In addition to higher wages and recognition of their union the men seek payment for lost time and return of five meat cutters reported by the strikers to have been dismissed last week for circulating a petition.

Two girls from the slicing floor who struck in sympathy Saturday left the plant and from their homes aided in preparation of food for their fellow-strikers.

DEATH BREATHES ON BOY; SLIDES BENEATH TRAIN

Hurled under a moving freight car when the sleigh on which he was riding down an embankment on the Canadian National Railway's right-of way in Calder upset about 3 p.m. Saturday, Gordon Bates, 11 year old son of Mr. and Mrs. William Bates, of Edmonton, had one foot badly crushed.

Playmates, who witnessed the accident, called Dr. A. R. Cameron who took the lad to the Royal Alexandra hospital in an ambulance. It was feared at first that it would be necessary to amputate the foot but Monday morning Dr. Cameron said that he hoped amputation would not be necessary.

HEALTHFUL!
tasty!
ENERGIZING!
fish

Vary your diet with the healthful, appetizing goodness of Canadian Fish and Shellfish. Serve Fish Foods more often during the week. Whatever form is most available to you...fresh, frozen, canned, smoked, pickled or dried...you will find it an easily digested food...rich in proteins, vitamins, minerals, iodine and other health-giving elements. You'll find its variety of flavour adaptable to countless simple and delicious recipes. And you'll find that Canadian Fish and Shellfish give you full value in sound nourishment for every cent spent.

DEPARTMENT of FISHERIES
OTTAWA

SALT FISH DE LUXE

1 1-lb. package of boneless cod or other Canadian salt fish freshened. [illegible]
½ cup of hot water 2 hard-boiled eggs
½ tsp. of pepper 1 tsp. of dry mustard

Flake freshened fish into pieces. Turn three-quarter cup of hot water in which fish was freshened, over fish, which has been placed on platter or shallow dish. Sprinkle with teaspoon of dry mustard and half teaspoon of pepper. Chop hard-boiled eggs over fish and dot generously with butter. Serve with tomato sauce.

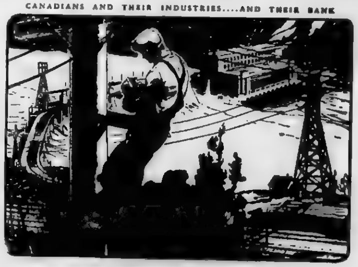
CANADIANS AND THEIR INDUSTRIES....AND THEIR BANK



· THE HYDRO-ELECTRIC INDUSTRY ·

Established long before the commercial use of electricity was even dreamed of, the Bank of Montreal has seen the hydro-electric industry rise from its infancy and has provided helpful financial service in every phase of the utilization of water power to industrial and domestic use.

With abundant snow and rainfall on the uplands, and ample reservoir capacity in numerous lakes, Canada is fortunate in having a reliable supply of water power within transmission distance of the principal industrial centres. Only one country, the United States, has a greater total of hydro-electric development.

More than three-quarters of the power equipment used in manufacturing industries in Canada is electric-driven. Seventy per cent. of Canadian homes, urban and rural, are equipped with this "modern servant."

Cheap hydro-electric power has been an important factor in the rapid development of the mining industry. It has been a deciding factor in the refining of base metals from Canadian mines, which only a few years ago was a monopoly of foreign countries. The use of water power has gone hand in hand also with the expansion of the great forest industries of Canada.

The production of hydro-electric power has advanced steadily since the recovery of 1933, reaching new high records each year. The per capita output is exceeded only by that of Norway, yet only one-sixth of the known available water power resources of Canada has been utilized.

Hydro-electric industries and their employees all over Canada find in the Bank of Montreal the convenient and helpful banking service they need.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CROSSED EYES

Children may be born with crossed eyes or develop them before the age of eight years, rarely after that age. In the past, parents were advised to do nothing about the condition until the child was about 14 years old because the eyes sometimes become straight. Modern science, however, has shown this to be very poor advice. The child does not use the eye that is turned and the delicate nerves in the back of the eye do not develop because the eye is not used. So in time the afflicted eye becomes blind. It is most important, therefore, that treatment be started as soon as the condition is recognized.

No child with crossed eyes should be allowed to reach school age without proper corrective treatment. A child with a squint suffers the jeers of his playmates and is sometimes regarded as mentally subnormal. The effect of this is harmful and the child may develop an inferiority complex.

If you think that your baby's eyes are not straight, seek the advice of your family doctor. Sometimes the bridge of the baby's nose is very wide so that more of the white of the eye is seen on the inside. This gives the appearance of squint although the eyes are straight.

The eyes, for proper examination, must be tested with drops which enlarge the pupils. The doctor will likely advise covering the good eye for a certain period each day so that the child will be forced to use the eye that is turned to develop its sight. Certain eye exercises will also help to develop vision. Sometimes glasses will straighten the eyes but if they do not become normal in six months, it is wise to have them straightened by a slight operation by a competent surgeon.

Crossed eyes can be cured and no child should be allowed to go through life suffering a tremendous handicap because medical advice was not sought to correct this condition.

Questions concerning health, addressed to the Canadian Medical Association, 184, College Street, Toronto, will be answered personally by letter.

THREE EVIL SISTERS

"Fluctuations in employment are tied to all other wasteful fluctuations in our mechanism of production and distribution. One of these wastes is speculation. In securities or commodities the volume of speculation, the wider become the upward and downward swings and the more certain the result that in the long run there will be more losses than gains in the underlying wealth of the community.

"And, as is now well known to all of us, the same net loss to society comes from reckless over production and monopolistic underproduction of natural and manufactured commodities.

"Overproduction, underproduction and speculation are three evil sisters who distill the troubles of unsound inflation and disastrous deflation. It is to the interest of the nation to have government help private enterprise to gain sound general price levels and to protect those levels from wide perilous fluctuation. . ."—From Roosevelt's Message to Congress, January 6th, 1937.

RUSSIA'S POPULATION ON THE INCREASE

A few years ago (1930—1) when Russia exported over 100 million bushels of wheat fear was felt that that country under the Soviet Union system of economy would flood the world with wheat and eventually drive competitors to a subordinate position in international trade. This has not happened due partly to increase in population, poorer crops and a change in the policy of the government whereby the people are better fed.

The Soviet authorities are now taking a census which is expected to be more thorough and complete than anything in the past. The Russian peasant, notoriously suspicious of the prying of census officials in the past, is being taught to co-operate on a more friendly basis. Indications are that the Russian population is increasing at the enormous rate of around three million a year, and that the total figures will approach the 180 million mark. With that large number of people and the remarkable annual increase it would appear unlikely that Russia will become an important factor in the international wheat trade in the future.

THE EVER NORMAL GRANARY

Canadians are watching with intense interest the experiment being conducted in the United States to iron out the wide fluctuations in prices and supplies on farm products. To overcome this the secretary of agriculture, Henry Wallace, is planning the "ever normal granary", to be established through governmental purchases, through commodity loans or through crop insurance. The surplus of wheat grown and other grains provided in good years will be stored to be available when bad years come along when the supplies will be available to the nation. The objective is a fair level of prices without violent fluctuations.

The consumers say that farmers have a definite duty to consumers to see that they are adequately fed no matter how severe the drouth or other unfortunate visitation may be. Furthermore, prices should not rise too much in times of drouth or there will be unrest in the cities. Farmers agree with this point of view, but also observe that if consumers are to be adequately fed in times of great national calamity it is also reasonable to ask that the public, through the government, protect farmers from ruinously low prices after several years of favourable weather.

There should be no conflict of interest between these groups of citizens. Both are interested in ironing out the wide fluctuations in supplies and prices which worked such a hardship on farmers and consumers alike. The "ever normal granary" will undertake to perform this service.

CANADIANS EAT LESS BREAD

Wheat bread is the cheapest food, all factors being considered, and usually its consumption increased during periods of hard times in the past. This was not the case during the depression period which started back in 1929.

Even in Canada the consumption of bread actually declined during the depression. James McAnsh, statistician of the Board of Grain Commissioners, produced evidence at the Turgeon Enquiry to show that Canada's population of nearly 11 million people consumed only 3.9 bushels a head in 1935, while in 1929 approximately 10 million people then living in Canada consumed almost one million more bushels of wheat than in 1935.

Between 1920 and 1935 the per capita consumption of wheat in Canada was fairly constant around 4 1-2 bushels annually. But the trend has since been steadily downward with 1935 making a new low of 3.9 bushels per capita.

The Canadian government is now advertising to promote a greater demand for Canadian wheat and flour in Great Britain. May be it would be a good thing to similarly endeavor to increase the consumption of Canada's main agricultural product within the boundaries of Canada.

WOMAN 101 TODAY BUT HOPES THIS IS LAST BIRTHDAY

Toronto, Feb. 8.—Mrs. Marty Atkinson is 101 today, but she said she hoped she would have no more birthdays. "I have lived long enough," she said.

Mrs. Atkinson was born in Edinburgh, came to Canada when she was 20.

"They put straw in the bottom of the street cars here to keep your feet warm," she recalled. "There was no running water in Toronto and we paid sixpence for five pails of water."

Mrs. Atkinson's two sons are dead. I have no one now," she said. There will be no birthday party.

"I'm through having bethdays. What is so wonderful about living to my age?" she asked.

OPPOSE ALLOWANCE FOR FORMER RULER

London, Feb. 10.—Labor members of the commons decided Wednesday to oppose granting former King Edward a civil list allowance.

At a special meeting, the Labor M.P.'s adopted, instead, a resolution favoring his "being provided for by the royal family."

The Labor members also advocated nationalization and the revenues from the duchies of Lancaster and Cornwall and suggested that a 'part' of these be given to the royal family.

The evening Standard asserted that because of Labor hostility in the commons to placing the abdicated monarch on the civil list—which would provide him with money directly from the government—the cabinet was considering a compromise whereby His Majesty the King would give Edward an income out of his own pocket.

NORTH MAIL MAN RECALLS FORD'S START

Grande Prairie, Feb. 10th.—Spinning along the road at seventy miles an hour in a sleek, eight cylinder car it is hard to remember—and sometimes convenient to forget—that you once crawled along at twenty-five in an old four cylinder model and really thought you were going places.

But W. L. Trotter, whose job it is to convey His Majesty's mail the 70 miles from Sturgeon Lake to Grande Prairie twice a week, by truck or sleigh, a wagon or what have you—rain or shine, through mud or snow; who must cross the Smoky river whether that treacherous stream of sudden changes is in full flood and has risen thirty feet during the night or whether it merely refuses to freeze over sufficiently for travel when ice jams the ferry—likes to remember when he helped Henry Ford turn out one-cylinder motors that were all the rage at that time.

Back in 1905 Mr. Trotter went to work for one Henry Ford, who had come to Detroit the year before from his farm in Lansing, Michigan, to operate a machine shop for the manufacture of one-cylinder motors for boats. And until 1910, the future world figure, with the aid of fifteen men, did just that, while he planned and watched for the opportunities that finally came his way.

He entered into partnership with one "Dodge" who had a patent for a clutch—and the famous Model T Ford was the result. The rest is history, even to the later dissolving of the partnership and the launching of newer cars by both Ford and Dodge.

"Mr. Ford was a fine man to work for," Mr. Trotter remembers. "We all liked him. He always was interested in farming problems and would talk about them any time. I think he liked farming better than the work he was doing, but it did not pay as well. "Never buy a threshing machine," he used to advise me when I mentioned an interest in farming. "I've got a few thousand dollars owing me in threshing bills I can't collect."

"We used to think some of his ideas for improving farming were far fetched, but we've found out since that he was right every time. He could see farther than the rest of us, all right," the mail man admitted with a smile.

ELEVEN PERISH WHEN AIRPLANE FALLS IN BAY

San Francisco, Feb. 10.—Without apparent sign that any of the 11 persons aboard were alive, a wrecked airliner plane was found early today five miles out in south San Francisco Bay, where it plunged last night at the end of a flight from Los Angeles. Patrol Boat No. 287 reported finding the twin-motored liner, its nose rammed into the bottom of the bay.

Eight feet of the plane's tail jutted out, but the cabin and pilot's compartment were submerged in 18 feet of water. Discovery of the illfated craft, which carried several persons prominent in the business and social life of San Francisco and Los Angeles, came more than five hours after it fell into the water.

A crowd of thousands on shore watched through the night as spotlights cut eerie paths on the surface, seeking the plane which apparently overshot Mills' Field here and went over the bay to circle back.

Prior to last night's accident, transport crashes in the west have killed 22 persons—Martin Johnson, the explorer, was one victim—in less than two months.

Over Belmont, only a few miles south of his destination, Pilot Thompson received radioed instructions to use the north-to-south runway at Mill's Field. Thompson, a minute later asked for use of the east-to-west runway and the dispatcher answered "yes."

When the big ship crossed the field and headed out into the bay, Despatcher Theodore Martin said he was "amazed."

"She came in from the south and then for some reason she circled around east and started back south." Neghirbon stated.

"The plane had no landing lights turned on.

"I saw her get lower and lower and said to another fellow, "She's going to hit... There was a big 'whom' where she struck and disappeared."

Word of the accident spread quickly and hundreds of automobiles jammed the bayshore highway bordering the airport. Many of the cars contained friends or relatives of those aboard the sunken plane.

Fire trucks were stationed along the seawall at the water's edge, and their batteries of huge lights illuminated the bay for several hundred yards from the shore.

Airport officials admitted they were mystified by the accident. Visibility was good, they said, and no other plane was in the air nearby to interfere with the landing.

High Lights and Low

The star on the theatrical stage stands in the brilliancy of spot light illumination; the political leader stands in the brilliancy created by countless votes; the athlete stands in a light created by the plaudits of a multitude. Yet for all of them, some day the light fades—even is extinguished. There are lights high and low of varying degrees for every individual in every walk of life, but for the great majority of us plain ordinary daylight suits us best. As long as life lasts within us, daylight recurs with unfailing regularity.

It is much the same in the realm of commercial affairs. Sometimes the lure of the city causes us to bask in the light of a "great bargain," but we find on sober reflection that the bargain light, like the spot light of the theatre, is purely artificial and magnifies and glorifies things out of all proportion to their true worth.

Every-day buying from your local stores, established to serve you, is, like daylight, safe, dependable and real.

Tofield Stores stand ready to supply you with almost all of your daily needs. Catchpenny schemes are almost unknown and you get value for your money—whatever you buy. Make 1937 a Tofield Trading Year You will be just as well off in the end.

THE MERCURY

GRAND PRAIRIE OIL PROSPECTING PLAN REVEALED

One of the biggest oil development programs in the history of the province was indicated Thursday when Hon. N. E. Tanner, minister of lands and mines announced that recent applications for prospectors' permits involve 200,000 acres of petroleum lands in various districts.

Grande Prairie region came into the picture in a big way when it was announced that one of the applications is for a permit covering 107,000 acres in the area southwest of that town extending to the Alberta border.

Adjacent to this area is an area of 80,000 acres which is covered by another application for a permit.

Location of the area described by the application for 107,000 acres is in townships 16 and 17, ranges 28, 29 and 30. Permit for the 80,000 acre block involves townships 62, 63, 64, 65 and 66.

Edmonton brokers reported that the flood of buying orders for oil stocks continued to grow and number of speculators was on the increase.

Applications for leases are being received by the department of lands and mines at the rate of 40 per day. The majority of these are from the southern part of the province.

Applications covering lands in the southern part of the province include one for 25,000 acres in the Coutts district near the international border. This is located in townships one and two range 17 and township one range 18.

Another application relates to oil development in the Nanton district where some 25,000 acres is covered by the permit. This is part of townships 62, 63, 64, 65 and 66 ranges 13 and 14.

The Jumping Pond district on the Elbow district west of Calgary, also is involved, one application concerning 22,000 acres in that region.

Area of some 22,000 acres in the High River area is covered by another application.

Owing to the activity in filings and applications for leases, besides payments of rentals, the land and mines branch at Calgary took in $18,000 last week.

When an application is granted for a prospector's permit, the applicant must commence operations within 90 days or the permit will automatically terminate. If the applicant goes ahead, the work must conform to the requirements of the department of lands and mines. When that is done the applicant has the right to take out oil leases.

CANMORE MAY EVACUATE ALL ITS RESIDENTS

CANMORE, Alta., Feb. 11.—People in the Horseshoe Island district here were still living in the second storeys of their homes today more than 56 hours after waters of the Bow River swept over the ice and flooded the low lying area.

More holes in the ice were blasted by dynamiting crews but they brought slight relief. Throughout the day there was little change in the water level.

If the warm weather continues and heavy snows along the watershed above the town it is thought likely the whole population of the district will be evacuated as a precautionary measure.

WORK HORSES OUST FARM MACHINERY

HELENA, Mont., Feb. 11.— The horse despite its appetite—is running machinery right off small farms in Montana, W. J. Butler, state veterinarian said today.

Farmers are finding it cheaper, he explains, to use work horses.

PLEASING OPERETTA PERFORMED HERE

On Friday and Saturday night, under the auspices of the Holy Trinity [illegible] a pleasing operetta was performed at the Variety Theatre.

The story though simple, was very [illegible] having to do with a lost [illegible] of the manor, a gypsy; a sea [illegible] and others. The little lad 12 [illegible] had drifted away in a [illegible] in charge of his nurse. [illegible] gypsies had rescued him and [illegible] far-off seas. The nurse [illegible] had fainted and had a [illegible] of wandering. Twelve years later she heard [illegible] the story and meet- [illegible] lady of the Manor, [illegible] fortunes promised [illegible] return. This was [illegible] the amazement [illegible] of all.

[illegible] costuming, singing and [illegible] very effective and provided a very pleasant evening's en- [illegible]

KINGMAN

* * * * * * * * *

Mr. Tom Gibson sawed the wood at the school house on Saturday afternoon.

Mr. and Mrs. Clarence Simonson were visitors to Wetaskiwin over the week end.

Miss Eloina Simonson spent Sunday with Marie Lawson of Kingman.

The young folks went out and visited Miss Mae Thompson last Sunday evening. It was in the nature of a surprise visit.

Miss Muriel Asp entertained the High School girls last Monday evening.

There will be a dance in the Kingman hall on Friday evening, Feb. 12.

The gymnastic club will have a program on Saturday evening. There will be no admission but they will sell candy and lunches.

Rev. Emil Erickson will hold services at the Lutheran church on Sunday, February 14th at 3 p.m.

The Best Way

Waiter: "How'll you have your eggs cooked?"

Customer: "Does it make any difference about the cost?"

Waiter: "No, you can have 'em any way. The customer is always right, here."

Customer: "Then cook 'em on top of a nice thick slice of ham."—Whitewright Sun

GOOD WORD FOR COWS

Agricultural College Employee Thinks They Are Smarter Than Horses

Take it from Miss Pearl Gardner of Cornell University's Agricultural School, the cow is not so dumb as her cud-chewing propensities have indicated. Five years of tests made with 72 horses, 48 cows and 11 sheep have convinced Miss Gardner that the cow is smarter than the horse and the sheep Dobbin's mental equal. "Cows" she told the American association for the advancement of science "catch on quicker remember better." The horse has gained his reputation for intelligence because of the fact that he trusts man far more than any other barnyard animal. Miss Gardner found no difficulty in teaching sheep to do tricks such as taking a handkerchief out of her pocket rolling a barrel and shaking hands "just as easily as a horse. So now we may be expected to extoll "cow sense" as the ideal of solid thinking. —Detroit Saturday Night.

THE OLIVER STANDARD "70"

Here's How the "70" Earns More Money the Year Around

There's no end to what the smooth-running, easy-handling, powerful Oliver "70" does for you. The more work you give it, the more money it makes you month after month.

On drawbar jobs, the "70" pulls two 14-inch plows at 3½ to 4½ miles per hour in average soil. It harrows, drills and plants at high speed, too. With power take-off, plenty of power is provided for a two-row corn picker-husker, small combine, grain or row binder, pick-up hay baler, potato digger or power sprayer. On the belt, the "70" is just right for driving a 22 x 36 thresher, for shredding or shelling corn, hammer milling, filling silos and sawing wood. Efficient six-cylinder power means a saving of fuel on every job, and it makes every job lighter. Choose either the "70" HC (high compression) for regular gasoline, or the "70" KD for kerosene or distillate. The same money-saving, money-making operation is yours. Come in and get all the facts about this great tractor today.

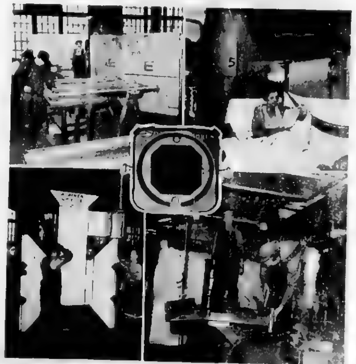
Sunburst Motor Coaches Ltd.

Canadian Pacific Extends Air-Conditioned Service



The Canadian Pacific Railway Angus Shops at Montreal are humming with activity these days as the Company continues its comprehensive programme of air-conditioning. In the current year, air-conditioning equipment will be added to 136 cars, including standard sleepers, dining cars, tourist sleepers, parlor cars, and day coaches, and these, in addition to the 130 cars air-conditioned in 1936, will permit a very considerable extension of air-conditioned services throughout the Dominion.

Provision is made by the 1937 programme to provide air-conditioned dining cars on all trains carrying air-conditioned sleepers or parlor cars, besides additional sleeping and parlor cars for use on trains between Montreal and Quebec, Montreal and Ottawa, Toronto and Ottawa, and trains 39 and 40 between Montreal and Saint John, N.B. Air-conditioning of tourist cars for use on the transcontinental trains between Vancouver and Montreal and Toronto is a new and interesting feature of the 1937 programme. This will supplement last year's services which allowed air-conditioned standard sleepers, compartment lounge, bedroom and parlor cars to be used on transcontinental trains between Montreal, Toronto, and Vancouver; the Montreal, Toronto, Hamilton, Chicago services; and the night trains between Montreal and Boston. Air-conditioned sleepers and lounge cars were also provided for the "Mountaineer" service between Chicago, St. Paul, and Vancouver.

Some idea of the work connected with air-conditioning is given by the pictures above. A car is stripped, as in lower right, and insulated to keep out heat, cold and dust. The pictures at the left show some of the units being placed in the cars. The satisfaction written all over the face of the young lady, in [illegible] expresses the public's feeling toward this new type of controlled comfort. In the centre is a close-up of the control equipment, by which, as the arrows indicate, the individual can regulate the volume and direction of the flow of air.

DOCTOR BAIN VISITS TOFIELD

Doctor Charles Bain, who is now living in the State of Washington, U.S.A. visited Tofield on Friday last, but was only able to stay 24 hours. He was on a return trip from the Maritimes where he had journeyed to attend the funeral of his father. Dr. Bain who is now surgeon for a clinic is well known here, having practised here some twelve years ago. Those Tofielders whom he met were very pleased to see him again and were sorry his stay was not longer.

The doctor casually mentioned that should anyone have a troubled conscience over the money owing him, payment could still be made.

WORLD'S DAY OF PRAYER OBSERVED

The World's Day of Prayer was observed here last Friday at a service held in the Holy Trinity Church. The service was led by Mrs. J. W. Robinson. Others taking part were (Rev.) Mrs. Allan and Mrs. Swift of the United Church and (Rev.) Mrs. Wallis and Mesdames Bailey and Baptist of the Anglican Church. The organist was Mrs. G. McCarthy.

Born: To Mr. and Mrs. W. H. [illegible] of Cardston, Alta, on February [illegible] a son. Mrs. Hayne was the former Miss (Bessie) Marian Carter.

KETCHAMOOT

* * * * * * * * * *

Mrs. Davison entertained the Ladies' Aid at her home Wednesday, 3. In spite of very cold weather there was a splendid attendance. The next meeting will be held at the home of Mrs. Minnie McConnell of [illegible] district.

Mr. and Mrs. Schultz, Mr. and Mrs. I. H. Ingram were among the passengers to Edmonton on Friday of last week.

Mr. and Mrs. Wm. Ingram, Mr. and Mrs. Les. Orckdson were Sunday guests at the Nomeland home.

Mr. A. Coombes, Miss Ethel and Harold motored to the city Wednesday of last week.

Miss Jackie Lindsay and pupils put on a Valentine party at the school on Friday afternoon.

Miss Hazel Sears is visiting friends and relatives in the city.

Mrs. Johnnie Lee entertained the Social Hour club at her home Thursday afternoon of last week. A goodly crowd was present and all reported a pleasant afternoon.

Miss Margaret Mitchell visited Miss Elsie Carlisle Tuesday afternoon.

Roy Whillans spent Friday and Saturday in Edmonton.

Mr. Roger Ray took grist to mill at Camrose one day last week.

Mr. and Mrs. Roy Lee and children, Misses Nellie Lindsay and Signa Walker were Sunday guests of Mr. and Mrs. C. A. Ingram.

Mr. and Mrs. Schmitz and four children of the Farmington district returned home Sunday after spending the winter months in U.S.A. Mr. Angus Mitchell stayed at their home and looked after the stock.

Mrs. O. Barnes, Mrs. Ralph Barnes and sons are the latest victims of the flu.

[illegible] flu, measles, whooping cough, pink eye and what have you, put a stop to all social activities the two weeks of absence of the Ketchamoot budget.

WHEAT POOL SHOWS PICTURES

Quite a large number turned out to the story of wheat picture at the Variety theatre on Wednesday afternoon [illegible] by the Alberta Wheat Pool. In addition to some very [illegible] instructive picture [illegible], Mr. F. A. Moen and another gentleman spoke on Wheat Pool matters.

COMMUNICATION

* * * * * * * * * *

Dear Editor:—

Being of the disposition that likes a fight if it is "just talk about it fight" I decided this week to pick a fight with the editor, re his remarks about the big grader, purchased by the Cornhill Municipality, in the week before last issue of The Mercury.

The figures given to show more "labour applied to taxes" in 1936 than in 1935 do not show how much was applied to payment of taxes [illegible] only the Public Works outlay [illegible] besides according to the audit, even those figures, a smaller [illegible] of moneys received to the general revenue of the Municipality was applied to labour in 1936 than in 1935, for the net general revenue in 1936 is more than $8000 greater than in 1935.

The amount of money spent for labour is no indication of the amount or utility of work done (dirt moved etc.) for labour may be just waste of time or worse. I can point [illegible] places where road work has been detriment to public welfare. Does the mass movement of dirt in this Municipality by the "big grader," create wealth or filth? We certainly have less miles of road work done than in past years and must decide whether more miles of the old standard or less miles of the grader standard are of the greater utility to us.

Over 4000 gallons of gasoline were used, the value of which went out of the district, except the local dealers small commission, part of the labour was also from out of district with its accompanying loss of trade to the business of the municipality.

While in normal times the purchase of the "big grader" may have been justified, in the worst depression in history, it seems to me to be entirely unjustified. When a ratepayer is allowed to work out part of his taxes on the road "that part" is practically a tax of so many days work each year, but when the price of the ratepayers production drops to about twenty per cent of normal times as it was last year when the big grader was purchased to compel him to pay in cash is equivalent to raising that part of the ratepayers taxes fifty per cent. And in depression times, a crying shame.

The above are some of the factors that should be considered in deciding the value, negative or positive of the big grader (elevating grader).

Thanks Editor,

GEO. G. ABERNETHY

SOCIAL CREDIT ZONE MEETING HELD LAST THURSDAY

On Thursday of last week a Social Credit meeting was held at the Variety Theatre. This was a zone meeting, members from various groups meeting together for mutual benefit. The public was also invited and a very good turn out resulted.

Dr. McPherson M.L.A. and Mr. McDonald addressed the gathering along Social Credit lines, urging continued confidence in the government, which, he said, was trying to solve the problems confronting it.

GREENFEED YIELDS TO OTHER FORAGES

Editors Note: By special request we are publishing three Experimental farm articles together. The articles are inter-related and are best understood when read together. They are from the Lacombe Experimental farm and should prove interesting and beneficial to farmers of this district.

Article One

Green oat sheaves have long been the staple roughage for live stock in the west, but their supremacy is now being challenged by grass and legume crops.

Oat greenfeed has its good points, but it also has a number of undeniable weaknesses. It takes almost as much out of the soil as an ordinary grain crop and it is about the most expensive roughage grown. Then too, greenfeed is lacking in protein and minerals, as a feed for live stock.

A report from the Dominion Experimental Station, Lacombe, states that grasses and legumes, in the proper mixtures are the best possible roughage for stock, grasses being comparitively high in mineral matter, and legumes high in protein. When legumes are fed the use of high priced commercial protein supplements is unnecessary.

Thus, besides being much cheaper to grow than greenfeed, grasses and legumes balance a ration much more effectively, thus proving more economical feed.

Farmers living near cities usually find a ready market for good hay. Wherever big dairy herds are maintained, or sheep or beef cattle are fed in large numbers there is usually a shortage of hay. This opens a very profitable outlet for surplus forage crops.

In the next news letter issued by the Lacombe Station, the merits of grass and legume mixtures for improving fertility and increasing the fibre in the soil will be discussed.

GRASSES, LEGUMES BOOST FERTILITY

Article No. 2

It is common knowledge that on thousands of farms in Alberta the soil is worn out from following a continuous rotation of grain interspersed with summerfallow. In a few more years, if this condition is further aggravated by adhering to the old system of farming, much of the land that has not actually left home will be covered with nothing but the weeds that grow on barren ground.

The question is: How can this land be restored to its normal ability to produce good crops?

And the answer is: Through the intelligent use of grasses, to increase the fibre content, and of legumes and in some cases fertilizers restore fertility.

This does not apply to the short grass prairie where the problem is much more complex and where the difficulties to be surrounded are vastly greater; but in the park belt and transitional prairie belt, this problem may be solved by the use of forage crops.

Rotation experiments conducted at the Dominion Experimental Station, Lacombe, have shown that in years of reasonable rainfall wheat seeded after sweet clover will produce as good yields as wheat after summer-fallow. Why not take advantage of the extra profit from the forage crop?

Each year, more and more farmers are realizing their precarious predicament. As a result, more grass and legume crops are being included in farm rotations and the yielding ability of this land is being restored, while weeds are being held in check.

Hay Mixtures Recommended

Experience has shown that, in order to secure the best stand possible under current weather conditions, it is wise to seed mixtures of grasses and legumes. Such mixtures increase both the fertility and the fibre content of the soil, and produce hay which is relished by live stock.

For meadows to be left down for only one year, the Lacombe Station recommends the following 15 lb. sweet clover; or 15 lb. sweet clover, 4 lb. timothy; or 10 lb. sweet clover, 8 lb. rye grass.

For meadows to be used for two years a mixture of 10 lb. sweet clover, 3 lb. timothy and 5 lb. rye grass is very suitable.

For meadows to be left down for three years or longer: 12 lb. alfalfa; or 8 lb. alfalfa, 2 lb. timothy, 5 lb. rye grass; or 8 lb. alfalfa, 4 lb. timothy, or 8 lb. alfalfa, 8 lb. brome grass.

Special mixtures are recommended for low, wet places or wet districts. Where the land is not flooded for more than a week or ten days in the spring a mixture of 4 lb. each of timothy, red clover and alsike clover may be used. But where it is under water for a considerable time each year, 2 lb. timothy, 2 lb. red top and 4 lb. alsike will produce better results.

Article Three
METHODS OF SEEDING HAY & PASTURES

According to popular opinion, there is a great deal of luck in establishing good stands of grasses or legumes. This idea which arises from the fact that in the past these crops were seeded in a haphazard manner, is absolutely incorrect.

According to the Dominion Experimental Station, Lacombe, forage crops can be grown anywhere that cereal crops will grow. However, it is necessary to use a crop adapted to the conditions, and to seed it in a way that will give it an opportunity to prove its worth.

On the prairie, where rainfall is very limited, it is best to stubble in the grass and legume seed, without a nurse crop, either in the late fall or the early spring.

On the gray bush soils, where moisture is abundant, they may be grown with a nurse crop. On this poor soil, without a nurse crop, either in the late fall or the early spring.

In the park belt, the Lacombe Station recommends seeding without nurse crop. On rich soil, so-called nurse crops are actually often the strangle crops, growing so rank that they rob the tiny seedlings of the moisture, plant food and light which they require.

In order to secure a good seed bed, the land is disked or cultivated in the late fall or early spring and then left until late in May when it is ploughed. Next, it is worked down into a fine seed bed, and harrowed weekly until the third week in June when, after a thorough packing, the grass or legume seed is sown.

How to Seed

The easiest method of sowing the fine seeds is by means of a grass seeder attachment on the grain drill; but where only small acreages are grown this attachment is not essential. Seeds of brome, crested wheat and rye grass are too coarse to be handled with the grass seeder attachment.

For stands of only a few acres, the seed may be broadcast. Then the land is packed or, if no packer is available, given a couple of strokes with the diamond harrow, turned upside down, so that the seed is covered, but not buried more than one inch deep.

For larger stands, and for the coarse-seeded grass the seed may be sown through the grain drill, by mixing the small seeds with material which will carry them through the runs without clogging.

For this purpose, one may use wheat that has been heated in an oven or run through a crusher so adjusted that it will merely break up the kernels to kill germination. The amount of grass seed to be sown per acre is thoroughly mixed with one-half bushel of wheat thus treated. Then if the drill is set to sow approximately three pecks of wheat per acre the grass and legume seeds will be sown at the proper rate.

Don't "Bury" Seed

If the land is packed until it is quite firm and all the pressure is taken off the drill the seed will be planted at the proper depth. When it is found that the drill is laying the seed more than an inch deep stop seeding and pack the land again before completing seeding. Grass and legume seeds buried too deep are wasted as the seedlings are smothered before they can reach the surface.

STATE CONTROL IN BRITAIN

"British freedom" is a phrase that has frequently been flung about in Western Canada when state interference with economic affairs and private trade was being discussed. Actually, however, Great Britain has abandoned the doctrine of "laissez-faire" and rugged individualism, and today is further along the road to government control than either the United States or Canada.

Professor Comstock of Mount Holyoke College, Massachusetts, who has made a study of recent trends in Great Britain, contributed an article to Barron's Weekly not long ago, which related some of the ways in which the British government has taken over control from private interests. He mentions that the United Kingdom is not bothered by questions of constitutionality. Lacking a written constitution, acts passed by parliament are the law of the land until rescinded.

Through agricultural marketing schemes Great Britain is remedying a deep-set defect in her national economy, the weakness of farming. The problem as Great Britain sees it is a mistaken emphasis on industry rather than agriculture. The British government is using the controls to make farming profitable, whatever the cost to the exchequer and the consumer may be.—Wheat Pool Budget.

High Lights and Low

The star on the theatrical stage stands in the brilliancy of spot light illumination; the political leader stands in the brilliancy created by countless votes; the athlete stands in a light created by the plaudits of a multitude. Yet for all of them, some day the light fades—even is extinguished. There are lights high and low of varying degrees for every individual in every walk of life, but for the great majority of us plain ordinary daylight suits us best. As long as life lasts within us, daylight recurs with unfailing regularity.

It is much the same in the realm of commercial affairs. Sometimes the lure of the city causes us to bask in the light of a "great bargain," but we find on sober reflection that the bargain light, like the spot light of the theatre, is purely artificial and magnifies and glorifies things out of all proportion to their true worth.

Every-day buying from your local stores, established to serve you, is, like daylight, safe, dependable and real.

Tofield Stores stand ready to supply you with almost all of your daily needs. Catchpenny schemes are almost unknown and you get value for your money—whatever you buy. Make 1937 a Tofield Trading Year. You will be just as well off in the end.

THE MERCURY

Any day a FISH DAY

A Healthful, Tasty and Economical Food for Any Day in the Week

TUESDAY, Wednesday, Thursday or Friday . . . any day can be Fish Day . . . when you realize just how healthful, tasty and economical Canadian Fish and Shellfish can be. Healthy, because of their rich store of proteins, vitamins and minerals, iodine and other elements. Tasty, because of their easily digested and finely-flavoured meat. Economical, because Fish gives you full value in nourishment for every cent spent.

Serve Canadian Fish and Shellfish more often. Whatever way is most convenient . . . fresh, frozen, canned, smoked, pickled or dried . . . you get nourishment in its most delightful form . . . in prime condition from sea, lake or river, to your table.

ANY DAY A FISH DAY

THAT BIG GRADER—

NOT ONLY the Cornhill Municipal Council but the Mercury also has come in for some criticism concerning the big grader. The Council for purchasing it, the Mercury for apparently endorsing the purchase. Actually our endorsation was very much of the proviso kind, saying in effect that while the immediate effect of the purchase might not be beneficial to all ratepayers, we were of the opinion that the ultimate effect would be. Only time can tell whether we were right or wrong. Neither were we holding any brief for the Council, they would likely resent that. A very common thing that one runs up against nowadays, is partizanship; it seems that one must either be wholly for a thing or wholly against it. But there are, of course, other ways of approaching a question, ways in which the ability to appraise, analyse and study a situation is used. When this ability is exercised it is rarely found that any one thing is all good or all bad.

It was somewhat along these lines that we viewed the purchase of the grader. We took it for granted that before the purchase was made there was full investigation as to its ability to do better work, more work and cheaper work than was done previously. If it doesn't do these things it was a poor buy and the question can be considered closed. If it does the above mentioned things, the question then to consider is whether it fits into the economic set up of the municipality; viz: wheher there is work for it to do and whether in doing the work, it unduly disturbs the pre-existing balance as between ratepayers and municipality as regards roadwork. As to work for it to do, that goes without question, as while there are plenty of road miles where it would be extremely difficult to use it, if it could be used at all, there are also plenty of road miles where it could be used. The next question is not so easy. It has been the general practice for a number of ratepayers to work out a portion of their taxes. They have the time, they have the horse-power and it is a convenient way of paying taxes. The practice is a genuine example of using your own credit. Will using the big grader put a stop to this, forcing farmers to pay out in cash, what they have hitherto paid out in labor? To a considerable extent it undoubtedly will and for the time being at least, those men will be the "victims" of a new economy. But in the long run, what? One of the features of ratepayer constructed roads is that generally speaking, they are not permanent. There are exceptions of course, but frequently the grade is not high enough and work done one year has to be done all over again a year or so hence. In contrast, work done by the grader is of a more or less permanent nature. Instead of the grade being too low, grades made by it so far, are too high. At least the north road is reported to be so. But in time these will settle and widen into a fairly permanent road which with a reasonable amount of dragging could be kept in a good surface condition. Thus would be eliminated the repeated grading of stretches of road. This in turn, as the years passed would mean less money needed for that particular road work, and if assessments were correlated to municipal expenditures in given areas, the "victims" to-day of the new economy would be the "beneficiaries" of tomorrow, for with their roads built and presumably paid for, there would be neither work for them to do or for this purpose, money for them to pay.

We would like to state here that the above is chiefly theory, as regards the practical side of road work we are quite ignorant. We view the installation in the light of something to increase out-put and reduce costs, and viewed in this light the problem is pretty much the same whether it is a show case for a store, a piece of farm equipment for a farm or a grader for a municipality.

In our previous treatment of this subject, we stated that "cost per mile" was one standard by which the grader should be judged. We learn that the cost per mile of road work done by the grader last summer was around $287.00. Whether this is high or low we do not know as we have no figures on other methods of construction. And even if we had there is the "amount of dirt" and "length of life" to be considered. Finally we neither endorse or condemn the purchase. Looking at the question strictly from an economic view point, we believe it to be too early to do either.

"COMING OUR WAY"

"THINGS ARE coming our way." So it must have seemed to an Arkansas farmer and a New Jersey motorist who figure in current news dispatches. J. D. Griggs of Jonesboro, Ark., awoke the other morning and found a brand new house on his farm. The Mississippi flood had deposited it there during the night.

In Irvington, N. J. Izzy Milkofsky started out with one auto and had two when he stopped. In the mirror over his windshield he saw a darkened car following him at close range. Finally stopping to investigate he found that when he pulled out of a parking place he had unwittingly kidnaped another car whose front bumper had become locked with his rear one.

Which only goes to show—if a moral MUST be drawn—that while we go dutifully about our own business, things may be coming our way if we don't immediately realize it.—Christian Science Monitor.

THE WORLD OF WHEAT

* * * * * * * * *

By H.G.L. Strange

A new variety of wheat is out; Garnet, ten days earlier than Marquis!

This was the news that passed from farmer to farmer in 1926 in the northern country of Alberta and Saskatchewan, where Marquis was being caught by early frosts.

Thousands of bushels of Garnet were issued that first year. Last year three million acres were seeded to the new variety.

Selected and distributed by Dr. L. H. Newman and his associates at the Dominion Experimental Farm, Ottawa, the result of a cross between Preston and Riga, made by Charles Saunders in 1905, ten days earlier and somewhat higher yielding than Marquis, almost completely resistant to stinking smut or bunt, and throwing a bright and red kernel, Garnet soon became a great favourite with northern farmers.

Unfortunately, its milling value is different from Marquis. Canadian millers objected to it. There were a few complaints from abroad, so Garnet was placed into special Garnet grades, or degraded to No. 3 Northern.

Yet the world's millers today pay relatively high for Garnet; and pay for No. 3 Northern, which is heavily loaded with Garnet, a higher price in comparison with No. 1 Northern than almost ever before recorded.

Following factors have tended to raise price: Spain purchases Argentine, Australian and Danubian wheat—Drop in official Argentine corn acreage figures—Dust storms in U.S. southwest—Sweden reduced import duties on oats—Estimated exportable surplus of rice from Saigon, Burma and Siam smaller than 1936 shipment by one million tons.

Following factors have tended to lower price: Rains benefit Argentine corn; possibly record crop—India receives general beneficial rains—U.S. longshore strike affects Vancouver grain bookings—Rain fall in time to prevent corn crop deterioration in South Africa—Rains in south and snow in north improve condition Chinese wheat crop.

RAILWAY AND MEN ON FRIENDLY TERMS

OTTAWA, Ont. February, 15.—The clerical and other classes of employees of the Canadian National Railways represented before the Board have put forward no valid reasons why the railway should at this time discontinue the existing deduction of ten per cent from the basic rates of pay. This was the contention of the Canadian National Railways, represented by A. J. Hills, Chief of Personnel, in a statement submitted to the Board of Conciliation and Investigation here today in rebuttal of the brief submitted to the Board by the representatives of these employees last week. The Board consists of His Honour Judge F. L. Smiley, Chairman; W. Sanford Evans, nominee of the railway and Howard S. Ross, K.C., nominee of the employees.

The statement pointed out that there exists between the management of the railway and the employees generally, including those represented at the present hearing, a very fine feeling toward each other, and while there were sometimes differences of opinion such as those which exist with respect to the removal of the wage deduction, which in this case was a matter of degree or speed as the railways admit that the deduction is of a temporary nature, such differences did not impair the goodwill which years of friendly relations had built up.

The railway's statement replied specifically to eight arguments which had been presented by the representatives of the men. Dealing with the employees' contention that the wage rates of the employees represented before the Board were low, the railway pointed out that many of the employees occupied junior positions, or positions designed for juniors as well as positions entailing but little responsibility and requiring but little training. The wage rate of these employees, it was contended, was adequate considering the duties they were called upon to perform. The average cash rate of other employees in the group, such as clerical forces, was $280.00 per year higher than the average compensation of employees in manufacturing industry in Canada.

The employees in their brief had presented statistics and quoted various authorities to prove a very considerable degree of business recovery in Canada. The railway admitted there had been a substantial improvement since the depth of the depression in 1933 but submitted "that such improvement as has been made in business conditions generally has not as yet been fully reflected in railway operating revenues."

"The railway has already returned the employees one-third of the deduction that was effective during the depth of the depression," the statement continues. "Despite the fact that railway operating revenues have returned toward normal by considerably less than one-third."

Commenting on the optimistic opinions from various authorities quoted by the employees, the statement continues: "The railway also believes that the future may be looked upon with some degree of restrained optimism, but that upon the degree of recovery experienced so far there is no justification for cancelling the 10 per cent deduction from basic rates."

The statement declares that according to the history of previous wage adjustments the groups of employees represented before the present Board have obtained generally the same treatment as other classes of employees, and continues: "It is obviously impossible for the railway to treat these employees any better than employees performing comparable service and obtaining similar compensation who are involved in the dispute which was before the other Board. That has been the position of the railway in previous wage adjustments and it is impossible to depart from that policy."

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

OBEDIENCE

"Doctor, what can I do with my child? He simply refuses to obey me. He won't do a thing I tell him to."

Such questions are asked frequently in every doctor's office, and sometimes it is difficult to explain to parents the real meaning of obedience and discipline. So many parents feel that their children should "mind" every time a command is given, regardless of circumstances. Such an attitude is bound to bring trouble,—for healthy children are too intelligent, too active and too interested in their activity to do this all the time. The habit of absolute and unquestioning obedience is taught only at the cost of habits of independence, initiative and responsibility.

It is a fact that many commands given by parents are unnecessary. Sometimes they are not even sensible. It is useless for an irate father to keep on commanding his child to "be still" or to "keep quiet". A young and active body cannot do this for more than a few minutes. Constant nagging is not understood by the child and may be downright harmful.

Spanking, bribery, threatening, scaring the child, or arguing with him are not wise methods to use in controlling the situation. A shouting and bullying father may instil fear for the moment, but he will never command confidence and respect.

Good discipline is best developed through the establishment of a regular routine. Such procedures as dressing, washing, eating and going to bed need never become an issue in the household where a definite and consistent routine exists. In this way control becomes a question of conforming to definite rules in the home rather than a "battle of wills" between parent and child.

Give only a few commands—the absolute necessary ones—and mean every command. If you don't care much whether your child obeys you or not, then your child will soon learn not to care also. But you must be sure the child understands exactly what you want. Speak quietly and in clear and simple language. Leave no doubt that you expect obedience and then make sure that you get it.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

ENGLISH OAKS FOR THE U.S.

English oaks, from acorns from ancient trees on historic English estates will soon be growing in the United States. In response to a request from the United States Department of Agriculture received through the Boy Scouts of America, English Boy Scouts gathered acorns from 17 old estates closely linked with English history, and these have been forwarded by the International Scout Bureau at London. The estates included Windsor Great Park, the home of the King, those of Princess Royal, and the Dukes of Norfolk, Portland, Newcastle, Devonshire and Rutland. Acorns also were sent from the forests associated with Robin Hood and the poet Byron.

CANADA'S CARRYOVER WILL BE LOW

Canadian exports up to the end of January totalled 148,488,000 bushels of wheat or 18,000,000 bushels greater than last year. The Dominion had only 119,000,000 bushels available for export and carryover at the end of January, and it is quite possible that the carryover will be down to 25,000,000 bushels on July 31st. Canadian visible supplies at the end of last week totalled 97,796,951 bushels, the smallest since August, 1930.

THE TRUTH ABOUT CANUS WHEAT

By K. W. Neatby, Department of Field Crops, University of Alberta.

During the past two months glowing accounts of the merits of Canus wheat have appeared in the Canadian and the American press. These reports contained several erroneous statements and, generally speaking, gave a grossly exaggerated account of the virtues of this variety. They were not authorized by the Department of Field Crops, despite the fact that the name of the head of the department was associated with them. Naturally the Department of Field Crops has been "swamped" with inquiries and requests for seed. This leaflet is being distributed to correct the misstatements so widely published, and to lighten the burden of correspondence.

Canus is a hard red spring wheat selected from the cross MarquisX Kanred. This cross was made at the University of Minnesota about twenty years ago. When Dr. O. S. Aamodt came to the University in 1928, he brought several MarquisXKanred strains with him and subjected them to comparative trials. One strain, subsequently named Canus, proved to be highly resistant to the strains of the stinking smut organism commonly found in Canada; it displayed some resistance to certain forms of root-rot and appeared to possess a moderate degree of drought resistance.

The baking quality of Canus has been held in question by Canadian cereal chemists. However, the results of extensive milling and baking tests indicate that the defects are not serious and Canus is considered equal to Marquis for purpose of commercial grading.

Small lots of Canus were distributed to eight farmers in the spring of 1935. No further distribution was undertaken in 1936. The reports received to date are, generally speaking, favorable and in the opinion of the officials of this Department, justify further distribution of seed in 1937. The supply of seed, however, is limited and will be delivered to farmers in the relatively dry areas of Alberta. The Department is not yet recommending Canus. If the 1937 results are entirely satisfactory, it will be more widely distributed in the dry sections of the open plains in 1938.

Transforming Mountain Waters & Electricity For a Prairie People's Needs.
CALGARY POWER COMPANY LIMITED

'Province-Wide!' A POWER SYSTEM that Assures Many Advantages Otherwise Unavailable —

A PROVINCE-WIDE power system makes dependable Electrical Service available at a lower cost than would otherwise be possible, particularly to the smaller communities.

Rates throughout the Province are stabilized so that adverse local conditions do not necessitate increased local charges in an effort to maintain continuous service.

The technical services of our experienced efficiency-minded engineering staff is available to present and prospective consumers.

New industries and developments are assured of a supply of energy immediately available for their electrical needs. The growing demands of a community are anticipated and provided for in advance by reserve capacity of generating plants, substations and transmission lines.

LOCAL & PERSONAL

Mrs. Jobb is visiting with her daughter, Mrs. McColl, of Neilberg, Saskatchewan.

Mrs. Bertha Seale, Miriam and Mrs W. E. Seale spent the week end with Mr. and Mrs Googlein.

Mr. J. D Hannan of Camrose was a visitor in Tofield for a few days last week

Les Glover is playing hockey with the Irma team in the Black Cup Competition. Irma played the Bush Mine team at Irma on Wednesday and won by the score of 4—1. They meet again at Edmonton on Saturday

Miss Marie Scott of Camrose spent Friday at her home here.

Mr. and Mrs. Chapman spent the week end in Edmonton

Miss Eva Trepanier of Edmonton spent the week end visiting with Miss Jerry Thomlinson

Mr. and Mrs. Wallis spent a few days in the city this week.

Mr. and Mrs. Provost and son and Miss Aileen Allan from Edmonton visited at the Allan home over the week end

Miss G. Hennessy of Viking is visiting Mr. and Mrs. H. Green.

Miss Betty McCarthy is visiting friends in Viking for a short time.

Mrs. Ray Coatta is spending a few days in Edmonton

Mr. Geo. B. Brace was a visitor to Edmonton for a few days this week.

The Jolly Twelve Bridge Club met at the home of Mrs. Coatta on Wednesday evening. Honors were won by Mrs Wallis and Mrs Regure.

Donald Beirnes journeyed to Hardisty last week where he played with the Hardisty junior hockey team. He will later play in the Alberta Playdowns with that team.

LINDBROOK

The dance given last Friday evening at the school by the ladies of the L.C.C. was a decided success, quite a large number attending. Music was supplied by Messrs S. Smith, C. Lindgren, H. Tucker and Mr Druce and was well received, evidently being the kind that's liked. Mr. Chas. Mordon acted as M.C. A dainty lunch was served in the interval and after the dance, what was left of the cakes were auctioned off, so both socially and financially it was O.K., so, come again ladies!

Congratulations to Mr. and Mrs. B. Trainor on the birth of a baby girl, born right here in Lindbrook. Both mother and baby are doing fine.

Divine Service was held on Sunday at the School here and was pretty well attended. Rev. A. Wallis of Tofield Anglican Church conducted the service

Mr. F. Evans is home again from his sojourn in the Military hospital, Edmonton

The young folks have had lots of fun with their Valentines this year and so, we believe, have a few of the older folks too.

The sympathy of the district is extended to our friend and neighbor, Mr. Arthur Tucker on the death of his mother, Mrs. Tucker of Tofield, who was known and liked personally by many here

KINGMAN

Rev. Haverstein will hold services at the Lutheran church Sunday afternoon at 2:30.

Mr. and Mrs. Mike Fugium and Kathleen Berlin were supper guests at the J. T. Regness home.

Miss Mildred Fleming visited with Bernice Asp last Friday afternoon.

Mr. Helmsten was in town calling on several of his friends last Wednesday

Mrs. J. T. Regness, Mrs. Alex Asp and Mrs. Eric Erickson visited Mrs. Habett last Thursday.

Mr. Herbert Asp has gone to New Norway for a few days.

Mrs. Regness, the postmistress is ill with the flu. Miss Mabel Simonson is helping at the post office.

The Candy Social which was held by the Gymnastic Club was well attended and they had a very good program. The club realized twenty-four dollars.

Mr. Peter Rodnunsky of Edmonton is in town for a few days looking after his store.

Mr. and Mrs. Elmer Schmidt and family have returned home after a two month's visit in the United States.

About twenty-five people visited Edmonton last Friday.

LAKESHORE

Miss Jean Burrel of Edmonton is helping at the Joe Jones home.

Miss Mildred Graham and Miss Jean Burrel were Sunday evening visitors at the R. H. Phillips home

Mr. L. H. Graham was a visitor to Edmonton last week.

The Lakeshore school opened on Monday after being closed for three weeks

Mrs. Mel Wood entertained a number of the ladies of this district on Tuesday. Bridge was the order of the day.

JOHN DEERE COMPANY TO SHOW PICTURES

On Thursday, March 4th, the John Deere Company in conjunction with M. C. Hammond the local dealer, will show some interesting talking pictures. These pictures have an interesting story base as well as being instructive. Farmers are especially invited to bring their wives, sons and daughters. There will be two shows, one at 1:30 for farm families and one at 4:00 p.m. for townspeople and local school students. Admission is by ticket only. If you have not received a ticket get in touch with M. C. Hammond.

HIGH SCHOOL TEAM DEFEATED BY RYLEY

An interesting match of the national game was played at the local rink on Monday night, Ryley High School furnishing the opposition to the local High School team.

This is the first time a Ryley team of any kind for quite a few years have played on local ice and it was interesting to see the team all decked out in bright red and white uniforms. On the night's play Ryley had a little edge but not enough to make the game uninteresting. At all times the locals were "in the game" and for short periods were actually setting the pace. The final score 2-1 is a fair indication of the play.

TOWN COUNCIL MEETING

A regular meeting of the town council was held on Monday evening, February 15th. Mayor W. C. Swift and Councillors Lovell, Bellamy, and Brace subscribed to their oaths of office as they took their seats for the next ensuing two years. Counciller Lovell was appointed Deputy Mayor for the next three months. Besides the above members of council there were present Councillors Hammond and Coatta. The following standing committees were appointed for the year 1937: Finance, Brace and Coatta; By-Laws and Police, Coatta and Brace; Health and Relief, Law and Hammond; Fire and Light, Hammond and Law; Property, Lovell and Bellamy; Public Works, Bellamy and Lovell, the first named to be chairman of his respective committee. The estimates of receipts and expenditures for the year 1937 were compiled and ordered submitted to the Board of Public Utility Commissioners for approval. The estimates were calculated on the same mill rates for all taxes as in 1936.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

U. F. W. A. NOTES

The February meeting of the U.F.W.A. was held in the Municipal Hall on Thursday, 11th instant with a very good attendance. This was a meeting of unusual interest, as the delegate to the recent Provincial Convention at Calgary, Mrs. A. Torrie, presented a very full and comprehensive report of the four-days session.

Such prominent outside speakers as Dr. W. Kelloway, Rabbi Eisen and Kenny Gordon presented first hand pictures of conditions in other countries, particularly Russia, Germany, and Scandinavia. Our delegate was much impressed by the quality of the discussions in Convention of current problems and of the resolutions presented, reporting them keen and intelligent, as well as tolerant and convincing.

The meeting unanimously supported a petition to the Governments to "Take the Profit out of War," believing that profit making is the real incentive to war.

The U.F.W.A. Local meets on the second Thursday of each month and all farm women are cordially invited to attend

There is still a supply of U.F.W.A. Cook Books on hand which may be obtained from the Secretary, Mrs. I. C. Olson, Tofield.

BRITAIN'S FOOD SUPPLY

Approximately two-thirds of the United Kingdom's food is imported, with no prospect of the country becoming self-containing. When it is necessary to send abroad annually for 5,000,000 tons of wheat; 600,000 of beef; 350,000 of mutton and lamb; 350,000 tons of bacon; 1,000,000 pounds of butter; 4,000,000,000 lbs. of sugar and similar quantities of other supplies, the danger of an European war brings up a problem almost as great as that implied by human slaughter.

The question on wheat storage has been discussed but apparently nothing has been added to the sum of information in recent months. Canada could make a real contribution to the security of the British people by assisting in any program to increase the available supplies on hand for emergency purposes, not only of grain, but all other food commodities produced here.—The Toronto Globe and Mail.

"Just Average Folks"

There are no mysterious "fifty big shots" crushing the debtors of Alberta.

The bond and mortgage holders of this Province are just average folks—just such neighbourly people as you deal with every day—people who have hoed their row successfully, put by a little savings from year to year and tried to invest these savings securely, thus creating nest eggs for their old age.

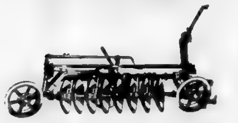
The $382,000,000 invested by life insurance companies in city and farm mortgages in Canada are the savings of 3,500,000 policyholders. In the same way, other hundreds of millions held in mortgages by loaning companies are the savings of scores of thousands of shareholders and debenture holders — $70,000,000 of mortgage holdings of one such company alone representing the savings of between fifty and sixty thousand persons of average means.

In Canada, it is the people of such average means who provide the funds which are invested in bonds and mortgages in Alberta and other provinces.

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of its member companies. It represents hundreds of [illegible] by typical Canadians. Its [illegible] in Alberta amount to some forty-five million dollars.

[illegible]

A Plow With Sense and Backbone



This new Oliver Overhead Beam One-Way Disc Plow has *Sense* because the *power lift* and new *power return* lifts the plow out of the ground and returns it to work in a more practical way than on any plow ever built before. Secondly, it has *backbone* because the square 2¾" x 2¾" superior steel overhead beam provides a central pillar of strength and makes the *power lift* and *power return* possible. That overhead beam—with the beam above the discs—also gives far greater clearance for the handling of weeds and trash by the discs.

Come in and see this amazing new improvement

Cornhill Annual Ratepayers Meeting Well Attended

Some fifty to seventy-five interested ratepayers attended the annual ratepayers meeting held on Saturday afternoon last. The meeting was held at the Variety Theatre as the accommodation at the Municipal Hall was too small for that number. A. J. Harrison was appointed chairman.

Councillor McSporran gave a detailed explanation of the auditor's financial report, taking many of the items one by one and explaining anything that might not seem quite clear. This took quite a little time as occasionally there were questions bearing directly on the subject mentioned.

After the reading of the reports the meeting was thrown open for general discussion. The discussion, which brought forth many conflicting opinions, centred around three main topics: the caboose, the big grader and the publishing of council minutes.

As regards the caboose, Councillor McSporran said the apparent high cost was chiefly caused by the permanent nature and solidness of construction. The figures mentioned in the report also included interior requirements such as bunks, stoves, dishes, etc. The trucks were purchased and a body constructed for them. While he did not receive any remuneration for doing so, he superintended the construction of the body. The idea was to make a body that would last and where ever possible bolts were used instead of nails. This meant considerable labor with a rather high labor cost.

Much discussion took place over the purchase of the big grader. It was explained that the idea of the purchase was to make really permanent roads. It was stated that while the municipality had been in existence for quite a few years, it was really getting nowhere with its road building policy. Roads constructed became flat in a year or so and had to be done over again. Criticism was made on the ground that too much attention was given to trunk roads, it being stated that it was no use having good trunk roads if a farmer could not get to them. This criticism was answered by the statement that the purchasing of the big grader was part of a road building program that eventually include side roads, but trunk roads had to be constructed first. A motion was made by A. J. Williams and seconded by T. Rorem that the Council consider having work done by contract instead of using the big grader.

ROCKS

I don't know who was to blame Whether it was the Boss, or whether it was friend wife, Madge.

He called me into the office at the end of last December.

"Jones," he said, "you have been a faithful employee of the firm for the past twenty-two years."

"Yes, Mr. Brown." I looked modestly at the carpet.

"You know the depression is making it hard. Nobody's buying. We're going to have to lay you off for three months," he finished quickly.

"Very good sir," I said, which of course was a lie because it wasn't good at all.

"You will be laid off on the first of January."

"Very good, sir, I repeated which which was another lie.

I went home and told Madge the news. I expected she would be up in the air, but she wasn't. You never can tell what these women are going to do.

"That's just fine George," she said. "It will be so nice to have you home for awhile and for exercise you can curl."

"Can curl," I snorted, I never curled in my life and it's beastly cold down at the rink." Gone were my visions of warm firesides, cosy corners, and old cronies. Curling—that was an Eskimo's game.

"George, you're going to curl. Mrs. Smith was telling me only yesterday how much good it did her husband to ed in my life and it's beastly cold

I could tell by the look of her face it was no good arguing, so I said, "Yes my dear."

"I'll have to see about some warm clothes for you, and a sweater. I do like those bright ones the men wear when they are curling," Madge added, with ectasy.

Now, I'm a modest man, so I murmured, "Not too brilliant, my dear. You know I've not curled before. I don't want to make myself too conspicuous."

"Why George," she smiled proudly, "I'm sure you will be able to curl as well as Mr. McPhee and look what he wears."

Well, that was that, and on the first day of January I found myself the possessor of a new sweater, that would have put Jacob's coat of colours into discard, a membership ticket in the Caledonian Curling Club, to say nothing of a broom, which looked as though the manufacturer had forgotten to cut the end of the bristles off.

When I arrived home after an afternoon's walk down town on the second day of my enforced vacation, Madge greeted me with eyes asparkling "George you're curling tonight at seven, on Mr. Armstrong's rink and," she added breathlessly, "I'm coming down to watch you."

That fixed it. Madge got supper a bit early and seven o'clock found us down at the rink. Here was I, besweatered and be-broomed, ready for my first game of curling.

"Jones, Jones," I heard someone calling.

"Here," I stammered, the old schoolday discipline coming to the rescue.

A big chap came toward me whom I recognized as Armstrong "Hello Jones, you're on my rink. You'll be playing lead," he said, shaking my hand.

"Yes," I replied, I'm afraid without much enthusiasm.

"You have curled before, I believe Mrs. Jones told me, when I called her on the phone."

"Oh yes," I replied untruthfully.

"Got your own rocks?" he asked.

"No," I said.

"Come on then, we'll get a pair."

With that I followed him out on the ice, and it was there I met the rest of the rink. "This is Jones, my lead," he said.

I am not a heavy smoker, but on my way down to the rink, I had bought myself a small packet of cigarettes, so I thought I would smoke one, just to steady my nerves. As soon as my skip saw them, "Thanks," he grinned, helping himself, handed them round "The lead you know .." he murmured as he gave me the packet back.

He pointed to a couple of rocks. "How are these for weight?" he asked.

"Fine," I said.

"Ready?" he looked around at the other men.

"Let's go," they started to take off their coats.

I hadn't exposed, as yet, my new sweater to the vulgar gaze, and as explained before, am a modest man, but the effect produced when I removed my coat, was, to put it mildly, "Immense". Every eye in that

(Concluded Next Week)

KETCHAMOOT

We are very sorry to report the death of little Miss Ruby Sutton, youngest daughter of Mr. and Mrs James Sutton. Ruby May Sutton was born in the Ketchamoot district, July 14, 1930 and passed away in an Edmonton hospital Friday, February 19, at the age of 6 years, 8 months and five days. She contracted whooping cough a month or more ago which developed into pneumonia. She was taken to the hospital Friday but passed away shortly after being admitted.

The funeral service was held at the home of her grandmother, Mrs Fannie Sutton Monday afternoon at 2 p.m. Bishop Milo Stutsman officiated and interment took place in the Tofield cemetery. Pallbearers were Donald Sutton, Lyle Coombes, Harley and Homer Schmidt. Many beautiful floral tributes were received as a token of sympathy to the bereaved family.

She leaves to mourn her loss, her parents, two sisters, Lillian and Marian and one brother Conrad; grandmother and one grandfather in Ontario, besides a number of other relatives and her little schoolmates. Our sincere sympathy is extended to the family. Mr. Stinson was the funeral director.

Mrs. Roberts of Poe came on Sunday and is the guest of her friend Mrs. A. F. Schultz.

Mrs. Davison and daughter Edith visited Mrs. McMullen and Ethel on Monday afternoon.

The Sears brothers, Harold Schultz and Jimmie Inman motored to the city Thursday evening to attend the hockey match.

Miss Marian Sutton, second daughter of Mr. and Mrs. James Sutton is seriously ill with pneumonia. A nurse is in attendance and oxygen is is being given.

The monthly meeting of the Ladies' aid will be held next Wednesday afternoon, March 3rd, at the home of Mrs. Minnie McConnell. A cordial invitation is extended to all.

Mr. and Mrs. Chas. Whillans were passengers to Edmonton Friday of last week

Mrs. Whillans left Saturday for a visit to her old home and with friends and relatives in different parts of Ontario.

Messrs. William Staire and nephew William Davison left one day last week for their homestead at Drayton Valley

Mr. A. T. McLean has been ill for several weeks past and unable to make his regular visits to Tofield. He will, however, visit Tofield on Saturday, February 27th. He will be at J. E. Stinson's Office.

Mrs. Matheson, nurse caring for Mr. J. Wills, would like to thank all those who kindly remembered Mr. Wills over Christmas and in the New Year, and report that he is doing well. To the lady who loaned the wheel chair Mr. Wills is especially grateful

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

SORE THROATS

Do you know the dangers of a sore throat? What you think is just a little cold in your child's throat may be the beginning of permanent damage to his health. Rheumatic heart disease which is prevalent in temperate climates like ours, particularly in the crowded cities, often has as its beginning an infection in the throat. Serious kidney trouble too may follow soreness in the upper respiratory area. Therefore every child with a sore throat should be treated with the greatest care and be put to bed until he is better. Also an effort should be made to prevent the infection spreading to other members of the household.

There are many causes of sore throats in children. Perhaps the commonest is an infection of the tonsils and adenoids. If these become inflamed frequently they should be removed before any serious damage is done. Although diphtheria is rapidly disappearing due to the wonderful results obtained from toxoid, it still does occur, and if your child has not been given toxoid this disease must be kept in mind. Here, of course, prevention is greater than the cure and so toxoid should be given to all children. Many of the other infectious diseases such as scarlet fever and measles, make their first appearance as a sore throat. This often occurs before any rash appears, and it is most important that your child be put to bed and be carefully watched, particularly when an epidemic of any infectious disease is in the neighborhood.

Sore throats may be treated by warm gargles if the child is old enough and heat to the neck often adds to their comfort. Food should be given in fluid or semi-solid form as this is swallowed with less pain. But the main preventive of complications is to keep the child at rest in bed. So, one of the best means of insuring your child's future health is to treat a sore throat with the greatest respect.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered by letter.

INFORMATION FROM AUSTRALIA

Australian farmers are experiencing good times and are quite happy over the fact that wheat is bringing them better than five shillings a bushel. They are finding a ready market for their surplus which totals some 85 million bushels, Italy being a particularly keen buyer. The Australians like the way Italy buys wheat as that country makes no attempt to spread sales judiciously and take advantage of heavy spurts of shipments or quiet interludes in demand. This is contrary to the clever technique of the big British buyers, who act in concert and get the last ounce of bearish pressure on prices by waiting for excess of exporter's offers and allowing the weight of supply to reduce market quotations in their favor.

Another source of joy to Australian farmers is the termination of the trade war between that country and Japan, as a result of which Japan had quit buying Australian wool. According to the new agreement Japan will buy 800,000 bales of Australian wool in the next eighteen months, and Australia will admit 153,750,000 square yards of Japanese textiles in the same period. The trade war started when Australia restricted importations of Japanese textiles in order to give British manufacturers a larger share of the market. Japan struck back through tariffs and quotas, and Australian sheep men were nervous about the effect of Japan's embargo on wool prices. However, demand from elsewhere kept the prices up and now Japan is back as a big buyer.

Australia usually supplies the Orient with wheat, but finds the demand from China very light this year, only one cargo having been taken up to the end of 1936. This is due principally to the large wheat crop in China last year (790 million bushels), and the low prices prevailing in that country. China apparently is trying to grow her own wheat, and better transportation facilities from the interior have the effect of curtailing imports.—Wheat Pool Budget.

ALTA WEATHER CONDITIONS

The map of Alberta has been turned upside down this winter. The southern prairies, frequently bare of snow in the winter time and seldom covered more than a few inches, have experienced quite heavy storms and a thick blanket of snow covering, particularly in the regions south of Calgary and close to the foothills. The streets of the City of Lethbridge were blockaded with snow to an unprecedented degree and that city is in the heart of the Southern Alberta prairies. On the contrary many districts in the central and north central areas of the province report comparatively light snowfall this winter.

Heavy snowfall is welcome, particularly in the dry areas because it prevents soil drifting. Snow usually adds very little moisture as it melts and runs off in the spring before the ground thaws. But enough moisture usually permeates the soil to give the crops a start.

Except for the Peace River country most of Alberta soil is very dry. Heavy and frequent spring and early summer rains will be needed to produce a good crop. The fickleness of the weather in Alberta is proverbial and no one can say just what will eventuate.

If the spring opens propitiously and early rains are experienced an increase in wheat acreage may be expected because of better prices. On the other hand if adverse weather conditions are experienced early in the spring a small reduction in acreage may be expected.

Reserve moisture is an important matter in growing wheat and for the most part the province has very little stored up moisture in the soil. Federal agricultural experts have calculated it takes 14 inches of moisture to produce a bumper wheat crop. This shows the urgent need of abundant spring rains.—Wheat Pool Budget.

TIMEPIECE TOOK LONG TRIP

Luck sometimes works in reverse, and anyone demanding concrete proof might page a farmer residing near Dimsdale in the Peace River country. This gentleman some weeks ago lost his watch. Recently it was found—at Vancouver—after a search about as exacting as for the proverbial needle in the haystack.

When the valued chronometer first embarked on its jaunt the owner was loading grain. That evening he missed the timepiece.

In jig time he informed the Calgary office of the Alberta Wheat Pool of the number of the car he loaded and his loss.

The Pool in turn notified Joe Bennett, superintendent at the Vancouver terminal. He slowed down the unloading belts and sure enough, up popped the watch—a bit dusty but none the worse for wear and travel. —Calgary Herald.

ANCIENT CUSTOM LINGERS ON

Early Church Started Fish Habit That Persists To this Day

Fishermen from the Atlantic to the Pacific are hopeful that the present effort of the Canadian Government to promote the consumption of Canadian fish will result in people eating more fish throughout the week rather than confining this delicacy to Fridays.

Though fish has been eaten as a food since prehistoric times, the early Christian Church decreed that no meat should be eaten on Fridays and fast days but that fish might be substituted. From that arose a practice that has persisted down to the present time and has led people of every denomination to associate fish with Friday often to the virtual exclusion of other days.

According to leading executives of the fishing industry, this habit is not only harmful to the industry but is robbing people of many advantages. If the people eat more fish throughout the week, they would be assured of fresher fish and they would get it at lower prices. The increased demand for products of the sea, lake and river would give impetus to the whole industry, and while retail prices to the public would drop, the price to the fisherman would increase, owing to the lessening of the present overload caused by the public habit of eating fish mostly on Fridays.

Not only the fishing industry but the medical profession are behind the move to encourage people to eat more fish throughout the week. Many medical columnists of newspapers have gone on record as to the nutritive and healthful value of fish. With its richness in proteins, minerals and other elements, they say fish is an important article of diet, as nourishing as other foods and more easily digested.

CAN YOU TAKE IT?

TRY KEEPING BEES

Most of us like honey—but at the mere suggestion of keeping our own bees we experience a most uncomfortable sensation. Yet there are hundreds of men in Alberta who handle bees as a profitable sideline with no more discomfort than if they were feeding lambs.

The modern honey bee is really quite civilized—not a beast of prey ready to pounce upon any unwary passerby. When properly treated, she is a very busy, inoffensive little creature who holds no grudge against anyone who treats her person and property with due respect.

Most people have been stung (by bees) a few times during their lives, and know whether they can take it. If, after a number of stings, the poison causes no further discomfort, you're a born bee-keeper; but if it repeatedly causes real agony, stay away from bees.

According to the Dominion Experimental Station, Lacombe, bee keeping requires comparatively little time — less than half an hour a week for each colony is usually ample, and that for only six months of the year.

The initial cost of supplies is only about $25.00 for two colonies; for this amount it is possible to purchase a complete beginners outfit, including two hives, bees and necessary equipment. With a little care and the least luck the two colonies will almost pay for this outfit in the first year; and after that they will usually show a comfortable profit. After a year's experience in handling bees a person is in a position to decide whether to expand operations.

Bees have been kept at the Dominion Experimental Station, Lacombe for over twenty years, and have produced a yearly average of 125 lb. of honey per colony. The highest yield for a single colony ever produced there was 348 lb.

The Lacombe Station has no bees or equipment for sale; however, it has for distribution literature on every phase of bee keeping, which is free, on request.

FIRST KING GEORGE COINS SOON READY DISTRIBUTION

LONDON, Feb. 22.—The first King George VI coins will be ready for distribution to the poor in the traditional royal alms-giving ceremony on Maundy Thursday, March 25, officials of the royal mint announced today.

Officials said coins bearing the likeness of the new king, for general circulation may be ready before the coronation but could not express any certainty.

2000 CANUCKS SEEK SEATS FOR KING'S CROWNING

LONDON, Feb. 22. — Canada House has received 3,000 applications from Canadian citizens desiring seats to view the coronation procession. It is announced that every application has been filled. Contrary to expectations, the abdication of Edward has not dulled enthusiasm in the United Kingdom and elsewhere over the coronation period and demands for accomodation in London are so great that a voluntary committee has been organized to find rooms additional to hotels and boarding houses which are now booked.

BOY 8 FEET 5½ WILL BE 19 YEARS TODAY: WEARS SHOES 39

ALTON, Ill. Feb. 22—In his stocking feet if he should choose to take off his size 39 shoes, Robert Pershing Wadlow, 19 years old today, stands 8 feet 5½ inches tall.

Alton's youthful giant shies away from discussing the fact he is probably the tallest man of authentic record.

His father Harold Wadlow, is five feet 11 inches tall.

The approach of maturity has retarded but slightly the amazing pace at which Robert has grown since his birth. He was six feet two inches tall at nine years of age, seven feet 8½ inches at 15, and eight feet 3½ inches a year ago. His weight is about 450 pounds, a gain of 60 lbs in a year.

Did You Ever Attend a

SPOOFEN-DUFFLE PARTY?

"Spoofenduffle?" you query, "what is a spoofenduffle party?" You never heard of a spoofenduffle party?"

Well, we never did either. There probably isn't any such thing for the simple reason that no one ever started the idea and no one ever followed it up by repeatedly bringing it to public attention.

But people do know about Hallowe'en and Thanksgiving and Christmas parties. These events receive plenty of free advertising each year.

Wise merchants see to it that they have goods in stock which will help people to the fullest enjoyment of these festive occasions. Moreover, they let the people know about their readiness to serve them.

Window displays, floor and counter displays and advertising displays, all work together to the eventual benefit of merchants and customers.

Every merchant in Tofield has some goods which will abet the enjoyment of the winter party season.

May we help you to help others enjoy their parties to the fullest extent?

"THE MENACE OF THE TROPICS"—

SOME TEN or twelve years ago we published a lengthy article on the above title. The article, if we remember correctly, was a reprint of an address given at some gathering on the Pacific coast. It endeavored to prove that vegetable oils from tropical and semi tropical areas were gradually and continuously boring into the trade, considered almost inviolate, by the dairy industry of North America. During the past ten years we have not come upon the subject very often, perhaps because there have been so many other public questions for speakers and writers to concern themselves with. Yet as everyone must realize who gives any thought to the subject at all, it is an important matter for the dairy industry in general and for Canadians in particular, as so many of the population are engaged in cream production. The article appearing in an adjoining column is based on a letter written by J. Burns, and deals with the current situation thoroughly. The point to take into consideration, though is, if the sale and use of vegetable oils have increased in the past ten years, what does the coming ten year period hold in this regard? It is safe to say, left unrestricted, sale and use of vegetable oils will increase, partly at least, at the expense of Canadian cream producers.

Canadian farmers generally, particularly Western Canadian farmers, are not kindly disposed towards tariffs. With respect to many things they sell and many things they buy, they are compelled to sell in an open market and buy in a protected one. Consequently tariffs are the bane of the Western farmers' existence and to hear them express themselves, one gathers the impression that they are out and out free traders. But a tariff working against the farmer is a different thing to a tariff working for him, consequently the Canadian farmer, we believe, would be quite in favor of having a duty placed upon vegetable oils entering Canada so as to increase the revenue obtained from the dairy section.

There is another thing to consider, the effect of an increase in the price of dairy products and animal fat products to the Canadian consumer. How will the factory workers of Montreal, Toronto, Winnipeg, Vancouver and other cities fare with a duty on vegetable oils entering Canada? Mostly in a retail way, one runs into vegetable oils chiefly in the form of shortening. At the present time, compared to the present price of lard, high grade vegetable oil products are actually dearer, so it would appear that any small increase in the price of lard as a result of a duty on vegetable oils, would hurt the consumer very little. Moreover, in addition to the fact that most city workers are profiting in some form or another by tariff impositions, it is also well known that farmers and their families are the chief purchasers of factory products, and additional revenue makes them better purchasers.

The question is a timely one and an important one. If our Canadian dairy industry is to thrive—and we all hope it will—adequate steps should be taken to see that it is not subject to unnecessary and unfair competition from tropical and semi-tropical countries. The same applies to the live-stock industry. The whole question is one purely of economics with the ultimate solution being the greatest good to the greatest number of Canadians.

TEA AND GAS MASKS FOR TWO—

THE DEVELOPMENT of the arts, the progress of science and the advance of the social amenities are all admirably illustrated by a London dispatch to the Herald Tribune. "Hundreds of women will wear gas masks," it tersely explains, "at an 'at home' to be given by Mrs. G. Farquharson, Mayoress of Wimbledon, to interest women in air defense. The Government is co-operating by lending respirators and a lecturer. Tea and cakes will be served before the gas masks are donned."....

The ladies of Wimbledon haven't quite mastered their problem; at subsequent "at homes" of the Lady Mayoress, no doubt the tea and cakes will be served after donning the masks (eating was always one of the worst problems for the novice, but, of course, you've got to learn to eat and sleep in the things if they are to do any good under prolonged strafing), but it will all be accomplished with the most perfect form, and the lecturer will be lovely and so inspiring.

Thus is civilization saved; and the fact that none of it—gas masks, bomb-proof shelters, lecturers and the rest—is likely to be of the slightest use when the bombing starts makes no difference. These little observances enable one to forget to think about that; the world goes on, and tea and gas masks become the fashion. And the big rearmament programs go smoothly through.—New York Herald Tribune.

FOREIGN VEGETABLE OILS DEPRIVING CANADIAN FARMERS OF $20,000,000 ANNUALLY

Imports Increase Almost 34 Million Pounds in 1936 Over 1935

Foreign vegetables oils such as peanut oil, palm oil, [illegible] soya bean oil, etc. entering Canada in increasing quantities are having a serious effect on the use of Canadian butter and lard in Canadian kitchens.

These imported vegetable oils come from such countries as China, Manchukuo, United States, Egypt, etc., where for the most part living and labor conditions are far below those of Canada, and conditions of doubtful sanitation exist.

In 1935 these importations were 123,341,700 pounds. In 1936 the amount had increased to 156,867,713 pounds. These importations resulted in 61,215,000 pounds of shortening, containing no animal fats being sold in 1935, which was double that sold in 1932. No new market is being created as these products are simply replacing Canadian butter and lard in the home market.

On the other hand, Canada is producing an annual surplus of from 7 to 10 million pounds of butter which must be exported and some 20 million pounds of lard.

The Canadian market could easily absorb all of the butter, lard and edible tallow produced in Canada, and more; hence the Canadian producer should enjoy the advantage of this and must be given this advantage to enable him to produce profitably. Instead, however, we find that the exportable surpluses of these products are increasing because of the foreign importations.

Exportable surpluses also affect the domestic market price. It is recognized that the presence of a large surplus on a market has a "bearish" influence on that market until such time as the surplus is removed. The presence of an unlimited supply of cheap foreign produced vegetable oil shortening has a further depressing effect on the domestic butter and lard market, as it is a competitive product of both. Butter and lard must be sold at a price comparatively low to compete with this shortening.

An equally unfortunate situation exists in regard to tallow and grease. Previous to August 21, 1936, a large part of Canada's production was exported, however, the United States imposed a duty of 3 cents per pound on tallow and oils. Consequently Canadian production was excluded from the American market, excepting subject to the prohibitive tariff, plus freight charges. Canada is now the dumping ground of all tallow producing countries with the result tallow and grease are quoted in Toronto and Hamilton at a discount of about 2 cents per pound under Chicago and Cincinnati. This discount comes out of the pockets of Canadian live stock producers.

To check these tremendous losses to our primary producers, an application is before the Tariff Board at Ottawa recommending the following duties on the various items now flooding the Canadian market.

Vegetable oils, (other than crude), 6 cents per pound.
Crude vegetable oils, 4½ cents per pound.
Animal fats over 40 degrees titre, 3½ cents per pound.
Animal fats under 40 degrees titre, 3 cents per pound (plus 20 per cent.

In all cases a 25 per cent preference on products of British Empire origin is recommended.

The calculated effect of the imposition of these duties is:

1. The elimination in Canada of exportable surpluses of butter, lard, tallow and grease.
2. Increased production and consumption in Canada of butter, lard, tallow and grease.
3. Increased returns to primary producers for each pound of butter, lard, tallow and grease produced.
4. Increased employment created in producing and manufacturing additional quantities.
5. Increased Canadian railway freight earnings..
6. Additional fuel and supplies, e.g. containers of Canadian origin used.
7. Additional revenue to Canadian Government owing to increased duty collectable.

Canada's 318,000 dairy farmers are solidly behind this application. At the 1936 Annual Meeting of the National Dairy Council, it was decided to investigate the situation and take whatever steps were advisable. This action of the National Dairy Council in supporting and becoming a party to, this application was recently endorsed by the Provincial Dairy Councils in both Eastern and Western Canada.

A conservative estimate of the increased returns under such protection to Canada's 318,000 cream producers based on the 1934 production is almost $14,000,000.

Value of the increased duty to Canadian live stock producers is conservatively estimated to be almost $6,000,000.

This should add $1 per head to the value of hogs, and $2 per head to the value of cattle.

These millions of dollars rightfully belong to the Canadian producers, and will be received by them if the present tariff application is included in the forthcoming Budget to be tabled in the House at Ottawa early in March.

If Canadian dairymen and live stock producers want these millions of dollars this year, they will have to express themselves accordingly, both individually and through the various agencies and associations at their disposal, by wire or letter, without delay.

SAFE WINTER DRIVING

Modern cars are engineered for year-round operation, and the driver who takes advantage of the refinements which they embody can achieve a degree of security and comfort equal to that which he enjoys in warmer weather. A bulletin issued this week by Chevrolet points out to motorists several ways of reducing winter driving hazards. Sliding, wheel-spinning, and skidding are all the result of too-abrupt application either of the power or of the brake. Following are some of the important rules motorists should follow:

"Let the clutch in gently as you start the car. Give the engine only enough gas to prevent stalling as the clutch takes hold. The object of this is to apply the power to the rear wheels so gradually that they will take hold and propel the car forward, rather than spin on the ice. The same rule holds good once the car is in motion. Both acceleration and deceleration should be gradual rather than abrupt.

"A good driver uses second speed extensively, in stopping, in approaching intersections, and in turning corners. With the synchro-mesh transmission it is simple and easy to shift to a lower speed and keep perfect control of your car at all times.

"Cultivate the habit of giving other drivers ample notice of your intentions to stop or turn. Even though your ability to stop your own car quickly is not the question, the driver behind you may need more space in which to slow down. Be especially careful to signal when pulling out of line.

"Adequate visibility always of the utmost importance at any time of year is assured in winter by the use of de-frosting units which are available in several forms at moderate cost."

RAILWAYS ARE HEAVY TAXPAYERS

Norway Maine, February 15th.—"In the old days of railroading, before the internal combustion engine had revolutionized transport, to the railroads as to the undertaker, 'every man was a prospect'," declared A. A. Gardiner, assistant general passenger traffic manager of the Canadian National Railways, at a joint meeting of the Norway and South Paris Rotary Clubs here. In those days, Mr. Gardiner admitted, many railroaders had a "take it or leave it" attitude toward the public. However, conditions have changed very vastly with the development of modern railroading conditions and the aim of the railroads today was to provide the best service that was possible, and courtesy and service to the public were considered of prime importance. Mr. Garidner reviewed the development of the railroads of the North American continent and their part in the building up of the United States and Canada.

"The railroads have long since become a substantial institution in the land, and are firmly rooted in the communities they serve. They have an interest in these communities," Mr. Gardiner continued. "They cannot, for example, remain in these communities only when conditions are good, and go off to better fields where more remunerative traffic is to be handled. The railroad is an essential, intimate part of the territory it serves. What is good for the territory is good for the railroad, and vice-versa.

"They are substantial taxpayers. In the past ten years, in the United States, the railroads have paid over three billion dollars in taxes and, if you add to this the taxes paid by their employees and by the industries they have occasioned, even this stupendous sum will be greatly increased. Incidently, in the same period—ten years—the Canadian National has paid in taxes $70,000,000. The railroads have, in many circumstances, given proof of their public-mindedness. Free transportation of relief supplies to the flooded areas is a recent example. The railroads ask in return that the public display railroad-mindedness."

When worms are scarce, hens don't stop scratching, they go a little deeper.—Lewisham and Catsford Guide.

YOUTH IN AGRICULTURE

British South Africa is making an intensive study of its industrial problems with a view to directing the education of its young people into such channels as will give them the best chance of success in their adult life. Farming is one of the occupations most favoured, according to an article in The Northwestern Miller of January 27th. The country has vast areas of arable land, but unfortunately its soil is relatively poor, and, to be profitable, farming requires a far higher degree of intelligence and education than elsewhere. The government is now enamored with the idea of changing public school training in order to educate youth in the ways of agriculture and also changing the land policy in order that suitable young people will have an opportunity of putting their education to a practical test.—Wheat Pool Budget.

TORONTO MAN HAS ELECTRIC PLANE MOTOR

TORONTO, Feb. 23—The Toronto Daily Star said today in a news page story it had learned from "an authoritative source" that a new type electrically-driven airplane engine had been developed and operated successfully by a Toronto man. The name of the inventor was not given.

The Star said the engine is kept in a burglar-proof vault-like room between tests and under constant guard during tests.

"It was learned today," the Star said, "the engine had this week successfully undergone a test of two days' continuous running. In the past two months, three break-in attempts had been made at the premises. It was said."

The Star said "the smaller of the airplanes 'engines' now perfected, will drive a Moth machine 150 miles an hour for 72 continuous hours at a power cost of about 40 cents, it is said."

[illegible] ANNUAL RATEPAYERS MEETING WELL ATTENDED

(Continued from front page)

 up themselves. Much discussion revolved around the wording of the motion and the exact definition was hard to arrive at but the above is the gist of the motion. It was stated that the municipality now have 23 miles of good road built last summer. The average cost per mile was $287.00. The council hoped with last season's experience to guide them, to reduce this considerably this coming season.

Some discussion took place regarding orders given relief recipients. Apparently these are routed to one store and the following motion was made by Mr. Abernethy and seconded by Mr. Romm. "That relief recipients be given the opportunity of trading at any store they wish." The motion was passed. Mention was also made of the reported practice of charging relief recipients more for their goods than other customers. It was made clear that the report of overcharging did not concern any Tofield store and had been attended to by the Council.

The publishing of the minutes came up for considerable discussion. A motion "That Council make as good a deal with the Mercury as [illegible] and have the complete minutes published," was made by W. Abernethy. In the ensuing discussion we are not quite sure whether the motion came to a vote, but the meeting went on record as in favor of the minutes being published.

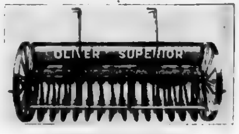
Prior to four p.m. the returning officer, W. Foreman announced he was ready to receive nominations for Councillors for divisions two and three. After four p.m. the following nominations were announced. Division two: Albert Swanson, Kingman; Chas. Holmberg, Hay Lakes. Division three, Gilbert Mollgoran, re-elected by acclamation.

MR. THOMAS HENDERSON DIES IN ENGLAND

Word has been received of the death in January of Mr. Thomas Henderson formerly of Tofield, but for several years past a resident of England.

Mr. Henderson, it will be remembered was manager of the former Doball mine properties here and later lived on his farm now occupied by Mr. Maciborski. He was interested in pure-bred cattle and erected a fine barn on the farm.

Mr. and Mrs. Henderson were among the early supporters of Tofield Holy Trinity Church. Mrs. Henderson passed away before Mr. Henderson left for England.



The New Grain Drill with Running-in-Oil Transmission

It's the new Oliver Superior No. 35 Grain Drill—with the most accurate seeding mechanism ever built—and with dozens of new improvements—you'll wish to see at once.

There's a new All-Steel Cylindrical Hopper—stronger, bigger. There's a new Variable Speed Transmission—fully enclosed—all gears running in oil—and 60 different rates of sowing! There's rear spring pressure in *all* furrow openers—a new Oliver feature. There's a new . . . But why go on? There's not room here to tell you all about it. Come in and see for yourself.

Remember, too, that all these new improvements are combined with the *Superior Double Run Force Feed*—that world-famous mechanism that measures with absolute accuracy as long as there's even a handful of grain in the hopper. Ask us for complete information. There's nothing else like the new "35"

TOFIELD ALBERTA

ALBERTA

....will prosper if Albertans purchase Alberta made products.

Brewing is an important industry, yet few people realize what it means in the way of employment to hundreds of our people.

Beer is manufactured from the products of the farm. The growing of barley brings good revenue to those who till the soil.

This Advertisement Is Not Inserted by the Alberta Liquor Control Board or by the Government of the Province of Alberta.

LOCAL & PERSONAL

The Anglican W.A. will meet at the home of Mrs. Coutts on Thursday afternoon, March 4th, at 2:30 p.m.

Miss Isabelle Robinson spent the week end at her home here.

Miss Lois Wilson, who is attending university at Edmonton spent the week end at her home here.

Mrs. Cairnes, who has been spending some time with her daughter, Mrs. Currie, returned to Edmonton this week.

Dr. Law, Mr. Currie, Glenn Wood and Mr. Cowell are attending the bonspiel at Camrose this week.

A number from town attended the dance at Community Hall last Friday evening.

The Jolly Twelve Bridge Club met at the home of Mrs. W. Chapman on Monday evening. Honors were won by Mrs. Thomas and Mrs. Cowell.

Mr. A. Hummell visited Edmonton this week.

Don't forget the hockey game scheduled for Saturday evening. The Tofield seniors will meet the Edmonton Motors. This promises to be a good game, so everyone turn out.

Mr. and Mrs. Stan Yakabuski returned this week after visiting for some time at Renfrew, Ontario.

Born: To Mr. and Mrs. A. McCullie, of Sedburg, Sask. on Thursday, Feb. 18th, a daughter.

Mr. Joseph Rogers, who has been visiting friends and relatives in southern Alberta returned home on Friday evening last. Mr. Rogers was at Granum for some time, also at Calgary. He reports the winter "down south" very severe, particularly as regards snow fall and wind and as a consequence much difficulty has been experienced in keeping roads open. The feed problem too has been serious there. Even when feed has been imported by rail considerable difficulty has been experienced in getting it to farms due to snow blocked roads. The Tofield district appears quite good to Mr. Rogers just now.

HOCKEY

The senior team is still active in the puck chasing game, having played three games since the last issue of this paper and winning them all.

On Saturday night last Ross Creek made their third appearance here and were again defeated. On this occasion they were not up to their full strength and showed the effect of absentees. Even so it was a real hockey game, the locals having to step lively to maintain their lead.

The visitors scored the first goal in the first period, but Tofield soon after got the equalizer. They also got two more which gave them a lead of two goals. This lead was never reduced. The score at the end of the first period was 4-2; at the end of the second period 6-2; and at the end of the third period 6-5 for Tofield.

Swinton refereed the game.

On Sunday the locals played Ryley at Ryley winning by a score of 5-2. We have no particulars regarding the game except that it was rough. The score was 5-2 for Tofield.

On Tuesday Ryley seniors played a return visit and a hard fought struggle resulted, running into over-time play. On the night's play Tofield deserved their win. Time and time again they swarmed the Ryley net but were unable to score. The game at times was productive of good hockey, at other times play was very ragged.

All three regular periods ended in a tie. First period 1-1; second period 2-2; third period 3-3.

Twelve minutes overtime was played, 6 minutes each way or to be more exact 8 minutes one way and four the other. At this stage play was very fast and even. End to end lightening rushes with the inevitable scramble around the goal. Tofield came down fast, the puck going behind the net. Tofield bored in and while quite a number of players were milling around the goal the puck was tossed out from behind and shot in. With only a few minutes left Ryley were unable to score the equalizer and the game ended 4-3 for Tofield.

Scores: Tofield—1st. period Swinton, Everitt; Second period, Everitt.

Ryley—first period, Gregg, [illegible]; Second period, Bendickson.

Overtime—Swinton from Sears.

Line-up: Ryley—Hjelter; Bendickson; Anderson; Lauber; Gregg; Umphrey; Mehus; Young; E. Chappell; A. Chappell.

Tofield: Burke; Everitt; Dunn; N. Glover; J. Bowick; Swinton; J. Whyte; Matchmess Lehman.

On Wednesday night the Tofield High School team played Ryley at Ryley. The game was evenly contested and well played. The score was 3-2 for Ryley.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Tofield

Notice is hereby given that the assessment roll of the Town of Tofield for the year 1937 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the forenoon until four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed on any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary-Treasurer.

Dated at Tofield, this 24th day of February, 1937.

J. W. CHAPMAN,
Secretary-Treasurer.

WOODLAWN

The Woodlawn Dramatic Club are staging a two hour and thirty minute play, "The Clay's the Thing," in Woodlawn School Saturday evening, March 6. Everybody welcome. Don't miss it folks, we'll be looking for you.

Mr. John Wilson sr. spent a few days of the past week with his son John.

A group of the Woodlawn young people took in the Lindbrook dance last Friday. They had a "real dandy good time" and are looking for another lively dance soon.

OBITUARY

There passed away at an Edmonton hospital, Elmer Bender, who resided near Grand Forks school at the age of 30 years. Mr. Bender was taken ill with the flu and appeared to be recovering. However he suffered a relapse and was taken to a hospital on Wednesday, but passed away early Thursday morning. He leaves a wife and one young daughter, Donna.

The funeral will be held on Saturday, service to be held at the Mennonite Church. Interment will take place in the Mennonite cemetery.

The passing of Elmer Bender is particularly sad as only a few days previously he had buried his mother, Mrs. Katie Bender. Mrs. Bender developed the flu and with complications resulted in her demise. She leaves Elmer (who has since passed away) Mahlon and daughter Fannie.

The funeral was held on Saturday last, Feb. 20th. Service was held in the Mennonite Church.

Mrs. Andrew Johnson is ill with the flu.

There will be a dance in the Kingman Hall on Friday evening, Feb. 26.

BEHIND THE HOG

A.B.C.'s Column

Well folks, we are running a little short on material to Contribe, Contribe.

****

Curlers quit your stalling,
To you for verses I am calling,
Come on, come on, you column hitters
This waiting gives A. B. the jitters

****

They say that prosperity is just around the corner, so I hied me around the corner and Lo and Behold I met two rinks with Rocks and Brooms headed for the Camrose spiel. *Flash*—They have returned, one rink laden with Irish Clays and Irish Twist and the other with Rocks and Brooms.

****

My final skit entitled "ROCKS" seems to have been very appropriate in view of the manipulation of Stones for the Camrose Spiel, so that all members? would be well supplied for the Camrose Spiel. It left the club a little short, but why worry, Spring will soon be here, Beautiful Spring.

****

And Curlers, I still have a few Souveniers left.

****

We have three sides to all stories in this column, Yours, Mine and the Truth.

****

And Curlers, Hot Air won't make a warm friend.

****

Next week will be our "Finis" and we want to close with a Bang! so give me all the news.

ROCKS

(Continued from last week)

. . . . Every eye in that rink was turned toward my shrinking form. I felt them look. I glanced at Madge. She was pointing out its beauties to her companion, which was unnecessary for that sweater spoke for itself.

"You shoot after him," called Armstrong, as they all moved down the ice, pointing to a man busily cleaning the bottom of his rocks.

"Are these the rocks you are going to use?" asked the chap nodding toward the two Armstrong had picked out for me, "You'd better clean them; the ice is pretty heavy."

What he meant I didn't know, but I got hold of one of the rocks, turned it over and pinched my fingers between the handle and the ice.

The skips had reached the other end of the ice, my friend was yelling, "Inturn, centre ice." My friend, or should I say enemy, got down on his knees and gave his rock a shove.... down the ice it went. Then his skip started. First he shouted, "Sweep, sweep," then he evidently changed his mind and shouted "Whoa, whoa" then again he yelled "Sweep, sweep ....at last the rock stopped.

It was my turn. I got down on my knees, looked at Armstrong. Sure enough he was yelling "In-turn, centre-ice." I didn't know what he meant so I gave my rock a push, my feet slipped and down I went on my tum....I should say chest. The rock ....it wabbled about half way down the ice and stopped. I picked myself up and looked around.

"You didn't have your foot in the hack," said my friend.

"In the what?" I asked.

"In the hack, this little hole to put your foot in."

By his time I had gained enough nerve to look down the ice at my skip. He had his back toward me, but I noticed he had his handkerchief out and seemed to be wiping his nose. I guessed the poor chap had caught cold on the beastly ice. My friend was preparing for another shot.

It was my turn again, with foot firmly in the "hack" or whatever they call it, I looked toward my skip for orders. He was hitting my friend's rock with his broom and yelling, "In-turn, in-turn, don't be short." I glanced enquiringly at my friend. "He means knock that rock out," he said.

"Get the broom, get the broom," yelled my skip.

"What broom?" I looked up at my friend.

"The skip's broom."

"Confound it, why didn't he say so before I knelt down." I rose to my feet and started up the ice. The spectators roared. "Hey!" called my friend, "where are you going?"

"To get the broom," I said.

The crowd roared again. I was getting kinda mad by this time.

"What d'you mean?" I shouted.

"The skip means, shoot your rock at his broom," he squealed.

(To be concluded next week)

LINDBROOK

The dance given last Friday week by Messrs. V. Glenn and A. Scott went off very well despite the inclement weather. The attendance was not large owing chiefly to the weather and the fact of it following the other dance so closely. The orchestra was supplied by Messrs. C. Lindgren and S. Smith and it was O.K. Those who attended voted it a real good dance and the fact that the crowd was not large made it so that the dancing was fine and it was a jolly crowd and so everyone enjoyed themselves.

The monthly meeting of the L.C.C. was held last Wednesday afternoon at the home of Mrs. Robert Smith. Mrs. Herndon was joint hostess. The roll call was answered with "Helpful Hints" and some nifty ones were heard too. Mesdames Kortzman and Bailey were charge of the entertainments which were very amusing and caused no end of fun. A dainty tea was served and enjoyed by all. The next meeting will be held at the home of Mrs. E. W. Hooper and the roll call will be answered by Easter Verses. A suggestion which we think is an excellent one is, that from now on the ladies of the club exchange magazines and books at each meeting, this will be appreciated as much by the ladies' men folk as by the ladies themselves.

We hope this break in the weather means the break of the winter, although looking back it hasn't been too bad so far.

The "Kortzman 'Leen Kutters" have been out around the neighborhood lately busy "kutting" firewood this last week.

MEETING OF KETCHAMOOT CREEK TELEPHONE COMPANY

The annual meeting of the shareholders of the Ketchamoot Creek Mutual Telephone Company was held on Thursday evening at the home of Mr. H. T. Barden. All shareholders were present. The minutes of the previous annual meeting were read by the secretary, Mr. C. R. Burchard and were adopted as read. The company ended the year with a small cash surplus. All things considered the year 1936 was quite a success. Walter Bellamy was elected president for the coming year and C. R. Burchard was re-elected secretary-treasurer. A vote of thanks was tendered Mr. Burchard for his past services.

OBITUARY

We regret very much to have to report this week the death of Marian Sutton, daughter of Mr. and Mrs. James Sutton. Death was caused by pneumonia and complications. The death is a particularly sad one as it is the second young daughter Mr. and Mrs. Sutton have lost during the past weeks.

The funeral was held on Wednesday and was attended by many sympathizing friends.

List of floral offerings to appear next week.

WOODLAWN

The Good Will Club held their February meeting at the home of Mrs. Stanley Brown. The sunny afternoon brought forth a large attendance of members. Mrs. Leslie McGinitie, Mrs. John Brown and Mrs. Roger Ray were visitors to the club. Extra widths were added to the school curtains to have them in readiness for the big play Saturday evening.

After an enjoyable afternoon the hostess served a delicious lunch and the guests departed homeward.

Miss Margaret Cookson spent the week end at the home of Miss Mary Winquist.

The Winquist kiddies have had a touch of the flu but are doing nicely again.

A number of the Woodlawn residents attended the hockey game at the Miquelon rink last Sunday. By all reports it was a very interesting game.

AMISK CREEK

OBITUARY

Mrs. Ivar Aanebo passed away at her home here February 22nd. She took ill with the flu which later developed into pneumonia, the cause of her demise. Mrs. Petra Cornelia Aanebo was one of the old timers of this district. She came here and settled on a homestead thirty-three years ago. She leaves to mourn her loss a loving husband, four daughters and two sons, besides many other relatives and a host of friends. The funeral was held Thursday, February 25th. Service was held at the house in the Norwegian language and in Ryley in the English language. Rev. C. Hoverstein conducted the services. Burial took place at the Ryley cemetery. Mr. H. Fohs was the funeral director.

Our deepest sympathy is extended to Mr. I. Aanebo and family in their

PROGRESS OF CANADIAN CAMPAIGN

The London office of the Canadian Wheat Board, under the management of its European Commissioner, R. V. Biddulph, is making good progress with its advertising campaign, and several attractive advertisements proclaiming the merits of bread made from Canadian wheat, have appeared. The copy points out that "England is today enjoying better bread than it has tasted in recent years. Why? Because the bread contains so much Canadian hard wheat and is baked in England by expert English bakers.

In addition to the displays appearing in the daily press, the board is utilizing the milling and baking trade press concerning the merits of bread made from Canadian wheat, and bakers are asked to make this fact known in their respective neighborhoods. Bakers are requested to ask the miller, importer or factor, for flour with a high content of Canadian wheat.

Advertisements also have been inserted in the milling papers stating that the Canadian Wheat Board, as a result of its campaign, is already receiving numerous letters from consumers asking where and how to obtain bread made from Canadian wheat. The advertisement states that all such inquirers are informed that their local baker is in a position to supply a high grade loaf made from Canadian wheat. All they have to do is to ask for it. The millers of the United Kingdom are asked to co-operate —The Northwestern Miller

THE BOYS' WHEAT CLUB WINNERS

William Maksymec and brother Mike of Northern Valley. The former obtained the highest score in the standing crop competition of the Alberta Junior Wheat Clubs, and the latter tied with E. N. Scott of Rochfor Bridge for second place. A total of 750 boys were entered in this contest

William Maksymec is nineteen years old and brother Mike seventeen. They were born and raised at Northern Valley. Both have been members of the Junior Wheat Clubs there for three years and have taken a great deal of interest in the work. Both boys have their plans made to be farmers and give promise of being in the forefront in that occupation.

MORATORIUM WILL BE DECLARED SOON

Temporary moratorium will be declared in the immediate future, probably on Tuesday by the provincial government to prevent a rush of mortgage foreclosures throughout the province as a result of the judgement of Mr. Justice A. F. Ewing, declaring ultra vires the Dept. Reduction and Settlement Act of the province

This was reported on reliable authority on Monday, following statements that since Friday last when Mr Justice Ewing's judgement was handed down, there has been a rush of mortgage foreclosures

The government will declare its moratorium in order to bring about a stay of proceedings until such time as it has an opportunity to study what should be done as a permanent cure for the economic ills under which the people are laboring.

As a starter the government is likely to declare a moratorium for a three months period and this can be extended if necessary and deemed advisable

The government had power to invoke a moratorium in the whole or any part of the province, under provisions of the Debt Adjustment Act, a consolidation of which was passed at the special legislative session last August.

NEW SEA SERPENT REARS ITS HEAD OFF SHETLANDS

LONDON, Feb. 22. —A strange sea creature 30 feet long, which raced a steamer off the Shetlands was seen from the inter-island vessel Earl of Zetland, according to passengers and crew who arrived at Lerwick.

They said they were able to observe it at fairly close range. They noticed three large pointed fins about six feet in height. It was obvious they said, that they were not dorsal fins of three big basking sharks.

The length of the creature was estimated at 30 feet at least, though the head and tail were always below the surface

The fins were dark in color and the fish moved at a fast speed, passing the steamer easily. It was still visible when two or three miles away. When it came to the surface it emitted a loud puff, or blow, but it was not a whale.

* * *

THE WORLD OF WHEAT

* * *

By R. G. L. Strange

A new variety REWARD has beaten Marquis for the Canadian Championship at Toronto, and the World Championship at Chicago!

In the winter of 1927 the cable dispatches of North America carried this news. Farmers, seed growers and scientific agriculturists were greatly interested. All wanted to know something about the new variety.

Reward wheat, it seemed, gave kernels that were unusually hard, exceedingly uniform and plump, of a beautiful dark red color and high in weight per measured bushel. It attracted the eyes of the judges then, and has done so at every grain Exhibition ever since.

Reward is the result of a cross between Marquis and Prelude, made by Dr Charles Saunders in 1912 and selected, as was Garnet, by Dr. L. H Newman, for test in 1923.

In addition to its magnificent appearance Reward is even better than Marquis in milling and baking value, and as well is from 5 to 7 days earlier than Marquis.

Here at last, it seemed, was the perfect wheat for the northern country. Alas! tests eventually revealed that Reward lacked in one character—most important to the farmer—its yield was definitely lower than that of Marquis, and so it has failed, unfortunately, to fill the place expected.

Following factors have tended to raise price:— China purchases Argentine wheat—Some opinions that France faces considerable inflation—Too much rain falls in parts of India—France announces tariff rebate on imported Durum wheat.

Following factors have tended to lower price:—Normal crop virtually assured in principal Argentine corn area—French Cabinet issues decrees to curb any rises in prices—Quality of southern hemisphere wheat crops well above average—Beneficial precipitation in U.S. southwest—Argentine wheat offered for resale at prices lower than quoted by shippers—Continued large wheat shipments particularly from Argentina.

Russia Attracts Thousands of Tourists

More than 100,000 foreign visitors have travelled through the new Russia under the care and guidance of "Intourist", the State travel agency. This season notably increased interest in the land of the Soviets indicates that a very considerable number of people not only from Canada but from the United States as well will include Russia in their summer itineraries, according to information received at the headquarters of the Canadian Pacific Railway in Montreal. Many round the world parties are adding to their knowledge of the country by using the Trans-Siberian Railway which has been modernized and double tracked. The picture layout gives a broad idea of certain phases of Russian life under the Soviets. Indicative of the part women are playing in the new regime is the distinction won by Anya [illegible], shown in the oval upper left, of being the first aviatrix and parachute jumper. The centre picture illustrates the progress in education, and shows an attentive class learning some useful wrinkles in chemistry. That all is not hard work is proven by the scene in lower left which shows a group of harvesters, improving the noon time rest period with folk dances and songs. In lower right a good looking Russian girl is, in the traditional Russian manner, carrying in a basket of fresh picked [illegible]

Did You Ever Attend a

SPOOFEN-DUFFLE

PARTY?

"Spoofenduffle?" you query, "what is a spoofenduffle party?" You never heard of a spoofenduffle party?"

Well, we never did either. There probably isn't any such thing for the simple reason that no one ever started the idea and no one ever followed it up by repeatedly bringing it to public attention.

But people do know about Hallowe'en and Thanksgiving and Christmas parties. These events receive plenty of free advertising each year.

Wise merchants see to it that they have goods in stock which will help people to the fullest enjoyment of these festive occasions. Moreover, they let the people know about their readiness to serve them.

Window displays, floor and counter displays and advertising displays, all work together to the eventual benefit of merchants and customers.

Every merchant in Tofield has some goods which will abet the enjoyment of the winter party season.

May we help you to help others enjoy their parties to the fullest extent?

THE MERCURY

LIGHTS IN THE SCHOOL HOUSES—

A TRAVELLER from Edmonton to Tofield on Wednesday night casually remarked that the lights were on in nearly all the school houses en-route. And went on to say Social Credit Groups were meeting and pondering events within their party since last they met. Perhaps he was wholly right or partly right—it does not matter. What does matter is that the Social Credit Groups that were assembled in country school houses should realize that, assuming most of them were farmers, they are the people who do the giving when any giving is done. This country, this province, depends for any degree of permanent prosperity it may enjoy, upon agriculture, mining, lumbering and fishing.

About a year ago the writer had occasion to journey to Edmonton fairly early in the morning, the trip being made for the purpose of visiting the parliament buildings. Driving along the road we passed a farm, none too prosperous looking, upon which was a very humble habitation. As the car in which we were riding passed, the door opened and a woman came out, took a few steps and picked up some wood, which judging from the smoke commencing to rise from the chimney, was for a fire just started. Later, after having reached the parliament building and while still amid the marble and mahogany magnificence of that edifice, the thought kept recurring that while the manner of payments may be intricate, labor from farms such as we had passed went to provide the architectual splendor amid which we were standing. And we wondered what part—what beneficiary part—the woman whom we saw picking up wood, played in the grand scheme of provincial finance. As to benefits received, we do not know, but we do know that on every bushel of grain, every pig, yea, every brood of chickens, somehow, somewhere, the producer pays a tithe to parliament buildings and all other provincial institutions. To expect it to be otherwise is equivalent to expecting water to run up hill; to changing the laws of gravity. Perhaps if we looked over to another continent we might get a clearer perspective of an identical situation. In a letter written in Australia the following passages occur:

> "More than this, I realized that we in Australia also think a great deal about an animal, a less interesting and amusing animal, perhaps, but a tremendously important one—the sheep. It has been said that "Australia lives on the sheep's back". That is quite true. It has been true for a long time. We know the real story of the Golden Fleece. Sheep-raising and wool are at the bottom of our development and our wealth. On the plains of this continent are pastured the world's finest flocks, and wool normally represents from 35 per cent to 45 per [illegible] of our exports. One-quarter of the world's wool comes from down here.
>
> "Don't get the idea from this that we all live on sheep stations. As a matter of fact most of us live in our four great cities. But I think that in the final analysis, it would be admitted by all of us that the most important man in modern Australia is still the "man of the frontier", the pastoralist."

The object of the quotation is to show that in Australia, as in Canada, the "most important man" is the man who actually produces. No amount of theory will replace a bushel of wheat once it is eaten or a pound of wool once it is worn out. Therefore the flowing tide of economic support must flow from the farms to the capital. To expect permanent prosperity with the tide running the other way is to expect a miracle.

It is good that the lights in the school houses are on. It is good for people to meet and discuss rationally, even critically, affairs of government, for government we must have. It is wise, however, that people realize that they, not the government, are the providers.

THE "GUARDIAN" LOOKS AT PEACE—

TO ATTEMPT to settle our differences, in the present highly organized state of the world by indiscriminate distribution of high explosive shell, incendiary bombs, and poison gas is like trying to regulate a delicate and expensive clock by stirring up the works with a red-hot poker or smashing them with a crowbar....

No war settles the questions about which it was fought since they have all ceased to have any importance long before the war is over .... If our (Great Britain's) rulers....would demonstrate to the world that we would neither go to war for our own supposed interests nor allow ourselves to be jockeyed into war in connection with the quarrels of other nations, I believe that we should not only do the best for ourselves and for our Empire but would soon raise in other nations a clamor for release from the chains of conscription, war taxation, and international hatred....

There is no need to "give away our Empire to other people" as some critics of pacifism say. An international conference to consider the just requirements of all nations in respect of raw materials and of opportunities for emigration and the "open door" everywhere in place of present-day crazy economic nationalism are the things called for alike by Christianity and by common sense.—Manchester Guardian.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PREVENTION OF CONTAGIOUS DISEASES

Mothers, do you realize that fifty years ago 'black' diptheria wiped out whole families in a very short period of time? Like a plague it swept through many towns and villages, leaving death in its trail, and very little could be done about it. Today most towns and cities are practically free from diptheria. This dramatic change in the picture is largely due to the development of diptheria toxoid, which prevents the disease in children and adults. The giving of the diptheria toxoid produces no discomfort.

Another disease which in the past has caused disfigurement and death is smallpox. Today it is practically unheard of in this country. This state of affairs again is due to the widespread use of vaccination against the disease. Diptheria toxoid and vaccination against smallpox have prevented two of the worst plagues of mankind and all parents should have their children protected against these diseases.

There are other contagious diseases which although not absolutely preventable like diptheria and smallpox, can be modified and in some cases prevented by early recognition and treatment. The most serious disease of the latter group are scarlet [illegible], [illegible] and whoo[illegible] cough. Contrary to the generally accepted idea that all children develop these diseases and recover from them, is the fact that death occurs from all three in certain infants and young children. Pneumonia following measles and whooping cough is often a cause of death. Remember, mothers, your infant or young child may be one of the less unfortunate and develop complications from scarlet fever, measles and whooping cough, which may cause life-long disease or death. Never allow your child to be exposed to contagious diseases with the excuse that he will get them sometime anyway.

The family physician should always be consulted when any suspicion is aroused that a contagious disease has attacked your child. The physician will be able either to prevent these diseases or modify their severity by early treatment.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

FARMERS' INTEREST IN TRANSPORT RATES IS HELD PARAMOUNT

Line Elevators Tell Government Limiting Lake Freight Competition is Disadvantageous to Farmer's

Winnipeg—Appeal to the Dominion Government to consider the interest of the farmer as paramount in legislation relating to grain transportation rates now before Parliament was made in a telegram forwarded to the Hon. C. D. Howe, minister of transport, by the North-West Grain Dealers' Association.

The message dispatched to the Government by the Line Elevator Companies who comprise the membership of the North-West Grain Dealers' Association reads:

With reference to proposed Act to establish a Board of Transport Commissioners for Canada the Country Elevator Companies who are members of this Association and whose customers comprise more than 50 per cent of Western farmers respectfully draw Government's attention to danger that the fixing of uniform rates for steamship companies upon Great Lakes will tend to limit competition presently beneficial to cost of movement of Canadian grain and particularly to possibility of additional burden upon Western farmers due to increased freight charges STOP Earnestly recommend that interest of hard pressed Western farmer be considered paramount in any legislation or regulations directly or indirectly affecting grain transportation rates.

SLOOP LEAVES FOR LONELY OCEAN ISLE

SUVA, Fiji Islands, Feb. 22. —The sloop Leith departed today with a Fiji government wireless officer and complete radio plant for Christmas Island, 2000 miles northeast of here in the North Pacific ocean.

Only a French couple are reported to be living there.

The sailing indicated Great Britain intends to perfect its claim to Christmas Island, largest and most desirable of a number of scattered mid-Pacific islands, ownership of which has been disputed with the United States for years.

CARE OF THE SOW AND LITTER

The brood sow should be in a condition when bred and maintained in breeding condition, neither too fat nor too thin, during pregnancy.

Daily exercise is necessary and can be ensured by providing pasture in summer and feeding in a outside lot in winter previous to farrowing, at some little distance from sleeping quarters. During winter some fresh sods, green feed and roots will help approximate summer pasture conditions. Care must be taken to prevent the sow from becoming constipated. Bran should be added to the regular ration two weeks or more previous to farrowing. A suitable mixture for pregnant sows consists of 2 parts oat chop and one part shorts or ground wheat supplemented with a little skimmilk or 5 per cent tankage.

To prevent hairlessness or goitre in new born pigs, one ounce of potassium iodide should be dissolved in one gallon of water and each sow given one tablespoon of the solution two or three times weekly in feed. If the sow farrows during cold weather, artificial heat will be necessary and special care should be taken to prevent chilling of the new born pigs. The use of a small amount of cut straws for bedding, and guard rails, will help prevent tramping and crushing of the little pigs

When the sow becomes hungry after farrowing, she may be given a little warm thin slop, containing oat chop and bran after which the regular nursing feed may be introduced and gradually increased over a period of several days to all the sow can eat in two or three feeds daily. A good nursing ration consists of equal parts oat chop and shorts supplemented with 3 pounds of skimmilk per pound of meal or 10 per cent of tankage and a little bran if available.

If a little sweet skim-milk with sifted oat chop, shorts, etc. are provided for the little pigs in a creep they will learn to feed at an early age and receive no setback at weaning. Castration should be attended to when pigs are four to six weeks of age so that they will be healed before weaning. Weaning is generally advisable at six to eight weeks. Sows and litters handled as outlined above at the Experimental Farm, Indian Head, Saskatchewan, have invariably given good results.

FARMERS HELPED BY WEATHER RECORDS

In order to have meteorological records in convenient form for farmers for reference purposes, certain of these records, as reported by the Experimental Farms and Stations of the Dominion Department of Agriculture throughout Canada, have been incorporated in the Progress Report of the Division of Field Husbandry for the years 1931 to 1935. The report which has just been issued is published in two parts, one dealing with Eastern Canada and British Columbia, and the other with the Prairie Provinces, Manitoba, Saskatchewan and Alberta. These meteorological reports have been prepared in co-operation with the Meteorological Service of Canada.

As the Experimental Farms and Stations are located in the principal agricultural regions of Canada, the weather records in the Report present a fairly representative picture of the climatic conditions of these regions. Tables showing the average monthly temperatures at the different stations, the average monthly precipitation, the average annual snowfall and rainfall and the average monthly hours of sunshine are given. In studying the information contained in the report, it has to be kept in mind that the figures in each table are the average for the month or year, and have been calculated from daily records. Deviations occur and the records in a given month or year may be considerably above or below the normal as presented. It is the deviation from this normal figure which most frequently affects the yield of crops abnormally. In order to learn the effect of variations in weather upon crop yields in a given year, it is necessary to have complete figures for the year in question, rather than an average for a period of years. Such figures are available at all times in the office of the Field Husbandry Division, Central Experimental Farm, Ottawa.

With regard to sunshine records, Dominion Experimental Stations at which an average of more than 2,000 hours of bright sunshine are recorded annually include Ottawa, Harrow, Ont., Saanichton and Summerland, B.C. as well as stations located in the Prairie Provinces except Indian Head, Sask.

HEROIC OPERATOR DIED AT HIS KEY

HALIFAX, N.S. March 1.—Plans to erect a memorial to commemorate the unselfish deed of Vincent Coleman, gallant victim of the Halifax munitions explosion of December, 1917, are discussed in the current issue of the Canadian National Railways Magazine. Vincent Coleman was working the dispatch key in the Canadian National Railways station at Richmond, when fire broke out in the munition ship Mont Blanc, then in the harbor, a scant 200 yards distant, as the crew fled from the vessel, the cargo of which was presently to explode, cause loss of life to 1,635 persons and lay waste a great area of Halifax. Realizing the great impending catastrophe and knowing that a train with 350 passengers was soon due, Mr. Coleman tapped out this message to the next station:

"Hold up train. Ammunition ship afire in harbor and will explode. Guess this will be my last message. Good-bye boys ......"

The greatest explosion of man-made explosives the world ever knew put a period to the message, but the train was flagged at Rockingham and 350 lives were saved from the inferno. The body of Vincent Coleman his hand still holding the telegraph key on which he tapped his death message was found in the shambles that represented what had been a suburban railway station.

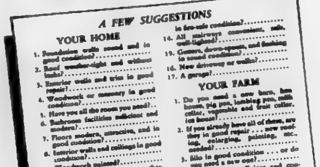
Modernize your Home...
or your Farm Buildings!

Check over this list . . . .

You give the orders—we can provide the money

When you have decided on what jobs you want to carry out either in your home or your farm buildings, come to the Bank of Montreal, which is co-operating with the Government in financing this work . . . our manager will be glad to talk over your plans with you with a view to arranging a loan for the purpose. Loans are repayable in easy monthly instalments.



A FEW SUGGESTIONS

YOUR HOME

1. Foundation walls sound and in good condition?
2. Roof weather-tight and without leaks?
3. Exterior walls and trim in good repair?
4. Woodwork or masonry in good condition?
5. Have you all the room you need?
6. Bathroom facilities sufficient and modern?
7. Floors modern, attractive, and in good condition?
8. Interior walls and ceilings in good condition?
9. Woodwork painted?
10. Doors and windows weather-tight, easy to operate?
11. Walls and roof insulated against heat and cold?
12. Enough closet space? Built-in conveniences?
13. Chimneys drawing properly and in fire-safe condition?
14. All stairways convenient, safe, well-lighted?
15. Gutters, down-spouts, and flashing in sound condition?
16. New driveway or walks?
17. A garage?

YOUR FARM

1. Do you need a new barn, hen house, pig pen, lambing pen, milk cellar, vegetable and fruit cellar, ice house?
2. If you already have all of these, are they in good repair . . . new roofing, enlarging, painting, etc., needed?
3. Silo in good condition . . . or do you need a new one?
4. Water supply efficient and convenient . . . do you need to put down well or erect windmill?
5. Have you a proper shelter for farm machinery? . . . Tool shed and workshop?

AMISK CREEK

(Continued from front page)

recent sad bereavement.

Andrew Elvestad, brother of the late Mrs. Annebo, from Grand Prairie, attended Mrs. Annebo's funeral.

Mrs. W Garthee from Viking visited with her sisters Mrs. Berg and Mrs. Flaaten for a few days.

Gordon Sand who has been visiting around Elk Point for some time returned last Friday. He is staying with his aunt and uncle, Mr and Mrs. P. O Flaaten.

Mr. and Mrs E A Moen, Hilmar and Edna were guests at the A Haukedahl home in Bardo last Sunday.

Ole and Anna Berild visited their sister who is teaching school at Miquelon Lake, over the week end.

Mr. and Mrs. P. O. Flaaten held a social evening for the Young Peoples' League last Saturday evening. About thirty persons were present. The evening was spent with playing games and contests Lunch was served about midnight after which the guests departed.

The Young People will have a program in the church next Sunday evening. Everybody welcome.

Mr. and Mrs. L. Reifstad and children visited at the P. O. Flaaten home last Sunday

Grandma Moen, Mrs. A. Patterson, Mrs. W Garthee and Mrs. P. O. Flaaten visited at the E. A Moen home Monday afternoon.

CARD OF THANKS

Mr. Iver Annebo and family wish to thank their many friends for the kindness and sympathy extended to them during their recent sad bereavement, also for the beautiful floral tributes received.

EXCITING HOCKEY GAME SATURDAY LAST

In what could truthfully be said to be the best hockey game on local ice this winter, Edmonton Motors barely nosed out a win over the local aggregation. This was the first time an Edmonton team has played on Tofield ice for quite a few years and the local boys were "on their toes" to turn in a good performance. That they did it is past history and while they did not turn in a win, the large number of fans present were well pleased with their showing. The crowd incidentally was the largest this winter and was the result of, partly the drawing power of an Edmonton team and partly the fine night.

The first period opened up fast, the locals setting the pace in an endeavor to obtain a lead. The visitors who were fast skaters and some of them very tricky, were seen matching the speed of the locals. Before the period was many minutes old, both teams were battling on even terms. Tofield scored the first marker when Sears shot from left wing, beating the goalie neatly. A few minutes later Swinton from right wing repeated, giving the locals a lead of two goals. Edmonton kept boring in at this time but seemed unable to find correct range, many shots going wild. Those that were on, Burke handled comfortably. The period ended 2-0 for Tofield.

The second period was fast hockey at times very fast, and was peculiar, inasmuch as Edmonton scored two goals in rapid succession at the very beginning of the period and two goals in rapid succession right at the close of the period. The period was less than a minute old when Muir for the visitors skated through and gave Burke no chance A minute later he repeated and the score was knotted About midway through the period Matchmess for the locals shot the rubber in the hemp and Tofield was one up. A little later Everitt of the local defence after a smart run down the ice shot and scored. This goal was of the "pretty" variety and was well earned. A two goal lead with the second period nearly gone looked good, but a minute or so before time Hart and Mather for the visitors scored in quick succession and the score was tied up at 4-4 as the period ended.

The third period was a ding-dong affair Norman Glover for the locals scored first, but the advantage was short lived as Loftess for Edmonton kept his team in the running with a marker. Jack Bowick for the locals then scored only to have Mather for Edmonton retaliate and the score was again tied at 6-6. The fans had visions of an overtime period but Hart for the visitors scored the 13th goal of the game which was unlucky for somebody. Tofield desperately tried to get the equalizer but the final bell rang without result. The final score was 6-7 in favor of Edmonton Motors.

Line-up—Edmonton Motors: Warner; McDonald; Hare; B. Muir; Loftess; J. Muir; Mather; Hart; Oare.

Tofield—Burke; L. Glover; Everitt; Sears; Swinton; Whyte; Bowick; Matchmess; N. Glover.

Referee: J. J. Hannan.

MIDGETS PLAY AT RYLEY

Stan Burke's midgets played the Ryley aggregation on Saturday last and won by the score of 4-0. This was the "big" game of the season for the boys and a thriller.

Tofield line up—Harold Pearson; Arthur Fardy; Hughie McAllister; Geo. Yakupik; Don. McAllister; Aaron Witzen; Martin Lunkin; Joe Lakalon; Johnnie Young.

Sorry we haven't the Ryley line-up.

WEDDING

On Tuesday afternoon, March 2nd, in the United Church manse, Miss Mildred A. Ingram, daughter of Mr. and Mrs. James Ingram, Ketchamoot was united in marriage to Mr. Wendall H. Wiley Rev. D. K. Allan officiated. James Ingram jr. and Kathleen Ingram were witnesses to the ceremony. Mr. and Mrs. Wendall Wiley will reside in the district.

LARGEST CROWD SINCE SPORTS DAY

The free picture show on Thursday afternoon brought out the largest day-time crowd seen on Tofield main street since sports day. At noon the occasional car was coming into town and by one p.m. there was hardly parking space on main street. At the first showing the Variety Theatre was packed to the doors and judging by the remarks of those attending they were well pleased with the program. The picture show was presented by the John Deere Co. in collaboration with M. C. Hammond the local dealer.

SCHOOL NOTES

By E.G.R.

On Friday last the Tofied High School Students' Union held a Skating party at the rink Hockey, broomball and skating was the order of the evening. The girls' skating race was won by: 1st Minnie McAllister; 2nd, Louise Stevenson. The boys' skating race was won by: 1st Arnold Swift; 2nd James McAllister; 3rd Mr Mcintyre.

After a pleasant evening at the rink, soup, crackers and candy was enjoyed at the school.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

Large Number Attend John Deere Moving Picture

As announced in our brief mention last week of this event, held at Tofield on Thursday, March 4, the number attending probably constitutes a record for picture show attendance at Tofield. The pictures were of more than ordinary interest and while of course were designed for publicity purposes, yet contributed in a very real sense educational entertainment of a high order.

The "Blacksmith's Gift" was a picture of a kind to capture the imagination of enterprising striving folk, depicting as it did a brief insight into the life of John Deere (1804-1886).

John Deere was born in Vermont and was the son of an English tailor. When eight years of age his father left for England, but while his trunk arrived, no word was ever heard from him after. John Deere's mother carried on the tailor shop and her son as soon as able commenced to help with the family fortunes. His first work was grinding bark for a tanner and later he apprenticed him

ROCKS

(Continued from last week)

"Oh, I see " Down I went on my knees I would show the giggling idiots that I could hit the skip's broom. With foot in hack once more I shoved the rock

When my skip saw that rock coming, he started to yell "Whoa, whoa," Well, all his "whoaings" couldn't stop that rock. It hit the other end of the rink with a bang. I'd show them I could throw a rock down the ice Yes, sir!

I walked down the ice with what dignity I could, and took my place at the side, ready to sweep. Now, sweeping isn't much in my line. Madge does most of that, but I had watched carefully how the other fellows did it and felt sure I could do the same

By this time another man was ready to shoot, away went his rock. I had made up my mind that I had had enough order, for one day, so as soon as that rock came near me I ran out to sweep it Two fellows were sweeping already, but I'd made up my mind I'd show the skip I wasn't afraid of work At last the rock stopped inside the rings, I looked at it with pride, feeling that it was only with my help it had gone so far Armstrong touched me on the shoulder "Jones," he said, "I don't know where you have curled before, but here we don't sweep our opponents' rocks."

I had only gone a little way down the ice when I heard everyone yelling, "Ice, ice " I turned to look at my skip, after this I wasn't going to listen to anyone else. Something hit me on the feet.

When I awoke, I was at home in bed My head all bandaged up, and old Doc Scott was saying to Madge. "You don't need to worry Mrs Jones, it's only a slight concussion Keep him quiet for a day or two, he'll be all right "

There is a second-hand curling ticket, broom and a blazing sweater for sale at Jones' cheap ...Madge hasn't mentioned curling since

HERBERT T H ELLIS

GALLINGER PLACES GOOD SHORTHORN SIRES LOCALLY

Claude Gallinger, Tofield Shorthorn breeder, informs the Examiner that never since he has been in the business has he had the number of inquiries that have been received recently concerning his herd—and they have not come only from Canada but the United States as well.

Alberta breeders have also apparently been anxious to get young herd sires from the fashionably bred Gallinger Shorthorns, as he reports several sales.

To W. W. Sharpe, of Stettler, goes one of the best young bulls that Mr Gallinger thinks he ever raised This calf is Rothes 11 months' old sired by Lord Rothes, grand champion at the C N E, at Toronto, and junior grand champion and reserve grand champion at the Royal in Toronto in 1934 His dam is Averne 37th, of that family strain, and she was junior and grand champion at the Wisconsin State Fair in 1933 Not only has this calf got royal breeding but has outstanding individuality He is a dark red, low set, and has lots of bone, and in the hands of Mr Sharpe should develop into a real breeding and show bull.

Another young bull was chosen by W. S Henderson, of Calgary who got Rosewood Balmuchy, sired by Balmuchy Jasper, by the imp. Balmuchy Landlord, that was grand champion at the American Royal in 1932. His grand-sire is Naemoor Jasper, considered by many stock men as the greatest breeding Shorthorn of all time. Rosewood of Helford, his dam, was sired by Collynie Clipper Star, grand champion at the American Royal and at Chicago in 1933.

Mr. Henderson is just founding a herd and he should be away to a good start with a sire of the breeding and quality of the selection he has made from the Gallinger herd

LOCAL & PERSONAL

Miss Beryl Edwards and Miss A. Tanberg from Ryley spent the week end at the Edwards home

Charlie Edwards left on Saturday evening for Trail, B C where he will be working.

Harland Thompson left on Saturday evening for Montreal

Mrs. H Rollins from Viking is spending some time in Tofield visiting friends.

Mr and Mrs R. Whyte of Wetaskiwin spent Sunday at their parents homes here.

Miss Margaret Whyte who is training in the Royal Alexandra hospital in Edmonton visited her home here on Sunday She was accompanied by two of her class mates.

Mrs C. Patterson and Mrs. B. Lovell are attending Rebecca Lodge in Calgary this week.

Mr Everett is back from Hamilton, Ontario

[illegible] Firth returned from Calgary this week.

Mrs. Malcolm is visiting in the city for a few days.

Mrs N Scott and Norma visited the city last week

Mr and Mrs H E Rogers and Mr and Mrs Clutterham motored to Edmonton on Sunday.

Born: To Mr. and Mrs. A. Lewis of Rimbey, a son.

On Thursday evening of last week the Tofield young people gathered together to bid farewell to Charlie Edwards and Harland Thompson, both of whom were leaving town shortly. Dancing was the order of the evening and a very pleasant evening was had The party broke up with the singing of "For They are Jolly Good Fellows" and "Auld Lang Syne."

Mr P. Dunn spent four days of last week attending the Ford School in Edmonton.

On Friday evening last the Jolly Twelve Bridge club held a masquerade party at the home of Mr. and Mrs. Currie Honors in bridge were won by Mrs Coutts and W. Schultz, and consolations by Mrs. Wallis and Mr A Hummell.

E. W. ROGERS

LAMB STEW

At this season of the year when many persons may be convalescing from colds, soups and broths are highly desirable while the invalids are confined to bed. Stews are also easily digested during the stages of convalescence. Lamb is a particularly healthful meat both for invalids and for persons who are well and active. The following recipes may prove to be timely:—

Lamb Stew (French Style)

Cut meat into two-inch squares. Roll in seasoned flour and brown in a hot frying pan or kettle. Add boiling water to cover and simmer until partly cooked. Add turnips, carrots, and onions sliced, peas and beans. Simmer until the vegetables are tender.

Lamb Stew (Irish Style)

4 lbs. meat
12 lbs. potatoes
5 onions (medium size)
5 carrots (medium size)

Cut meat in two-inch squares. Place in cold water and bring gradually to boiling point. Simmer for one hour, then add vegetables (cut in any desired size) and seasonings. Simmer until cooked, remove meat and vegetables, thicken liquid and serve. To make dumplings for stew, sift together 2 cups flour, 4 teaspoons baking powder, ½ teaspoon salt. Add gradually 2-3 cup milk to make soft dough, and drop by spoonfuls on top of hot stew. Cover and cook 15 min.

Lamb Broth

Buy 2 to 4 pounds of neck and shank pieces. Have butcher cut into small sections. Add two quarts of water, 1 teaspoon salt, 3 tablespoons rice or barley. Put into pot, heat gradually to boiling point, season with salt and pepper, and simmer until meat is tender. Strain and remove fat, heat to boiling point and add rice or barley. Diced vegetables may be added when meat is partly cooked. The addition of potatoes, onions, peas and beans will make a more strengthening broth.

LOW RAILWAY FARES FOR EASTER HOLIDAY

WINNIPEG, Man., March 1.—Announcement has been made by R. Creelman, Passenger Traffic Manager, Canadian National Railways, Western Region of reduced fares between all stations in Canada on the Canadian National Railways, for the Easter holiday.

On the going journey, tickets will be good from Thursday, March 25 to 2 p.m. Monday, March 29th, and good to return not later than midnight, March 30.

The fare will be the one-way fare and one-quarter for the round trip and will be good for all classes of travel—coach, tourist and standard sleeping cars and parlor cars upon payment of the usual charge for accommodation required.

His Manners

"You have several fine estates, I believe," said the Duchess of Wapsinger. "Would you mind telling me where they are?"

The Earl of Suffix sat without answering.

The duchess repeated her request, but the earl did not utter a word. Finally he looked at her and smiled vacantly.

Her ladyship became flustered. Just as the earl's wife came near she raised her voice and asked the question a third time.

Lady Suffix sensed the situation at a glance. She approached her silent husband and laid an indulgent hand on his shoulder.

"Come, dear," she smiled. "You are forgetting your manners."—Wall Street Journal.

Glasgow savants say that Scotland has tilted a [illegible] feet in the last 72 years. The inhabitants of course are laughing with their free ride.—New Yorker.

TEXT OF DEBT PLAN SUGGESTED TO GOVERNMENT

On Feb. 12th 1937, a committee of the Dominion Mortgage and Investments Association and of the Mortgage Loans Association of Alberta informed the government of the province that the lending institutions, members of these associations, were prepared to make concessions to their farm borrowers and to submit a plan embodying such concessions, and since that date these associations have been giving attention to the formulation of such a plan.

In the meantime the judgement in respect of the Reduction and Settlement of Debts Act was delivered on Feb. 19 1937.

While the lending institutions have already made many adjustments, resulting in substantial concessions to farm borrowers in Alberta, they desire to submit a proposal embodying a further adjustment of debts of general application as to those borrowers as set out in the following proposal. The details can be the subject of settlement between the government and a committee of the lending institutions.

For the purpose of applying the proposed scheme of adjustment the province is to be divided into two areas.

Area A

Districts to be included in this area are to be more definitely defined by agreement between the government and a committee representing the lending institutions on the basis of the crop records as shown by statistics of the Department of Agriculture at Ottawa covering the period of the last say, six years. This area is intended to include those districts which have suffered most severely from crop failures during that period.

In this area the interest rate on all farm mortgages held by the companies will be reduced to six per cent as from Jan. 1st, 1937. In addition to this reduction in the rate of interest all unpaid interest accumulated down to January 1st, 1936 will be cancelled and the maximum amount owing to any mortgage in this area at Jan. 1 1937, will be the principal amount of the mortgage, together only with any amount of interest which shall be due for the years 1935 and 1936 on such principal.

In addition any payments received from the borrower out of the 1936 crop will be applied in reduction of the 1935 and 1936 interest. The interest will then be consolidated with the principal outstanding on the mortgage, so that the mortgage will no longer be in arrears and the mortgagor will be given a fresh start. A renewal agreement will affect this consolidation and will provide for a payment of five per cent of the principal annually with the balance due in the tenth year. During 1937, 1938, 1939 if the farmer delivers a one third share of the crop then notwithstanding that the proceeds of such one-third share shall NOT equal the stipulated payment of principal and interest, the farmer shall NOT be in default, and the balance unpaid on such installment and interest shall be due and payable on the next due date, but if the proceeds of the said one-third share of crop exceed the annual installment of principal and interest, the excess is to be accepted by the company and applied on the mortgage account. If the crop is less than the cash value of ten bushels per acre, Number 2 Northern, current year's taxes to be paid out of the one-third share of crop. The agreement when executed will terminate bonus credit arrangements, previously in force and will supplant all former agreements.

With respect to agreements for sale in this area, all interest unpaid down to the first day of January, 1935, will be written off and in addition where it is necessary to make further adjustment on an agreement [illegible] taking an amicable arrangement with the borrower, the matter will be referred to the Debt Adjustment Board. Interest will be reduced to six per cent as of the 1st of January 1937.

With respect to both mortgages and agreements for sale in this area where the borrower has signified his [illegible] action with the adjustment by signing the renewal agreement, then the agreement is to be free from the Debt Adjustment Act. If the government [illegible] that credit [illegible] other than the lending institutions, holding mortgages or agreements for sale in this area should make the same measure of adjustments as the companies then the existing Debt Adjustment Board can deal with them.

Area "B" the rest of the Province

The interest rate on all farm mortgages to be reduced to 6 per cent effective from January 1st, 1937. In addition, where individual mortgages carry an accumulation of arrears of interest due to the succession of crop failures, or by [illegible] of circumstances beyond the control of the mortgagor, the Companies will [illegible] at the earliest opportunity, consistent with their staff facilities, [illegible] the arrears of interest, consistent with the requirements and the merits of each such case. If the concession is satisfactory to the borrower, a renewal agreement will be entered into with him consolidating the balance [illegible] and thereby removing him from the position of default, and containing the provisions mentioned with respect to the agreements in Area "A". These mortgages will still be subject to the provisions of the Debt Adjustment Act unless the agreement executed by the borrower is submitted to the Debt Adjustment Board and approved by the Board. Once the Board has approved of the same, the agreement to be final.

General

In the case of trust companies holding mortgages in their capacity as executors or trustees or agents for others, it is understood that the consent of those beneficiaries would have to be obtained before such mortgage could be included.

There would be excluded from the general rule those cases where proposals have been made under the Farmers' Creditors Arrangement Act.

Insofar as concessions offered by the companies are concerned, it is not a condition that relief with respect to arrears of taxes, and seed and relief liens, should be granted to farmers by municipalities and provincial and dominion governments, but that is a matter to be dealt with by those respective authorities.

This voluntary arrangement of debt adjustment is based on the assumption that The Reduction and Settlement of Debts Act is invalid or repealed, and that no new legislation of a restricting nature affecting lending institutions will be enacted.

Seed Advance for year 1937

As part of the arrangements for the rehabilitation of the financial position of the farmer, the companies will be prepared to make advances for the supply of seed to those deserving borrowers needing it, in the manner they arranged last year.

ACCIDENT LEADS TO MAJOR INDUSTRY

A cow kicking over a lamp, they say, started the Chicago fire. A spider climbing a thread brought Bruce of Scotland victory. But these and many other like historical incidents pale before the story of the housewife whose carelessness founded one of the most important phases of the Canadian fish industry.

Away back in a Scottish village a housewife left a haddock hanging from the rafters of her cottage as she went out for the day. She had left it too near the peat fire, however, and when she returned the fish was all dried by the smoke from the fire. She decided to cook it anyway and the result was so appetizing that the news spread like wildfire and smoked fish became a national delicacy.

Today the popularity of smoked fish has spread everywhere and the appetite for this delicacy has founded Canadian organizations of international repute, some of which have been established for a century and more.

The Canadian climate has been found ideal for the production of this delicacy and other cured fish and today the Dominion holds a foremost place in the world trade in the export of dried, smoked, and pickled fish.

CORONATION CEREMONIES WILL PROVIDE GREATEST TRAVEL EVENT OF YEAR

WINNIPEG, Man. March 8.—Canada within the next few weeks will send its largest delegation in many years to England to attend the coronation ceremonies on May 12, exceeding even the number that left on the Vimy Pilgrimage last summer, according to R. Creelman, passenger traffic manager of the Canadian National Railways. "Already London is undergoing the change that will transform the city into a garden of color for the coronation," stated Mr. Creelman. "In addition to the gay and attractive street decorations along the route where tens of thousands of people will be seated, the places to be floodlit are Buckingham Palace, the Victoria Memorial, St. James' Palace, Westminster Abbey, the National Gallery, the Tower of London, Houses of Parliament and Tower, Trafalgar Square, Windsor Castle and Hampton Court Palace, to mention only a few of the more prominent edifices of interest."

Sailings from Montreal, timed for the Coronation have been augmented to include eight liners, these being the Alaunia, Andania and Duchess of York on April 23, the Ausonia on April 29 and the Athenia, Lancastria, Duchess fo Atholl and Montcalm on April 30. From Quebec the Empress of Australia will sail on April 24.

If you think punctuation doesn't matter, try shifting the comma in that news head: "Alice Marble, Champion."—Sales Management.

THE ESSENTIALS OF DEMOCRACY—

(By Raymond Crawford in Canadian National Railways Magazine)

IT IS NOT our purpose to discuss democracy as the working out of a political system as against other systems so prominent in our day, but rather to consider it as a spirit in its essence and its ideals, not forgetting its consequents.

Now that every adult—in Canada at least—has a voice in the direction of the affairs of state, and has something to say on the most momentous question of home and foreign policy, it is wise and well that we should acquaint or remind ourselves of what this much mentioned word democracy means. To use the memorable phrase of Lincoln in his famous Gettysburg speech it is nothing else and nothing less than "government of the people, by the people and for the people" but into this we interpolate the word "all", government of all the people, by all the people and for ALL the people, because many in our day seem blind to the comprehensiveness of the idea of democracy either as a spirit or a practical political system. If it is government of, by and for the people it must have certain qualities in order to make its parts cohere and function.

If all responsible people of adult age are in this democracy, there must obviously be a common aim, a common understanding and common ideals. This aim is, or should be, to have a safe, happy, contented and prosperous people. That being the case it is we who must bring about this condition; but who are WE?

WE are the artisan and the artist, we are the farmer and the business man, we are the banker and the broker, we are the jurist and the garbage collector, we are the shop-girl and the cabinet minister, we are the locomotive engineer and the physician. We, in short, are just the constituent elements of society and we must come together, recognize our place in this confederation, neither exalting nor depreciating our own importance, worth, influence or contribution. Democracy being essentially a spirit —through whatever bodily political forms it may express itself—it is necessary for its healthy growth that there should be common good-will. Nor can democracy be sane and safe without a sense of COMMON RESPONSIBILITY. No man can play his part in any orderly community if this be lacking. Along with this sense of responsibility there must be the power of self-criticism—something not too common in our day. Of criticism there is enough to spare, but usually it is criticism which does not include the critic himself in its scope. It would help to engender one of the greatest and rarest of virtues—namely TOLERANCE; tolerance which recognizes that others have rights just as we have, opinions just as we have, lives to live just as we have and happiness to seek like ourselves.

Another constituent element in this spirit that we call democracy is just ordinary PATIENCE. There are those who are impatient of everything. They want a change—quick and even revolutionary, but forget two things: first, that what we have of government or political system—faulty as all human institutions are, was not built up in a day. To this end we must venture to add another desirable thing—GRATITUDE, as rare as it is precious, and still another PATRIOTISM, not the kind alone that will impel one to do for one's country, but the rarer kind that will live for one's country, by seeking through honest and lawful means to add to its best life.

And finally as one of the most vital elements in this spirit of democracy we would mention KNOWLEDGE. Since we come into our heritage of franchise so early in life it is essential that we realize what devolves on us. These then are the things that democracy needs; a common aim, common tolerance, common patience, common responsibility, common patriotism, and the uncommon quality of common sense—with these we shall have security and sanity, without these or with their opposites, dynamite and chaos.

PROVES THEIR NATIONALITY—

Among the complaints of "bad food" listed by a prisoner at the Guelph Reformatory inquiry was that there was no sugar to sprinkle on their porridge.

If there are any Scots in the institution it is a certainty that they will not make that a cause of complaint. They would be more likely to complain if sugar was sprinkled on their porridge. Scotland is the land o' cakes and porridge and Scots know their porridge better than other people know their onions. They will simply not put sugar on "them." (Scots always refer to porridge as "them.") To do this is to spoil porridge for a Scot. If there are fifty men in a room eating porridge and one is supping "them" without sugar, you only need one guess at his nationality. Sugar on his porridge spoils "them" for a Scotsman as much as milk spoils tea for an Oriental.—Stratford Beacon-Herald.

THE WORLD OF WHEAT

By H. G. L. Strange

An internal economic battle for wheat markets will some day—perhaps soon—take place.

The contestants will undoubtedly be Canada, the Argentine, Russia, the Danubian countries and Australia. Which exporting country will be able to increase its wheat acreage? Which will be forced to decrease acreage? And which will be able to hold acreage they now have?

The country that can produce the highest quality at the lowest cost will win; others will lose.

The harsh truth is that it is much more necessary for Canada to keep her present acreage in wheat than it is for any of the other countries. The Argentine has corn, flaxseed and cattle as substitutes. Australia has mutton and wool. The Danubian countries have corn, pork and tobacco. Russia has a large population needing more foodstuffs. Canada alone has no substitutable product for export which she can grow on any substantial part of her twenty four million acres now in wheat.

Western Canada, therefore, somehow, must improve the quality of her wheat, and bring down the cost of production. Can she do this? Yes! I for one believe she can provided the Dominion Government will assist the West, even more than it is now doing, along sound, constructive lines.

Following factors have tended to raise price:— German food scarcity becomes more evident as purchases made of Czecho-Slovakian, Indian and Australian wheat, also Argentine wheat and corn—Further large quantities of wheat probably needed—Further dust storms with little precipitation in U. S. southwest—West coast Mexican vegetables damaged by frost.

Following factors have tended to lower price—Further heavy general rains benefit Indian wheat and linseed—On passage wheat stocks increase—Officially decided not to raise guaranteed price of wheat in France—Pear and apple production in Argentine increasing—Irish Free State increases home-grown wheat required in milling.

TITLED VISITOR SAYS NO WAR FOR 25 YEARS

MONCTON, N.B. March 8.—There will be no general war in Europe within the next twenty-five years or longer, prophesied Lord Riverdale, prominent British steel manufacturer, when interviewed on his arrival here over the Canadian National Railways from New York via Saint John, N.B., enroute to Sydney, N.S. There is a possibility of trouble between Germany and Czecho-Slovakia but, should this occur it is not expected that it will involve any general conflict, the titled industrialist said, who is also a member of the Scientific Industrial Research Committee of the Privy Council. A strong Commonwealth of British Nations is the best guarantee of world peace and Great Britain is making tremendous strides in her defence programme to that end, he declared.

"British export trade has improved immensely and our domestic trade is also showing a greatly enhanced capacity for absorbing the industrial output," Lord Riverdale continued. "There is a shortage in Britain at the present time of two million tons of pig iron and two million tons of scrap. This metal will be obtained from Belgium, Germany, the United States, Canada etc. There is also a shortage of skilled labor."

Lord Riverdale will visit Montreal and later will go to Western Canada.

[illegible]

For the first time since 1926 the prices of farm products reached a balance of that of retail prices and cost of services in the month of December, 1936. Calculating 1926 wholesale prices as equal to 100, the Dominion Bureau of Statistics gives the index price of farm commodities in December as 82.4 while retail prices and cost of services are given as 81.8. The lowest point from 1926 to 1936 was in 1932 when the index price for farm products was 48.4 and retail prices and cost of services were 81.4. The low point for retail prices and cost of services was 66.9 in 1934.

While farm prices have now apparently reached a balance with the rest of things farmers have to buy, the unfortunate feature is that the farmers have so little to sell. Western Canada's grain crops in 1936 were almost at a record low point in volume of production.

Nature arranges things nicely. She always gives us the kind of voice that our own ears enjoy hearing.—Youngstown Vindicator.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MASTOIDITIS—WHAT IS IT?

The mastoid bone—the bone behind the ear—is filled with a complex system of cells. These cells communicate through a short, wide passage with the middle ear space, i.e. the space inside the ear drum. The middle ear space in turn communicates with the upper part of the throat by a long narrow tube. All these parts are lined with mucous membrane.

It can be readily understood how inflamation can creep up this tube to the middle ear and mastoid cells. Inflamed tissue swells and if the tissue is mucous membrane, fluids are given off and pus forms. The tube is closed by its swollen mucous membrane lining and the fluid and pus formed in the middle ear and mastoid cells cannot escape into the throat. The pressure becomes very great in these parts, causing extreme earache. Something must give way, and the drum being the weakest wall of these cavities, bursts if not lanced. This allows the accumulated fluids and pus to drain away, the pain is relieved, the temperature subsides and the patient is soon on the road to recovery.

But sometimes drainage through the hole in the drum is not sufficient. The emptying of the mastoid cells becomes impeded and the pressure in the bone rises. Pain then returns, the bone becomes tender and a swelling may appear over it. Increasing pressure in the mastoid bone destroys its thin outer shell. Nature is trying hard to provide drainage for the abscess within the bone. If the mastoid bone is now drained, i.e. if a mastoid operation is performed healing should be rapid and complete. Provided the operation is properly executed and done when the disease is sufficiently localized, complications should practically never occur.

Sometimes, if the outer shell of the bone is thick and hard, the inner shell will be destroyed and if the disease is not efficiently drained, meningitis or brain abscess may result.

Often the drainage through the drum, while not sufficient for a rapid cure of the disease, is enough to prevent rapid outward or inward spread of inflamation. The disease in the bone may linger on with the grave risk of spreading to vital structures. The patient may seem perfectly well with the exception of the discharge from the ear. Any ear that has been discharging for three or four weeks should be examined to ascertain if disease remains in the mastoid bone. Neglect of proper surgical treatment at this time may lead to a chronic discharging ear with deafness and the ever present threat of fatal complications.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

CANADIAN NATIONAL

WHEN THE GRANARY OVERFLOWS

The committee which is drafting an outline of a plan for the ever normal granary to be introduced in the United States suggests that there should be a ceiling above which prices of commodities cannot rise and that there should be a peg below which prices cannot drop. It is held that while it is an excellent theory for farmers to produce reserves of food and fibre for all the people the seasonal surpluses above such reserves, if and when they come, must not be allowed to crush the men who produce them.

THE AVERAGE VALUE OF FARM LANDS

The average value of Alberta farm land is placed by the Federal Bureau of Statistics at $16 an acre. The average value of Manitoba farm lands is given at the same figure and the Saskatchewan farm lands at $15 an acre. Farm lands are valued higher in British Columbia than in any other Canadian province, the figure being $60 an acre. The average value of farm lands in other provinces: Prince Edward Island $31 an acre; Nova Scotia $36; New Brunswick $30; Quebec $38; Ontario $44.

HIDDEN PASSAGES AND SECRET CLOSETS

The restoration of an ancient castle, and the hunt for and discovery of hidden passages and secret hiding places is the enviable project being carried out by the Scouts of the 1st Kelvinside Troop Scotland. The castle is Castle Mains, a 13th century stronghold at East Kilbride, the home of Red Comyn during the days of Robert the Bruce. Already the Scouts in clearing away debris have found the original key of the castle gates and unearthed a number of ancient vessels and coins. A crane has been rigged up to handle the stones for the rebuilding of the battlements.

EMPIRE SCOUTS AT THE CORONATION

It is estimated that 250 Scouts from over twenty different countries of the Empire will be in London for the Coronation of King George. To date representatives have been indicated from Australia, Barbados, British Guiana, Burma, Bermuda, Canada, Ceylon, Cyprus, Gambia, Gibraltar, Gold Coast, Grenada, India, Kenya, Malta, New Zealand, Nigeria, Northern and Southern Rhodesia, St. Lucia and Trinidad. Sightseeing places along the route of the Coronation procession are being assigned the visiting Scouts.

Work Must Be Found

Through jobs men and women are insured against privation and kept off relief. Jobs enable them to hold up their heads among their fellow-beings, to be self-supporting, to maintain homes, to educate and raise families.

With the exception of Alberta, the Dominion has made substantial progress in the past year in the matter of increased employment. In fact, 60,000 jobs have been made available to Canadians in 11 months, or thereabouts. On every hand—with the exception of Alberta—there is a definite upward swing in the employment pendulum.

What is our situation here? According to statistics issued for the week of December 12, 1936, Alberta had 2,694 more jobless than for the same week of 1935.

The fact is that the present policy of debt repudiation has not increased employment, but has increased unemployment. If our men and women are to be found jobs, as men and women are finding jobs in other provinces of the Dominion, the credit of Alberta must be restored.

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The eighth statement in this series will be published in two weeks) 7

EAT PLENTY OF fish FOR HEALTH

BRING Canadian Fish and Shellfish more often to your table. Benefit by their richness in proteins, minerals, vitamins and iodine. Enjoy their delicate, easily digested and fine-tasting meat. And make a saving in your budget, too, for Canadian Fish Foods, through their great nourishing qualities, give you full value for every cent spent.

Serve Canadian Fish and Shellfish more often. Fresh water fish or seafood . . . in fresh, frozen, canned, pickled, dried or smoked form . . . whatever way you prefer this delicacy . . . it is available in prime condition.

DEPARTMENT of FISHERIES, OTTAWA

Try
This Appetizing Recipe

FISH CHOWDER
1½ Pounds of fresh fish (cod, haddock or other fish)
2 Cupfuls of diced potatoes
2 Cupfuls of diced carrots
4 Cupfuls of water
½ Pound of salt pork, diced
2 Medium onions, chopped
3 Tablespoonfuls of flour
3 Cupfuls of milk
Salt and pepper to taste

Remove the skin and bones from the fish and cut into small pieces. Cook the fish, the diced potatoes and the carrots in the water for 15 minutes. Fry the salt pork until crisp, remove the pieces and cook the onions in the fat until tender. Add the flour, stir until well blended and gradually add the milk, stirring until the mixture is smooth and thick. Combine this mixture with the fish and vegetables, season to taste with salt and pepper, simmer for about 10 minutes stirring frequently and serve hot.

Floral Offerings

[illegible] Sister and brother; Fred and May, Mother, Tom and Joe; Evelyn, Douglas, Myrtle and Albert Sutton; Mr. and Mrs. Les Ovelson; Mrs. [illegible] and daughter, Ivan Mitchell, Mrs. Nellie Lindsay and [illegible] children (Mr. and Mrs. Roy Lee, Doreen and baby), Mr. and Mrs. [illegible] Brown, Ella and Merlen, Mr. and Mrs. Leslie McGintie, Doris and [illegible] Mr. and Mrs. A. F. Schultz; Mr. and Mrs. Earl Carlisle and family, Mr. and Mrs. Wm. Ingram; Mr. and Mrs. Chas. Ingram; Mr. and Mrs. W. Sears; Mrs. Henderson and Jason, Mr. and Mrs. T. D. Ferguson; Mr. and Mrs. C. Coombes and family; Mrs. E. McMullen and family, Mr. and Mrs. Sam Stirrett and family; Mr. and Mrs. Hy Mc[illegible], The Ratigan Brothers; Mr. and Mrs. Sam Noneland and family, Angus Mitchell, Mr. and Mrs. A. [illegible] and Mildred; Mr. and Mrs. [illegible] Tofield and family; Mr. and Mrs. R. Barnes, Mr. and Mrs. O. Barnes, Mr. Jno. McGintie; Mr. H. [illegible]; Mr. and Mrs. J. Ingram and family; Mr. Wylie and Wendall; Angus Mitchell, Wilfred Sutton; Percy Sutton and family.

KINGMAN

The Ladies' Aid held their annual business meeting at the Kingman Hall last Thursday. Mrs. P. Simonson and Mrs. S. Simonson being the hostesses. Election of officers was held. The officers for the following year are: President, Mrs. Thor Herte, Vice-president, Mrs. Bonnes, Sec-Treasurer, Mrs. Agnes Simonson.

Rev. Haverstein will have services at the Lutheran Church on Sunday afternoon at 2.30 p.m.

Mr. Thor Herte and family and Mr. Albin Anderson attended the golden Wedding of Mr. and Mrs. T. Rorem of Bardo last Sunday.

Mr. and Mrs. Thomas Rognass and Arnold were supper guests at the M. Fuglum home last Sunday.

Mr. Peter Radinsky of Edmonton is in town a few days looking after his store.

Mrs. Roy Mulvik is ill with the flu.

There will be a dance at the Kingman Hall, Friday evening, March 12.

Mr. Jack Herron and Mr. Swanson were Tofield visitors on March 14.

Miss Malinda Dettwiler attended a quilting bee at Mrs. Abe Wideman's home last Wednesday.

Mrs. Vivian Herte is staying with her sister Mrs. Ingvald Ness for a few days.

Mr. and Mrs. Clarence Simonson, Merlin and Nora spent the week end at Wetaskiwin.

Miss Alvina Simonson spent Sunday with Miss Marie Lawson.

Mrs. McIntosh was in Edmonton last Friday.

Mr. Alec Asp, Bertie, Douglas and Bernice spent last Sunday in Edmonton.

BIRTHDAY PARTY

Sometimes local editors become engrossed in affairs of state and slip up on things that really matter. Anyway we hasten to record the birthday party of Muriel Rogers which took place two weeks ago. The event which took the form of a skating party was attended by some twenty or more guests. After skating all went to Muriel's home where a wonderful repast was awaiting them and which, with appetites sharpened by skating vanished like dew-before the morning sun, Muriel's mother incidentally getting the reputation of a wonderful cook, a reputation which quite likely will last many years, and spread to all corners of the globe. After lunch games were played and Muriel was presented with many gifts. All good things having to come to an end the party broke up just before midnight, all wishing Muriel many happy returns of the day.

TOFIELD SOCIAL CREDIT GROUP ENDORSES PRESENT GOVERNMENT

On Wednesday evening the Tofield Social Credit Group met at the Town Hall under the chairmanship of Mr. Johnston Ferguson. The group went on record by resolution as endorsing the tenure of the present provincial government.

Debt reduction matters were discussed at some length and the policy of the government in this respect upheld. A comparitively small number were present.

CANADA'S NATIONAL FARM MAGAZINE STILL GOING STRONG

The Family Herald and Weekly Star with many years of publication behind it is still in the vanguard of progress. This popular farm and home publication contains each week much of great interest to both rural and urban readers. It is safe to say it is purchased and found in more farm homes than any other magazine, a tribute to its reader interest and real worth. The Family Herald and Weekly Star can be had together with the Tofield Mercury for one year for $2.25.

SCHOOL BOARD MEETING

At the March meeting of the school board, Mr. A. C. Dodds was appointed chairman of the board for the next ensuing year. He succeeds A. J. Harrison, who has been chairman for the past two years.

CARD OF THANKS

We desire to thank the many kind friends who so kindly assisted us and sent floral offerings in our recent bereavement.

Mr. and Mrs. J. Sutton.

FOR SALE—Second generation Victory Oats, registration No. 30277, Grade 1. Price 75c bushel, machine run or 90 cents bushel sealed and sacked. Apply Elmer Schmidt, Kingman, Phone 315.

HOLMBERG RE-ELECTED TO CORNHILL MUNICIPAL COUNCIL

In the recent election for councillor Mr. [illegible] Holmberg was re-elected. His opponent, Mr. Albert Swanson, polled a good vote however, being only 12 below that of Mr. Holmberg. The figures were Holmberg 95, Swanson 83. Mr. Holmberg has held a seat on the council for quite a few years being a councillor as far back as 1925 perhaps farther back than that.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

LARGE NUMBER ATTEND JOHN DEERE MOVING PICTURE

(Continued from front page)

self to a master blacksmith, which was the first move in a sequence of events that was to have tremendous results in future years. Well built, muscular and thoughtful, the apprentice served his time and later worked as a journeyman blacksmith in his native state. In 1836, eleven years after he had finished his apprenticeship the urge to "go west" entered his soul, so leaving his wife behind he left on the then long and hazardous journey. He settled at a village called Detour in Illinois and immediately found his services in demand. At this time settlers from the east were pouring into the great plains of the prairies. The wonderful fertility of the soil, however, had one serious drawback. The prairie once broken was too difficult to plough again. The sticky soil stuck to the plough and a ploughman would spend more heart-breaking toil and labor on cleaning than on plowing. The most rudimentary plows were used and men baulked at the heart-breaking labor involved. John Deere realized that successful plowing depended upon a plough that would scour-clean itself. Turning the question over and over in his mind there came one day a flash of inspiration. Visiting a saw mill John Deere observed a circular saw discarded as being of no further use. Came the thought, here was the material that a self scouring plow could be made from steel. Obtaining possession of the saw, by much labor he built a plow with a mold board and share of steel. The day came for the great test. In sticky soil the first steel share went into the ground and amid the hopes, doubts and fears of all assembled the plow went forward and the sticky earth fell from it cleanly. Perhaps no other single thought has meant so much to the vast prairie west. Other inventions and developments of ideas have come and become commonplace but the "self polishing" plow opened up a vast expanse of virgin prairie to the 19th century settler. From this point on it was a case of development. At first one plow a year, then three plows, then ten until in a factory built at Moline for transportation facilities thousands of plows per day were turned out. In every country of the world John Deere plows went, and even before he died the manufacture of plows and other machinery had become a vast undertaking.

This development was not made without difficulties. Finance, difficulties of collection for plows sold; lack of transportation and communication; difficulty in procuring supplies all played their part in the upbuilding process. But such was the dependability of the man, the practical nature of him that these difficulties were overcome as they arose.

In 1886 John Deere died, leaving his son Charles to succeed him. The city of Moline, for the day of the funeral suspended practically all activities. Flowers were banked deep around the plain casket. Nearby stood a floral plow with the inscription "John Deere."

Such briefly was the story of "The Blacksmith's Gift," educational, inspirational and entertaining. Other reels were shown which were of much interest, the entire production being one of unusual success.

The Tofield senior hockey team played the Orange Crush team of Edmonton last Saturday. The soft ice made good hockey impossible. The score was 7-2 for Edmonton.

Nature arranges things nicely. She always gives us the kind of voice that our own ears enjoy hearing.—Youngstown Vindicator

Spring Ready-To-Wear

SWAGGER SUITS—

Unusually attractive novelty wool fabrics, tailored in the new form fitting models, or if preferred, the more familiar loose backs. Three-quarter length coats. All popular colors, with grey and bright rose featured shades. Sizes 14-20, Prices from $12.95

COATS—

Following similar style trends and a complete size range from 14-24½. Fortunately early price protection enable us to price these as low as $10.95

FELT HATS—

Smart new models for the long period before the white season. Not the freakish shapes suggested by some fashion forecasts. You will be surprised at the ease with which they can be worn. All sizes to 24.

Town Council Meet

A meeting of the town council was held on Monday evening March 15th. Present were Mayor Swift, councillors Bellamy, Bruce, Coatta and Lovell. Business was largely of a routine nature. Mr. G. Edwards was given permission to erect a temporary building on Main Street for use as an egg grading station, said building to be removed at the pleasure of the council. The matter of a spring clean-up was given considerable discussion and council intends to compel the removal of refuse and manure just as soon as the weather permits of same being done. The Mayor brought up the matter of a Coronation celebration in Tofield, and it was felt that some type of celebration should be held. The matter will be further considered by the council, who will probably call a meeting to further consider the matter, in collaboration with other public organizations in Tofield and district.

Use Ceresan This Spring

The use of Ceresan in treating your seed grain will more than repay you for the extra cost through increased yields. In 38 tests with Wheat, Ceresan increased the yield over untreated seed to an average increase of more than one bushel per acre. In 65 tests with Ceresan on Oats over a three year period the gain was over three bushels per acre.

In 30 Barley tests Ceresan increased the yield by 1½ bushels per acre.

All grains can be successfully treated two to three months before seeding.

We rent out an automatic treater for use with Ceresan at 75c per day.

CERESAN in 5 pound cans	$3.90
CERESAN in 1 pound cans	$1.00

5 pounds will treat 160 bushels of grain

A.B.C.'s Column

BROOMS AND SWEEPING

Actually curling is a game almost utterly dependent upon the skillful application of that lowly household dust-chaser, the broom. Trophies are made with broom designs and a curler would almost prefer to pose without trousers than to leave out his trusty broom. Even when the broom is not coaxing the round rock a little further it is as handy to a curler as a roomy pants' pocket to a schoolboy. For instance, the broom is used to maintain a balance, to point a direction, to nudge a hard-hearing team mate or to even sit on while the perplexed Legree-like skip comes to a definite conclusion. When the broom is raised aloft it indicates to the brothers that they have won the end, when carried under the armpit, it announces that the hands are cold. Every Curler MUST sweep. Of course the method of plying the broom may vary, some curlers slide as they sweep, others alternate a slide and a step, some gracefully glide while even the shufflers, trotters and sneakers have movements of their own. But no matter how you travel or whether you prefer the overarm or the under arm "SWOOP" the fact remains you must violently wave that corn brush or get off the ice and be replaced by some chap in whose veins the blood of a real sweeper truly flows. GOOD sweepers do work. In one end of sixteen stones there may be more than 400 broom strokes. In our own rink I have counted fifty swipes in just one journey from "Hog to Hog." Why all this effort, what is the effect of sweeping that commands so much attention and importance. (Now here is where we make the curlers mad.) Most curlers unhesitatingly declare that sweeping adds at least 4 feet of life to a granite stone, while a few are convinced that a rock swept hard all the way can be stretched to a point 12 feet beyond where it would have died if left unswept. They attribute this prolongation to the belief that proper sweeping creates a vacuum in front of the travelling stone and removes a wind resistance. They also contend that broom wielding heats the ice then the instantaneous freezing gives more glide to the stone. Certainly curlers almost to a man will attribute his humiliating defeat to the ignorance, incompetence or downright indifference of his rink who failed to properly respond to his sweeping commands.

Now curlers, hold your breath, along comes science. During the first few times on new surfaces, sweeping adds 5 to 8 feet, BUT after the ice has been used awhile and surface repeatedly cleaned and polished by sweeping, the unswept stone goes as far as the swept one. Or after the 2nd end swept and unswept stones have an equal value. (If you care to get in an argument about this "come up and see me sometime".) But can you picture a beardless Santa Claus, or cupid without his Bow and Arrow or a King without a crown, well that's akin to a curler without a broom, a national figure separated from symbols that give him character. If grown up whisks ever lose their sway, you may depend that many curlers will turn and toss on "sweepless" nights. Rolling curling stones, whether swept or unswept, do not gather moss. Anyway, right or wrong, the broom must stay in curling. While the skip still shouts, he still waves the besom as industriously as his orthodox friends. The skip is not just a titled player, for he legally possesses the power and often the manner associated with European despots. When eliminated in competition he reverts to the armchair second thinkers, and as each rock comes twirling down the ice toward the rings in front of his observation post, his confusing cries of "Too wide" or "Too narrow," "Too Fast" or "Too slow," "She needs Sweeping" or "Leave her alone", "She's running through" or "She isn't up."

••••••••

But neither verbal blasts from scornful spectators or truth-seeking scientists can rock this game. A pastime so inexpensive that one set of stones may last a couple of generations, a sport so saturated with superstition, tradition, and rollicking sociability, well deserves the life and homage of 15,000 live Canadian Sportsmen.

••••••••

Well folks, this is the final sweep and station A B C is now signing off. Will be with you again as the season rolls around.

••••••••

The curling season is closing with a Slam, Bang affair. Art will slam the back door and Bang the front door shut. No lunch.

••••••••

We consider our skit, Brooms and Sweeping, the best thing we have had this year. At that I had to leave out a lot of good jokes, mostly on the "hush" side. Even during this present generation one has to use a little judgement.

••••••••

A parting word, don't forget to lock up your rocks or you will find them in the mud next year. The brooms, well what use has a man for a broom in the summer time.

••••••••

As Longfellow said, "Never was an idle brain, but bred an idle thought."

LOCAL & PERSONAL

Mrs. R. Wilson spent the week end visiting in Edmonton with her daughter Lola.

Mr. and Mrs. Abbott and Mr. and Mrs. Letourneau visited Mr. and Mrs. Brady at Edberg on Sunday. Mrs. Brady returned with them.

Miss Marie Scott spent Sunday at her home here.

Mr. Cowell is back on duty at the bank here. He had been at Carstairs for two weeks.

Mrs. Neil Ross of St. Albert visited with her daughter Lorett this week.

Mr. and Mrs. Geo. Coatta and Mr. and Mrs. Ray Coatta spent the week end in Edmonton.

A number of Tofielders took in the hockey games in Edmonton on Monday and Wednesday evenings.

Mrs. H. Kendall spent a few days in Edmonton this week.

Mrs. Pyle is visiting her daughter Esther for a short time.

There will be a Community Auction Sale held in Tofield on Saturday, April 3rd, sponsored by Stinson & McCarthy and cried by Mr. C. A. Everitt. There will be numerous articles in the sale and those desiring to enter goods are asked to get in touch with either Mr. Stinson or Mr. McCarthy not later than Thursday, April 1.

MASONS PUT ON PLAY

On Wednesday evening, Unity Lodge No. 51, Masonic Order, visited Tofield and presented a play of Masonic origin at the Variety Theatre. About 45 visitors from Edmonton, Holden and Viking were present. After the play a banquet was served in the Curling rink. It being St. Patrick's day, green and white predominated as table decorations.

U.F.W.A. MEETING

The March meeting of the U.F.W.A. was held at the Municipal office. Mrs. J. Francis read a splendid paper on "Youth and Unemployment," which was followed by a lengthy discussion. Mrs. Anderson read the March bulletin on "Health." Members having books from the Frances Bateman Library are asked to bring them to the next meeting.

TEMPER TANTRUMS

"My boy has tantrums; if he does not get his own way he screams and kicks. One day he held his breath un, til I thought he would die. Nothing I can do to stop him is any good except giving in to him. Then he gets up in a second and is as sweet as he can be."

That is the whole story in a nutshell. These attacks of temper tantrums as we call them always come on after the child has been refused something or ordered to do something he does not want to do. They are more frequent if he is tired by too much nagging or not enough sleep. They keep on because he has found out that he can get his own way by yelling loudly enough or if worst comes to the worst by holding his breath until he turns blue.

Every child has one or two temper tantrums at some time or another. To prevent frequent temper tantrums see that the child is not kept on edge. He should have regular meals, plenty of sleep, with an afternoon nap, and healthy play with other children. When his first tantrum occurs just remember if he does not get his own way he will soon stop.

When these tantrums are well established, we must learn the way to treat them. There are two things to remember: First, that no harm ever occurs to the child in one, and second, that the best thing to do is to pay absolutely no attention to the child. Just walk into another room until the tantrum is over. Say nothing about it later and never give in to the child because of a tantrum. If you keep up this simple treatment, the child will stop because he won't hold a tantrum for the exercise.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

"CORONATION" MENUS FOR C.N.R. DINERS

WINNIPEG, Man. March 15.—A series of artistically designed menu cards bearing cover designs depicting in rich color traditions surrounding the stately coronation ceremonies of ancient kings of England accompanied by an interesting description of legendary form of the functions attending the consecration of a new monarch have been issued by the Canadian National System for use in the dining cars and also on the passenger-carrying ships of the company in the West Indies services. Some of the subjects dealt with bear titles such as "Westminster Abbey"; "The Legendary Consecration of the Abbey"; "The Wedding Ring of England"; "The Legend of the Oil and Ampulla" and "The Stone of Scone".

Another series of menu cards has also been designed for use in the buffet cars of the Canadian National Railways presenting scenes of outstanding interest along the lines of the system across Canada in which are featured sketches typical of Jasper National Park, the Gaspe Peninsula and Totem Poles of the West Coast. Each of these cards also carries a drawing illustrating some important improvement in equipment, such as individual controlled air inlet in air-conditioned sleeping cars, air outlet in ceiling of air-conditioned cars and some modern features of the 6400-class engine, the world's largest streamlined steam locomotive.

CORONATION IN LONDON IS STIMULATING TRADE

LONDON, England, March 15.—The death of a monarch, particularly one so beloved as the late King George V, considerably affects the trade in wearing apparel, as witness the serious falling off in colored hosiery that took place in Britain last year, so universal was the grief felt at his passing. Likewise, a coronation has a contrary effect, stimulating the trade for gayer colors.

This year the coronation of King George VI is giving a tremendous filip to the trade for all kinds of wearing apparel from ducal robes down to the ordinary man and woman on the street, as well as for flags, bunting, decorations of all kinds, souvenirs, etc. according to the Industrial Department of the Canadian National Railways. London, doubtless, will present a gay picture this season and a number of industries will experience a decided speeding up of activity as well as greater financial returns.

C.N.R. WORKERS RETURN LOST PURSE

MONCTON, N.B. March 15.— A resident of this city received an agreeable surprise when handed a billfold containing a considerable sum of money that had been lost about two months ago. Last December a passenger boarded a Canadian National sleeping car attached to the Ocean Limited bound for Montreal. Shortly after leaving Moncton, he discovered he had lost the billfold and with it his money. Diligent search at the time failed to locate either the billfold or the money. In the meantime, the sleeping car did not return to the East for some time. Eventually however, it reached Moncton again and in the course of routine was sent to the Moncton shops for service overhaul. While in the act of removing a steam pipe, a worker found the billfold with the money intact behind the pipe. The worker turned his find over to his foreman and the billfold with the money was returned to the owner.

PRAISES CANADA—HOTELS, SCENERY

Canada's mountains and hotels are two things that excel anything in their respective "lines" to be found in any other part of the world, in the opinion of Dr. David Lang, of Pittsburg, Pa. world traveler and lecturer who addressed the Edmonton Canadian club in the Macdonald Monday noon.

This famed globe-trotter, during an illustrated lecture on Australia, New Zealand and many of the islands in that "down under" neighborhood, was high in his praise of two outstanding attractions to travelers.

"You do not have to leave the dominion to see beautiful scenery," Dr. Lang said. "You have the equivalent of 50 Switzerlands contained within the province of British Columbia."

It was during screening of many Australian business buildings, ranked among the most beautiful in the world that Dr. Lang "plugged" for Canada's homes away from home.

"Your hotels are another thing that are outstanding in Canada," the speaker said. "No other country that I know of in the world has such beautiful hotels, much like the one we are in now. Your other buildings do not compare so favorably. Australian bank buildings are unequaled. But your hotels. . ."

Stressing the need of a stronger bond between Canada and the Antipodes both major links in the chain that is the empire, Dr. Lang produced motion pictures and lantern slides taken during his travels in Australia.

Scenic wonders of that great country were screened in color. Aerial "shots" were included in the pictures of cities, vacation centres, industrial areas and the native districts. Even a deep-sea fishing expedition was included in the movies.

Despite differences in geographical location and in climatic condition of the Australia and New Zealand islands there is found the same things that mean so much to Canadians and all those who are members of the British family," Dr. Lang said. "The same desires for democracy, freedom and peace are expressed. Education to bring about better understanding among nations is desired and should be given every opportunity to take effect."

DUTCH INDIES ISSUE BOY SCOUT STAMP

Following the example of Holland, the Dutch East Indies are issuing a special postage stamp to commemorate the holding this summer of the 5th World Boy Scout Jamboree in the Netherlands. The stamp depicts two Boy Scouts, arms linked in friendship, with the world as a background. The stamp will be issued in three values.

WHAT IS 12 p.m.? COURT PUZZLED

SEATTLE, March 16.— Police Judge Bell Monday ordered no-parking signs changed after F. Wagner, a motorist, successfully defended parking in front of a sign which read, "No parking from 8:00 a.m. to 12:00 p.m."

"Is 12 p.m. noon or midnight?" Wagner asked.

"I don't know," said the magistrate.

"On that I rest my case," said Wagner triumphantly. He was dismissed. Encyclopedias said there was no such thing as 12:00 p.m.

RAIL WORKERS NOT TALKING COMPROMISE

MONTREAL, March 16.—Howard B. Chase, union spokesman for 117,000 Canadian railway workers said Tuesday "there has been no suggestion of a compromise and no negotiations for a compromise," in the dispute between the two railways and their employes over wages.

Chase will preside at a meeting of the general conference committee of 18 railway running trades unions here Thursday at which the ballots of 117,000 railway workers will be considered. The men were asked to give the committee power to call a strike if such was held necessary. The ballots were returnable Monday.

While other union officials, already here for informal conferences preceding the general meeting, maintained their strict silence, they had before them the plea of Hon. Norman McL. Rogers, federal minister of labor for a "just and peaceable" settlement of the dispute.

CHRISTMAS IS GOOD TO THIS CARETAKER

PRINCE ALBERT, March 15 — An Irish hospital sweepstake ticket given as a Christmas box was worth to Alexander Steiger, caretaker of a local business block, anywhere from $2800 to $150,000 this morning.

The lucky ticket holder received notification today that he had drawn "Keen Blade" in the sweepstake to be run March 19.

Phil Morgan, proprietor of a shop in the block gave the ticket to Steiger for a Christmas present. Steiger is now planning a trip around the world and a visit to Switzerland, his native land.

ANOTHER FOR RIPLEY

Something new in engine trouble happened to J. N. Stephenson of Senneville, Que. the other day. The motor coughed and the car kicked and jumped indicating that one or more cylinders was not working. Probably a cracked spark plug and a short circuit. So, to the garage. The attendant opened the hood — and laughed. "Here's a new one," he said. "I've known cows, pigs, and even moose to stop a car, but this is the first time I ever heard of its being done by a rat." Sure enough, the long-tailed rodent had crawled on top of the engine to get warm and made a short circuit across two spark plugs which, in the 1936 Oldsmobile, are set in the top of the engine. The garage man said it was worth admission and amusement tax.

SAFETY IN THE FACTORY

During the year 1936, the Oshawa factory of General Motors of Canada, Limited had only 41 lost-time accidents in nearly six and a half million working hours a record which placed it well up in the list of the Corporation's plants. As a matter of fact there were only four divisions out of 78 in the list which had a greater number of working hours and a better plant safety standing than Oshawa.

The Most PERFORMANCE for the Money!

THERE'S NO DELAY WHEN YOU ORDER A NEW CHEVROLET

THE SHORTEST DISTANCE—

GENERALLY SPEAKING we are not particularly interested in politics as such. Our interest runs more along the lines of economics and our desire is to see a better standard of living among farmers and the working class. We have long since accepted the belief that governments add nothing to the wealth of a country—the best a government can do is to so legislate that the population of a country can increase its own wealth. Certainly we must have organized government and it lies within the power of a government to be worth what it costs, conversely it also lies within the power of a government to cost more than it is worth. Just what class the present Alberta government is in remains to be seen, they still have three years to run. Certainly its making a bid for fame and fortune. Having dropped the idea—temporarily at least—of paying citizens dividends it is now turning its attention to bringing about a "regimented" population. It is proposed to license all trades, businesses, industries and occupations, and in addition to fix prices on any or all goods whether industrial or agricultural, produced in Alberta. For goods not produced in Alberta, the importer is expected to send a copy of the invoice to the department in charge. To say that the legislation is drastic in the extreme is only expressing it mildly. It is so drastic that its full import will be lost upon many people who are accustomed to casual reading of government innovations.

We have no desire here to give a long dissertation regarding Italy and Germany. As "horrible examples" they may or may not have been over worked. Nor is it our intention to emphasize how terrible "regimentation" may or may not be. But we do emphasize that every voter in this province should in some way be informed what this proposed legislation means to them. Furthermore they should be informed authoritatively as to whether this proposed legislation is the forerunner of other legislation which would make regimentation more complete. Having been authoritatively informed on these matters they could then express themselves as to whether they wanted "regimentation" or not.

At the same time the members of the government should make it their business to correctly estimate the temperament of the people. History records many incidents where governments persist in legislation, that due to its unpopularity is repealed, but only after serious consequences.

We said at the beginning that we were not particularly interested in politics as such. This is true. To us what a government does is more important than the banner under which it works. We also said that we desired to see a better standard of living among farmers and the working classes. In this connection we would like to point out that this is a province, mainly agricultural. Its chief product is largely sold abroad. Government costs money, the more government regulation we have the more it costs and the less we have left to spend on ourselves out of what we earn. The shortest dstance between two points is still a straight line.

SITTING DOWN ON THE WORKERS—

The Detroit manufacturer who matched his employees' sit-down strike with a sit-down strike of his own illustrated, somewhat humorously perhaps, a point which has been largely overlooked during the recent wave of industrial disagreements.

By sitting down himself, the Detroit capitalist effectively demonstrated to his employees that he has been working for them as well as they for him. Without the orders he obtains, there is no work to be done.

In this particular instance, the point is more easily discernible than in the case of a large corporation where relationship between employer and employee is less sharply defined, although, of course, the principle remains the same.

It should seem obvious enough that the man who provides a job is entitled to as much consideration as the man who takes the job he provides, but there has been a marked distortion of attitude during much of the period of sit-down strikes.

In many instances a villainous motive is ascribed to the employer who protests that he cannot meet the demands of his employees. The necessary interdependence of employer and employee is lost sight of, in many cases, and it is assumed that the provision of work is a sacred responsibility on the part of the employer. Actually, of course, the employer may be in a worse predicament than his employees, for while they possess the strike weapons to enforce their demands, he may be at the mercy of competitive conditions without any such weapons.

In a broad sense, the consuming public is the ultimate employer of all—employing employers to employ employees. The employer, like the employee, is but a link in the chain of production.—Cincinnati Enquirer.

A group of people living in Cleveland have adopted the idea of flying to New York to the opera and returning the same night. Now that is what might be called being aria minded.

Living in a trailer ought at least to take the work out of moving-day.

CANADA'S CONTRIBUTION TO HER WHEAT GROWERS

At the present time it may be fitting to cast up accounts and see what Canada has spent to aid her wheat growers since the depression started. The statement appears to be something like this:

Total of 5c bonus to wheat producers paid by the Federal Government in 1932	$12,000,000
McFarland Stabilization operations $15,856,000 less refund $8000000	7,000,000
Equalization of 1930 Pool payment	6,000,000
TOTAL	$27,861,000

It might be mentioned that the Dominion government is likely to receive further refunds on the $15,000,000 credit as the sales by the Wheat Board are effected.

A few years ago blue ruin stories were circulating throughout Canada as to the probable cost of the price stabilization operations to the country. Estimates even as high as $200,000,000 were suggested. The final result offers a different picture and suggests that Canada got off lightly indeed.

In Australia where wheat production of the province of Alberta, the government subsidized the wheat growers to the extent of more than $63,000,000.

In the United States total cost of aid to wheat growers is around one-half a billion dollars. Many other countries contributed far more heavily to their domestic wheat growers than did Canada. The loud protestations in Canada over aid given western wheat producers has subsided to a murmur.—Wheat Pool Budget.

WEATHER CYCLES

Mankind has been intrigued for generations over the possibility of weather occuring in definite cycles. These cycles have been suggested over certain periods of years, but even the greatest of scientists have failed to definitely establish the repetitive theory of weather occurrences. The search is being kept up however, and three notable investigators in the United States are inclined to support the theory of a twenty-three year cycle, based upon data compiled by three solar observing stations, one in California, one in Chile and one in Egypt. One of these men, C. G. Abbot, secretary of the Smithsonian Institute has made a graph of rainfall at Peoria, Illinois over a period of nearly one hundred years. According to this graph Peoria has one more year of subnormal moisture in its drouth cycle. The Lethbridge Herald claims that the peoria graph agrees with Lethbridge rainfall figures and so concludes that after this year there will be a rise in rainfall in Southern Alberta.—Wheat Pool Budget.

REPORT OF HAIL INSURANCE BOARD

The Report of the operations of the Hail Insurance Board of Alberta for 1936 showed a deficit of $47,853.18. A total of 243,723 acres were insured against hail, which was a decrease of 12 per cent from the preceding year. Insurance was written in 108 municipal districts. Hail was experienced on 30 days and claims were received from 68 districts. The outstanding storms of the year occurred on July 3rd, 7th and 18th and August 16th and 21st. The amount of collections of hail insurance taxes increased materially due to the rise in the price of grain and the good crop in northern Alberta, and thus enough was collected to pay the loss incurred in 1936, all costs of administration and interest and to reduce the liability at the bank brought over from 1930 by $17,000.—Wheat Pool Budget.

BLIND SCOUTS USHER AT ENTERTAINMENT

That blind scouts can usher as efficiently as those with their sight was the interesting demonstration given by the boys of the 1st Brantford Troop, of the Ontario School for the Blind, at a recent school concert. They also demonstrated their ability to signal by semaphore.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

NORTHERN TRAGEDY SOLVED AT LAST

ATHABASKA, March 16. —Grim northland tragedy that mysteriously claimed the lives of two tiny brothers almost five years ago, was believed solved this week with discovery of bones of two children, found near Rock Island Lake, 60 miles north of Athabaska.

On May 16, two brothers eight and six years old sons of Nick Tansik, homesteader near Rock Island Lake, wandered from their home. For more than two weeks an intensive search was conducted throughout the trackless swamp and muskeg wastes near their home. Trappers, Indians and R.C.M.P. joined in the hunt. The search eventually was halted, the children believed to have perished by drowning or as victims of wild animals.

The children left tracks for eight miles through the bush to Swift creek. From that point no trace of them was found.

Now, Sam Daren, settler in the Rock Island Lake area has discovered remains of two children lying side by side at the foot of a spruce tree, seven miles from their home. These remains are believed to be those of the Tansik children.

MOVING THE TIMBER CROP

Steady expansion of Canada's forest industries is reflected in the increased use of trucks for transporting logs and lumber. Even in the forest and over the rough roads to the primary mills, trucks are playing the biggest part in the transportation of Canada's annual crop of three billion cubic feet of wood. A Chevrolet truck operated by John Campbell and Sons of Westree, Ont. after being equipped with a dual drive axle, regularly carries 6000 feet of jackpine over a 10-mile haul, which has a couple of very bad hills in it. While the same truck can handle much larger loads on the level, this lumber firm cites its capacity on the hilly road as an example of truck operation under the rough conditions which are common in most lumbering operations.

SIT-DOWN STRIKE CLOSES 5 HOTELS

DETROIT, March 16.— Detroit's four largest hotels in a "mutually agreed" decision, suspended activities and closed their doors to new patronage Tuesday in response to growing labor disputes.

Joining with the Hotel Statler, where a sit-down strike started on Monday, the Book-Cadillac, Detroit-Leland and Fort Shelby closed.

Policemen stood at the doors to each hotel, motioning visitors and prospective patrons away. Facilities including heat, were suspended.

"Maybe I will go on a sit-down strike myself," announced Lily Pons, opera star, who came here to sing at a concert Wednesday night.

At the Book-Cadillac, Sonja Henie, figure ice-skater found herself without accomodations because of the shutdown but was invited to a private home.

Unperturbed by the turn of events was Evelyn Gardiner, contralto with the D'Oyle Carte Opera company. As she left her tenth floor Statler room for a theatre, she chuckled. "Just what I've needed—three trips a day and I'll be right down where I want to be."

THE OLIVER STANDARD "70"

Here's How the "70" Earns More Money the Year Around

There's no end to what the smooth-running, easy-handling, powerful Oliver "70" does for you. The more work you give it, the more money it makes you month after month.

On drawbar jobs, the "70" pulls two 14-inch plows at 3½ to 4½ miles per hour in average soil. It harrows, drills and plants at high speed, too. With power take-off, plenty of power is provided for a two-row corn picker-husker, small combine, grain or row binder, pick-up hay baler, potato digger or power sprayer. On the belt, the "70" is just right for driving a 22 x 36 thresher, for shredding or shelling corn, hammer milling, filling silos and sawing wood. Efficient six-cylinder power means a saving of fuel on every job, and it makes every job lighter. Choose either the "70" HC (high compression) for regular gasoline, or the "70" KD for kerosene or distillate. The same money-saving, money-making operation is yours. Come in and get all the facts about this great tractor today.

Hockey

ROSS CREEK 4 — TOFIELD 6

In a fast game played on hard ice on Tuesday, Ross Creek and Tofield met at the local arena. The boys from the north put up a stiff battle and the locals were extended to their limit to turn in a win. Three goals quickly obtained in the first period by Tofield without an answering tally proved a sufficient margin to work on and while the visitors came within one goal of tieing the score most of the game was played with them trailing by two goals. There is some very good hockey talent in the Ross Creek district. As regards skating and stick-handling they are equally as good as the town team. But their finishing plays could stand improvement and in addition many good rushes were spoiled by wing men getting ahead of the play.

The first period opened fast with Tofield setting the pace. Within a few minutes of the commencement Tofield scored three times, Les Glover scoring two and Dunn one. At this stage Ross Creek tightened up and the play became more even though throughout the period the home crew had quite an edge. Towards the end of the period Wiltzen for Ross Creek scored and the period ended 3-1.

The second period found the visitors in better form, having their full share of territory play and getting by their checks with clever stick-handling. A minute or so after the period started, Wiltzen again scored making the score 3-2. The game was fast at this stage, Ross Creek trying hard to get the equalizer. However Swinton for Tofield came in on a nice rush and scored. With the game going at a merry clip Wiltzen came up fast and shot hard and straight on from the blue line, the puck going through Bowick's pads. Both goals had narrow escapes, players being through with only the goalie to beat but both goalies made sensational saves. There was no further scoring in this period it ending with the score standing at 4-3.

The third period was played on even terms. The visitors were still pressing for the equalizer and for the second time in the game the locals scored ahead of them, Allan putting his team two ahead. But Ross Creek never let up trying and were again successful in cutting the lead down to one when Motyka scored from close in. The visitors played all men up in a last effort to get the evener but in a Tofield rush down the ice the locals scored again making the score 6-4. This was all the scoring for the game.

Line-up—Ross Creek: Goal, Boyd Strand; G. Motyka; P. Strand; S. Wiltzen; B. Motyka; A. McLacklan; G. McLacklan; H. Calvert; E. Sander; R. Sander.

Tofield—Goal, H. Bowick; Allan; Everitt; Beirnes; Jack Bowick; Matchmess; Swinton; Whyte; Les. Glover; Norman Glover; Dunn.

Referee—Stan Burke.

Next Game

The Edmonton Motors are scheduled to play at Tofield on Saturday night, March 20.

LINDBROOK

Another touch of winter, which we we all hope will be the last.

Congratulations to Mr. and Mrs. Peter Ezm on the birth of a baby girl, both mother and child are doing fine.

Miss Ruby Lepine has been having trouble with a cyst that has formed on one of her eyes and will probably require an operation to remove same.

Divine Service was held last Sunday at the school here, the service was conducted by the Rev. A. Wallis of Tofield.

We understand that Mr. H. W. Rayner has sold his farm north of here and will shortly move to Leduc.

Many Happy Returns of the Day, Otto! you Scandinavian Mick!

Several Lindbrook folks attended the play put on last Saturday by the Woodlawn Dramatic Society and all state that it was very good, especially so for amateurs.

The local Social Credit Study Group held their usual monthly meeting at the school here one evening last week. The attendance was good

FOR SALE—Hardy Fruit and Nursery Stock. KETCHAMOOT

Mrs. McDowell returned to her home in Edmonton the latter part of the week after a two week's visit at the Whillans home.

Mrs. L. Carlisle returned home Friday after spending several months with her mother at Reinbeck, Iowa, U.S.A. She left her mother improved in health.

Miss Margaret Mitchell is lending a helping hand at the Sherlock home. Both Mr. and Mrs. Sherlock are ill with the flu.

We did not know until a few days ago that Mr. and Mrs. A. J. Willians were visiting with their home folks in Ontario. Mr. and Mrs. Willians and Mrs. Willans made the trip on the same train.

Mrs. Whillans is having a most delightful trip visiting at Toronto, Niagra Falls and Barrie, Ontario. At Toronto she visited Jack Fair who was soon starting to work in Eaton's new store.

Mrs. Les Ovaldson of Miquelon district spent a few days at the home of her parents, Mr. and Mrs. J. H. Ingram.

Mrs. McDowell and Mr. C. J. Whillans visited at the home of Mr. and Mrs. Frank Stupe of Lindbrook on Wednesday and Thursday of last week.

Mr. Joe Sutton sawed wood for some of the neighbors the first of the week.

Miss Margaret Mitchell entertained the Social Hour club at her home Thursday afternoon of last week. Some twenty five members and visitors were present. Fancy work occupied the time by the members. Visitors present were Mrs. C. A. Ingram, Mrs. Schultz, Mrs. Brich, Mrs. Sears, Mrs. Ralph Barnes, Mrs. Albert Sutton, Mrs. Elsie Carlisle. A delicious lunch was served by Miss Margaret assisted by her mother which brought a pleasant afternoon to a close. The April meeting will be taken by Miss Hazel Sears.

A PROBLEM FOR BRITAIN

Great Britain makes automobiles but has to import most of the fuel to run them. Statisticians have been calculating the total of petroleum products imported into Britain in 1936 and they find it reached 2,430 million gallons. Turning to home-produced petrol, they estimated that approximately 75 million gallons had been manufactured from coal. The home production of petrol is thus only 3 per cent of the country's requirement, which means that Britain is dependent annually on about 1,200 million gallons of motor fuel from across the sea.

ROYALTY TO MAKE GRANT TO EDWARD

LONDON, March 16.— British government will not pay an allowance to the Duke of Windsor, presentation of His Majesty the King's civil list message disclosed Tuesday.

Instead, the royal family from its own pocket will make an allowance to former King Edward VIII.

There was no mention of the Duke of Windsor in the message, presented in the commons. It turned over to the commons the hereditary revenues from the Duchy of Cornwall. It asked in return that the commons make provision for members of the royal family.

Hockey

The Tofield senior team met the Edmonton [illegible] at the local [illegible] on Saturday night last and while they were not able to turn in a win, they played heads up hockey, pleasing to watch and satisfying to their supporters.

At first it appeared as if the visitors were going to have an easy task but after the first minute or so of play, the locals settled down to business and gave stiff opposition all the way.

The local team has improved a great deal since the beginning of the season and on Saturday night's play are a good country town aggregation.

The first period opened with Edmonton pressing the locals finding it difficult to clear the puck away from their own territory. The puck was brought up into Edmonton territory and immediately returned down the ice with another seesaw play for about a minute. Then play began in earnest and from then on neither team could lay claim to much of an advantage on ice play. Edmonton were the first to score, Muir sending in a fast one from the right wing that eluded Bowick. The first goal as usual speeded up the play and a few minutes later Beirnes scored a similar goal from the left wing. Both goalies were called on to stop shots ticketed for the hemp, and for the rest of the period they both kept their goals intact. The period ended 1-1.

The second period opened up fast, Edmonton being the first to score, Mather scoring the counter. On a nice combination play Tofield scored when Machtmes received a pass and shot it neatly into the net. With the score tied, both teams tried hard to obtain the lead. The break came when Edmonton scored during a milling around Tofield territory, Mather again being the marksman. Playing hard, fast hockey to stay in the running Tofield again tied up the game when Jack Bowick beat the Edmonton custodian. The visitors put on pressure to again get the advantage and were successful when Hart beat Bowick with a well timed shot. Play swung back and forth and both goals had narrow escapes but the period ended with the score 4-3 for the visitors.

The third period commenced with the visitors turning on the heat and before the locals could catch their stride the visitors had run in three goals, Hart, Mather and Orr scoring. The locals swung into action and cut this lead down by one when Swinton scored a nice counter. This was followed by a goal from Orr's stick, being the visitor's eighth goal for the night. The locals never stopped trying and just before the game ended Tofield scored another when Allan made it five for his team. The final score was Edmonton Motors 8; Tofield 5.

Lineup— Tofield: Bowick; Les. Glover; Allan; N. Glover; Whyte; Sears; Machtmes; Beirnes; Jack Bowick; Everitt.

Edmonton— Stuart; McDonald; Hare; Hart; Mather; Orr; Kowper; Muir.

Referee: J. J. Hannan.

KETCHAMOOT

Mr. J. H. Ingram left on Saturday morning for a three week's holiday at Victoria, B.C.

Mr. Kleinschroth sr. is visiting his daughter in B.C.

The school board held a meeting at the Roy Lee home Thursday evening of last week, principally to discuss building a new school house.

Mr. G. W. Sears and boys loaded a car of wheat the first of the week. Chester Coombes loaded a car of oats.

Our congenial elevator man at Bardo has accepted a grain elevator at Leduc and will be leaving shortly.

The Ketchamoot hockey team motored to Hasting Lake Sunday to play the Hastings Lake team. The score was 4-5 in favor of Ketchamout.

Mr. and Mrs. Schultz and son Harold and Mr. and Mrs. C. A. Ingram were dinner guests of the Sears family.

Mr. Angus Mitchell returned home Sunday after visiting in Edmonton for two weeks.

Mr. and Mrs. Berreclough and family of Bardo, Mrs. Earl Carlisle and family and Mrs. Elsie Carlisle and daughter Doreen were Sunday guests of Mr. and Mrs. L. Carlisle.

The Charley Nashman family have been having a serious time since the new year. The children had whooping cough and are now down with the flu.

On Thursday, March 18, Mr. Frank Hull celebrated his 83 birthday. In the evening some 50 or more friends and neighbors gathered to wish him many happy returns of the day and to spend the evening with him. Mr. Hull lives with his daughter Mrs. Oscar Barnes and is quite hale and hearty. Visiting for the older people and dancing for the young folks soon passed the time away. Lunch was served at midnight. Mrs. Carlisle baked the birthday cake which was cut by Mr. Hull. After an hour or two more dancing the guests bid Mr. Hull goodbye until another year.

Misses Janet and Ethel Brown entertained to a miscellaneous shower at their home Thursday afternoon of last week in honor of Mrs. Wendall Wiley, nee Mildred Ingram. After chatting with friends and neighbors community singing was enjoyed for a period. Little Miss Nola McGinitie and Merlen Brown pulled into the room a little wagon filled with many useful and pretty gifts. Being St. Patricks day the decorations were green and white. Lunch was served and all spent a delightful afternoon.

Mr. and Mrs. Herman Lawson and family and Mr. and Mrs. Geo. Lawson and Martin visited at the Roy Lee home Sunday afternoon.

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

LEAD POISONING

Convulsions in young children are serious and naturally cause much alarm to the parents. Many mothers do not know that lead poisoning is a common cause of these convulsions otherwise they would take greater care to guard their children against biting on painted toys and playthings.

Many babies develop a habit of biting on anything within reach and unless the parents are aware of the dangers of such habits and keep painted articles away from the child's mouth, convulsions or even blindness may result. For this reason children should be restrained from putting any painted objects in their mouths. New enamel cribs or other articles of children's furniture are not dangerous in this way because recent government legislation has made it compulsory for lead-free paints to be used in their manufacture. Old cribs and cots which have been repainted with ordinary house paints are on the other hand quite dangerous, since the soft layer of paint may be easily nibbled off and cause lead poisoning. Window-sills, kitchen chairs and verandah railings are other places where lead-containing paints are frequently used and a young child who is romping about the house may get paint from any of these places.

A doctor was recently called to see a child of 17 months of age who was in an unconscious state and having frequent convulsions. The doctor suspected that the convulsions were caused by poisoning with lead paint but on questioning the mother was advised that she had not noticed the child biting the paint from the cot or from any other painted furniture or toys. Not being satisfied with this negative evidence however, an inspection was made of the child's home and it was found that a considerable amount of soft paint had been bitten off the verandah railing during the summer. The child was just beginning to walk and was tall enough to reach the railing and nibble the paint. If the mother had been conscious of the danger she would have noticed this habit and the child's life would have been saved.

The responsibility rests with the parents to prevent these serious cases of lead poisoning, which occur all too frequently in young children.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

HUMBLE FOOD WINS PRAISE

Long associated as a dish for the masses in England, the humble fish and chips is apparently gaining recognition in Canada. At least one large restaurant chain in Toronto and Montreal make a feature of this dish and according to the caterer have struck a very responsive chord in the palates of their customers.

Recently a columnist in the British Fishing News predicted that fish and chip shops in this country, if they were properly developed, could absorb 60 per cent of the fish landed, as they do in Great Britain. In the old country, he says, everyone in the business earns a good living, especially the fishermen who benefit by the vast markets created by this lively trade.

A few Canadian restaurant executives are of the opinion that the humble fish and chips has real possibilities. The chief handicap in the past, according to one, has been that no effort has been made to place this business on a quality basis. The merchandising of fish and chips has been largely confined to poorer districts and people have not been properly educated to think of fish and chips as the wholesome and savoury food it is.

Were more restaurants to feature it and give it the imprimatur of quality, there might very well be a new habit created among Canadians and a substantial fillip given to the fish industry.

REQUIRE LIGHTS ON ALL CYCLES

When the new bill to amend the Vehicles and Highway Traffic Act is discussed in the legislature, the section dealing with lights on cycles is expected to cause some interest.

While some municipal authorities have passed regulations requiring such lights, under the terms of their by-laws, the provincial government is now taking a hand in the matter by making such lighting compulsory for the province.

The section says that "At any time between one hour after sunset and one hour before sunrise, no cycle shall be in motion on any highway unless there is carried thereon a lighted lamp showing a white light in the direction in which the cycle is proceeding and also a red lighted lamp or a red reflector so placed as to be clearly visible to drivers of vehicles approaching it from the rear.

The bill also provides that any town or city may by by-law define areas within which every standing vehicle shall between one hour after sunset and one hour before sunrise, have lighted lamps to the front and either a red lighted lamp or reflector to the rear.

Legislation which would give adequate highway safety in the way of proper lighting of vehicles on the highways at night has been advocated frequently by the Alberta Motor Association.

WORLD OF WHEAT

By H. G. L. Strange

Improve quality! Keep down cost of production!

These should be the watchwords for Western Canadian farmers, for all who are their friends, and who are, therefore, keenly interested in the farmers' welfare.

Very definite, and, it would seem, successful efforts are being made not only to maintain, but to improve wheat quality; but how about reducing cost of production? Unfortunately very little in this direction is being done, yet the reduction of costs is just as important as the improvement of quality— Can costs be reduced, or at all events stopped from rising still further?

It will not be easy, but I for one believe it can be done, even though costs of production actually are now rising as revealed by the Searle Index which keeps account, month by month, of the costs of the things farmers buy.

More will be said in later articles about methods which might be adopted to reduce costs. In the meantime anything that will increase the yield per acre will definitely help. The use of Leytosan and Ceresan for treatment against smut and root rot disease, also the use of fertilizer, which increases yield and brings about earlier maturity, are splendid ways of reducing costs of production.

Following factors have tended to raise price: Japan, Mexico and Greece purchase Argentine wheat —Italy purchases still more Argentine, and Roumanian wheat—Germany and Gt. Britain continue to buy Argentine, Turkish, Australian, Indian, Yugo-Slavian and Canadian wheat—Spain purchases wheat—Inclement weather jeopardizes crop prospects in India—Grasshoppers causing concern in Australia—French franc falling in value.

Following factors have tended to lower price: First official Indian rice estimate larger than year ago—German bakers must put seven percent corn meal in all wheat bread—Weather seasonable and present moisture supplies sufficient in Australia—Supplies of Danubian wheat and rye still substantial with navigation about to reopen—India preparing to make substantial wheat exports.

1937 CROP PROSPECTS

After a rather severe winter in Alberta with considerably greater snowfall in the south than has been experienced for years, the weather has moderated and the snow has been disappearing very quickly. The account of blockaded roads in the south would suggest that snowfall there was to drift on the highways. Actually the precipitation of snow and rain since last November was little above normal in Lethbridge where most of the road blockage occurred, the number of inches being 5.06 in that locality while the normal is 4.66. In the Calgary district the normal is 4.09 and the September-March 1st this season 4.06. In the Medicine Hat district the normal is 3.86 and the precipitation this season 3.71.

Snowfall is never relied upon to provide much moisture during the ensuing growing season in the great wheat areas of Western Canada. Spring rains and moisture stored in summer fallow from the previous season provide the great bulk of the moisture for the growing crop. Due to last year's exceptional drouth moisture reserves are virtually nonexistent. The '37 crop will have to rely on spring rains. For this reason abundant and frequent rainfalls are vitally necessary from May 1st onward.

With characteristic optimism most farmers are planning spring operations with the idea that the drouth cycle is ended and Alberta this year will have a wet spring.—Wheat Pool Bulletin.

THE HOG SITUATION IN CANADA

On December 1st of each year the Dominion Bureau of Statistics makes a survey of the number of hogs on farms throughout Canada. This practice has been followed for the past six years. On December 1st, 1936 the total number of these farm animals was placed at 4,422,400. This is probably the greatest number of hogs in the history of agriculture in this country. This is an increase over the previous year of 465,400.

Hog production increased in every Canadian province except Prince Edward Island. The increase reached from 5 to 26 per cent the former figure being in Alberta and the latter in Manitoba.

Ontario leads all provinces in total hog population with 1,690,000 and showed a gain of 16 per cent over the previous year. Alberta is second with 855,700.

The following table shows the number of hogs in each province on December 1st, 1936 and the percentage of increase over the previous year.

	Total	Percent. Increase in Total Over '35
Prince Ed. Island	41100	
Nova Scotia	54300	14
New Brunswick	72900	10
Quebec	782300	10
Ontario	1690000	16
Manitoba	244100	26
Saskatchewan	[illegible]	10
Alberta	855700	5
British Columbia	65300	20
TOTAL—Canada	4422400	12

BRITISH IMMIGRATION AND FAMILY SETTLEMENT IN SASKATCHEWAN

Following up the Resolutions passed by the Saskatchewan Immigration and Settlement Convention of last September, we have been at Ottawa for the past month, in contact with Members of the House of Commons, and of the Federal Government on the subject of a resumption of British family settlement in Saskatchewan.

Yesterday we had a satisfactory conference with the Honourable T. A. Crerar, Minister of Immigration. In laying Saskatchewan's case before him, we emphasized particularly that a large majority of all groups of Members of the House of Commons and of individual Members, with whom we have discussed the Resolution of the Saskatchewan Legislature, the Resolutions of the Saskatoon Convention and the supporting action of the Saskatchewan Provincial Government, are in favour of a resumption of British immigration on a considerable scale, in conjunction with adequately financed and properly supervised settlement on the land, subject to the necessary finances being provided from United Kingdom sources.

The Minister assured us that he would place our Case and the Resolutions of the Saskatchewan Legislature and Saskatoon Convention before the Government at an early date for the Government's consideration; and that the Hornby Plan of organized, financed and supervised settlement is now under examination by his Department in accordance with the request of the Saskatchewan Provincial Government.

CANADA'S BUSIEST PRODUCTION LINE

There's no delay when you order your new CHEVROLET

COME to Oshawa for a minute. Step into General Motors' big manufacturing plants, birthplace of the new Chevrolets. Look at those cars come marching down the line! See with what care skilled hands weld unit to unit, bolt part to part —as Coupes and Coaches, Sedans and Cabriolets "grow up" in smooth succession before your eyes!

With thousands of these new models being shipped all over Canada, there's no delay when you order your new Chevrolet. So come to our showrooms now. Don't let another day go by without placing your order for the car that everybody's talking about . . . The new Chevrolet the only complete car in the lowest price field.

ROYAL MAIL WINS—

LAST FRIDAY, probably a million Canadian radios were tuned to the various stations broadcasting the running of the Grand National Steeple chase in England. To many listeners it was simply a broadcast of a horse race—to others it was an event holding forth wealth and notoriety according to which horse won. Royal Mail won the race. The announcer did not say whether, like Mr. Clutterham's car, he carried a front bench balcony annex on which to put the bags, or whether like the rural mail drivers he had a rear section in which to transport cream cans. To the man in Saskatchewan who won a large sum on the Irish sweep stake ticket he held, such remarks as above are irreverent, as they also would be to the several hundred of other prize winners. Even to the losers, which we surmise were almost without number, the race had an interest which only a two dollar ticket can impart.

The selling of Irish sweepstake tickets for several years past has become what might almost be called "big business". It is surprising how many people are willing, even desire to spend a dollar or two on the chance of reaping a large reward. It is not so much that they expect to win. Most of them know that the chance of any one individual winning is so remote that expectation is futile. But there is always the hope, the chance, the thrill, that by holding a ticket, lady luck may bestow her very rare favors upon one. If placed alongside many of the things many of us pay out two or three dollars for nowadays, the thrill, hope and chances involved in holding a ticket is value received for money paid out. We do not favor gambling in the generally accepted understanding of the word. Card playing, dice throwing, race track gambling have absolutely no appeal for us. But buying a single ticket on one of the many big sweeps in vogue today can hardly be classed as gambling. Gambling, despite its very many forms, promises something resembling opportunity. In card playing, one out of four; dice throwing, one out of two; race track gambling, one out of the horses in a race, which at no time are so very many. But buying a sweepstake ticket presents a chance of winning that is so remote as to be no chance at all.

How much money is spent by Albertans on sweepstake tickets will probably never be known. Certainly it is a goodly sum. Far too large a sum to be going out of the province for this purpose. Besides, in addition to the Irish sweepstakes that enjoy so much publicity, there are numerous others that take their toll from the pocket books of the people. Compared to the standard of living of people in some other countries, Alberta simply cannot afford to be cheerfully sending money out of the province year after year and getting only a small percentage back. We have to combat long, cold winters, hit and miss crop successes, the vagories of world markets and numerous other things, and the ultimate prosperity of Alberta is only being retarded by the constant drain from within to without, of sweepstake ticket money.

Sweepstakes are illegal. That is on paper. Every so often a check up of mail is made and sweepstake stuff denied mail transportation. Sometimes rank fraud is discovered and the purchasers of the fraudulent tickets are thus protected by the post office people working in connection with other departments. But while sweepstakes are illegal, the law is such that it can easily be sidestepped and the sweep run just the same. The truth of the matter is, that in spite of the fact that there is a law to prevent it, the average individual cannot realize that he is doing anything wrong when he or she buys a ticket on any important, or for that matter, unimportant horse race. Consequently tickets are bought and sold, money is lost and won, and few people think anything at all about the legal aspect of it.

We believe that the time is past due when the Alberta legislature should consider operating a government sweepstake and exercising stricter control on others that are not of government origin. We know that the restrictive laws against sweepstakes are federal, but it is more than likely that the federal authorities would make provision if the provincial house requested it. The restrictive laws are based upon, we expect, the bad influence of gambling in general, a good enough foundation. But the glaring fact remains that as far as sweepstakes are concerned, the restrictive laws do not restrict. Our interest in a provincial legalized sweepstake is not based so much on our liking for sweepstakes as on the wisdom of keeping this money within our own borders. Albertans cannot afford to pay out thousands of dollars yearly for fun provided outside their own province.

One could continue to write on the pros and cons of a legalized drawing indefinitely, giving opinions both for and against. But like many another matter it would simply be opinion that would be expressed. Fortunately there need be little argument or discussion concerning it, because how good or how bad it is can be easily determined. There is now, and has been for some time, a government drawing at Brisbane, Queensland, Australia. As a matter of fact there are a series of them throughout the year. The events are sponsored by the Queensland government, a governing body similar to our provincial body. Everything connected with them is so arranged that absolute fairness, impartiality and efficiency prevails. The actual ticket purchased always goes out from the government office at Queensland. Any ticket purchased from a salesman is simply a numbered receipt for the money, the number having no bearing whatsoever on the drawing. The drawing is made in the presence of police, press and as many of the public as care to attend. A fool proof machine is used which weigh several hundred pounds. Inside the machine there are numbered discs of equal weight and size. When an operator turns a crank, the discs fall down channels and the numbers become visible. There are many prizes with one outstanding large one. The winners are made known, each ticket holder receiving a full result of the drawing by mail.

NEW CHEVROLET MEETS WITH PUBLIC APPROVAL

The lively performance of the new six-cylinder high-compression valve-in-head engine developing 85 horsepower, the comfort of new all-silent bodies of uni-steel construction and the attractiveness of new speedline styling are three principal characteristics of the Chevrolet lines for 1937, which are being presented locally today. According to Chevrolet's announcement the new cars have been completely re-designed in chassis and body. This becomes apparent both to the casual observer and the man who takes the wheel; in the general appearance of the cars, with their distinct departure from previous style designs and in the peppy confident performance resulting from the application of Chevrolet's engineering genius to the problems of horsepower weight ratio, safety construction, economy of operation and luxury of appointment. The well-planned 1937 car with its silk smooth engine, is a landmark in Chevrolet's constant advance.

Two lines are offered, the Master and the Master de-luxe. They are identical in their wheelbase, 112¼ inches, in their compact chassis and power plant, in body design and general appearance. Differences are noticeable in spring suspension, body trim and accessory equipment only. The Master Chevrolet for instance, has semi-elliptic front springs, while the Master de luxe has knee-action front wheel springing, improved in certain respects. It is emphasized that while new in almost every detail, both Chevrolet lines for 1937 retain the basic principles which through the years have developed the Chevrolet character.

Both the Master and the Master de luxe are available in attractive colors in the following models:—5-passenger coach, coach with trunk, sedan with trunk and business coupe. In addition the Master de luxe carries a sport coupe with rumble seat and the Master carries a convertible coupe with rumble seat.

The road manners of the cars, influenced chiefly by the new engine, are such that Chevrolet for 1937 will soon make a name for itself. While scoring heavily in the power department however, the engineers have not forgotten comfort and safety. The hydraulic brakes have a reassuring, velvety action and the same ease of operation has been applied in every department right down to the new lifting jack, which can be operated from a standing position. Every model has commodious luggage space, either in a trunk or in a compartment behind the seat. As for safety, this has been considered from radiator filler to fuel tank.

The bodies, of course, are the great safety feature with their solid-steel Turret Top, steel double cowl and steel floor, all assembled into an integral steel structure by welding, without a single bolt, rivet screw or nail. Doors also are entirely of steel.

Fuel tank fillers on the 1937 Chevrolets have been re-located to extend through the right rear fender. With crankcase, radiator fillers and batteries also placed on the right side, all ordinary supply operations are thus performed from the curb side of the car. These changes are regarded as highly important from a safety standpoint.

The New Engine

Of a larger bore, shorter stroke, and developing 85 horsepower, the engine used in all chassis models has four crankshaft bearings instead of three as formerly with a 10 per cent increase in main bearing area. It is of 3½-inch bore by 3¾-in stroke instead of 3-5/16 by 4 previously. Displacement is 216 cubic inches as compared with 206.8 before and compression ration has been raised from 6 to 1 to 6.25 to 1. Greater power and torque are available at all speeds while fuel economy per cubic inch displacement likewise is increased. Engineers point out that crankshaft bearings are steel-backed babbitt while they are of graduated diameters. Outlet of the exhaust pipe is now in the centre of the engine and improved manifolding assures better heat control which is by thermostat.

Accessory equipment on the new 1937 Chevrolet includes a new air cleaner with easily removable filtering element; a gear-type oil pump, replacing the former vane-type; shorter, self adjusting leakproof water pump; new design higher reserve fuel pump.

It is pointed out that the completely new synchro-mesh transmission is compact and of more rigid construction. Improved friction cones have simplified the synchronizing mechanism.

The rear axle is changed in general design, utilizing a hypoid drive gearing which never before has been used in cars in the low-price field.

It will be noted that the propeller shaft is 1½ inches lower than in the former drive. This change has permitted the lowering of the entire chassis frame and body, while the ring gear itself is smaller in design. The new drive, engineers state, results in a greater contact area between gear teeth.

Braking is unchanged, with hydraulic actuation of Chevrolet's exclusive design of double-articulated brake shoe linkage within the drums, which are of composite cast-iron and steel with external cooling ribs. It is pointed out that the pedal support is now cast integrally with the main hydraulic cylinder which is attached to the chassis frame while both the brake and clutch pedals now have detachable pedal stems.

Steel disc wheels of new design with massive hubs accentuate the dignified modernistic lines of the new Chevrolets while the tires are 6.00-16. Fender-well wheel carriers have been abolished and spare wheels and tires are mounted either inside the built-in trunks or on concealed carriers on trunkless models.

Sloped running-boards of molded rubber on steel assure complete drainage. In addition to a new type of rear fender being featured the edges of all fenders are without moulding and are rolled inward. At the same time larger and longer headlamps have been adopted.

It is stated that all-round changes in the new Chevrolet, which is more compact with a gain in strength and reduction in weight, contribute to improved performance, safety economy and comfort. Greater roominess has been achieved by re-location of the power plant on the chassis frame, while use of the hypoid rear axle has resulted in a reduction of the overall height. The new box-girder frame and all-steel body has resulted in greater strength and durability. It is also claimed that greater car stability has resulted from the lowering of the centre of gravity and through wider-spaced rear springs.

In addition to the all-steel construction other features of the new bodies include greater visibility through wider windshields and larger windows. Seats are wider and interior styling is pleasingly new and attractive. A new instrument panel of striking appearance is to be found on the new Chevrolets, it is announced. Speedometer, oil pressure guage and other instruments are separately mounted on a carrier plate for easy servicing, but are installed in a unit grouping under a single plate of glass. Edge lighting illuminates the dial.

SUBSTANTIAL PROGRESS MADE PLACING COLONISTS ON LAND

MONTREAL, Que. March 22.—Very substantial progress was made last year in the establishment of colonists on vacant land served by the lines of the Canadian National Railways. The prospects for further increase in colonization activities during the present year are excellent, Dr. W. J. Black, director of colonization and agriculture for the National System, declared in a statement on the work of his department issued here.

The records of the department show that during 1936, 2,567 families, 2,232 heads of families and 1,684 single men were settled along Canadian National lines on 667,996 acres of land. These families were located directly by the department. In most cases they had sufficient capital of their own to settle independently and without assistance from any source other than the settlement service provided by the department.

The western offices of the department reported a total of 400 families settled on 121,661 acres of land. These families possessed sufficient funds to enable them to establish themselves on farms of their own.

In co-operation with provincial governments a great many city dwellers were assisted by the department to locate and establish farm homes for themselves. A total of 2,156 persons were carried on Canadian National lines to new colonization areas in the northern parts of Quebec province.

This and other colonization activities have resulted in the development of very large new farming areas in the province. During the past six years, Dr. Black points out, the population of the Abitibi area has been more than doubled, while figures for the 1936 five-year census of the three prairie provinces shows an increase in the six most northerly electoral districts of almost 17 per cent.

The department last year through its farm employment service was the means of establishing 3,181 persons on farms in various parts of Canada.

"In a general way, the outlook for the farmer improved during the year", Dr. Black said, "and with the continued improvement in prices for farm products, there is a growing evidence of a return to more normal conditions."

CANADA'S NATIONAL FARM MAGAZINE STILL GOING STRONG

The Family Herald and Weekly Star with many years of publication behind it is still in the vanguard of progress. This popular farm and home publication contains each week much of great interest to both rural and urban readers. It is safe to say it is purchased in more farm homes than any other magazine, a tribute to its reader interest and real worth. The Family Herald and Weekly Star can be had together with the Tofield Mercury for one year for $2.25.

THE OLIVER STANDARD "70"

Here's How the "70" Earns More Money the Year Around

There's no end to what the smooth-running, easy-handling, powerful Oliver "70" does for you. The more work you give it, the more money it makes you month after month.

On drawbar jobs, the "70" pulls two 14-inch plows at 3½ to 4½ miles per hour in average soil. It harrows, drills and plants at high speed, too. With power take-off, plenty of power is provided for a two-row corn picker-husker, small combine, grain or row binder, pick-up hay baler, potato digger or power sprayer. On the belt, the "70" is just right for driving a 22 x 36 thresher, for shredding or shelling corn, hammer milling, filling silos and sawing wood. Its smooth six-cylinder power means a saving of fuel on every job and it makes every job lighter. Choose either the "70" HC (high compression) for regular gasoline, or the "70" KD for kerosene or distillate. The same money-saving money-making operation is yours. Come in and get all the facts about this great tractor today.

TOFIELD - - ALBERTA

NEW HARDY FRUITS FOR THIS DISTRICT

Very little fruit could be grown here twenty-five years ago, but great strides have been made in the last few years in developing new hardy varieties and there are now quite a few fruits that can be grown here successfully.

Now is the time to order nursery stock for spring planting. It is not satisfactory to wait until garden planting time as trees will be starting to grow and will not do so good. Get your catalogue or list now and order early, not later than May 1st, but April 1st is better.

Among the hardy fruits that can be successfully grown here are—Several varieties of crab apples, one or two small apples, plums, sand cherries, raspberries, strawberries, cherry-plums, currants, gooseberries, rhubarb and several other fruits.

One cannot expect to get good results raising fruit if they allow rabbits to girdle the trees, let stock, chickens or other pests run over them or allow weeds and grass to take up most of the plant food and moisture.

If one likes to see things grow, a few dollars and a little work will soon pay dividends in fruit and pleasure in the satisfaction of seeing it grow. By all means put 2 inch mesh chicken wire, 4 feet tall around your fruit. One roll of wire will protect a dozen or more trees. There should be enough shelter to hold the snow.

In most cases fruit raised from seed will not be like the parent plant, so one should get trees started by grafting or some proper method. Many trees and shrubs are still being offered for sale that are too tender for this locality.

Rhubarb in some ways is our best fruit. It is not bothered by rabbits, mice or cold. Rhubarb's worst enemy are weeds, grass and wrong pulling. Rhubarb has been greatly improved in the last few years. Ruby or a selected seedling will be found to have an excellent flavor and will take no more sugar than apples, and will be found almost as delicious as strawberries. Try canning your rhubarb as early as possible in the spring. It has better flavor, takes less sugar and has less acid. The surest way to kill rhubarb is to keep it pulled all summer. Do not plant too deep and never put fresh manure around it. Use only well rotted manure.

Next to rhubarb or perhaps first are improved sand cherries. They can be grown from seed, but it will be found more satisfactory to get plants that have been started from selected plants. Seedlings will vary greatly in size, flavor and other characteristics. Good sand cherries have a wonderful flavor and are from ¾ to one inch in diameter and each bush will produce up to 6 or 8 quarts when 4 or 5 years old. They are perfectly hardy, grow about 3 feet high and ripen early. More than one variety must be grown to get fruit. They make up in many ways, preserves, pie, jam and jelly etc.

Selected Manitoba wild plums and some of their hybrids are going to raise a lot of good fruit here. They start bearing at about 4 years old and are hardy and tough. It is necessary to grow more than one variety to get fruit. Several varieties of cherry-plum do good here too and are excellent.

A few of the new hardy crab apples and one or two small apples do fine here. Some of them are good eating raw, being crossed with the large apples. Good crab apples and apple crab will supply apple sauce and pectin for jelling other fruit juices. Many of these start fruiting at 3 and 4 years old and produce heavy loads of fruit.

Some of the newer raspberries are hardy, raise heavy crops of excellent fruit if they are taken care of. Some of the newer varieties are practically thornless.

There are some new gooseberries out that sure raise fruit here. One to two gallons per bush is not unusual.

So far I have not found the everbearing strawberries very successful. The Senator Dunlop is excellent. It raises a large crop all at once and birds, etc. do not get so many. They should be planted on clean ground and covered with about 4 inches of clean straw about the 1st of December. By covering them with straw when there is 4 to 6 inches of snow on the ground, mice will not bother them like they would if the straw was put on before snow. It is not the winter that kills the plants, but the freezing and thawing in the spring, so if you did not cover them in the fall do so before the snow goes.

Mountain Ash, Red Elder and Nanking cherry are useful for their fruit and are very ornamental.

Selected chokecherry juice mixed with crab apple or wild cranberry juice makes excellent jelly.

Selected high bush Cranberries do good under cultivation and make good jelly.

Low bush cranberries if picked and made up before they get ripe make as fine a jelly as one can make.

There are many hardy shrubs, perennials and flowers that produce a lot of bloom, such as roses, honeysuckle, lilacs, Lillies, Gladioli and Iris and Peonies etc.

It is important to procure nursery stock early so it can be planted before the trees leaf out. Most things do best if planted as soon as the frost is out and the ground can be worked.

Get the right varieties, keep down the weeds, protect from pests and you are sure to raise fruit.

—Maurice McGinitie.

The Misses Mary Burnett and Jessie Munro spent a day in Edmonton this week.

The Tofield Young People's Society held a Scavenger hunt on Monday evening last. After the hunt hamburgers and coffee were enjoyed in the Church basement.

PHONE 8 C. PATTERSON TOFIELD, ALTA

KINGMAN

A farewell party was held in the Kingman Hall in honor of Mr. and Mrs. Olaf Halsett and two small daughters on Wednesday evening. Mr. and Mrs. Halsett and family left on Friday for Westminster, B.C. They were a highly respected couple and will be missed in Kingman community life. A purse of money was presented to them from their many friends.

Mr. Albin Anderson is visiting friends in Bellingham, Wash.

Mr. and Mrs. Simonson and son Henry spent last Sunday at the B. Chrifuson home.

Mr. S. Heie and Borgild were dinner guests of Mr. and Mrs. Mackintosh.

Miss Gladys Shalin spent a few days in Camrose visiting with Mrs. Easton.

Mr. Ben Stabler and Miss I. Thompson visited Edmonton on Wednesday of last week.

Mrs. Rognnes had for supper guests on Sunday: Mr. and Mrs. Oscar Johnson and 3 sons, Harold, Ronald and Wallace; Miss Olga Johnson, Mr. and Mrs. Thomas Rognnes and Arnold.

Miss Delia Simonson called on Miss Muriel Asp on Sunday afternoon.

Mr. Herbert Asp is back home again in the barber shop after being in New Norway for the past month.

Rev. Emil Erickson will hold services at the Lutheran church on Good Friday in the evening at 8 o'clock.

Mr. Thor Grahn and family called at the W. Grahn home on Sunday evening.

Mrs. Helga Reger and little son Allan are visiting at the P. Simonson home for a few days.

The home talent play which was held in the Kingman hall last Saturday was well attended. They realized twenty-eight dollars clear.

The Social Credit Group will put on a program in the Kingman Hall on March 31st, at 8 oclock.

We are glad to hear that Florence Hard of Kingman High School is much better again. She has been very ill with the flu.

URGES BUSINESS TO VOICE VIEWS

WINNIPEG, March 16.—Western business men were urged Monday night by John M. Imrie, managing director The Edmonton Journal, to express their views "on the dangers of repudiation of bureaucracy and of radicalism" and "to stem the tide that has set in across the prairies."

In an address to the Winnipeg board of trade at their 58th annual meeting, Mr. Imrie made seven suggestions for submission to the proposed royal commission to study federal-provincial financial responsibilities.

"The present is not alone a time of great danger," he said. "It is a time also of great opportunity." The rise and spread of Social Credit reflect the swing of the pendulum to a far extreme as a protest against an accumulation of grievances, he said.

Mr Imrie suggested the commission be asked to study:

1. Effects of early settlement mistakes, such as the opening to homesteaders of large areas far removed from railroad, highway, education and other facilities.

2. The old tradition that "the west can pay more" has outlived its justification and its abandonment in some measure, is necessary to ensure the financial independence of the prairie provinces.

3. "There should be a thorough analysis of the excess cost to the prairie provinces, governmental and individual, of the national tariff policy."

4. Due attention should be given also to the indirect cost of national trade policies through resultant curtailment of foreign markets for wheat and other agricultural products of the west. Every tariff increase or dumping duty that affects adversely an actual or potential buyer of the west's agricultural products adds to the indirect cost to the west of national tariff policies."

5. "Two at least of the three prairie provinces have had for many years an unfavorable trade balance."

6. "Much of western business is in the hands of dominion or other extra-provincial corporations or of individuals located in other provinces. This situation helps to broaden the base of taxation of the dominion and of these provinces."

7. "Progress of mining and of paper making and the armament program has made eastern Canada less dependent on western conditions."

WOODLAWN

The play which was produced in Kingman Hall last Saturday by the Woodlawn Dramatic Club received a large attendance and on the whole could be considered quite a success. The players also visited the home of Mr. and Mrs. Bill Grahn, former residents of the Woodlawn District. The Grahns are quite well settled in Kingman and seem to be enjoying the town life.

A few of the Woodlawn young people attended the play and dance in Kingman Hall last Thursday evening. By all reports they had a real jolly time.

Miss Kathleen Loughead left for Viking last Thursday.

Here's wishing Health, Happiness and Prosperity to the new bride and groom, Mr. and Mrs. Henry Huebert.

Miss Nola Cookson has been quite ill and unable to attend school for the past few days.

FOR SALE—Barn, 14x24, 1½ storeys. Apply J. W. Morton, Tofield.

LAKESHORE

Mr. and Mrs. L. H. Graham and Lawrence motored to Edmonton one day this week. Miss Marie Graham will return with them to spend the Easter holidays at home.

Mrs. George Francis returned from Ontario last week where she had spent several months visiting friends and relatives.

R. C. Phillips spent several days in Edmonton last week.

Miss Grace Mackinnon spent the week end at Bertha Seale's home.

SEVEN IN A ROW

Laurie Scott, the pride of Duluth hockey fans when he was a member of the Hornets and who now divides his time between operating an oil station and coaching the Duluth Zephyrs of the International Amateur Hockey league is a happy man today. Last night he watched his black-and-gold-clad ice warriors capture their seventh consecutive league victory by beating Eveleth, 4-3 and clinch second place in the final I.A.H.L. standings, one notch above the powerful Port Arthur Bear Cats and only four points behind the league leaders, Fort William.

LOCAL & PERSONAL

The first of a series of Saturday dances by the Melody Makers will be held in the Variety Theatre, Saturday, April 10th. Don't Miss It!

Miss Glenna Hannan is visiting her grandparents, Mr. and Mrs. J. D. Hannan of Camrose over the Easter holidays.

Mrs. McIntyre and son Donald is visiting with Mr. and Mrs. McIntyre of Raven, Alberta.

Mr. Jacobs sr., of Washington, U.S.A. is visiting his son here for some time.

Miss Betty McCarthy who is training in The Royal Alex Hospital in Edmonton visited her home here on Sunday.

Mrs. Hans Berge Krogh of Copenhagen, Denmark, visited with Muriel Malcolm over the Easter week end.

Miss Joan Ellis of Edmonton spent the week end at the Malcolm home here.

Mrs. D. E. Ball of Edmonton is visiting with her sister, Mrs. Geoglein.

Mr. E. Geoglein is spending some time in Calgary.

On Friday afternoon Muriel Malcolm entertained a number of friends to tea in honor of her friend Mrs. Hans Berge Krogh. The room was tastefully decorated with Easter lillies and daffodils. A dainty lunch was served and a very pleasant afternoon was spent.

Mr. and Mrs. Geo. McLaughlin and Enid of Wetaskiwin visited at the Jacobs home on Sunday. Enid remained to visit with Ida Jacobs for the holidays.

Mr. and Mrs. R. Whyte of Wetaskiwin spent the week end at their parent's homes here.

Mr. and Mrs. W. Swift and family of Camrose spent the week end at the Swift home here.

Mr. Geo. Bruce returned on Sunday evening after spending a week at the coast.

Miss Isabel Robinson of Edmonton is spending the Easter holidays at her home here. She will teach at the Lakshore school for a week of practice teaching before returning to normal school.

Max Rogers spent the Easter holidays with his parents here.

On Wednesday evening of this week Mrs. S. Yakabuski entertained a number of friends to bridge in honor of her sister-in-law, Mrs. Neale, who is spending a few days with her. Honors at bridge were won by Miss M. Bethel and Mrs. Simpson. A delicious lunch was had and after an enjoyable social time was spent, the guests departed for their homes.

Mr. R. Evans of Athabasca has accepted a position at the local creamery.

We sure have a live Harness Maker on 3rd Avenue. I noticed him riding a bicycle after the runaway horse on Wednesday morning. Needless to say he landed the job for repairs.

Born: To Mr. and Mrs. Paul Thomas, on Tuesday March 30th, a son, Barry Owen.

Visitors at the Allan home for the week end were: Mr. and Mrs. Gordon Provost and son of Edmonton; Miss Elspeth Allan and Mr. Dick Poating from Westlock; Miss Margaret Allan from Barrhead and Miss Aileen Allan from Edmonton.

LOCAL CREAMERY INSTALS NEW CHURN

This week the Tofield Creamery installed a new churn and is now all set for a big season's business. The new piece of equipment is of latest design and was shipped direct from Quebec to Tofield. It carries the name of Maple Leaf and has a capacity of 1200 pounds of butter at a churning, and weighs about 5000 pounds. It churns faster than the old type.

A new innovation as applied to churns is the clutch, this churn being equipped with a clutch of the same type as is used in the automobile industry. Large, new and shiny, it appears as a standing invitation to all farmers of this district to route their cream through it.

HOLY TRINITY CHURCH

Holy Communion 11:00 a.m.
Evensong (short) 7:30 p.m.

Followed by Song Service of favorite hymns. Solos and anthems by the Choir.

Rev. [illegible]

KETCHAMOOT

Miss Nellie Lindsay is spending the Easter holidays at the home of her sister, Mrs. Margaret Sims of Hinton.

Miss Mabel Lawson of Camrose is spending the Easter holidays at the parental home.

Miss Marie Lawson who is attending school in Kingman and Miss Maud Wildman who is attending high school in Edmonton are home for the Easter holidays.

Mrs. Elsie Carlisle and daughter Noreen spent the holidays at the home of her parents at Hay Lakes.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday April 7, at the home of Mrs. Rev. Allan in Tofield. A cordial invitation is extended to all.

Mrs. J. H. Ingram, Mrs. Les. Ovelson and Lloyd Ferguson were guests of Mrs. E. McMullen on Tuesday.

Mr. and Mrs. Campbell and family of Woodlawn were Sunday guests of Mr. and Mrs. Coombes.

(Continued on back page)

SOCRED REBELS FAIL CHALLENGE TO SETTLE ISSUE

Facing down members of the Social Credit party in the legislature who believe that a change of leadership is imperative, Premier William Aberhart emerged from a five hour caucus of Social Credit legislators on Wednesday night still holding the reins of leadership. But the matter not yet settled and although no agreement has been reached the so-called insurgent group in the ranks of the Social Credit members is reported to be still unsatisfied and the matter may be thrashed out at another caucus which may be held tonight.

Wednesday night's caucus which started shortly after 8 o'clock and continued until early Thursday morning, lasted for over five hours. At times discussion was acrimonious, one member describing it as "a dog fight."

The caucus was called as a result of the split in the party on the budget debate and which has only been temporarily bridged over by the passing of interim supply.

Although members of the caucus are pledged to secrecy, it is stated that the Premier threw down the gauntlet to recalcitrant followers and declared that he would not only resign, but that members of his cabinet would follow his lead if more unanimity was not obtained among government back benchers and the cabinet was not given assurance that sufficient support would be forthcoming to carry on the business of the province comfortably.

Despite this outright talk the necessary assurances were not passed, and there is still considerable unrest in Social Credit ranks in the legislature which may culminate in one or more resignations over the week-end.

SLIGHT ACCIDENT ON MAIN STREET THURSDAY

On Thursday morning about 10:30 a slight accident in which, Walter, young son of Mr and Mrs Piper, was injured, occurred. The lad jumped out of his dad's car just as Bill Taylor was coming down the street in his car. The lad and Bill Taylor were quite close and neither could stop before the boy was hit. Bill was driving quite slowly and while the boy was hit and knocked down, fortunately he was not seriously injured. At first it was feared his leg was broken but examination at Dr Law's office showed that with the exception of shock and bruises he was not hurt.

E. W. ROGERS

THE CHOICE OF BIRDS FOR THE BREEDING PEN

(Experimental Farms Note)

A great deal has been said and written about preparation for a successful poultry hatching season. Considerable progress has been made in recent years, but there is still room for improvement, there are a few considerations from the standpoint of the birds themselves and their qualifications which should be emphasized once more for the benefit of those who are about to mate up their breeding pens. Among these important considerations vigor should come first. This applies as well to the male birds as to the hens. Too often poultrymen are carried away by the outstanding records of some of their birds and give too little weight to other things.

When it is considered that the average yearly production of farm hens is in the neighborhood of one hundred or lower, and that in selected flock the average is twice that number in many instances it seems apparent that this question of vigor is vitally important. Not only is it necessary to mate vigorous and heavy producing hens to healthy and well developed cockerels, but the size of the egg must be considered. This statement applies to all breeds for although some strains are heavy producers the size of the egg is often below the standard. It is important that cockrels which are often bought at high prices be well qualified; that is, that the dams and granddams on both sides should have laid many and large eggs. If such qualifications are required from the male birds no less scruple should be shown when selecting the hens. Hens are mentioned intentionally because results for an average of fifteen years at the Cap Rouge Station, P. Q., show that it takes fewer eggs per chick when wing banded (three weeks old) from hens than from pullets.

With dual purpose breeds, matings should also be made with a view to improving the conformation of the birds. Many thousands of dollars are lost each year when these birds are graded, either for local or export markets, because to little attention was paid at mating time to the suitability of the breeding birds for meat purposes. It would appear that satisfactory body conformation is not incompatible with high production. While it may be true that those interested in profits which can be made from poultry meat, yet they can control this situation to a large degree since they are the ones who supply the chicks.

The full development of each and every important point to consider at mating time is not possible in this short article. It should be emphasized in closing, however, that to further improve the poultry situation, only birds which are vigorous, well developed, of good type for the breed, and high producers of normal eggs, should receive consideration for the breeding pens.

WORLD OF WHEAT

By H. G. L. Strange

Since the dawn of agriculture, the dreaded black rust, like a giant scythe, has from time to time, mercilessly cut down the farmers' fields of wheat.

In 1935, after several years of distressing drought, Manitoba and Saskatchewan had the promise, at last of a bumper crop. Thirty, forty and fifty bushles to the acre were the words on every body's lips. Alas! the rust crept in and the fine promise of a bountiful crop became a mockery. The horn of plenty was ruthlessly snatched from the very grasp of the expectant farmer.

Mr H Lillejord, of Arnaud, Manitoba, however, had a crop of good red Spring wheat that matured unharmed by the rust. It was Thatcher, a new rust resistant variety, under development since 1907 by the Minnesota Agricultural Experiment Station. The Manitoban Government purchased Mr Lillejord's crop and distributed the seed, as far as it would go, to Manitoba farmers.

There was, however none available for Saskatchewan. So, with the encouragement of the Dominion Department of Agriculture the "Crop Testing Plan" imported from Minnesota all the highest class registered Thatcher available for their best seed growers. Nine carloads were brought in and distributed at cost to some two thousand farmers in Saskatchewan and Manitoba.

The following factors have tended to raise prices:— Intensive demand for wheat by certain European countries continues unabated — Soviet Spring sowings considerably behind schedule — Wheat crop in the Orient expected to be below last year. Drought affects rice crop in French Indo-China — Siamese rice surplus for export smallest in five years.

The follow factors have tended to lower price:— Favorable weather in the United States' winter wheat belt — Beneficial rain occur in Australia — Crop prospects in Argentine good — Egyptian corn yield above average — Generous rains assure good cereal germination in Palestine —U. S. A. total wheat acreage may be 68 million.

THESE TROUBLOUS TIMES

This sad world today seems full of grave discontent, with the serious unrest that exists among individuals, groups of people and nations.

Unemployment abounds in almost all countries with all the distress and suffering that ever has been part of it. The prices of industrial and agricultural products are out of adjustment, impairing the purchasing power of consumers and the productivity of the workers.

Innumerable individuals, numbers of towns, villages and municipalities and even nations, find themselves over-burdened with debt. The production of goods, commodities and services, and the trade and exchange in these necessities and amenities of life, between nations is at a low ebb. The movement of capital and labor between countries has practically ceased. Many nations find it difficult if not impossible to purchase from others those essential raw materials which are so vitally necessary for the health and well being of their people.

Governments, at their wits end in an effort to reduce the burden upon their people, have, in many cases repudiated their own just debts, have arbitrarily reduced interest rates and almost generally have paid interest and repaid principal in a form of money of less value than they agreed to so in their bonds and contracts.

Governments, in addition, have depreciated their currencies in order to make the payment of debts apparently easier, and as well to try to obtain a temporary trading advantage over other nations. They have also, in a great measure closed their countries to the importation of foreign goods in order to try and conserve work for their own people. Many states have placed legislation on their statute books with the intention of relieving debtors of part of the principal and interest owing to creditors.

Farmers the world over have demanded that governments should artificially bring about or set higher prices for agricultural products—workers in almost every country have struck for higher wages and shorter hours.

These attempts to better conditions may temporarily help one class of people but only at the expense of others; may help one nation for a time, but harm others, and so they lead to the creation of prejudice, passion, hatred, intolerance, suspicion and envy among the nations, and between different classes and groups of people.

As a consequence, leaders of certain countries which are in desperate need of raw materials, feeling their people have been treated unfairly, make veiled threats to other nations and engage in campaigns of imperial expansion. Thus, fear becomes rampant, the nations begin to arm to defend themselves against each other, and as a result vast sums for armaments are loaded on to the already over-burdened taxpayers.

Remedies Suggested

Innumerable remedies are suggested to restore the prosperity that once existed, among them being the devaluation of money, the planning of production distribution and the consumption of products and commodities, the nationalizing of private business and enterprises by governments, the fixing of prices, and the policies of "Self-Sufficiency" or "Nationalism." Advocated too, are changes in political systems from Monarchies to Democracies, to Fascism to Communism and by some the reverse of this sequence back to Monarchy. The exact remedy suggested depending upon the particular belief and conviction of the advocate as to the primary cause that brought about the depression.

A study of the economic and social history of the past reveals unquestionably that the troubles existing in the world today, and the remedies proposed to cure them, are no new things, that they are in fact as old, apparently, as the human race itself. The story of mankind during the times of the Ancient Jews, of the Assyrians, of the Egyptians, of the Greeks, or the Romans throughout the Dark and Middle Ages to the very present day is a story of ever-recurring periods of booms and depressions of prosperity and of adversity. These phenomena have occurred in something of a regular rhythm in the past, with peoples of all races, of all creeds and under every kind of monetary, economic and social system conceivable, yet alternate prosperity and adversity and the recurrence of deep depressions, similar to our own, have run like warp and woof throughout the ages.

War the Real Cause

Quite evidently, then, the causes of our present trouble, and other like depressions, cannot be, as many suppose, merely the result of defects in our capitalistic or economic, social, monetary or political systems, nor have they anything obviously to do with race or creed. Behind every depression recorded in history there has been however, one important event that has ever occurred and which quite evidently has been the cause of all periods of great adversity. This common event has been a great war. No serious period of adversity or depression seems to have happened excepting as the result of war. No great war has ever occurred without the aftermath of a deep depression.

Records reveal that great wars ever bring in their train the same sequence of events. Rising prices, a scarcity of labor, greatly increased wages, enhanced commercial and industrial activity and a considerable expansion of debt by individuals and governments. In other words, a boom. Then, ever a feeling that a "new era" had arrived, that the standard of living of the people had permanently risen. Then, usually unheralded, and totally unexpected, comes the crash, the return to earth, the end of the holiday. Creditors demand repayment, prices fall, unemployment greatly increases. The period of depression lasts for a number of years, the bottom is reached, then comes the gradual climb upwards to recovery, or as occasionally happened, the disappearance almost entirely of a civilization.

The Same Remedies Proposed

During each depression the same identical remedies are ever proposed, often some are tried, but there is no definite evidence that any of the "cures" in the long run, have been very helpful, yet recovery seems to come at about the same rate approximately, and at the same time, with all nations, regardless of their political or monetary, social or economic system.

True recovery however, and the start of another period of prosperity, ever seems to have been signallised, with certain important phenomena. A definite increase in the production of gods and commodities; a readjustment of agricultural and industrial prices; and a most definite expansion of the trade between the countries in the world; and then, most noticeable of all, the reappearance of friendship between the people of the world and a considerable increase in the esteem and respect the nations and the people hold for each other.

Better Methods For Recovery

Perhap it might be recovery from the depression would come quicker if less attempts were made by governments to interfere with private business and enterprise, or to attempt to "fix" prices, and if more energy were to be devoted towards increasing the production of goods, commodities and services, and in devising ways and means of making these things available, without hindrance, to the peoples of the world that so badly require them.

This, it is suggested, would lead to a betterment in the friendship that should exist between nations, hence to the possibility of a reduction in armaments, so in turn to a raising of the standard of living of all.

Then, if future depressions are to be avoided, it seems, that the only way would be for war itself to be eliminated as the means of adjusting national differences. —Searle Grain Co. Lt.

COMMON ERRORS IN CHILDREN'S DIETS

Every mother wants a healthy happy child. There is no way in which health can be better influenced than by giving the child a proper diet. Due to the desire of parents to prepare attractive looking food and to give the child food that it likes, very often some of the food elements necessary for good health are not present or have been removed in the preparation of the food.

Milk, meat, eggs, vegetables (including salad greens) and fruits are our most valuable foods. Although it seems at first glance a very simple task to have your children's meals, or for that matter your own meals, built around milk, meat, eggs vegetables and fruit it is extremely easy to give too much of other foods which result in an unbalanced and unhealthy diet. One of the greatest dangers in giving an excess of sugars, such as candy, jam or marmalade. Sugars are of value to supply calories or energy, yet due to their pleasant taste children invariably are inclined to take too much of these sweet foods. Frequently children take too much starchy foods, such as pastry, cakes, cookies and even bread. Although sugars and starches are of value as a source of energy if too much are taken they are harmful as one does not then take enough of the other foods which are necessary for a balanced diet.

It is a simple matter to take pains to see that your child gets each day a pint and a half of milk, including the milk used in cooking, [illegible] some meat, two vegetables besides besides potatoes and some raw fruit. If your child receives too much of the starchy or sweet foods, although he may appear to be quite well, on close examination it will be seen that he tires easily, is somewhat pale, is not as firm or solid as he should be and frequently is subject to constipation. In this state he is much more apt to get colds or other illnesses which may permanently undermine his health. It is essential for a healthy happy child to get a well balanced diet.

Questions [illegible] Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

CANADIANS AND THEIR INDUSTRIES . . . AND THEIR BANK

· · THE FOREST INDUSTRIES · ·

The forest area of Canada on which there is timber of merchantable size is larger than the total area of France and Germany combined, the standing timber on this is estimated at 274 billion cubic feet. An area of even greater extent is covered with young growth.

This vast reservoir of wood is the source from which Canada drew wealth in excess of $110,000,000 in 1934 (*the latest figures available*) in the form of primary products such as

- raw material for saw mills, pulp mills, wood distillation, charcoal plants.
- logs, pulpwood, bolts, etc., for export,
- firewood, railroad ties, posts, poles, fence rails, mining timbers,
- maple sugar, balsam gum, resin, cascara, tanbark, moss, etc.

The total value of manufactured products made principally from raw materials of forest origin was $404,433,948.

Forest products in 1936 afforded an excess of exports over imports—$158,360,000—very important to Canada's international trade.

The Bank of Montreal has co-operated with every activity of the forest industries—assisting in every phase of production and marketing. The Bank has had the privilege of financing a large share of the export business of these industries. Thousands of workers are depositors, sharing in the safety and facilities of the Bank with their employing companies.

• • • • •

Some of the Bank's services most frequently used by employers and employees in the forest trades: Commercial accounts, foreign exchange accounts, financing of shipments, commercial loans and discounts, collections, trade and credit information, safekeeping of securities, savings accounts, personal loans, money orders, travellers cheques, banking by mail.

THE MAIN CHANCE—

AS WE write, as we go to press, the air is full of rumors and counter rumors as regards the fate of the present Alberta government. The largest government group in the legislature have split into two factions and at the present moment one man's guess is as good as another as to what might happen. Reports in the daily papers tell of a crowded gallery, so many people in fact, as to overflow out of the legislative chamber into the main hall of the parliament buildings, where for the benefit of people who have assembled there, loud speakers have been installed so that the proceedings inside the legislative hall may be heard.

Not only at the parliament buildings is interest at a high pitch. Throughout Edmonton, the capital city, rumors fly thick and fast, and business men with more at stake than mere political beliefs and preferences, congregate in groups discussing the latest piece of news and weighing its significance. Not only the capital city is effected but throughout the province, on street corners and in stores of small towns, little groups of interested citizens carry on animated conversations.

It is all very interesting, though perhaps partly confusing. For the time being men, and women too, do feel that so much depends upon the fate of the government. And in a way, certainly, so much does. But after all, with the protecting shadow of the Dominion government over us, there are things of even more importance than the fate of the provincial government.

In a very short time farmers of this and other districts will be in the fields sowing the seed for another Alberta crop. Beyond choosing good seed, using the right type of implement, and preparing a good seed bed, there is little the individual farmer can do regarding having a good or bad crop, weather conditions being the deciding factor. But the very fact that there are thousands upon thousands of acres to seed, and men and implements to put the seed in, makes this by far the most important thing in the province of Alberta today. Beside this, the fate of the present Alberta government is puny. Any one single crop year in Alberta is important, but on this coming crop depends much. Economists tell us that the depression is over. Perhaps it is for Eastern Canada and other industrial territories. but here in Alberta, while there has been some improvement in conditions, we are far from having made a complete recovery. For the past six years due to one cause or another, low prices, light crop, and frost, the farmers of this province in the aggregate have had no easy time navigating their financial craft. Last year was a little better, but even then there were large areas where insufficient rain fell to bring about a really good yield. Some places they had no crop at all, while others of course did not fare too badly. Prices were fair, at least they were quite an improvement over the years immediately preceding, but such havoc as the years of depression has wrought, was only partially healed by last year's crop, even where it was fair to good. This coming crop year will in many instances be the deciding factor in the fortunes of many an Alberta family. Five or six lean years warrants the return of a fat one, and we hope for the sake of Alberta and the west as a whole, that the coming year will be plenteous.

So while the fate of the provincial government may be making many a man's pulse beat a little quicker, and conjecture and supposition be the dominant note, we are content to look forward in time and outward to the fields, hoping that once again as in years gone by, they will produce abundantly of those things that really go to sustain life in its manifold forms. We know well enough that as long as Alberta's acres produce, there is no question but that we will have a government of some kind, and if they do not, we will not be able to afford one of any kind.

ONE VAST SLUM?

My general impressions (on the Russian situation) may be summed up as follows: There are good things—good things in labor and factory conditions, in creches, holidays, rest camps, preservation of museums, the encouragement of opera, ballet, concerts. On the other hand, the impression made on the ordinary tourist is of a country which is one vast slum—drabness, dreariness, sameness, no color, no garden, no flowers, no variety, no contrast, no luxuries. The three weeks I spent in Russia were among the most interesting but most depressing weeks of my life. I felt a terrible sense of oppression; but I frankly admit that if there were a secret vote in Russia today, 80 to 90 per cent of the people would vote for the existing regime—partly because they know nothing else and partly because of the efficiency and intensity of the propaganda. They are in a sense, happy for the same reasons.—Capt. Victor A. Cazalet, M.P., in The Nineteenth Century (London).

WARBLE FLIES CAUSE FARMERS HEAVY LOSSES

Losses in livestock in Canada from all causes attributable to warble flies have been estimated from $7,000,000 to $14,000,000 every year according to information compiled by Dr. Arthur Gibson, Dominion Entomologist and C. R. Twinn, Entomological Branch, Dominion Department of Agriculture. There are two species of these flies and their life histories and injurious habits are similar. The flies lay eggs during sunny days on the legs and lower parts of livestock, particularly of cattle. About 400 eggs are laid by each female fly. The tiny grubs hatch in a few days, penetrate the skin, migrate through the tissues and in some cases congregate in the region of the gullet where they remain until late winter. Then they migrate to the skin of the back, which they perforate to make breathing holes and after about two months force their way through the holes, drop to the ground and change into pupae. From the latter, the flies emerge in the spring and summer, mate, and lay their eggs on the legs of the cattle. The flies live only a few days, but are continually replaced by the emergence of new individuals throughout the summer. And so the cycle is continued year by year.

Apart from the damage they do by perforating the hides, the flies are injurious to cattle in several ways. When laying their eggs, their buzzing frightens the cattle, causing them to run round the fields. This reduces the yield of milk and brings about loss of flesh and condition. The animals become unthrifty and do not gain satisfactorily when the grubs are numerous, with the ultimate result that valuable meat is wasted, necessitated by the butchers having to trim off "licked beef" from the best parts of the carcass where the grubs have been.

Measure of Control

Control is effected by removing or killing the grubs while they are exposed in the backs of the animals. The simplest and most effective method consists of applying a wash made from standardized derris powder (1 lb.) soft soap (½ lb.) and water (1 gallon). The soft soap is boiled in a quart of water and when somewhat cooled is poured into a bucket containing the derris powder and mixed with it into a paste. Cold water is added slowly while stirring to make up one gallon; the mixture is then ready for use. Standardized derris warble fly powders ready for use are sold commercially. The cost of materials for four dressings is from 4 to 6 cents per animal. The date for the first application, varying in different parts of the Dominion, is in early spring when the swellings in the backs of the animals caused by the grubs first become conspicuous. In the interior of British Columbia this treatment is given in mid-February; in the Prairie Provinces and Eastern Canada about the third week in March. The second and third applications are made after intervals of 28 days and the fourth after a further interval of about 35 days. The wash is liberally applied to the backs of the animals with a cloth or brush wherever the grubs are present. Only sufficient wash for immediate application should be prepared and it should be stirred frequently.

BOOKLET DEPICTS FEATURES OF JASPER NATIONAL PARK

The tourist desiring information on Jasper National Park in the Canadian Rockies will find within the pages of an attractive booklet just issued by the Canadian National Railways full details about this great natural paradise and the many facilities offered to visitors for recreational enjoyment. Jasper National Park lies on the main line of the Canadian National Railways and is reached from eastern American and Canadian cities through Winnipeg and Edmonton, and with equal facility from Prince Rupert, Vancouver and other coast cities from the west. Diverse and optional routes are also available.

This booklet, a handsome production in color contains a wealth of information about all aspects of this 4200 square-mile outdoor scenic playground and is accompanied by a series of photographs depicting the enjoyment of life midst the glories of nature in its most pleasing setting. A glance at the booklet reveals the variety of pastimes that may be indulged in by the tourist, such as motoring in the park, trail riding and hiking, golf, fishing, climbing and big game and camera hunting.

Reproductions of natural photography, depicting the glories of the Tonquin Valley and Maligne Lake, suggest the vivid coloring of these masterpieces of nature. The booklet is accompanied by a map showing location of the roads, trails, mountain peaks, rivers lakes and glaciers in the Park and will be found a handy reference guide to an intending visitor.

MINING DEVELOPMENT IN WESTERN CANADA PROCEEDING RAPIDLY

MONTREAL, Que March 29. — "Mining development is going ahead in Canada at a surprising rate, which is an indication of the immense resources in this field yet unexplored", stated F. V. Seibert, superintendent of the natural resources department of the western region, Canadian National Railways, in an interview here. Mr Seibert has been attending the Canadian Institute of Mining and Metallurgy convention here.

Speaking of development in northwestern Ontario, Mr Seibert stated that three years ago in the territory between Long Lac and the Manitoba boundary there were only two producing mines, whereas today there are at least 16, which last year produced a gross of over $9,000,000. These were all gold mines but one, which is a chromium mine near Collins, Ont. Over $6,000,000 was spent in wages, supplies and equipment in this area last year for mining development and production. "The interesting feature of development in this area is that gross production is more than taking care of all expenditures in development, high as they are", stated Mr Seibert.

Operation of the Flin Flon mine in Manitoba overshadows all other development in magnitude, according to Mr Seibert. "Nevertheless, a number of new mines have come into production in this area during the past year, while others give promise of coming into production this year."

"Saskatchewan, although considered primarily a grain producing province, has not been without its mining development, the two most conspicuous being the Beaver Lake-Flin Flon area and the Goldfields camp on Lake Athabaska," stated Mr Seibert. "Radium development at Great Bear Lake is well known and plans are being made for further expansion. Perhaps the most notable feature of mining in the northwest territories has been the number of gold discoveries on Great Slave Lake," concluded Mr. Seibert.

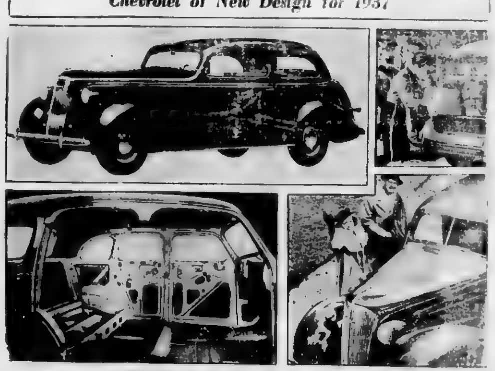
Chevrolet of New Design for 1937



SMARTLY STYLED UNISTEEL BODIES WITH NEW POWER PLANT

Chevrolet announces two cars for 1937—the Master and the Master de luxe. They are of identical wheelbase and both powered by a new valve-in-head motor of 85 horsepower. All-silent all-steel Turret-Top bodies by Fisher of unisteel construction are a feature of both. A cutaway view of the unisteel body is shown lower left. The flashing speedline, which extends from the hood through the front door panel, is shown lower right. The generous capacity of [illegible] trunks, a feature of [illegible] models, is [illegible] left, the Master de luxe [illegible]

MUNICIPAL MEETING

(continued from front page)

agreed to re Ketchamoot and Hastings Lake school districts.

Mr. Johnston Ferguson was reappointed relief inspector and he and the secretary will have authority to administer food and clothing relief to the best of their judgement

The council agreed not to furnish seed relief this year

A delegation met council re building of Spilsted school house Council stated they were not in a position to accept work performed on school as payment of school taxes

Mr Geo Abernethy interviewed council re resolution passed at annual meeting, reading report as appeared in Tofield Mercury Council considered this report was neither clear or concise and left ample room for argument

The "signing officials" of the Municipality were appointed the same as viz the reeve and secretary.

By-Law No 1-37, a by law to provide for the acquisition of land for road and other purposes was given first and second readings.

By-Law No 2-37, a by law authorizing the sale of S E 28-50-20, W4 to Mr Hjalmer Hanson was given first and second readings

Council decided to sell the S E 22-50-20 W4 for the sum of $400

Councillors Glenn and McSporran were appointed a committee to investigate and valuate S half of section 4-51-20-W4 and section 31-50-20.

Secretary was instructed to write the parties concerned, all of Hay Lake, that "council do not consider that 1936 spring floods were of a permanent nature, therefore council is unable to recommend to the Provincial Department of Municipal Affairs Edmonton that a new assessment be made Further, council requests all arrears, not under tax consolidation on property listed below, be paid on or before May 1st, 1937, otherwise steps will be taken by council to affect collection. All of section 8-49-21 W4; S half 8-49-21 W4.

The council went on record as being opposed to paying for the minutes of meetings being published in the Tofield Mercury. However, if the Mercury wishes to publish minutes free of charge, council has no objection.

A resolution was passed making Friday, April 9th, 1937 the next meeting date. Meeting commences at 10:00 a.m.

BARLEY VARIETIES

At this season of the year farmers are deciding the crop and varieties that will be grown in 1937. The National barley committee wishes to draw attention to the fact that according to Circular No. 65 of the Board of Grain Commissioners, that only C.A.C. No. 21, Mensury, Mensury Ott. 60 (Chinese,) Manchurian, Gartons, and Peatland, are the only six-row varieties that will be admitted into the malting grades, i.e. No. 1, No. 2, No. 3 Extra C.W. Six-Row. While for feeding purposes the new smooth awn sorts, i.e. Regal, Wisconsin No. 38 and Nowal may be desirable they cannot be graded malting. Trebi may be graded into No. 1, No. 2, or No. 3 Extra C.W. Trebi, but brings no higher price than No.3 CW barley, the best feed grade.

KETCHAMOOT

(continued from front page)

Mrs. Davison and family and Harold Coombes visited at the Jesse McMullen home at Ryley on Sunday Miss Jean McMullen was a patient in an Edmonton hospital, but was able to return home this week.

Little Miss Elaine Thomas of Tofield is spending the Easter holidays with her friend Mrs A F Schultz

Congratulations! Mr and Mrs P Thomas

Mrs C A Ingram was Sunday guest of her brother, Mr P O. Moline, also took in the Easter cantata at the Amisk Creek church

Mr and Mrs Herman Lawson and Mr and Mrs Roy Lee and families were Sunday guests of their parents, Mr and Mrs Geo Lawson.

Mr Grata, Mr J McGinitie; Mr. and Mrs M. McGinitie; Mr. and Mrs L McGinitie and their families, Misses Janet and Ethel Brown; Margaret Mitchell, Maude Wildman; Irene Oliver; and Kenneth Brown were Sunday guests of Mr and Mrs. John Brown

Miss Eileen and Eston Sterritt and Belva Carlisle were guests of the W A Mitchell family Monday

UNITED CHURCH NEWS

The Easter services were very well attended. The Junior Choir, led by Mrs. Stinson brought the Easter Message in song and recitation. It was well received and appreciated by the congregation.

In the evening the senior choir, augmented by members from Lakeshore, rendered two beautiful and festive anthems Mr Broughton assisted also and sang two appropriate solos.

Next Sunday, April 4th, the junior choir will render the cantata "Praise Triumphant," and familiar songs will be sung and illustrated by stories.

On April 11, after the evening service "Communion" will be held.

A P MOAN,
Secretary-Treasurer

KINGMAN

A gymnastic program will be held in the Kingman Hall on April 10 at 8 o'clock p m There will be club swinging, exercises to music etc.

Last Monday evening the Mennonite choir rendered a very good Easter program in song. There were twenty-seven members in the choir which was conducted by Rev. Milo Stutzman The two speakers were Edgar Boethger and Harold Lauber. There was a large crowd present and all enjoyed it very much.

Rev. Havenstein has gone on an extended trip to the U.S.A.

Mr O Bjorgum has returned home after visiting in the States for the past three months. He visited his brother and sister at Denver, Colorado.

We regret to report that word has been received of the death of Mrs Bertness of Bellingham, Washington.

Miss Gertude Asp spent Easter with her parents, Mr. and Mrs. A. Asp.

Mr. and Mrs Hardin and children, Martha, Harry and Hazel spent the week end in Edmonton.

The regular meeting of the Ladies' Aid will be held in the Kingman Hall on Thursday afternoon, April 8.

Mr. McDonald of Lacombe has moved to Kingman on Monday last. He will run the Lumber Yard and Hardware store for the Progress Lumber Co.

Mr. and Mrs. Norman Wideman have moved to the building next to the Farmers' Supply store.

AMISK CREEK

The Young people of this community rendered a very lovely program in the church on the evening of Easter Sunday A large crowd was present. Hearty thanks are extended to all who helped to get up the very enjoyable program.

Hilmer Moen is in Vegreville working as second man at an elevator

Those spending the Easter holidays at their parents' homes were: Ruby Berg from Edmonton; Miss B. Berild from Miquelon Lake; Alfreda Berild from Ryley; Agnes Annebo from Camrose was home Good Friday; H. Annebo from Standard School; Glen Olson from Camrose; Miss Merl Hillerud from Edmonton Normal school.

Mr. and Mrs. M. Norgard and son from Bawlf were visitors at the Annebo, R. O. Berg and P. O. Flaaten homes on Saturday last.

Mrs. J. Blackburn and daughter, Betty from Lavoy are visiting with their mother and grandmother, Mrs. K Olson, this week.

Mr and Mrs. Berild and family are leaving this district soon. We are sorry to see them go but wish them the best of luck in their new home.

J Wilson and family are moving to the C. Kjorung's place, formerly occupied by Mr. and Mrs. Berild.

Mr. A. Erickson and O. C. Blackburn motored to the city last Saturday, returning the same evening.

Mr. and Mrs. E. A. Moen were visitors at the R. O. Berg home last Sunday.

Mrs. Chas. Ingram from Ketchamoot spent Easter visiting with her brother, P. O. Moline and family.

Mrs. R. O. Berg has been ill with the flu. We are glad to report that she is improving.

Miss Ruby Berg called at the C. Erickson home last Monday.

Miss Doris Glasinger and Miss Borat Berild are attending the teacher's convention in Edmonton this week.

Mrs. B. Moen and girls and Mrs. P. O. Flaaten visited at the Berild home last Monday.

Mr. and Mrs. H. Strammer and small daughter from Kingman have moved to a house at the R. Olson place where they will assist with the work this summer. We wish them a hearty welcome to our community and hope they will like it and feel at home here.

A correction from last Amisk Creek correspondence. Instead of Mrs. Annebo's brother from Grand Prairie it should have read Mr. J. Annebo's brother.

TOFIELD LOCAL OF A.T.A. MEET

On Saturday, March 20th, in addition to quite a few local teachers, Messrs. Hegett, Richardson and McDonald from Bruce, Holden and Ryley were present at a meeting of the Tofield Branch of the Alberta Teacher's Alliance. They were officially representing their districts at the meeting.

Owing to unforseen circumstances the guest speakers, Dr. M. E. Lazert of the University of Alberta and Mr. J. W. Burnett of Edmonton [illegible] to be present as had been planned. After the business of the local had been dispensed with, the matter of a district sports day was taken up. It was decided to have a sports day alternating between Bruce, Holden, Ryley and Tofield. This year it will be at Bruce. Preceding the final sports day will be eliminations in each of the centres, the winners of the eliminations will proceed to Bruce for the final sports which will be about May 24th. The committee in charge will have the classes ready for announcement before the middle of April.

Following business a very pleasant hour was spent, refreshments being served by Miss Stewart and Miss Forester.

The next meeting of the Tofield Branch of A.T.A. will be held at Tofield on April 17th. Mr. J. W. Robinson, inspector of schools, Camrose, will address the meeting.

Many Things From Animal By-Products

To the ordinary person unversed in the modern production of food and commodities a steer or a pig represents merely a beefsteak or pork or bacon, but there is very much more to it than that. Ever since the introduction of chemistry into business, particularly durning the past 30 years, the development in by-products in basic industries has been phenomenal. In no instance, perhaps, has this been more apparent than in the meat packing industry. In Canada alone by-products of cattle and pigs—heads, hoofs, skin, hair and horn—formerly discarded as waste and as such constituting a problem in sanitation, now represents millions of dollars of additional income to the live stock industry and an amazing array of products regarded as essential to present-day civilization."

For example, an idea of what a hog supplies in the way of by-products, as turned out of the meat packing industry, may be gained by a simple recapitulation of its contributions to the various utilities apart altogether from meat and edible by-products such as tongue, heart, liver kidneys, tripe, sweetmeats and other "fancy meats."

From skins come bristles; pig-skin; glue; sausage; gelatin; gloves; belts; straps; pocket books; shoe containers; hair; curled hair; upholstering; plaster retargent and felting. From fats are obtained leaf fat; lard; neutral lard; oleomargarine; homogenated lard; salves; cosmetics; crackling; poultry foods; animal foods; grease; lard oil; stearine, cutting fats; tankage; fertilizer; soap; tallow; grease oil; lubricants; machine oil; gelatin; candles; glycerine; red oil; wool finishers; fatty acid; stearic acid; candle stock; metal polish; and tar for roofing and paving purposes.

Many pharmaceutical products come from live stock, such as benzoinated lard and pepsin and other medical tablets from pigs and blood serum, liver extract and insulin from steers From the casings of hogs, sausage containers; pepsin and chitterlings (cooked) are obtained, just to mention a few while from the head there are canned tongue sausage; lard; glue; grease; fresh and pickled ears; cheek and head meat; sausage; tongue; fertilizer and animal foods.

New Arrivals For Spring

SWAGGER SUITS AND COATS—
Fifteen mid-season's styles arrived since Easter. Colors are dark shades of blue, beige, brown and mustard, and the size range from 13-44. Coats priced from .. $10.95
Suits with three quarter coats from .. $12.95

COLORFUL SILK SCARVES—
The scarf is indispensable with new ensembles, and the new Ascots and Chokers provide the necessary contrasts priced 50c to $1

DRESS SLIDES AND BUTTONS—
Small items but important for home sewers A complete new stock to fill any need and matching color. Octagon and square trimming buttons are especially good, card 10c & 15c

WABASSO BED THROWS—
Soft nap wool and cotton, satin bound, 60x80 inch. Plaids in rose, gold or blue, .. $2.19
Reversible two color spreads at $2.75

SLACKS FOR GIRLS AND MISSES—
A special purchase in a well made slack of good weight drill in large color range .. $1.00
The well known 12 test pre-shrunk drill, navy with scarlet trim ...... $1.49 and $1.59
Pure wool dress slacks, brown or navy, . $3.25
Jackets of pure wool to match above $3.75

"PLAYALLS" FOR KIDDIES 2-8 YEARS—
The 1937 edition of these popular play suits. Navy drill with smart colored trims and medallions Three weights 95c; $1 25; $1.49

"CONQUEROR" BOYS' SHIRTS & OVERALL—
Well made work shirts, blue or heather shades 79c
Grey covert cloth, Wabasso sanforized .. $1.00
Dress shirts in new plaids and checks, ... 95c
Blue denim Combination Overalls with double knees. 4-8 yrs. $1.59; 9-16 yrs. $1.75
Double knee bib overalls ...... 90c and $1.19
Pants of good wearing brown cotton tweed, cuff bottoms, half elastic waist $1.35 and $1.50

"Silent Barriers" is Splendid Canadian Film

Silent Barriers, the film ep of the construction of the Canadian Pacific Railway, which had its Empire premiere under the patronage of Her Majesty [illegible] Mary, and Mrs. Stanley [illegible]n, in London recently, and its Canadian premiere in Montreal, and which depicts one of the most important chapters in the history of the British Commonwealth of Nations, will be shown in theatres from coast to coast during the current month. The story, based on Alan Sullivan's book "The Great Divide," brings back and vitalizes the titanic struggle with nature waged by the giants of pioneer railroading in this country, and particularly in the seemingly impossible task of thrusting the road through the Rocky Mountain barrier. The story has a tremendous Canadian historical value, as well as being first rate entertainment. The film, a Gaumont British production, was made at Revelstoke, B.C., and in the surrounding mountain area. It includes such great stars as Richard Arlen, Barry Mackay, Antoinette Cellier, Lilli Palmer, and J. Farrell MacDonald. In it the men who would not acknowledge defeat again play their parts. The lay-out shows a re-enactment of the historic scene when Sir John MacDonald pledged the support of his Government to the enterprise. Left to right are shown George Stephen, William Van Horne, R. B. Angus, Sir John Macdonald, T. G. Shaughnessy and Donald Smith. Picture No. 2 shows one of the tense moments of the play and is a scene between Richard Arlen and Lilli Palmer.

Road Matters Dealt With By Cornhill Council

The third regular meeting of the Cornhill Municipal Council was held at the Municipal Hall on Friday of last week

Among other business the council decided to dispose of a power fresno Councillor McSporran and the secretary being authorised to sell same to the best interests of the municipality.

A pound by law covering a number of sections in division two received its first and second reading.

The budget for 1937 came up for consideration discussion centering around the amount to be spent for public work. The estimates allowed $200.00 for each councillor to spend for road maintenance in his division Councillor Walker did not think this was enough and mentioned $900.00 Councillor McSporran mentioned $300 $200 for maintenance and $100 for emergency work and if any councillor required more he to apply for it

Discussion continued, Councillor Walker sticking out for enough money to help the people living off the main roads. Frequent mention was

H. W. ROGERS

LOCAL & PERSONAL

The Tofield Curling Club are sponsoring a Bridge drive on Friday evening April 16th at the Curling rink. There will be good prizes and good lunch. Everybody welcome.

Mr. R. Whyte from Wetaskiwin was a visitor in Tofield on Sunday. Mrs. R. Whyte returned with him.

Miss Enid McLaughlin of Wetaskiwin who has been visiting friends here returned to her home on Friday.

Mrs. Grace Scott entertained a few friends Friday afternoon in honor of her sister Nina who was just recently married.

Mr. Dell Wallen spent the Easter holidays with his brother Carson in Edmonton.

Mr. and Mrs. J. D. Hanson from Camrose visited at the J. J. Hanson home here on Sunday.

Mrs. McIntyre and small son returned from Raven, where they spent the Easter holidays.

Friends of Mrs. Seale will be pleased to hear that she is improving.

Miss Myrtle Bethel returned to Sedgewick on Sunday after spending the holidays here.

Mrs. Stan Yakabuski spent the week end in Edmonton.

Mrs. Richardson of Edmonton spent a few days in Tofield this week.

Mr McTaggart and George have finished grading hay in this district and have returned to Stettler.

Miss Agnes Johnson returned from the hospital on Tuesday evening.

Miss Gregg returned to Ryley this week. Miss Gregg has been assisting Dr. Law while Miss Baptist was away.

Miss Hennesy from Viking is visiting at the Harold Green home.

The Easter Thankoffering meeting of the W.M.S. will be held n the United Church on Thursday, April 15, at three o'clock. An interesting programme has been arranged. All ladies are cordially invited to attend.

HOLY TRINITY JUNIOR W.A. ATTENDED THE EDMONTON DIOCESAN JUNIOR RALLY

The Annual Junior W.A. Rally was held in All Saint's Church and Parish Hall on Tuesday, March 30. In addition to winning certificates for Memory work, Sewing and Study Book prizes, Tofield Juniors, under the leadership of Mrs. J. W. Robinson had the honor of winning the Diocesan Banner which they are now priviledged to hold for a year. Rev. and Mrs. Wallis kindly accompanied them.

UNITED CHURCH NEWS

After the evening service on Sunday 11th, "Communion" will be held.

It is earnestly desired that all members be present for this occasion.

There was a good congregation present last Sunday to hear the Junior Choir render the cantata "Praise Triumphant." The young folk did exceedingly well.

The Y.P.S. finished the season with a delightful supper. By the remarks of the President, Vice-president and Secretary it was evident that there is something [illegible] different in this virile and active organization Next season promises to be even better.

KETCHAMOOT

Next Sunday April 11, preaching services will be held at 11:00 a.m. instead of the afternoon. Everybody welcome.

Mrs. Chas. Whillans returned home Sunday morning after a six week's holiday visiting friends and relatives at Toronto and surrounding points.

Mr. J. H. Ingram returned home Friday of last week after a two week's trip to Victoria, B.C.

Miss Mabel Lawson returned to her school at Camrose, Miss Maude Wildman to Edmonton and Miss Marie Lawson to Kingman.

Miss Ingred Serelle of Tofield visited her friend Mrs. Elsie Carlisle on Sunday

Mr. and Mrs. A. R. Thompson and daughter Betty were guests of the Sears family on Sunday.

Mr. and Mrs. A. J. Williams re-

(Continued on back page)

LINDBROOK

Now for a brief resume of the month's news (apologies to the C B C) Firstly it looks as if winter was over and to celebrate same there has been several dances, chiefly birthday parties We cannot go into much detail re these but suffice it to say that all were of the famous Lindbrook brand and well enjoyed by same. Mr. and Mrs. F. Kortzman gave a birthday party in honor of their daughter Thelma's birthday. Two other guests also shared in the honors, these guests being Miss V Phipps and Mr. Jas. Hooper, whose birthdays occur in the same week as Thelma.

A birthday party was also held at the home of Mr. J. Glade in honor of his son and a great time was had by all present.

A dance was held last Friday at the home of Mr. and Mrs. W Robinson of Lindbrook N, and was greatly enjoyed by the Northerners and their friends from surrounding country

The first annual meeting of the L C C took place on April 1st at the home of Mrs. E. W. Hooper assisted by Mrs. J. Bracegirdle as co-hostess. A large crowd assembled. This being the annual meeting the election of officers for the ensuing year took place Mrs Smith was re-elected president by acclamation. Mrs. Karl Wilson took over the secretary's job, Mrs. L Gill retiring All seemed pleased to look back over the last year and to recall the pleasant gatherings every month and to look forward to another successful and enjoyable year. Games were played and a clever skit put on by Mrs. E. Wilson as a smart city slick fellow and Miss L. Morden as a farmer's boy, was a great hit. A dainty lunch was served by the hostesses and everyone voted the meeting O.K. Visitors were Mesdames J. H. Brown; H. Rogers; Mrs. Tough; Miss Johnson; Mrs. Elmer Lindberg and Mrs J. Lindberg.

The next meeting will be on the last Wednesday in April at the home of Mrs. Smith

Mr. J. Leahy of New Westminister, B.C. spent the week here with Mr. and Mrs A Whibley and visited old friends. Mr. Whibley's sale was well attended and prices realized pretty good After the sale Mr. and Mrs Whibley and Mr. J. Leahy left for B.C. where Mr. and Mrs Whibley will make their home.

Mr. Jas Bracegirdle left Saturday evening for Vancouver on a holiday

Mr. and Mrs. Jas. Bracegirdle and Mr. and Mrs. E. W. Hooper motored to Wainwright on Easter Monday to visit relatives of the former couple and incidentally to take in the Vimy celebration in that town.

Miss V. Phipps spent the holidays at her home in Strome.

EARLY CROPS ARE SAFEST

Spring grain varieties utilizing the whole growing season may produce larger yields than early ones if they mature safely. Midsummer drouth cuts heavily into the yield and sample of precocious sorts and most of the small grains fill best during cool, showery, autumn weather. Nevertheless, in the long it pays the park-belt farmer to play safe with early varieties for autumn frost dogs his steps, affecting grades when it does not reduce yields. Moreover, there is ground for belief that excessive filling of wheat may be at the expense of protein percentage and baking quality. Furthermore, the farmer whose fields are cleaned early may proceed with his fall work, perhaps making up partly on the next crop any difference in yield there may be as between a full-season and an early variety.

It has been noticed at the Beaverlodge Sub-Station that there is nearly always a brief period of good threshing weather after harvest; then rain or snow generally occurs, delaying most of the threshing until the short October days and leaving too little time after that for fall cultivations. Growers of Olli barley and Legacy oats have been able to take advantage of this good weather while neighbors twiddled their thumbs. Garnet, Reward and Red Bobs wheat have been cut and sometimes threshed when Marquis lingered provokingly on its roots or in the stook. It pays to grow good early kinds, get them off early and proceed with the fall work.

In four year tests at Beaverlodge Olli barley has matured in 7.2 days less than O.A.C. 21 and yielded 22 pounds more. In 15 years Reward wheat has matured 5.9 days ahead of, yielded within four bushels as much and graded better.

When an early oat with a plumper kernel than that of Legacy and a satisfactory early wheat with higher quality than that of Garnet is available the North will be fortunate since with such kinds it may obtain higher average yields than are possible with later kinds in the drouthier Lower Plains.

WHAT'S AHEAD

Thirty-three years ago Sir William Crookes, brilliant British scientist, gave humanity a fright when he said that without any probable, possible shadow of doubt—no possible doubt whatsoever—that a world famine was inevitable, which would reach a crisis in 1931. He based his calculations on the probable population increase and the limit of possible production in wheat and other food.

The year 1932 saw the world glutted with wheat and prices at the lowest level in recorded history. Then Hon. J. H. Thomas, Lord Privy Seal in the British government, ventured the prophecy that wheat prices would never touch $1.00 a bushel again.

These illustrations show the futility of prophesying when it comes to wheat. Right now the wheat picture is promising for wheat exporting nations. Prices are high and trade has been averaging better than 50 million bushels a month. Reserves are gone and nations that want to go to war are afraid to do so until they gather plenty of food supplies.

But it should not be forgotten that it took four big drouths in North America, one in Argentina, two under-average crops in Australia and one bad season in Europe to bring all this about. The thing to puzzle people's brains now is what will happen if the United States swings back into the exporting field again with an annual exportable surplus of around 150 million bushels and Canada comes back with a series of 400 million bushel crops? The United States department of agriculture, one of the best informed departments in the world, thinks that there will not be any great price reaction during the 1937-38 crop year even with big crops in North America because reserves are at a minimum and must be built up. Broomhall, the British authority, thinks similarly. If these prognostications are correct market worries should not press next crop year.

—Alberta Wheat Pool Budget.

OAT VARIETIES

In Western Canada Victory and Banner have long been the leading oat varieties, a position they still hold. The need, however, for earlier maturing varieties as well as rust resistant types has resulted during the past few years in the appearance of several new introductions. The more important of the early maturing varieties are Gopher, White Cross and Legacy.

Of the three, Gopher is the most widely adapted. Compared with Victory or Banner it is seven to ten days earlier maturing; possesses a stiffer straw; quality excellent. Gopher is recommended as an early oat in all three prairie provinces.

White Cross, which originated at the Wisconsin Agricultural Experiment Station, matures only a day or two later than Gopher. This variety has fair yielding capacity but may be criticized for its slimness of kernel and low bushel weight. It has given its best performance in northern Alberta.

Legacy was developed at the Central Experimental Farm, Ottawa, and matures midway between Victory and Gopher. It appears to be adapted mainly to central parts of Alberta and Saskatchewan where it produces a high yield of somewhat slender grains of good quality. At the Brandon Experimental Farm, Legacy outyields Gopher but is inferior to the latter in bushel weight.

Antony, a recent introduction from Minnesota is popular in parts of Manitoba on account of its resistance to stem rust. It resembles Victory very closely in earliness of maturity, straw strength and kernel characters. Anthony yields somewhat less than Banner or Victory under drouth conditions and distinctly better in rust years.

Two other rust resistant varieties of American origin, Minrus and Russia, have been tested at Brandon. Both have proved to be of poor quality, particularly the former which possesses objectional yellow kernels.

Vanguard is a new highly rust resistant oat produced at the Dominion shortly to be released for distribution. Results from recent co-operative tests show it to be two days earlier maturing than Banner stiffer strawed and approximately equal in bushel weight and yielding capacity. The quality of grain is very satisfactory.

Dryer than the Sahara!

THE Sahara Desert has its oases — pools of refreshing water along the Caravan Route — but moisture in a telephone cable means Trouble. Consequently, one of the most important steps in the making of telephone cable is the expulsion of moisture. Here a length of cable comprising twelve hundred telephone circuits (2,400 wires) is shown leaving one of the huge ovens in the Montreal plant of the Northern Electric Company, Limited, where a temperature of 275° F. is maintained under a vacuum which removes every perceptible trace of moisture from the cable. The cable is then wheeled into an air-conditioned chamber at the rear which is dryer than the Sahara Desert; here it awaits its lead covering which is applied in a hot plastic state under several tons pressure without the cable again encountering the natural atmosphere; it is then ready for use.

THE CAUSE FOR COMPLAINT

A witness before the Turgeon Grain Commission when it was holding its sittings in Winnipeg remarked that if the grain exchange was closed Winnipeg would become a village. This statement deserves careful analysis. Does it mean that the giant exchange operating in the city for the purpose of providing a market for Canadian grain is of so great importance in the life of the Manitoba capital that it virtually carries the city on its back? If that is so, there must be costs involved that are not discernable on the surface and the burden of carrying Winnipeg lies on the shoulders of the grain growers of Western Canada.

It may be however, that this particular witness was romancing a bit and rather exaggerated the point in order to create an effect. Certainly the grain exchange makes Winnipeg a city of world importance and if it was discontinued Winnipeg would suffer severely. But it is a mistake for supporters of Winnipeg to make statements that create the impression that their city stands or falls by the grain exchange.

Most of the grain farmers of the west are suspicious of the grain exchange. Many of these suspicions may be poorly grounded and the result of ignorance or misrepresentation. The exchange officials and grain companies point out that the institution is only a marketing place wherein the ideas of a vast multitude of people all over the world as to the current values of grain find expression. In this way a great liquid market is provided, this being necessary in order that grain at all times finds a buyer.

Probably in the background of the farmer's dislike of the grain exchange lies his bitter struggles with nature and his incessant toil to earn a meagre living while the satellites of the exchange seem able to provide a soft living for themselves. Bruce Hutchinson, writing of Winnipeg in the Victoria Times, illustrates in these terms:

"I never saw so many soft, fat men in my life.—These are the very quintessence of an urban not rustic civilization. They were dressed in the latest fashion. They were plump about the jowls, pale, moist. Just the sort of fellows you see on the pavements of New York except that their overcoats were heavier and they puffed more from the weight of them.—The prosperous Winnipeger has developed the softest, most sedentary and effete life in Canada.

"In Winnipeg the prosperous classes have developed a curious air-tight civilization of about 80 degrees Fahrenheit. They have insulated their offices from the cold with elaborate gadgets. They have over-heated houses. They dash from the office to a well-heated car and they dash to a well-heated club. After further internal heating there they dash to the over-heated house. Thus by elaborate organization and machinery they keep out of the prairies almost altogether and live in a gigantic hothouse. They have long since ceased to require oxygen."

This description adequately covers the whole point we are trying to make. These great prairies of the west were settled by the adventurous youth of many nations, mostly tough, hard-working, daring young men. They battled with the elements in their efforts to make an independent living. They married and their wives and children helped in the struggle. But how few have been able to grow rich and fat and live luxurious lives such as the men of Winnipeg as portrayed by the Victoria writer!

The farm folks on the prairie resent this. They have to work too hard and too often have seen their hopes dashed to the ground. They are lean with work, sunburned and dried up and wrinkled with facing the prairie winds, bowed with frustration and the entire hopelessness of the national battle. A staunch breed of men and women they were and are, but as age comes on courage dwindles and the fighting spirit droops.

There is too great a difference in the standards of life on the open bald-headed prairies and life among the pampered classes in the great cities like Winnipeg. This is an incontrovertible fact, and no argument, no matter how plausible, can explain the reason for the difference to the satisfaction of the hard bitten prairie dweller.

What is the answer? Where is the solution? Frankly we don't know. But we have pictured the situation as we see it and drawn from the experience of twenty-six years living side by side with the prairie farmers.—The Hanna Herald.

Victory

"The most tingling happiness that man knows is triumph over opposition."—Harry Emerson Fosdick

Money may not buy happiness, but with it you can be unhappy in comfort.—Radio Breakfast Club.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE VITAMINS

One pound of vitamin B is enough to supply the needs of one person for 1500 years, but if you don't get your tiny bit every day you will die in a few weeks. The vitamins are not drugs, they are foods, and all we need plenty of them. A good all round diet, properly cooked, should give healthy adults enough of all of the vitamins. Children and infants however need some extra vitamin D, and to get this they should be given cod liver oil in some form during the winter.

We need milk; butter; cheese; green vegetables; carrots and liver for vitamin A. We need whole wheat flour; oatmeal; liver; heart and kidney for vitamin B. Yeast and wheat germ are especially rich in this vitamin. We need oranges; lemons; tomatoes; lettuce; celery and other fresh fruits and vegetables to provide vitamin C. Ordinary foods contain very little if any vitamin D. In the summer-time the sun makes this vitamin for us free when it shines on our skins but in the winter-time many children need to get it in some other way which fortunately is obtainable in cod liver oil and some other fish oils.

If we eat such poor meals that any one of these vitamins is missing completely, we may get serious diseases, such as scurvy from lack of vitamin C and rickets from lack of vitamin D. If we eat too small amounts of these vitamins we are apt to suffer from lack of energy and we are more liable to get infections and to suffer more severely from them.

A well balanced diet requires milk, meat; eggs; fruit and vegetables. The young child may require to supplement this in the winter months with some cod liver oil.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

CAMPAIGN PUSHED TO HALT CANADA'S "CREEPING DESERTS"

MONTREAL—A score of nation-wide campaigns in forest conservation were set in action at the annual meeting of the Canadian Forestry Association. During the past year the Association has had a corps of campaigners at work in many parts of Canada enlisting the people of forest communities as friends and guardians of the timberlands. In the prairie provinces, the chief task has been to encourage farmers to plant shelter belts of trees, to make possible garden crops. Junior forest wardens now number 7000 young men with an additional 800 in Newfoundland, all of whom are active protectors of the woods and wild life. In British Columbia and New Brunswick particularly, the army of junior wardens has been regarded as a strong auxiliary of the public forces in fire ranging.

"Creeping deserts" wrought by forces of destruction which in the last five years have reduced western Canada's income by $1,000,000,000 must be checked along with the other instruments of desolation, if the western provinces are to be raised above their present status as "step-children of Confederation," W. L. MacTavish editor-in-chief of the Winnipeg Tribune warned the association.

Stressing the importance of the West in the national economy he showed that depression, debt, and drought have brought the West to its knees. "We have borrowed more money at higher interest rates than we can manage to pay," he declared. Speaking of drought he said that neglect of conservation and unscientific agricultural methods have resulted in relief funds being paid to western farmers in the last five years totaling $70,000,000. There are 900 square miles of useless land there now, and "the desert marches on."

WHEAT PRICE PROSPECTS

The crop outturn of wheat in 1937 will be a very important factor because there will not be a large carry-over on which to draw. There is nothing at present, however, to indicate that our world will be small. The United States Departement of Agriculture points out that while there is a deficiency of moisture in the spring wheat areas of North America, spring rains and good growing weather would produce a good crop. European sowing are large, probably equalling the record of 1936, and conditions are fair.—Wheat Pool Bulletin

Home Problems Magnified

"Most problems of government are an enlargement of the problems of every household."—Herbert Hoover.

VICTORIA ADDS NEW TRADE DEPARTMENT

VICTORIA, B.C.—British Columbia is going to add to its governmental machinery with a special "Department of Trade and Industry," Premier T. D. Pattullo recently announced here. Legislation will be submitted at the next session and a separate cabinet minister named to handle the post.

The Government's decision to establish the new department was the result of studies of provincial trade by an Economic Council, the Premier indicated. The outstanding point made by the council was that, within Canada's economy, British Columbia buys as much as $50,000,000 worth of goods more from the Eastern provinces than it sells to them.

Most of this sum is made up of tariffs and freight costs across the continent. In selling its own goods, British Columbia must accept world prices at the lowest competitive figure, the council showed.

Purpose of the new trade department will be to try to rectify this unfavorable position within Canada, and promote fresh markets.

EIGHT SHIPS TO CARRY 5000 BOY SCOUTS

Eight steamships have been chartered to transport the British contingent of 5000 Boy Scouts and leaders across the Channel to the World Scout Jamboree in Holland this summer. The ships include the Queen of the Channel; the Queen of Kent; the Continental Queen; the Queen of Thanet; two ships of the southern Railway and two of the L.N.E.R. Two of the vessels will sail from Dover; two from Great Yarmouth; two from Tilbury and two from Harwich.

THE SEARCH FOR PEACE—

(Christian Science Monitor)

IF THERE has been any moment, save only in the World War period, when as many different and important official contacts between Great Britain and the United States have been opened up as at present, it has escaped the attention of the historians. The extraordinary diversity of channels that have lately been established between Washington and London is of the greatest significance for the peace of the world.

The background of the present entente—for entente it almost is—between Britain and the United States, appears in the role both countries are now playing. Britain is the cornerstone of stability in troubled Europe. The United States is spokesman for democracy in the western world, and President Roosevelt in his South African speeches made himself the advocate of democracy as against dictatorship on the world scene. A diplomatic movement of democracies is under way.

A mere recital of the new relationships between Britain and the United States reveals that something unusual is going on. Four separate but equally important channels between the English-speaking capitals have been opened up since the beginning of the year:

First, an important British cabinet minister, Mr. Walter Runciman came to Washington to discuss world affairs with President Roosevelt. London deliberately sent one of its most experienced and least-easily persuaded statesmen.

Second, Mr. W. L. Mackenzie King, Prime Minister of one of the chief self-governing dominions, came down to Washington to take the lay of the land. With the new constitutional status of the dominions, with the coronation conference in London next month, at which Mr. King must take a leading roll. it is clear that this channel through Ottawa to the other English-speaking capitals is a vital link.

Third, Lord Tweedsmuir, the personal representative of the British throne in North America, comes to Washington and behind a cloud of ceremonial he and Mr. Roosevelt have several exchanges of view.

Finally, Norman H. Davis—President Roosevelt's personal roving ambassador—arrived in London yesterday to begin talks directly representative of the President, and to make inquiries in Britain and the Continent similar to those that British representatives have made here.

Where does all this coming and going lead? As far as Washington observers can discover, it supports this conclusion: that President Roosevelt is determined to do something helpful in the threatening world crisis, but does not know exactly what he can do. There are two requirements for action; First, his plan must command the support of American public opinion; second, it must be a useful contribution to Europe and the world.

These are stiff prerequisites. There is no assurance that they have been met. Evidently President Roosevelt is exploring, trying to find some useful course of action. It is not simple to chart a plan for him, even from the easy sanctuary of the editorial chair. But the search is pregnant with vast possibilities; upon its success peace may depend, for it is clear that unless the United States defines and lives up to its responsibilities as a nation-citizen of the world, peace cannot be assured. It is vital that the search be pressed.

Arthurdale is a town in the United States run along co-operative lines. Quite a number of influential people are interested in it. Quite recently the high school paper, under the heading of "Shut Up" published the following:

"What did you tell that man just now?"
"I told him to hurry."
"What right have you to tell him to hurry?"
"I pay him to hurry."
"How much do you pay him?"
"Four dollars a day."
"Where do you get the money?"
"I sell products."
"Who makes the products?"
"He does."
"How many products does he make in a day?"
"Ten dollars' worth."
"Then instead of you paying him, he pays you six dollars a day to stand around and tell him to hurry."
"Well, but I own the machines."
"How did you get the machines?"
"Sold products and bought them."
"Who made the products?"
"Shut up! He might hear you."

"HOME ON THE FARM" IN BROOKLYN

NEW YORK, March 30.—It was a bad situation when Mrs. Mary Masoula went to the Bridge Plaza Police Court in Brooklyn about two sheep and 10 goats because she was rather frightened and a little indignant that anyone should complain.

Her husband was summoned but she answered because he was busy and she could explain about his being busy. That really was the point of the whole thing, the farm.

She stood before Magistrate Nicholas Pinto and said, Yes, they did have two sheep and 10 goats in the basement of their home, but not for long Judge, because they were looking for a farm. Her husband was out looking for the farm, she said.

Five of the goats were nannies and good milkers and the sheep were about ready for shearing.

Once they had a farm near Monticello but they sold it. There were several animals on the place from which Mrs. Masoula could not bear to part and so they were brought to Brooklyn. Then, while they were looking for another farm, it was so much cheaper to pick up livestock at a bargain, Judge.

The magistrate nodded and adjourned the case to April 10, while Mrs. Masoula beamed.

She did not mention the 65 rabbits; one pony; one mule; three cats; five dogs; several horses and a flock of chickens in the back yard.

Neither did the summons.

PLANTS REQUIRE LIQUOR STRONG

The growing plant is a living being which links man to the soil, says D. Leslie Knelle in the current issue of his "Farm News Letter," and the surface soil itself is alive with myriads of microscopic creatures—bacteria, protozoa, moulds, etc. Man is of the earth and derives his nurture from the soil through the medium of the plant products he consumes and also, less directly by preying upon quadrupeds and bipeds to gratify his taste for flesh. When the world was young and torrid, life as we know it could not have existed thereon, and how the first plants grew is a mystery as profound as that which veils the origin of the animal kingdom. As far as we know the wild goose chase for the "missing link" is proceeding; but let's get down to earth.

Soil Formation

Soils partake of the nature of the rocks from which they have been formed by age-long processes of weathering and chemical decomposition. Sedentary soils are those formed in their present location on plateaus on moderate slopes. Alluvial soils found in valleys and deltas are the accumulation of debris washed down from the hillsides or carried and deposited by streams. Other transported soils owe their origin and position to glacial action. Most of these "mineral" soils contain from two to three per cent of humus which though imperfectly understood is usually referred to as decomposed organic or vegetable matter. There are also the peat and muck soils formed in swamps through the successive growth and decay of plants muck being peat in a more advanced stage of decomposition. The more prevalent mineral soils contain varying proportions of clay and sand. When clay predominates the soil is heavy and if sand is the chief constituent the soil is light. Actually by volume sand weighs more than clay but the terms refers to the relative ease with which the soil may be worked. Mucks differ widely from mineral soils in that the former consists largely of vegetable matter with but little mineral substance. They are high in total nitrogen but low in phosphate and potash.

Plant Food Needs

Considering that the upper six-inch layer of a medium loam soil weighs [illegible] two million pounds per acre one realizes that the relatively [illegible] amounts of plant food substances supplied by say 300 lbs. of a 2-12-6 fertilizer could scarcely be detected in a chemical analysis of the soil. Yet these minute amounts of plant food will exert a distinct influence on crop growth because they are furnished in readily assimilable forms and in quantity sufficient for the plants' meagre needs at the outset. Plants consist largely of water and the carbon which represents half their dry matter they abstract from the atmosphere. They take the rest of their food from the soil in liquid form and like it strong.

A "RAT TRICK" IN LIFE SAVING

Three life savings in one day was the record made by Eagle Scout Joseph Moladie of Philadelphia. During an afternoon at Park's Pond in the Pocono Mountains last summer he rescued a baby; a girl swimmer who had broken a leg when jumping from a narrow diving board. For the latter girl he improvised a splint and saw her safely to a hospital fifteen miles away.

MISSING MISS, MISS MISSING, MAY BE WED.

ARAPAHOE, Neb. April 6. — This might be titled "The Missing Miss Missing."

Police Chief Joe Brening reported last night that Miss Elfrieda Missing, 15-year-old daughter of Mr. and Mrs. H. A. Missing was missing from her home here. Miss Missing was first missed when she missed school Monday Brening said. Her parents expressed misgiving Miss Missing had eloped Brening said.

FUNNY CLOWNS DO THEIR STUNTS AT OPEN GRAVE

BUDAPEST, April 6.—Dezso Kenedi's funeral was jolly; hundreds of children recall it as one of their pleasantest parties in years.

Kenedi wanted it that way. Kenedi, a famous clown who died at the age of 62, left a will calling upon his colleagues to perform before his open grave.

So they somersaulted, danced, swallowed swords, juggled and played funny instruments.

Some of them wept—but the guests had a fine time.

MORTICIAN TAKES POISON CLIMBS INTO OWN COFFIN

CAMPBELLTON, N.B. April 6.—Witnesses at an inquest into the death of John Tennier said yesterday the undertaker had taken poison and climbed into a coffin in his business establishment to await death.

After lying awhile in the casket he telephoned a shop where he bought the poison, complaining that "the stuff you sold me is no good." He died soon after.

The coroner's jury found Tennier committed suicide while insane.

50 MILES OF LONDON STREETS WILL BE GAY

LONDON, April 6.—More than 50 miles of London streets will be decorated during Coronation week.

It is anticipated that the average provincial town or London borough will require five miles of garlands in addition to miles of bunting.

The display will far exceed in extent and magnificence anything planned for any former public event and factories are working overtime to meet the record demand.

FATHER, MATE IN ANGER DESERT 2 WEE BABES TO DIE

LONDON, April 6.— Starvation-wasted bodies of two infant sons offered grim witness last night to the quarrel of a London couple who parted—each believing the other would care for the children.

Percy Davis, a laborer, slammed the door of their home behind him in wrath. His wife equally incensed, went to visit friends. The children, neither big enough to open the door were left alone.

Twelve days passed. Davis, repentant returned. He found both his sons dead on the floor beneath their bed.

HE FEARS HIS WIFE'S GHOST SO BOLTS COFFIN

PLYMOUTH, England, April 6.—Workmen clearing a half-derelict coffin here were astonished to discover a grave bolted down with steel bars firmly cemented and tar sprayed. On the crumbling head-stone was inscribed: "Sacred to the memory of Mary Ann, wife of John Blowey, who died July 14, 1880, aged fifty-seven years."

Inquiries revealed that soon after his wife was buried 57 years ago, John Blowey a dock-yard laborer was repeatedly troubled by the appearance of her ghost. So he made a weekly pilgrimage to the cemetery and instead of placing flowers there, set to work bolting, barring and cementing the grave in the hope of "laying" the ghost.

WHEAT: WHAT IS IT?

What is a seed that is planted and grown in the West to keep the producer broke and the buyer crazy. The protein varies in content and the man who can guess nearest the strength of the protein is called "wheat grader" by the public and "fool" by the farmer. The price of wheat is determined at primary markets and goes up when you have sold and down when you have bought.

A group of farmers sent a man to Edmonton to watch the wheat market and after a few days' deliberation he wired them to this effect. "Some think it will go down, some think it will go up, I do too. Whatever you do will be wrong, act at once."

Wheat is planted in the spring, mortgaged in the summer and lost in the fall.

A rut may be comfortable, but it never takes us to a new place.—Whitsitt Impress.

After a debt is contracted it seems to expand.—Chicago Times.

LINDBROOK COMMUNITY CLUB ANNUAL MEETING

The annual meeting of the L.C.C. was held at the home of Jennie Hooper, Gladys Bracegirdle assisting hostess. Twenty-two members were present. We had the pleasure of enrolling one new member Mrs Elmer Lindberg. Current business was soon attended to and the meeting proceeded to elect new officers. They were:

President, Annie Smith; Vice-president Alice Evans re-elected; Secretary Lily Morden; the former secretary Gladys Gill resigning; Press representative Gladys Gill.

The important parts of the minutes for the year 1936 were read and approved.

The club was started March 26 with the following officers— President Rose McMullen; Vice president and Secretary Gladys Gill; press representative Jennie Hooper; visiting committee Lily Morden and Evelyn Trainor.

March 27—New president Annie Smith and Vice president Alice Evans elected.

Purpose of club—The ladies of the district to be able to get together at less once a month and to be able to be a help to the community.

The club has been able to spread sunshine 22 times since organization. Number of meetings 14. Number of members 27.

Lily Morden and Lily Wilson were in charge of the entertainment and did splendidly. A guessing game was held which always is fun and a thread the peanut contest the winner having the advantage over the others by having the most peanuts to eat. A humorous skit which was very interesting, both costumes and dialogue creating much merriment.

After a very nice luncheon served by our hostesses the members departed for their home.

The next meeting will be held at the home of Annie Smith, visitors welcome.

Roll call will be answered by "Hints on Gardening."

NO DROUGHT FOR 46 YEARS SEEN

BOWLING GREEN, Ohio, April 12. —Prediction of a 46-year period without serious drought and with unusually heavy rainfall came today from Prof. Edwin L. Moseley, professor-emeritus of biology at Bowling Green State University.

He said his long-range forecast was based on studies of weather in the United States since early in this century.

MUSTARD, GOOSE GREASE IN COLDS, BUT NO WHISKY

SEATTLE, April 2.—Grandmother's mustard plasters, hot foot baths and goose grease rubs go marching on, but grampa's cold remedy—a pint of whisky—drew frowns here today at a regional meeting of the American College of Surgeons.

They insisted that the best prescription is to go to bed and stay there.

Old remedies for colds haven't been greatly improved," Dr. Perry G. Goldsmith of Toronto Ont. told the group. He said grandma's hot beef tea may have been evil tasting but it was sound medicine.

Dr. Wilson Johnston of Portland, Ore. said Dr. Goldsmith's grandmother's cures were excellent, but that grandpa's whisky cure was harmful.

Assimilation

It is not what we eat but what we digest that makes us strong; not what we gain but what we save that makes us rich; not what we read but what we remember that makes us learned; and not what we profess but what we practice that makes us Christians.—Bacon.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

CORNHILL MUNICIPAL COUNCIL HOLD THIRD MEETING

(continued from front page)

made regarding the amount required to operate the big power grader according to plan

Reeve Glenn called for a show of hands as to whether $500 per division for road maintenance would be satisfactory Four councillors voted in favor

Councillor Walker then moved that each councillor be allowed $500 for road maintenance and emergency work This amount to be strictly adhered to

Discussion then swung to the power grader and the municipal mill rate. The 1936 municipal mill rate was 13 mills but this was considered inadequate in view of the above resolution and the amount required to operate the power grader according to plan.

It was moved by Councillor Holmberg that municipal mill rate for 1937 be 15 mills Carried.

Considerable time was devoted to current taxes paid by August 1st whether a ten per cent discount on current taxes paid by August 1st should be given. There were no ardent supporters or opponents of the plan among the councillors, the discussion revolving around the advantages and disadvantages to the municipality were the plan adopted

Councillor McSporan moved that a ten per cent discount be allowed on current taxes paid by August 1st. The resolution was lost.

Moved by Councillor Holmberg that we spend $7000.00 on power equipment for road building. Carried

Tentative plans for road work with the power grader were made. It is proposed to bring the total mileage up to approximately 35 miles counting in the work done last year.

A petition from residents of Kingman asking for $250 for public improvements within the hamlet was left for further attention.

Moved by Councillor McSporan that council approve of rental agreement of Diesel power as of March 26th Carried

Moved by Councillor Holmberg that Provincial Department of Public Works be approached re obtaining a grant for road work Carried

Reeve Glenn and Councillor McSporan gave a report regarding the valuation for subsequent sale of certain lands

Councillor Morden moved that Reeve Glenn and Councillor McSporan appraise other land the municipality has for sale same being placed on file for reference as required.—Carried.

A number of accounts were passed and ordered paid.

The date for the inspection of roads was set at May 14th

The secretary reported that the outside wall in some places of the upstairs quarters of the Municipal Hall was in poor shape and needed replastering Councillor McSporan explained that the simplest way would be to tear off the old plaster and lath where needed, stuff with shavings refinish and plaster The secretary suggested that council authorize the work to be done Moved by Councillor Holmberg that necessary repairs be done in living quarters of Municipal Hall consisting of plastering etc

The council will again meet at the call of the reeve and secretary

A motion to adjourn was passed

ANGLICAN BUILDING FUND ACTIVE

At a recent meeting of the Anglican vestry it was decided to proceed with the building fund which has been left in abeyance for the past few years The object of the fund is to build an addition to the church which can be used as a vestry and other suitable purposes. It is also the intention to purchase a bell for the church The response of the general public has been very gratifying.

Council To Sponser Celebration On Coronation Day

At a regular meeting of the town council held on Monday, April 12th, there were present Mayor Swift; Councillors Lovell, Hammond, Lee and Bellamy. Following the adoption of the assessment roll for 1937, Council gave three readings to a By-Law setting the rates and taxes for the current year. The mill rate will be the same as in 1936 a total of 60 mills in town limits for municipal and school purposes, with a rate of 2½ mills for government social services tax. Rate on farm lands outside of town limits will be 10 mills as in former years. A discount will be allowed on all current payments of business tax if paid on May 31st 1937, and on all current property taxes if paid by August 31st.

Following the council meeting, the matter of a Coronation celebration was discussed. It was thought that it would be a good plan to arrange same along similar lines to the Confederation celebration of some years ago, when the local school children, together with pupils of schools from surrounding districts paraded. This was followed by track events for the youngsters and a singing contest. Baseball, basketball and softball were played by the older organizations. It is also planned to have a bonfire and a display of fireworks at night. Hot tea and cocoa will be provided for those wishing to have their suppers picnic style. Heads of committees were appointed to organize matters, with authority to add to their number. Committee heads are as follows; Baseball and sports G. A. Coatta; Grounds, G. B. Brace; Fireworks and bonfire M. C. Hammond; Concessions W. Bellamy; Refreshments H. W. Lovell; School parade and junior track events will be looked after by the local school staff with the help of the secretary.

Particular Cooks

Favor Bellamy's meats because they know that they are chosen with great care with quality the uppermost thought. And particular cooks create satisfied families, an achievement worth while. Phone or leave an order for a choice roast or fry—we won't let you down.

EVERYTHING FOR THE BUILDING

LOCAL & PERSONAL

Mr. A. R. Thompson left for Leduc last week. He will take over the elevator there.

Mrs. Ralph Neale and children are spending some time visiting in Tofield.

Mr. and Mrs. Martindale from Edmonton were visitors at the Coatta home here.

Mrs. John Lee sr. of Edmonton spent a few days in Tofield.

Mrs. E. Wootherick returned home after a short visit at St. Paul.

Dan Dodds returned home from Vermilion where he has been taking the course at the Agricultural College there. Mr. Dodds and Zelda attended the closing exercises.

Dorsey Letourneau from Calgary spent a couple of days at his home here.

Mrs. Letourneau, Mr. and Mrs. J. Letourneau and Dorsey motored to Edmonton on Sunday.

Miss Loret Ross spent the week end visiting in Edmonton.

Messrs. A. Machtmes, S. Schultz and A. Hummell motored to Strome on Sunday.

Harland Thompson arrived from Sudbury on Tuesday morning and left for Calgary Wednesday morning.

Mrs. A. R. Thompson spent Monday looking over her future home at Leduc.

Mr. J. O. A. Letourneau returned from the hospital on Wednesday.

Hubert Bethel is working at Burns' plant in Edmonton.

Mrs. Bethel, Mrs. W. E. Seale, Miriam Seale and H. Bethel motored to Edmonton on Sunday.

The Jolly Twelve Bridge club met at the Swift home on Tuesday evening. Honors were won by A. Swift and Mrs. Currie.

Miss Margaret McCauley spent part of this week in Edmonton writing her R.N. exams.

Mr. Geo. McLaughlin was a visitor in town on Monday.

Misses Lois Thompson and Pat Burnett spent a day in Edmonton last week.

Mr. Murray McHeffey has accepted a position with the Rawleigh Company and will have a route in the Okotoks district south of Calgary. Mr. and Mrs. Murray McHeffey have been living in Edmonton for the past year or two. Mr. McHeffey will leave for Okotoks at once and Mrs. McHeffey and daughter will join him later.

Mr. and Mrs. W. G. Morden have moved into town having lived for the past 13 years about four miles west and south of Tofield. He recently purchased 20 acres adjoining town to the north from Mr. Bellamy and also the house owned by Mr. C. Robinson now in England Before coming to town Mr. Morden sold his farm to Mrs. J. M. Brown of Lindbrook. Mr. Morden intends going more extensively into poultry a department of the farm in which he has already made considerable headway.

RETURNS FROM SOUTH

Mr. and Mrs. Jacob Brenneman returned to Tofield last Wednesday after a very enjoyable and lengthy trip to the south. Leaving here in November they journeyed by train to a point in the United States where Mr. Brenneman purchased a new Buick car. From there on travelling was done by motor and extended as far south as Florida where the greater portion of the winter was spent On the return trip home Old Mexico and numerous other states were visited. Mr. Brenneman looks well and is ready for another grain growing season in Alberta.

KINGMAN

Mr. Lee will speak in the Kingman Hall on April 24th at 8 o'clock His subject will be "Co-Operative Stores."

The Amateur Program under the auspices of the C.C.F. Club will be held on April 17th at 8 o'clock.

A large crowd gathered on Sunday afternoon to help Mr. and Mrs. Billy Christenson celebrate their silver anniversary A program was enjoyed which consisted of: Prayer by Rev Belde; Piano duet by Misses Marie Lawson and Muriel Asp; A recitation by Nora Melvik; A hymn by 6 girls; An address by Rev. Belde. After the program Rev. Belde presented Mr. and Mrs. Christenson a set of silver ware; a silver cake plate; a silver flower vase and a pair of silver candle holders. Lunch was served and a very enjoyable afternoon was had.

Edmonton visitors on Friday were: Mr Hele and Bergild; Mr. Andrew Johnson; Mr. Bjorgum; Mrs. Heflin; Mrs. Gertie Yoder; Mrs. Eric Erickson; Mrs Donald and Mrs. McIntosh

Mrs. Herman Lawson and Evelyn called at Mrs. A. Wilson's home last Sunday afternoon.

Mr. Albin Anderson has returned from a three week's visit at Bellingham, Washington.

Mr. Alex Bartness is home again after spending the winter at Bellingham, Washington.

Mr. Alex Asp and son Herbert are spending a week visiting Metiske and Alliance.

A large crowd attended the Ladies' Aid meeting held in the Kingman Hall last Thursday afternoon. The hostesses were Mrs. Horte and Mrs. Roy Melvik.

Mr. and Mrs. Henning of Hay Lakes called on Mr. and Mrs. Regehr last Sunday afternoon.

There will be a dance in the Kingman Hall Friday evening.

The busy season for the farmers has arrived. Mr. Christenson has put in 30 acres of oats already.

BOY 8, SELLS DAD'S COINS: LOSS HEAVY

EVANSVILLE, Ind. April 15.—That movie eight-year-old Hal De pin attended cost a pretty penny. Without cash he appropriated his father's coin collection and sold it to an unidentified woman for a quarter. His father said it contained a 90-cent piece valued at $450

SNATCHES PURSE OF HELEN KELLER

TOKIO, April 15.—A pickpocket Thursday stole the purse of Helen Keller, celebrated blind and deaf teacher, a few moments after she had stepped ashore at Yokohama for a Japanese lecture tour. The purse contained 200 yen (about $60). Miss Keller herself did not report the theft and police learned of it only by chance.

JOBB and Co.

Baseball Interest Stirring as Season Approaches

While it is a little early for Baseball the boys are preparing for an active season this year, and judging from the enthusiasm that marked the meeting that was held in the Town Hall last Wednesday, this season should go over with a bang

It was decided not to enter the Gas Line league this year but to form a local Community League consisting of Bardo, Lindbrook and two teams from Tofield A team consisting of picked players from the league will represent Tofield in exhibition and tournament games.

With two teams from Tofield it is hoped that more of the younger players will get an opportunity to play ball and thus develop their playing ability by meeting teams from outside points. Players that are interested in playing ball this year are requested to get in touch with T Schultz, who is managing the Tofield team this year.

The financial statement for last year showed expenditures of $101.62 and receipts of $94.38, the Club going in the "red" -7 24. It is hoped that interest can be aroused to such an extent this year that the Club can report a surplus at the end of the season

U. F. W. A. NOTES

The April meeting of the U. F. W. A. was held at the home of Mrs. J. B. Warner, and was attended by an unusually large number of members and [illegible]. The main attraction being a [illegible] our ever popular director, Mrs MacNaughton. Members answered [illegible] Roll Call" by an open confession of My "Worst Cooking Failure."

Mrs Warner gave a brief but valuable talk on the care and culture of gladiolus bulbs. A general discussion followed in which much helpful information was gained, on growing peonies, dahlias and other perennials, and also on the control of insect pests.

Mrs. Bygland gave a book review on a current publication, "Sweden the Middle Way."

Mrs. Booth read the Bulletin on "Adult Education" written by our Provincial Vice-president

Mrs. MacNaughton then gave one of her informal and delightful talks, full of inspiration and suggestions after [illegible] social time was spent [illegible]. Three new members [illegible]

The regular U. F. W. A meetings are held every second Thursday of the month at 2.30 p.m. and all farm women are cordially invited to attend.

The Service Garage

H BOWICK and STAN. GROVER

IT WORKS BOTH WAYS

"If the local press does not co-operate, I hate to tell you that you are licked." This phrase was part of an interesting address given at Oshawa by Edward A. Hughes, general manager of the Canadian National Exhibition. "The greatest agency behind the success of any activity in anything is the viewpoint of your native press," Mr. Hughes told the gathering. They must work with you. They must tell the story to the public and they must not measure their co-operation by the amount of money spent on advertising. The very backbone of the S.N.E. is the support given by the newspapers and the press has told the story to the world. The power of the press is beyond description. You can work your heart out, but if you have not the support of the press you are licked.

Mr. Hughes' wide experience should be enough to give warrant to his remarks. What he said is absolutely true and he added that newspapers should out of loyalty to their community, support the worthwhile things of the community. Mr. Hughes might have added one thing more. He might have pointed out that while the press has a duty towards the community and its activities the community has a duty towards its local paper. While a newspaper does give more free service than any other line of business this should not preclude it from the regular channels of business. We know of organizations and individuals in this district who come openly to the press for free support and take their printing elsewhere. After all, the newspaper is an enterprise involving heavy costs. Every boost rendered worthy objects is to dip into the exchequer of the publishers.

It seems only fair then that when these same citizens requesting newspaper support have any business that the newspaper can do the newspaper should get it. Too many organizations "farm around" to get a little bit cheaper printing and lose many dollars worth of free publicity.

Mr. Hughes stressed the value of co-operation to make anything a success and this co-operation should extend as far as local organizations giving business support to its local newspaper in return for the hundreds of favours done by the newspapers annually for those same societies.

CROP INSURANCE

The method by which crop insurance is to be inaugurated in the wheat growing industry in the United States and a "never failing granary" is to be maintained is herewith outlined.

Let it be supposed that a Kansas farmer applies for a crop insurance policy under the plan. The local committee will handle the application. It will have available a record of yields covering a six year period of the applicant's farm and those in the immediate vicinity. The committee will then determine the loss experience on the applicant's farm. If the average yield per acre is around 16 bushels and the applicant desires to insure up to 75 per cent he will be guaranteed a yield of 12 bushels per acre. The loss experience of the farm and the county is then utilized to fix the premium which may be 1½ bushels of wheat per acre per annum. This premium will be paid by the applicant in good years and the wheat [illegible], stored and sealed either on the farm of the insured or in the nearest elevator.

In bad years the applicant will have grain returned to him up to the extent of his actual loss. If for instance, his crop is a total loss he will be paid the full 12 bushels for which he is insured. If the yield is [illegible] bushels the insured will be paid [illegible]. The entire transaction is in wheat and no money changes hands. The plan is based on local operation with the advice and assistance, of course, of county agents and experts from the Department of Agriculture.

The purpose of this plan is to maintain an even supply of wheat without alternate gluts which ruin the price or scarcity which sets the price soaring, irritating the consumer and yet benefiting the producer whose crop has failed to a comparatively small extent.—Wheat Pool Bulletin.

HEIRS SEEKING MILLION DOLLARS UNKNOWN SPOTS

NEW YORK, April 12.—Heirs of John M. Phillips, New York sewer pipe manufacturer sought today for the fortune of more than $1,000,000 he left scattered around in various unnamed banks and safety deposit boxes in Canada and the United States.

For years before he died in 1928 Phillips made frequent secret trips away from New York depositing huge sums of money under false names in banks whose location he revealed only to his son Francis who carried the secret with him when he died in a plane crash.

TAX ON TRADING IN GRAIN PROPOSED TO WHEAT INQUIRY

(By [illegible])

Vancouver, April 10th.—Vancouver views of shippers and exporters were placed on the records of the Turgeon Grain Commission session which ended here Friday and the commission moved to Edmonton to resume its prairie hearings.

One of the last witnesses to be heard here, F. W. Rudolph, grain exporter, member of the Winnipeg Grain Exchange and prairie farm owner urged some means be devised by governments for obtaining revenue from trading operations on the Winnipeg Grain Exchange. He favored a minimum price to producers of 75 cents a bushel Fort William basis.

Hugh A. Stevenson, manager of Canadian Transport Company and H. R. MacMillan, chiefly interested in lumber exporting feared shipping companies would suffer if the Canadian grain trade was put in the hands of a single agency. It might prevent joint shipping of lumber and wheat through the agency chartering ships for carrying wheat only.

After John Glossup of Santa Monica, California, charged selection of wheat for its protein content endangered Canada's export trade, Hon. J. K. Ralston, K.C. Montreal, commission counsel, said evidence to be presented later would show less than one quarter of one per cent difference in the protein content of wheat shipped to the United States and to the United Kingdom.

Robert McKee, Vancouver exporter who previously proposed appointment of a wheat market commissioner to develop foreign markets, explained such a commissioner would have nothing to do with the price of wheat or its actual sale. Foreign buyers wanted a free and open market and objected to fixed prices, he said.

Although his plan might meet with some opposition in the United Kingdom, Mr. McKee said he did not think British millers would oppose the scheme if price control were NOT attempted. He contended restoration of the shrinkage in the United Kingdom market since 1929 alone would justify appointment of a market commissioner.

Lowering of the domestic freight rate to the level of the export rate was urged by Dr. Lyle Telford, British Columbia leader of the Co-operative Commonwealth Federation. The high domestic rate he said, was putting a heavy burden on British Columbia consumers and prairie producers alike.

Grain for domestic use and feed stuffs for B.C. farmers were far too costly because of the domestic rate, he charged. He pointed out the export rate through Vancouver from either Calgary or Edmonton was 20 cents and the domestic rate 41½ cents.

Dr. Telford charged milling companies were over capitalized and that there was excess capacity in the industry. They should be recapitalized as had been done with the Canadian National railways. He contended the industry was NOT on sound basis and consumers and producers were footing the bill.

A Vancouver export merchant, Robert M. Bryan, dealt with Oriental trade. He suggested giving names instead of number to various grades of wheat which, he believed, would facilitate sales to the Orient. Japan was buying Canadian flour for its gluten content and using it for flavoring sauces, he said.

Fear that establishment of a central wheat board would bring about centralized shipping and ruin merchants engaged in export of certain by-products of wheat was expressed by F. E. Burke of Vancouver. Continuity and availability of shipping space in small lots was essential to the business in which he is engaged, he said.

Donald McLean, manager of Pacific Elevators, Ltd. explained public and semi-public terminal elevator operations. The chief function of the public elevator, he said, was storage.

BAD BRUCE BOSSY BROWSES BLOUSES

BRUCE, April 9.—When this Bruce resident went to retrieve his striped silk Sunday shirt from the clothes line he discovered most of his shirt was gone, leaving only the neck-band and an attached fringe with which to adorn his person on the Sabbath.

With determination to solve the mystery he sat back and watched the clothes line. Next morning his patient vigil was rewarded. As the morning mist was arising he saw a pair of overalls disappearing, one leg at a time.

It then became evident that a neighbor's cow, tiring of a strictly hay diet had developed a taste for succulent haberdashery. Neighbors have been warned not to leave appetizing garments within reach of bossy.

DAD BUYS BLOOD FOR 6 YEARS TO KEEP SON ALIVE

RALEIGH, N.C. April 9—Nick Saparilas watched his little Andrew play in the park today and wondered how long he is going to have to pay $15 to $20 a pint for blood refills to keep his son alive.

Andrew is nine, bright-eyed and olive skinned. Although he looks healthy, he is suffering from Mediterranean Disease, a strange malady that is slowly making him look like an Oriental.

The only reason Andrew is alive, Nick said, is because he has been living on borrowed blood for six years.

"Already my Andrew has had seventy-three blood transfusions," Nick said. "They come every two months now. For a while they came once a month. The last one was two weeks ago. They never stop."

Doctors tell Nick his Andrew may outgrow the disease sometime. Nick shrugs his shoulders.

"The doctors—they don't say much lie."

Already Andrew has borrowed four times the normal amount of blood a child of his age should have.

The disease known in medical annals as erythroblastic anemia, impedes the normal manufacture of blood. It occurs only in children of Mediterranean races. Andrew is of Greek descent.

Nick said he doesn't mind paying $15 to $20 a pint for blood to keep his son alive.

"What do I care about the price, when it keeps my Andrew alive?"

MUSKRAT KING SAYS RATS IN NORTH CAN GET NUMBER BOOST

FORT CHIPEWYAN, April 9.—Thomas Lamb, from the Pas, Manitoba known as the "Muskrat King" has been making a survey of the Wood Buffalo park and the Chipewyan delta, as far north as Resolution, for the Dominion department of mines and resources.

After ten days he gives a most optimistic report and estimates that the rat production can be at least doubled by a scheme of dams to maintain a constant water level and that the fur catch can be made uniform from year to year.

The rat acreage in Northern Alberta can be increased four-fold, he states with a very small investment properly directed. Mr. Lamb travels in his own plane with Carl Yule as pilot.

WILL RESUME DRILLING AT WAINWRIGHT

Resumption of drilling in London, Ribstone Petroleums' number two well on their 15,000-acres property at Dunn, near Wainwright will begin definitely this week and it is hoped that the well will be brought into production within 30 days according to Managing Director G. N. Beattie of Vancouver who was in Edmonton Sunday on his way to the field.

Drilling on the property was abandoned six years ago when an expensive "fishing job" accentuated an already weak financial situation. Mr. Beattie told the Bulletin that the company has obtained sufficient capital to complete their present program and if it is successful more wells will be drilled immediately.

London, Ribstone Petroleums spent $175,000 on geological field work and initial drilling. The property was reported on favourably by Campbell M. Hunter of London, England, and other eminent geologists.

Number two well is being drilled for production in high grade sand at 2000 feet. Before work was abandoned in 1931 the drillers, at this level hit the highest grade samples in Wainwright and Ribstone areas.

Mr. Beattie told the Bulletin that number one well which hit the limestone at 2145 feet will be deepened to make a thorough test of the possibilities in the limestone.

A crew from the Mills Credille Drilling Company of Edmonton is being assembled at the well and supplies have already been ordered. The company is capitalized at 4,000,000 shares of no par value. 1,500,000 of them have been issued.

PAIR SEES JOKING IN SUICIDE PACT AT MODEST HOME

PORTSMOUTH, Va. April 9.—John D. McCue, retired Marine Corps sergeant sat in his modest home discussing suicide with his wife.

McCue, sixty-one wanted his wife to live. She said no; that they had been married for eighteen years and loved each other dearly and that if he went she was going too.

McCue gave in and they lay on the floor, turned on the gas and he started writing a farewell note. Just before they died they were joking about the good times they would have had on vacation this summer.

Police found the bodies and this note:

"Hello. Well Nell and John are going down the long trail together. No we are not crazy. Nell just loves me dearly and has for eighteen years. I pleaded with her to let [illegible] go alone but she would not listen. We planned all this a long time ago. We are laying on the floor kidding each other about the good times we are going to miss this summer. But yes, I say, dragging a cripple...."

HALL BURNED IN DOUKHOBOR NEW OUTBREAK

NELSON, B.C. April 12.—British Columbia police last night instituted a 10 p.m. curfew for all Doukhobors in the Castlegar district where a Doukhobor community hall was fired by an incendiarist Saturday. The curfew was announced at police headquarters here.

CASTLEGAR, B.C. April 12.—The Named Doukhobors of this West Kootenay community last night wired Premier Pattulo suggesting recent incendiarism in the district had been intended to cause ill feeling between them and their Canadian neighbors and asked a government investigation.

The named sect which comprises some 3000 independent Doukhobors and those who are independent but still members of the Orthodox Christian Community of Universal Brotherhood, asked government intervention after the fire which destroyed a Doukhobor hall here. It was the 11th building to fall prey to fire in West Kootenay Doukhobor districts since last Sunday when 10 schools and halls were damaged or destroyed.

In addition to their plea to the premier, the Named group issued a newspaper appeal to the public asking that all Doukhobors not be blamed for the fanatic acts of a few and said peaceful Doukhobors were living "in fear of their lives."

LONDON TO COAST IN 48 HOURS TIME NEXT SEPTEMBER

OTTAWA, April 8—A trans-Canada air service by next September, linking Halifax and Vancouver on a 21-hour schedule with a six-cent-a-mile fare, was held out to the house of commons yesterday by Hon. C. D. Howe minister of transport.

The minister said Canadians would be able to travel between Montreal and Vancouver on a 16-hour schedule leaving Montreal in the evening and arriving on the west coast at noon the next day.

Similarly a five-hour schedule will be operated between Montreal and Halifax, linking the Atlantic and Pacific coasts with a service designed to carry passengers, mail and freight. Experienced Canadian pilots will fly the planes which will be guided by the latest scientific aids to navigation, including the radio beam.

Within 12 to 16 months, the minister expected, a regular trans-Atlantic air service would be operating, linking the old world with the new on a 24-hour schedule. Montreal will be the Canadian terminus for the route which will be operated by a company owned jointly by Canada, the Irish Free State and Great Britain.

Legislative authority for incorporation of the trans-Canada air lines went through committee stage yesterday and was expected to be given third reading today. The line will be controlled by the Canadian National Railways, empowered to sell 49 per cent of the stock to interested aviation companies.

A chain of emergency landing fields 50 miles apart would mark the route the Minister said. Weather reports would be sent by telegraphic printer from field to field and by radiophone from ground to plane.

Landing fields from Winnipeg west were completed by the fall, Mr. Howe said. This coupled with the impossibility of obtaining transport planes any earlier was delaying opening the service.

Earlier consideration was given to amendments to the Combines Investigation Act when it was charged that radio and electrical companies were abusing patent rights.

The Combines Act amendments, still in committee stage, will be considered again today to be followed by budget resolutions and supply.

SIT-IN STRIKES, LIKE UNTO CHAIN LETTERS, GOING

CHICAGO April 12.— Sit-down strikes, the experts say, are on the way out. Like the chain letter craze, the sweep of miniature golf and the Charleston dance, the sit-down strikers which at one time were estimated to occur at the rate of one an hour are gradually diminishing.

Within a few weeks after Michigan automobile workers first put sit-downs on the "big time" last November with their mass sit-downs in one plant after another, they had enlisted school children and teachers, lovers and legislators, caddies and chocolate makers, convicts and candy sellers, pin setters and violet pickers and even hockey players on various occasions in almost every part of the United States.

Varied were the causes of the sudden sit-down epidemic.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

KEEPING ONE'S FEET DRY

It is surprising how important to our well being are some of the apparently trivial details of our everyday life. For instance consider the simple rule to keep one's feet dry. Few indeed are the simple health rules, the observance of which pays such high dividends.

In a climate like ours where rains come frequently and where soft snow and slush are encountered many times spring and fall, it is not always easy to keep the feet dry. Rubbers and overshoes are a nuisance and it is very tempting to go without them. Before one realizes it the feet get wet. It may be hours before a change is feasible and during that time the feet get chilled, the heat regulating mechanism of the body becomes deranged and before we know it another cold has developed. Few things seem to lower the resistance of the body to infection as quickly as wet feet.

Children particularly require careful watching. They will slip off to school without rubbers and mittens, they will tarry en route to test out each stretch of "rubbing" ice and go out of their way to trudge through a mud-puddle; then they may have to sit until late afternoon without an opportunity for a change.

Absolute insistence upon warm dry feet always pays. With rapidly growing boys and girls rubbers and overshoes quickly become outgrown, but it is cheaper to buy a new pair than to pay for the costs of an illness. Shoes should have thick soles in winter or in wet weather. Half soling when required is not a luxury; one cannot risk putting it off. In winter sportswear and other boots should be kept waterproofed. Heavy wool socks and sockees are to be [illegible]. When driving or motoring long distances in cold weather the feet should be kept warm always.

The essential point to keep in mind is that most danger comes, not from getting the feet wet, but in letting them remain that way. There is very little danger if one can change at once into warm dry footwear. If the feet are chilled as well as wet, they should be rubbed until circulation has been restored and if necessary, a warm footbath taken as well.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

LET'S HAVE THE MAJOR—

THE PROVINCIAL legislative session which has just ended in Edmonton will go down into history as being one of the most soul stirring—perhaps nerve shattering—sessions held within Alberta's legislative halls. The foundation for a more tranquil session was apparently laid when the premier stated in a Sunday evening broadcast immediately prior to the assembly convening that the government's pre-election social credit pledges could not be fulfilled within the allotted eighteen month's time. It was expected that ordinary business such as a legislature is called upon to transact would go forward without serious hindrance—especially in view of the outstanding majority the government enjoyed.

But evidently there were quite a number among the members who felt that a more serious attempt to establish a system of social credit in Alberta should be made. This feeling was strong enough to create a body that were quickly named insurgents by the press. For a few days, this group created turbulence, where tranquillity was expected to have reigned, and after stormy sessions and still more stormy caucuses, an agreement was reached whereby a committee of five were appointed to seek a plan of social credit. A temporary budget was passed and after a "master" social credit bill was passed the legislature adjourned until June.

The whole procedure has a flavor of move and counter move, with victory, as far as this session is concerned resting with the government—the insurgents appear to have been out-manouvered. The whole situation is quite a mix-up, and while there are flashes of interest, it is rather a tiresome task trying to understand every new statement, plan and the interpretation thereof.

However, to us, two things are quite clear—the people voted for social credit, and there are quite a number of members who sincerely desire to give the people what they asked for. Let us go back to the days when the theory of social credit was first brought in a general way, to the attention of Albertans. Major Douglas was the modern father and chief disciple of the new economic creed. For quite a number of years this engineer had been writing and lecturing on behalf of social credit. He had encircled the globe, teaching this new school of economics where ever he went. From New Zealand he came to Alberta and while he did not win the then existing government to his cause, the seed sown by his visit germinated in numerous minds and the Alberta Social Credit government was the final result. Up to the time he reached Alberta he had been unable to find a whole people through their accredited representatives willing to endorse his teachings, but in Alberta the people took the matter in their own hands and elected a body of representatives for the express purpose of endorsing his views and putting them into practice. Now, there is no system of social credit working anywhere, so it is quite obvious that experts in the working of social credit simply do not exist. As regards the "basic principles" of social credit, who should know them any better than the major, for nearly sixteen years he has been working out details concerning them. To our way of thinking, the government having unloaded the responsibility of implementing social credit of this province on to the committee, the committee should be equally as adroit and unload the responsibility on to Major Douglas. The Major was the fellow that started all this fuss anyway, and furthermore, he has a definite responsibility, not only to Alberta, but to every purchaser of any one of his books. By electoral majority Alberta has been declared a social credit proving ground and it is the duty of Social Credit's chief disciple to make use of it.

CORONATION CELEBRATION—

IT IS PLEASING to note that the Tofield Town Council has made tentative plans for a Coronation celebration here. It is also pleasing to note that plans place more emphasis upon the children than upon adults. While the town is small, as towns go, it would be a pity to allow the day to pass without some form of recognition. As regards out-door sports, one takes quite a chance early in May as to temperature and general weather conditions and perhaps it would be wise to have some alternative program in the event of extreme windy or chilly weather. Seeding will of course be in full swing, but if the children of the surrounding schools come in there is bound to be quite a number of adults come with them. It is to be hoped that the day will be fine and warm and that a large number of children and adults commemorate the day by attending the celebration here.

M'Thistle: "Mon, 60 shoes were thrown at my wedding."

Friend: "Sixty? I can't believe it!"

M'Thistle: "Well, there's the shoe cupboard, open it and count them."—Pearson's.

SOCRED MASTER BILL MAKES ITS BOW TO PUBLIC

Appointment of "The Provincial Social Credit Commission" to administer Social Credit in this province with each commissioner appointed for 10 years is the main feature of "An Act Respecting the Issuance and Use of Alberta Social Credit" introduced into the legislature by Hon. Solon E. Low provincial treasurer and given first reading.

This measure incorporates the Social Credit Measures Act passed at the 1936 regular session of the legislature; the Credit House Act passed at the special August session of the house and the amending bill to the Social Credit Measures Act introduced earlier at this session by Premier William Aberhart.

This is the master-bill for Social Credit and gives the government the widest possible power to proceed with its plans for establishment of Social Credit in Alberta.

The bill will be brought up for second reading in the house on Tuesday and it is expected that as soon as it is passed through the house the members will adjourn until June.

The Act provides for the appointment of a board consisting of the following: Glen L. McLachlan S.C. Coronation; Floyd M. Baker S.C. Clover Bar; Dr. J. L. McPherson S.C. Vegreville; W. E. Hayes S.C. Stony Plain and S. A. Berg S.C. Alexandra.

The board or any members thereof, with the approval of the government, may visit any part of the world "for the purpose of procuring prospective commissioners or technical experts; or for the purpose of studying administration methods which might be of value to Alberta."

Salaries of commissioners and all expenses of the commission shall be fixed by the board with the government's approval.

The presence of a majority of the commission shall be necessary to constitute a quorum.

The act provides for the payment of a "provincial consumers' dividend" although no date is set when payment will commence.

Duties of the Commission in the main, are set forth in the Act as follows:

1.—There is hereby created an account in the Treasury of the Province of Alberta to be known as the Provincial Credit Account. In the year in which this Act comes into force and every subsequent year, the Commission shall determine for each such year the value of the unused capacity of industries and people of Alberta for the production of wanted goods and services; which amount shall be credited to the Provincial Credit Account which shall not have been the amount in the Provincial Credit Account which shall not have been drawn upon in that year shall be written off. The level of values used in determining the amount of the Provincial Credit Account shall be the same as in the determination of the retail discount rates. The decisions of the Commission and the Board as to the Provincial Credit Account shall be final. Said decisions shall be reported by the board to the minister and said reports shall be used by him as the basis for the establishment and maintenance of the Provincial Credit Account.

2. The commission shall use all reasonable ways and means to determine the retail discount rate as accurately as possible, strictly in accordance with the methods prescribed in this act and without any extraneous influence and advice. At the discretion of the commission the disbursement of the discounts may be limited to the amount of discount vouchers tendered for payment. The decisions of the commission and the board as to the rate of the retail discount shall be final.

3. The commission shall have authority to provide an advance of Alberta credit to any person or persons engaged in agriculture or manufacturing or industry in the province and to any person, persons or corporate body entitled to Alberta credit to defray the costs of the building of a home or for establishing or maintaining any business, vocation, calling or for public service; but no interest shall be payable in respect to any credits so provided.

4. The commission is hereby authorized through the Credit House and its branches or other agencies to collect tax levies; to receive and administer any securities which may be assigned to them, transfers or adjustments on account of unpaid taxes or for any purpose affecting the provincial credit; to adjust claims, handle settlements and liquidate or adjust debts as between individuals or corporations where application for such adjustment is made to the commission; to negotiate any transfer of Alberta credit with any firm, person or corporate body who may be entitled to Alberta credit and whose interests may be affected by the application of this act.

5. The commission shall have authority, with the approval of the board to employ and fix the compensation of special examiners, statisticians, clerks and other employees as it may from time to time find necessary for the proper administration of its duties.

The sections dealing with the basic, or "consumers" dividend are as follows:

1. From and after a date fixed by the Board a Provincial per capita consumers dividend shall be paid on the first day of every month during each accountancy period to every person entitled to Alberta Credit under the provisions of this Act. The payment of the said dividend shall be administered under the direction of the Commission and shall be made pursuant to regulations made by it. All payments of the Provincial consumers' dividend and all expenditures in connection therewith shall be met by the issuance of Treasury Credit Certificates as hereinafter provided.

Such certificates shall be issued to Branches or other agencies designated by the Commission and shall be accepted and dealt with by them as a treasury deposit against which credit vouchers in payment of the Provincial Consumers' dividend and all expenditures in connection therewith may be drawn.

2. The amount of the Provincial Consumers' dividend in any accountancy period shall be determined by making it approximate such percentage of the Provincial Credit Account as may be available and not otherwise appropriated as deemed advisable by the Commission, and said dividends shall in no case amount to less than five per centum of said account.

3. No Provincial Consumers' dividend shall be deemed to form part of the income of the persons for whom the same is provided as income subject to taxation, nor shall it be regarded or taken into account in making any computation of the amount payable to any person by the Province or the amount payable in pursuance of any Act of the Province in the nature of pensions, allowances or grants.

4. The Board may establish classifications of persons entitled to Provincial Consumers' dividend, having regard to any circumstances relating to purchasing power and production or economic conditions.

5. In the case of minors, special Provincial Dividend Vouchers may be issued and upon satisfactory evidence being adduced that the child's present and future interest in each case will be safeguarded, the parents jointly, or either separately may be appointed trustees until the child reaches the age of 18 years, whereupon he may at will, receive his own Provincial dividends or in the alternative the Commission may appoint a trustee or trustees for such minor.

It is provided that every corporate municipal body is empowered to accept transfers of Alberta Credit in satisfaction or partial satisfaction of any claim which the corporate body has against any person for rates, taxes, services or otherwise, to deposit any Alberta credit or currency in the Credit House and to use any Alberta Credit so accepted by making transfer thereof to persons who are willing to accept Alberta Credit.

Treasury certificates shall be available for providing a discount on prices to consumers at retail; government services; interest free loans; debt payments; export subsidies; provincial consumers dividend and "such other purposes as the Lieutenant in council at the request of the board may by order decree."

The credit house shall be situated in Edmonton and will be the head office of the commission, as well as being the agency of the provincial treasury [illegible] circulating credits.

The credit house will have branches at such places within the province as may be required in the judgement of the commission.

The principal function of the Credit House shall be to act in conjunction with the provincial treasurer and the branches in transferring credit in the manner prescribed in this Act and the Credit House is empowered to perform that function.

It is further provided that the provincial treasurer shall issue through the Credit House system, Treasury Credit Certificates in such denominations as may be deemed advisable by him and in such amounts and at such times as may be required to effectuate purposes of the Act.

BALDWIN SOON WILL RETIRE, HE INFORMS VOTERS

WORCESTER, England, April 12—Prime Minister Baldwin, sturdy corner-stone of British Conservatism, warned his people earnestly away from Communism or Fascism Saturday in a speech in which he announced his imminent retirement but set [illegible] for it. He has been prime [illegible] three times.

Addressing his constituents he warned against "mass consciousness" and "the virus of either Communism or Fascism."

"When I retire" Baldwin once said, "you will never hear of me again. I want to go back to Worcester, read books, live a decent life and keep pigs."

SPRING TOUCH OF WHITEWASH

In the spring the farmer's fancy may rightly turn to thoughts of whitewash for, after the long winter, the barn and creamery and home fences look much in need of being brightened up. Even dwellers in the city or suburbs will find that an outbuilding would be none the worse for a spring touch-up. And there is nothing after all better or so inexpensive as whitewash.

Persons are often deterred from using whitewash through fear that a shower of rain might ruin it, but the Dominion Experimental Farms have evolved a waterproof whitewash for outdoor work which will prevent a newly whitewashed barn from looking a picture of desolation after a downpour. It is made up in the following proportions; slake 62 pounds of quicklime in 12 gallons of hot water, and add two pounds of salt and one pound of sulphate of zinc dissolved in two gallons of water. To this, add two gallons of skim-milk. An ounce of alum though not essential, improves the wash. Salt should be omitted if the whitewash is required for metal surfaces which rust.

For farm buildings, a disinfectant whitewash may be desired. Here is a recipe recommended by the Dominion Experimental Station at Scott, Saskatchewan. First 50 pounds of lime are dissolved in eight gallons of boiling water. To this add six gallons of hot water which has ten pounds of salt and one pound of alum dissolved in it. A can of lye is added to every 25 gallons of the mixture. A pound of cement to every three gallons is gradually added and thoroughly stirred. The object of using the alum is to prevent the lime from rubbing off. Cement makes a more [illegible] mixture so that it is easier to apply and more surface is covered. Lye is added for disinfecting purposes but a quart of [illegible] disinfectant to every eight gallons would serve the same purpose. Lye is preferred when the [illegible] are to be kept white.

LAKESHORE

Norman Jones had the misfortune to dislocate his elbow recently

Miss Isobel Robinson spent last week practice teaching in Lakeshore school.

Farming is well under way in this district and the chicken business is flourishing

Henry Tiedeman, who has recently returned from Vancouver is helping R. C. Phillips during spring's work

Mrs Ralph Neal of Vancouver was a visitor at the R. C. Phillips home on Monday

MINIMUM FINE SYSTEM DROPPED

Removal of the minimum fine provision from the Vehicle and Highway Traffic Act was decided upon by the Alberta legislature last week when dealing with a new amending bill in committee of the whole

The committee also approves of compulsory dimming of headlights when motorists meet on the highways, lights on cycles on the highways at night and right of police to make inspections of cars when in operation.

The house favored the proposal to eliminate the $5 minimum fine and costs for the first offence of those convicted of infractions under the Act as it stood previously.

As a result, a magistrate will have the right to impose a fine of $1 and costs for example or any nominal amount he may desire. Previously he could not impose a first offence fine of less than $5.

Another change which the house approved was an amendment which reduces the distance of 350 feet ahead over which car lights were supposed to show objects clearly to 200 feet. This is being done for the purpose of curbing the glare menace which has been the subject of complaints by motorists from time to time

"Any step in the interests of greater safety for motorists has the strongest possible endorsement of our organization" said an official of the Alberta Motor Association which is keeping a careful eye on legislation of special interest to motorists

---

Mr and Mrs R H Phillips, Eileen and Don Phillips were city visitors last week

On Tuesday Ben Tiedeman sang "Down the Old Cattle Trail" while he and his brother Emil played the accompaniment as a guitar and violin duet in the Tofield Amateur Hour. The boys were well applauded They were accompanied to the city by Lynn Phillips

KETCHAMOOT

Mr Wm Lee returned to his home in Edmonton Saturday after spending several days on his farm in our district

Mr and Mrs. Henry McGinitie and family were Sunday guests of Mrs Bruha of Shonts The occasion was Mrs Bruha's and little Henry McGinitie's birthdays.

Mr G. W. Sears, Albert and Charley and James Ingram motored to Edmonton Thursday Donald Creasey accompanied them home.

A pleasant afternoon was spent at the home of Mrs D K Allan in Tofield when the Ladies' Aid met for their monthly meeting. Visitors present were: Mrs Whyte; Mrs Davison; Mrs Schultz; Mrs. C. Coombes, Mrs Elsie Carlisle: Miss Hazel Sears and Edith Davison

Miss Hazel Sears entertained the Social Hour Club at her home Thursday afternoon of last week with some twenty-five members present Needle work and social conversation soon passed the time away. Visitors present were: Mrs Davison; Mrs. Whillans Mrs C A Ingram; Mrs Myrtle Sutton; Mrs Elsie Carlisle; Miss Marie Boychuck; Ella Kleinocroth The May meeting will be held at the home of Mrs H McGinitie

Mrs J Carlisle and Mrs E Carlisle and children visited Mrs Henderson at her home Friday afternoon

Anyone finding a purse of money around $6 00 on the street of Tofield Tuesday afternoon, April 13th please phone 412

NOW IT MAY BE POSSIBLE EAT GARLIC: KEEP FRIENDS

CHAPEL HILL, N.C. April 15—Gas masks of wartime have resulted in discovery of a magnet that extracts bad tastes and flavors and unwanted odors from food and drink

The taste magnet, described to the American Chemical society Thursday by John W Hassler of the West Virginia Pulp and Paper company Tyrone, Pa uses the same kind of carbon as gas masks

The carbon is "activated" that is it is given an unusual power of attraction This is done by pulverizing the black material into particles so fine the carbon is virtually all surface In that condition it acquires electrical forces common to the carbon atoms that form one of the basic substances of all the living world. Hassler said the carbon magnet takes unwanted flavors out of sorghum, cane and corn syrups, pineapple juice vinegar and various drugs It is particularly good for cleaning up alcoholic liquors, wines, glycerine and water. It has worked well on lard and sugar. In the case of gelatin the carbon removes virtually all traces of animal odors

CLIENT SLUMPS IN CHAIR, DIES DURING HEARING

MONTREAL, April 15—As a doctor testified in Mr Justice Wilfrid Lazure's court today, a middle-aged man sitting quietly at the back of the room slipped a little lower in his seat.

Nobody noticed him and the doctor went on telling about Arthur Carmel's health. He was testifying in Carmel's suit for benefits from an insurance company which had refused to pay on ground he was in bad health when the policy was taken out.

Another doctor walked back for a word with the man at the rear. Then, "This man is dying your lordship" he cried.

And Arthur Carmel died in less than a minute.

TELLS HOW CROWD FLED CORONATION

LONDON, April 15.—Coronation at which everyone but the King, the Archbishop and the Abbot of Westminster fled was recalled in a speech by L. E. Tanner keeper of documents at Westminister abbey.

"Just as King William the Conqueror was being crowned the Norman soldiery all around mistook the guttural acclamations of the crowd for a revolution" he said. "They immediately set fire to everything they could find. In a short time the abbey was empty with the exception of the King trembling for the first time the Archbishop and the Abbot of Westminster

At the coronation of William IV said Tanner, Queen Adelaide was asked to take a walk because none of thee heralds knew which was her rightful chair.

At the coronation of George III the rattle of knives and forks as the congregation ate their lunch made the service inaudible.

An interruption disturbed the dignified atmosphere as George I was crowned. Coronation "banns" were called by the archbishop whereupon Lady Dorchester shouted: "Does the old fool think anyone will say no when there are so many drawn swords about?"

CORONATION BEACONS WILL LIGHT REMOTEST CORNERS OF DOMINION

MONTREAL, April 15.—Brightly-burning beacons the length and breadth of Canada will in age-old style signal the crowning of a king May 12.

This unique feature in connection with the coronation of His Majesty King George VI will be handled by the Boy Scouts of Canada according to announcement today by Sir Edward Beatty G.B.E.; K.C.; L.L.D. president of the Canadian general council of the Boy Scout's Association

Calling to Scout leaders to take the initiative in organizing celebrations on the occasion of the coronation of His Majesty who is Scout king of 90000 Canadian Boy Scouts Sir Edward recalled the most successful coast-to-coast beacon chain in 1935 marking the silver jubilee of the late King George V.

It was the first time that an organized beacon celebration on such a scale was ever attempted in Canada and was a splendid success due to the interest taken in the event by Boy Scouts and the great co-operation given them by the general public.

As public celebrations will likely be left largely to municipalities Boy Scouts will again have opportunity to show on a large scale that their organization is one of Canada's important public service bodies whose training produces young and older citizens of public spirit and enterprise.

Teacher: "Lot was warned to take his wife and daughter and flee out of the city Lot and his wife and daughter got safely away."

Willie: "What happened to the flee sir?"

TORONTO MEDIC PAYS $500 FOR MAIMING DOG

TORONTO, April 13—Maximum penalty of $500 or two months in jail was imposed on Dr. Norman King Wilson, Toronto eye, ear nose and throat specialist, who pleaded guilty today to attempting to maim, kill or injure a dog.

Inspector Weatherstone of the Humane society said he was called April 1 and found a mongrel dog lying in a pool of blood and Dr. Wilson standing nearby

"I put the dog in the wagon and Dr. Wilson came over to me," the inspector said. "He said to me, 'I cut the dog's throat.' He also said there were too many dogs around here.

"I asked him why he did it and he said the dog had been around his place barking for some time. He told me he used a penknife to do it. He also told me he was very sorry he had not made a good job of it."

An interested audience attended the Easter Thank Offering Meeting of the Womens' Missionary Society, held in the United Church on Thursday, April 15th

The president, Mrs Lovell, who was in charge of the meeting welcomed the visitors C G I T. Groups and the Mission Band

Mrs Firth had arranged a programme based on the Study Book, "Men and Women of Far Horizons" and introduced three members, who represented characters from different countries Mrs Allan dramatically portrayed an average day in the life of an African woman Mrs Stinson gave a vivid picture of a beautiful Chinese girl educated in a Mission school and Mrs. Swift represented a Japanese music teacher who had also become a Christian while attending a Mission school

The Mission Band sang a Easter Chorus Mrs Firth gave a very interesting report of the Board Meetings held in Calgary last month

In a very impressive ceremony the Senior and Junior C G I T Groups affiliated with the Woman's Missionary Society

At the close of the meeting a dainty lunch was served.

LAKESHORE

Mrs J H Johnston, Mrs. John Wood, Miss Maggie Wood, Mrs. M C Wood, Mrs. W. E. Seale, Mrs T D Ferguson and Mrs. Bethel were guests of Mrs. Minnie McConnel on Thursday last.

R C Phillips was a visitor to Calgary over the week end.

The Morray family were guests of the Anderson home on Sunday

L H Graham was a business visitor to the city Friday.

Born To Mr and Mrs. Harry Kosak, on April 19, a daughter.

Miriam Seale visited her mother who has been in an Edmonton hospital for some time. Mrs. Seale is expected home on Friday.

Mr. and Mrs. L. H. Graham were visitors at the Moss home on Sunday

Rev. D K Allan was a visitor in the district on Tuesday.

SOUTH SIDE HUNTERS SHOOT DOWN WILDCAT TREED IN CITY BUSH

A big lynx, which ventured too far from his wilderness habitat, to see the sights of Edmonton, or perhaps with the notion of messing up a few dogs in revenge for their harrying of his domestic feline relations, met his doom when two straight-shooting .22 rifles brought him down.

The lynx measured four feet six inches from nose to tail, and, when stretched out was six feet from forepaws to hindpaws Tawny grey in color, his legs were as thick as a man's arm and his paws as big as a fist.

Chased up a tree by Frank Brown 10712 64 avenue, and his dog, Sandy, the lynx was brought down by Bert Zornes, 10820 64 avenue and Harold Stewart, 10633 63 avenue, with .22 rifles and long cartridges

Two shots got him in the head and a third in the hip and the beast climbed backwards out of the tree An exciting chase through the bush followed and two more shots dropped the big cat

The lynx was first sighted in the bush by H Williams 10720 63 avenue, who looked out of his window He looked for his dog but the dog was not at home and his son, Lawrence, ran to the home of his neighbor, Frank Brown, who brought along his dog and ran the cat up a tree just behind Williams' house

Zornes and Stewart were called and the party of five some of them only partly dressed, quarried the beast

When it climbed out of the tree, wounded, Brown and Lawrence Williams chased it through the bush with clubs "I was close enough to hit it, but thought I'd play safety first" Brown said "This is the second lynx hunt I've been in About 10 years ago I shot one just west of the school at "Death Corner" south of here on the Calgary trail."

Spying the lynx huddled in a tree a young mother of the neighborhood a bit deceived as to its size said Don't kill the little thing, let it stay around " Viewing the huge cat on the ground though, with her baby clasped in her arms, she admitted that she had changed her mind

LOCAL & PERSONAL

Mrs Bert Swift and children of Falls is visiting with her mother, Mrs Booth.

Mr and Mrs. J Munro and family and Blake Clutterham from Edmonton spent Sunday at the Clutterham home here.

Mrs. Ellis, Joan and Raymond, Miss Cherry and Jean Campbell visited at the Malcolm home on Sunday.

Mr and Mrs Provost and son visited at the Allan home on Sunday. Mrs Provost and baby are remaining for a few days

Mrs Minnie McConnell entertained a number of friends to dinner on Friday afternoon A lovely dinner was served at 1:00 p.m after which the guests enjoyed an afternoon of bridge. Honors at bridge were won by Mrs. M Wood and Mrs. Bethel Those present were Mrs. John Wood, Mrs. Mel Wood, Mrs. J. Johnston, Mrs. W E Seale, Mrs. T. D. Ferguson, Mrs. Bethel, Miss M. Wood and Miss L. Ross

Geo B Bruce is making considerable alterations in his store. The shelving has all been taken down and re-arranged and other carpentry work done Mr Ray Weir and Mr. L. Simonson are doing the work.

Mr and Mrs Thompson and family motored to Leduc on Sunday.

Mrs Thompson and Lois spent Monday in Edmonton.

Miss Goldie Jacobs spent the week end with Jessie Munro.

Miss Julia Lukin is spending a week visiting at her home in Viking.

Ed Kallal of Holden spent Sunday in Tofield visiting his parents

Mr and Mrs Scott spent Sunday in Edmonton.

Mr L. Larson, head of Merco Ltd. visited Tofield on Tuesday. He was accompanied by other members of his staff

Mr and Mrs S Johnson returned from Grande Prairie after spending the winter up there.

Miss Annie Swift spent the week end visiting in Edmonton.

Mr J L Barnett is home for a short time after working on the railroad for the past months

Mr and Mrs Herman Lawson and family called at the Roy Fleming home last Sunday evening

THE PROOF IS IN THE EATING

"To be sure, history explains everything—including the fact that a wig should be necessary for the administration of justice in England" So wrote Salvador de Madariaga in The New York Times Magazine recently

Current history is rapidly explaining a lot of things to Alberta. To get right home, to our farmers

Take a look at Saskatchewan's drought area, for example It is history now that the voluntary debt adjustment plan worked out there has met with popular response from farmers themselves (Over 9,000 in what is known as the drought and marginal areas have signed new agreements, leaving less than five per cent who have for individual or personal reasons chosen to apply to the Farmers Creditors' Arrangement Act) The companies who loaned the money, the Dominion government, the provincial government and the municipalities got together last fall, and here's what has happened in a few short months:

1. Dominion and provincial governments have written off relief indebtedness of $24,500,000

2 The municipalities have written off taxes amounting to roughly $21,000,000

3 Even though only 20 to 25 per cent of the farmers owed mortgages held by companies (distinguished from private mortgages held by individuals) the companies have written off roughly $13,000,000

4 Private creditors, individual mortgage holders, merchants and so forth, have written off an amount impossible to determine

Net result Mr Saskatchewan Farmer has adjusted his debts to where he can pay them has signed a new contract for the reduced amount, and is going ahead on a new basis without the uncertainty of amateur laws, and without having his private credit destroyed by a moratorium hanging over the head of his province

E. W. ROGERS

QUALITY OF NORTHERN-GROWN WHEAT DISCUSSED BEFORE TURGEON GRAIN INQUIRY

(By Sam Ross)

Edmonton, April 17th.—Criticism of low quality wheat grown in northern areas, a proposal for exclusion of Garnet variety from Northern wheat grades and various views on marketing methods were presented to the Turgeon royal grain commission here last week.

Dr. A. G. McCalla of the University of Alberta made the criticism of northern-grown wheat and asked exclusion of Garnet from the Northern grades. The grain section of the Edmonton Chamber of Commerce was given permission to submit a brief dealing with Dr. McCalla's statements and recommendations.

Exclusion of Garnet would tend toward greater uniformity in the Northern wheat grades and Dr. McCalla in emphasizing uniformity was essential to Canada's export business. Dr. McCalla's plan would bar Garnet from No. 3 and No. 4 Northern as well as No. 1 and No. 2 Northern as at present. It would add No. 3 and No. 4 grades to the present No. 1 and No. 2 C. W. Garnet grades.

The general quality of all varieties of wheat grown in the grey, wooded soil of the Northern areas was below that produced in the southern prairies, Dr. McCalla contended. If extension of wheat growing in the northern areas occurred then the general quality of Canadian wheat would suffer, he said.

Northern-grown wheat, said Dr. McCalla, lacked sufficient protein and protein was a vital factor in making bread of fine, strong texture. As most of Northern Alberta wheat was exported through Vancouver, a weaker quality of Canadian grain was shipped through the Pacific port. Vancouver No. 3 Northern wheat was at times a glut on the market, he declared.

Dr. Frank A. Wyatt, head of the department of soils at the University of Alberta since it was organized in 1919, declared climatic and soil conditions affected the types and grades of wheat grown in the areas. The best wheat in Alberta was grown in the south where rainfall was a hazard, he pointed out.

R. H. Settle, spokesman for the grain section of the Edmonton Chamber of Commerce, asked a reduction in the domestic freight rate on ground grains, bran and shorts to Vancouver. British Columbia feed merchants could buy grain in Alberta, ship it to the coast, grind it and then ship it back into the B. C. interior cheaper than Alberta merchants could sell it direct.

Three witnesses—O. S. Longman, field crops commissioner; W. C. Moraw, accountant in the field crops branch; and Horace Woodman, secretary in the provincial treasury department—gave evidence of relief granted Alberta farmers between 1930 and 1936 by the federal and provincial governments through the municipalities. Of the $1,[illegible] now outstanding in agricultural [illegible] $1,048,074 was considered uncollectable while it was expected most of the balance would be collected.

Several farmers were heard during the sittings, with most of them urging continuance of the open market method of disposing of grain. Angus McDonnell of St. Albert, one of the farmers urging continuance of the open market, proposed a guaranteed price commensurate with cost of production plus a reasonable margin of profit. J. A. Whitford, who retired from his Bon Accord farm [illegible] ago, supported wheat board [illegible] ing with an initial and [illegible] payments to producers.

When the grain section of the Edmonton Chamber of Commerce answered Dr. McCalla's recommendations, it proposed Garnet variety be eliminated from No. 3 Northern and admitted to No. 4 and other Northern grades. No. 3 C. W. Garnet would be made a new grade and added to No. 1 and No. 2 C. W. Garnet. The northern areas were good farming areas, it contended.

Emphasizing the high protein content of the northern and central areas, the brief said "low yield and high protein content of good quality [illegible] apparently do go hand in hand but high yield and satisfactory [illegible] returns also go hand in hand [illegible] the quality is not equal to the best."

The brief, read by Mr. Settle, concluded the remark that Dr. McCalla was "building up a case" [illegible] had given the facts as he found them. Hon. J. L. Ralston, commission counsel, called it "an unfortunate expression."

Alfred Chard, Alberta expert on freight rates and traffic adviser, said present freight rate structure largely because of the mountain differential worked against Alberta and put an extra burden on the province.

"I went to every shop in town and couldn't get what I wanted," complains a correspondent. He probably [illegible]

WORLD OF WHEAT

By H. G. L. Strange

The spring wheat crops now being seeded in Western Canada and in the North Western parts of the United States will be anxiously watched by the world. Weather for the progress of these two crops will unquestionably have an important effect upon wheat prices during the coming months.

As these crops [illegible] will [illegible] to decide but should the prospects become lessened then price will tend to rise.

What are the actual prospects at the moment?

[illegible] state records [illegible] and comments [illegible] from over 500 [illegible] gauges in Western Canada by the Research Department of the Searle Grain Co. indicate that [illegible] never has the [illegible] with so [illegible] reserve in the soil.

The records show that at the moment Alberta has only 56 per cent of the normal [illegible], Saskatchewan 57 per cent and Manitoba [illegible] per cent.

The [illegible] that if an average crop [illegible] about 400 million bushels [illegible] present western wheat acreage is to be secured that very much better than average rainfall—[illegible] average [illegible] between [illegible] June and August [illegible] need.

Rainfall therefore will be the important thing to watch.

The following factors have tended to raise prices: Roumania [illegible] prohibits wheat export. Broomhall may raise [illegible] requirements estimate. Rains needed [illegible] condition [illegible] for seeding [illegible] hemisphere. Cold weather retards Russian spring seedings. Polish winter crop prospects doubtful. Spring seedings delayed in U. S. [illegible] still contracting for wheat.

The following factors have tended to lower price: Rains break long drought in Central China. Australian wheat estimate increased 15 millions. U. S. Government estimate winter wheat crop at 656 million. Beneficial rains in Western Canada. Uncertainty of gold policy in Great Britain and U. S.—France removes import license taxes on apples and pears.

CONTROL OF WILD OATS BY DELAYED SEEDING OF GRAIN

(Experimental Farms Note)

During the years 1929 to 1934 Reward wheat averaged 23.2 bushels per acre on summerfallow and 17.25 bushels per acre on stubble land on an area infested with wild oats on the Experimental Farm at Indian Head, Saskatchewan. This excellent result was obtained by delaying the seeding of wheat and destroying one of the wild oats before seeding.

Reward wheat, which is an early maturing variety of wheat, was seeded as late as May 25th with good success. This late seeding permitted the killing of a crop of wild oats by [illegible] before the Reward wheat was seeded.

[illegible] after harvest cultivation [illegible] the germination [illegible] and spring cultivation to kill wild oats [illegible] with the seeding of early maturing grain crops such as Reward wheat [illegible] one of the most effective methods of controlling wild oats.

Other crops which may be used for [illegible] are barley and [illegible] for green feed.

The duck foot cultivator was found to be a very satisfactory implement for after harvest and spring work in the control of wild oats.

VERIGIN IN FEAR OF ASSASSINATION

VANCOUVER, April 19— Peter Verigin the Younger Sunday night went back to his Doukhobor followers in south-central British Columbia.

The spiritual leader of the majority of Canada's Doukhobor population left for Grand Forks after telling an interviewer he feared assassination by the Sons of Freedom, recalcitrant members of the Russian religious sect who have been expelled from the Christian Community of Universal Brotherhood.

Discussing his two-hour conference with Premier Pattullo Friday, Verigin said:

"I protested and demanded from the government a firmer policy in dealing with those guilty for the bombings and fires in Doukhobor districts because it corrupts the life of the entire community.

Let them find the guilty ones," he said. "Jail them, hang them, do nothing with them but let us work at land in peace. If the present unfavorable condition prevails, the law-abiding Doukhobors may be forced to leave Canada in search of a country where they could be properly protected."

Verigin's father, Peter Verigin the Elder, also known as Peter Lordly, whom he succeeded as leader of the Doukhobors, was killed in 1924 when a mysterious explosion blew up a railway coach on the Kettle Valley line. The cause of the explosion was never determined.

In 1931, Peter Lordly's beautiful granite sepulchre on a mountain shelf overlooking the town of Brilliant, B. C., was wrecked by dynamite. Perpetrators of the deed were never discovered.

MANY THOUSAND OF LONDONERS SEE DRESS REHEARSAL OF CORONATION

LONDON, April 19—In spite of a biting cold, bleak, sunless morning, scores of thousands of Londoners lined the streets early Sunday to witness a rehearsal of the procession in which Their Majesties the King and Queen will proceed to their coronation May 12.

The court and police authorities who will be responsible for this feature of the festivities obtained a vague idea of the crowds they will have to control on the real coronation day.

Beginning at 6.30 a.m. and carefully timed all the way, the procession, including the gilded coach of state, perambulated slowly over the coronation route to enable officials to determine exactly how long the whole thing will take.

The crowd packed Trafalgar Square and 15 deep in Piccadilly Circus and 10 deep most of the rest of the route.

Even Londoners are becoming impressed by the extent of preparations for the coronation. This is brought home to them as plans go forward to care for 30,000 troops in London's parks and to establish a traffic control regime which will cut swanky Mayfair from the rest of the world.

BARRHEAD HOLD-UP NETS GUNMAN $62

BARRHEAD, April 19.—For the first time in the history of this village [illegible] took place late Saturday night, when an unknown man of about 24 years entered the general store of F. R. [illegible] quietly asked for a job and then, gun in hand, demanded money.

Mr. Mornault and clerk were in the back office at the time and were putting away the day's receipts, preparatory to closing. The bandit kept them covered with his gun and ordered up $62 in bills and coin but overlooked a box in which was a larger amount, mostly in cheques. He then made a hasty retreat from the store and was seen to run down an alley between two buildings, where he was joined by two others, who had a car in waiting.

Two R. C. M. P. constables were in a car a short distance up the road at the time of the holdup and they at once started in pursuit, but the bandit trio made a clean getaway.

Earlier in the day three men, strangers to citizens, had been seen in the village, but there was no indication of where they had come from or what route they were on. They had filled their car with gasoline and had bought some supplies at one of the stores.

Not in Stock

"You can get anything at a mail-order house," remarked the lady next door.

"Everything, alas, but a male," sighed the spinster.—London Opinion.

---

frequently and it will be necessary for some of the board to be here all the time. But the whole set up will be built around the technical adviser.

ALBERTA FARM DEBTS SLASHED BY $4,068,757

Debt slashes amounting to $4,068,757 were made from $11,346,283 indebtedness of Alberta farmers who appeared before the Board of Review appointed under the Farmers' Creditors' Arrangement Act, it was disclosed in a statement issued by Chief Justice C. R. Mitchell, chief commissioner, covering operations of the Board since its inception until March of this year. The debt reduction is 36 per cent of the total indebtedness.

The average debt of each farmer-debtor applying for relief under the act was $9,292 and the average deduction made was $3,332.31 while the approximate interest saving to each farmer was $355.07, based on the yearly average.

During the period under review 1,817 applications were considered, and 1,225 proposals formulated and confirmed. The Board refused to formulate proposals in 294 cases.

During the past six months the Board has received 472 new applications for consideration, this being an average of 74 monthly.

200-POUND FISHERMAN ESCAPES GIANT MUSKIE

"By this time the other muskies in Cliff Lake (Northwest of Hudson, Ont.) have heard from the lips of a giant, the thrilling story of how he hooked a fisherman from New York who weighed over 200 pounds and fought him for fifteen minutes before he lug lug got away. Next season I'm going to give him another chance at me" so says Rex Beach, world-famous author and sportsman in the April Cosmopolitan in describing one of his tussles with a giant muskellunge in Northwestern Ontario.

And here is how Beach leads up to the escape: "My hair flew up like a divot when I saw an enormous muskie following my lure. There was the usual look of longing, of indecision in his eyes. Then he sheered off. I cast again in the direction the big fish had taken and started to retrieve. The bait stopped suddenly as if it had fetched up on a log. The rod bent and the reel began to burn my thumb. He tore up something like an acre of weeds.

"The harder I tried to lift him the more savagely he bored down. I got a thousand dollars' worth of advice from the occupants of the other boats but it wasn't worth a nickel to me....

"Then the fish began to tire from the heavy strain. Its belly flashed. After a while Shorty, the guide, slipped the big net under it and heaved it aboard. They wrestled until the hook was removed, then held it up for a brief inspection. Then, Shorty gently lowered the big fellow back into the water. He lay motionless for a moment, then with a lazy swirl he disappeared...."

Rex Beach, who has fished all over the American Continent, visited Cliff Lake last Fall and, according to his reports enjoyed some splendid fishing. Outfitting at Mike Amont's lodge on Vermillion Lake, Beach flew in with Ernie Poole, Fish and Game Representative of the Canadian National Railways, to Cliff Lake for big muskies. Fish which, he says "looked like Man Mountain Dean" came through the water, snatched his lures and in some cases, smashed his line.

CANADIAN MARKSMAN GIVES GREAT DISPLAY IN REVOLVER SHOOTING

NEW YORK, N. Y. April 19—Sergeant Robert "Bob" Pickrell, of the Canadian National Railways police at Winnipeg, world's champion revolver shot and holder of practically all Canadian revolver and pistol championships, gave the United States army a lesson in marksmanship at Fort Wadsworth here a few days ago.

Using Bud Donahue of the Pathe newsreel as a target, Sergeant Pickrell outlined him and his camera with fifteen shots while Donahue worked the camera so that theatre audiences all over the world will be able to know what it feels like to be shot at. His colleague, cameraman Larry O'Reilly, also of the Pathe News, worked a second camera to show that the human target practice was genuine.

Sergeant Pickrell also made a number of shots at the regulation revolver targets that are used by the American army. Although an extremely strong and chilly wind was blowing, Sergeant Pickrell complained that the bullseye was really too big and so, from a distance of forty yards, he made his own bullseye by placing five shots around his first one. He was so accurate that the entire group of shots could be covered with a fifty cent piece. The United States army is saving this target to use as an example of the degree of accuracy which can be attained by a revolver shot.

Animal lovers are starting a crusade to abolish the use of the horse in warfare. So now all we need is that lovers of men shall start a crusade too.—Punch.

GEMS SCATTERED AS ROBBER FOILED

LONDON, April 19.—Gems worth $100,000 were scattered about the pavement in the fashionable Regent st. shopping district Monday when an attempted robbery was frustrated.

The jewels, including coronation tiaras and heirlooms left for alteration, were being brought to a prominent jewelry establishment from a bank safe. The messenger was knocked on the head and the bag of gems burst open.

The robber ran away without attempting to pick up any of the scattered jewels. He was caught by the messenger and his assistant, who left him in the custody of a crowd of spectators while police were summoned, but when the "bobbies" arrived it was found he had escaped.

OPEN GRAVE IS MAN'S SEPULCHRE IN QUEER MISHAP

CONNELLSVILLE, Pa. April 19. —Walking past a graveyard in the wee hours of the morning Saturday, John L. Collins, 29, stumbled into an open hole, accidentally pulled a gravestone over him and strangled to death.

The accident occurred right in the heart of Connellsville, on its main street.

A resident heard moans from the cemetery. Terrified, she called police.

Collins was found with the stone, weighing 300 pounds across his chest.

The coroner returned a verdict of accidental death.

FARES TO BE CUT FOR HOLIDAY ON CORONATION DAY

WINNIPEG, April 20—Coronation day, May 12 means not only a holiday but Dominion-wide reduced fares on both Canadian Pacific and Canadian National Railways. Announcement of fare-and-a-quarter rates for the round trip good going Tuesday May 11, and until 2 p.m. Wednesday, May 12, and returning not later than midnight Thursday May 13 is made by J. B. Parker western secretary of the Canadian Passenger Association.

These holiday fares in coaches will also be good in tourist cars on payment for accommodation. First-class fares and-a-quarter rates for the same time will be valid in sleeping and parlor cars on payment for the accommodation and for the same length of time.

The Right Man

It was after the opera. The expensively dressed woman approached the broad-shouldered man.

"If I am not mistaken," she said, "I have the honor of speaking to the renowned tenor, have I not?"

He felt flattered.

"And what can I do for you, madam?"

"I can't find my car," she answered pleasantly. "Would you be so kind as to call out 'Charlie' at the top of your voice?"—Montreal Star.

"What's the idea of touching the baby's face with the broom this morning?"

"I just wanted him to get used to kissing his grandfather."—The Kablegram

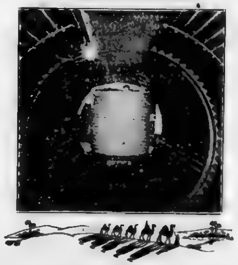
TOWN GOSSIP—

FOR MANY YEARS NOW, learned scientists have been endeavouring to find an accurate and fool proof way of determining in advance just what kind of weather any given area was to be favored with. Very elaborate stations have been maintained by numerous governments, some of them going as far as having stations within the Arctic circle. Each year they are learning more about the weather and at the present time there are men who speak along the lines of weather prediction with authoritative assurance. But whatever their means of arriving at their astronomical and meteorological conclusions, we know of one sure way of determining whether Jupiter Pluvious is going to shower this town with her blessings. Without exactly claiming to have aimed at the target, Tofield Town Council can claim an almost perfect score as regards signs of rain. A dry fall, a scarcity of snow throughout the winter and a dry, windy spring means nothing to them. Just let them bring out the grader and presto, clouds gather and rain commences to fall. This system was successful last year, it has commenced to be successful this year, and all we can say is— KEEP UP THE GOOD WORK.

You know, we have often thought Tofield was passing up a wonderful opportunity. For several years past there has appeared in the columns of the daily press accounts of the activities of water monsters. The Okanagan has its favorite, Vancouver Island it's finny pet with a horse-like head and even the Scottish folk around the Firth o' Forth lay claim to a deep sea monster. And while all this is going on Beaver Lake lays unruffled by any commotion. For quite a long time in the window of Mr. McCauley's former office, was a photograph of a "steamship" ready to steam out into the unchartered waters of Beaver Lake. To be sure, it didn't look like a modern battleship, nor was it exactly a pleasure liner, but the picture—not the boat—might have passed for a submarine. How thrilling it would be to have some worthy citizen go out and discover a creature "measuring about forty feet, with a horse—or sheep-like—head and which moved through the water at great speed with a serpentine motion." Here is a chance for some one to acquire fame—and if the monster is caught—fortune. Those fellows by the lake, Dodds, Warner, Francis, etc. could buy telescopes and keep us informed.

A few years ago electors in this part of the Vegreville provincial constituency frequently lamented the fact that the member was chosen from the northern part. With the election of Dr. McPherson in 1935 the situation in this regard was changed. Moreover recent developments within the legislative halls have placed upon the shoulders of the member for this constituency more than the usual share of responsibility. Being chosen one of a committee of five to implement a system of social credit in this province, the Doctor is now acting chairman of the committee, Mr. McLachlan the chairman, having, we understand, decided to go to London to interview Major Douglas. There is absolutely nothing to the argument as to whether a man is from the north or from the south, so long as he is a good member, and we feel that congratulations are first due the Doctor on the appointment to this position and that it should be permissible for this constituency to stick out its chest a bit. We certainly wish the Doctor every success in what must assuredly be a herculean task.

Dryer than the Sahara!



THE Sahara Desert has its oases — pools of refreshing water along the Caravan Route — but moisture in a telephone cable means Trouble. Consequently, one of the many important steps in the making of telephone cable is the expulsion of moisture. Here a length of cable comprising twelve hundred telephone circuits (2,400 wires) is shown leaving one of the huge ovens in the Montreal plant of the Northern Electric Company, Limited, where a temperature of 275° F. is maintained under a vacuum which removes every perceptible trace of moisture from the cable. The cable is then wheeled into an air-conditioned chamber at the rear which is dryer than the Sahara Desert; here it awaits its lead covering which is applied in a hot plastic state under several tons pressure without the cable again encountering the natural atmosphere; it is then ready for use.

POSSIBLE USES OF RUBBER TIRES ON FARM MACHINERY

Recent field tests made by the Dominion Experimental Station at Swift Current show that the "rolling resistance" of a rubber tired wheel is from 40 to 65 per cent less than that of steel wheels. This reduction in power necessary to move machinery on wheels is particularly noticeable on loose ground and, therefore, the application of the pneumatic rubber tires to certain farm machinery will reduce the cost of operation as well as enable a safe increase in operating speeds.

Machinery such as separators, combines, binders, drills and wagons are heavy to pull on soft or rough ground and must be operated at low speeds. Under these conditions rubber tires on these machines will permit a reduction in the power necessary to pull them, increase the possible speed of travel, reduce the damage done by excessive vibration and probably increase the life of the machines.

Lighter machinery such as mowers, rakes, planters, cultivators, weeders manure spreaders, potato machinery and the like, would appear too be particularly suitable to rubber tires since they may be operated at higher speeds than used at present with the standard steel wheels or with less wheel damage to the crop.

Some machines such as the plow and one way disc are dependent upon their wheels for controlling the uniformity of depth and may not be as satisfactory on rubber tires as on the rigid steel wheels.

Since the cost of rubber tires, special wheels and replacements are, as yet fairly high and since most farm machines are used only a few days each per year, the successful application of rubber tires to farm machinery would appear to depend upon the adoption of a standard wheel which may be used on a number of different implements, allowing the farmer to change the tires and wheels from one machine to another, with the least trouble, according to the season of the year.

Some definite advances are being made in this direction and many farm implements are now being offered to the farmer equipped with pneumatic rubber tires. In the near future many more implements may be rubber equipped and it will be well for the farmer buying such equipment to get as nearly a uniform size of tire as possible to reduce his replacement costs.

WARN MOTORISTS OF DEADLY GAS

With deaths from this cause still occuring in this province from time to time, a warning of the dangers of carbon monoxide poisoning is given to motorists by officials of the Alberta Motor Association.

During this season of cooler weather, there is a strong temptation to drivers to keep the car windows closed.

"Drivers cannot be too careful in checking their exhaust lines, carburetors, heater or muffler or in seeing that floorboards fit tightly," said an official.

"Carbon monoxide gas is colorless, odorless and tasteless. It acts quickly and without warning and is deadly even in small amounts."

Instances have been known where carbon monoxide has snuffed out the lives of drivers who were so anxious to listen to radio programs that they kept the motor running while parked in a closed garage or had all the car windows closed.

It has been established by tests that 60 per cent of all cars in operation create measurable quantities of this gas which is a deadly poison.

Here are some simple rules: Never have the motor running while the garage doors are closed.

Run the motor as little as possible while parked in a garage.

Never have all the windows of your car closed.

Warn members of your family.

Have the carburetor, exhaust lines and mufflers checked over frequently.

ALBERTAN PAYS IN OLD RACKET

ST. PAUL, Minn. April 19.—Joseph Chorrek of Orion, Alta. took a chance to win $200 by betting $65 with two penny-matching strangers Sunday. Chorrek is out the $65.

He told St. Paul police he met two men. The three began matching pennies, then quarters and finally $5 bills.

Chorrek told police he was getting along pretty well and, when the second man showed him a roll supposedly containing $200 and offered to stake that against the Albertan's roll, they matched. The stranger won and pocketed the $65. After thinking it over Chorrek decided to tell police about it.

Orion is about 35 miles south of Medicine Hat.

MILK

Every Day for Everyone

Milk and its products are indispensable to the growth of the child and to the health of the adult. For the infant, milk is a perfect food, for the growing child, milk and its products are essential foods; and for adults they are the most important foods.

The nutritive value of milk is unique, and milk should be regarded as the foundation of the diet. Milk is the best all-round food, as it contains more of the materials essential to growth and health than any other natural food. Milk furnishes more of the elements for body building and energy producing than any other food commodity at the same cost.

There is no waste—every ounce of milk bought may be used.

Milk may be served in many ways. Milk combines well with many other foods. Milk preparations require little fuel to cook. Milk may be purchased in different forms.

Potato Soup

3 medium potatoes
2 cups boiling water
2 to 3 cups milk
3 slices onion
3 tablespoons butter
2 tablespoons flour
1½ teaspoons salt
¼ teaspoon celery salt
⅛ teaspoon pepper
Few grains cayenne
1 tablespoon chopped parsley

Cook potatoes in boiling salted water. When soft drain and rub through sieve. Measure liquid and add enough milk to make 4 cups. Scald with onion. Remove onion and add liquid slowly to potato pulp. Melt butter, add flour and seasonings. Cook few minutes stirring constantly. Gradually add potato mixture. Cook 3 minutes. Sprinkle parsley in soup before serving.

Chocolate Bread Pudding

2 cups stale bread crumbs or small squares bread
2 cups scalded milk
2 squares unsweetened chocolate or ⅓ cup cocoa
2-3 cup sugar
2 eggs
¼ teaspoon salt
½ teaspoon vanilla

Soak the bread in the scalded milk about half an hour. Melt chocolate over hot water. When using cocoa mix with sugar. Add sugar and enough milk taken from bread and milk mixture to make it of a consistency to pour. Pour into bread and milk. Add salt, vanilla and well beaten eggs. Turn into buttered baking dish or individual dishes. Put dish in pan of water and bake about one hour at 350 degrees F.

Ham a la King

4 tablespoons butter
1 cup mushrooms
1 tablespoon green pepper chopped
4 tablespoons flour
½ teaspoon salt
½ teaspoon celery salt
Few grains cayenne
2 cups milk
2 cups cooked ham, cubed
1 tablespoon parsley, chopped
1 tablespoon pimiento, cut in small pieces

Melt butter, add mushrooms and green pepper. Stir and cook 5 minutes. Mix flour and seasonings. Add to first mixture. Cook 5 minutes. Add milk slowly. Add ham, parsley and pimiento. Reheat.

The Test

Willie (touching dinner guest's suit) "Huh! This isn't even warm."

Guest (uneasily) "What do you mean?"

Willie: "Why, Pa told Ma you certainly were hot-looking clothes."

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

NOSE BLEEDS

Stop those repeated nose bleeds before you lose your job. Business today demands a great deal if you are to keep your head above the tide and you cannot do this when your health is being undermined by frequent haemorrhages from the nose. Often the cause and remedy are so simple too. A small blood vessel towards the front of the nose bursts its wall and bleeds for awhile. Soon it stops, but before it is completely healed it breaks through at the same place again and this may occur a number of times. Your doctor can cure these nose bleeds by sealing off the offending blood vessel with some form of cauterization. It takes but a short time and is usually painless.

When you are faced with the alarming picture of blood pouring from the nose what are you to do? Well, first of all do not plug the nose with anything, as this merely causes further injury to the broken wall of the bleeding vessel. Tight pressure with the finger on the outside of the nostril which is bleeding will usually control the haemorrhage in about five minutes.

All nose bleeds of course are not due to bleeding vessels at the front of the nose. Common causes in children are adenoids and foreign bodies, such as beads and buttons. These usually cannot be discovered except by your doctor, who can remove the cause and stop the bleeding.

Some adults suffer from high blood pressure which indirectly may be the source of the repeated nose bleeds. Here the blood from the nose is a warning that other trouble is present and the sign should not be neglected. In older people growths in the nose cause irregular bleeding and the sooner the tumour is discovered and treatment begun, the greater the chance of cure.

So it is very important that all persons suffering from repeated nose bleeds should be examined by their doctor in order to find out the cause and to commence treatment before too much damage is done.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

FOOD HABITS AS REVEALED IN RAILWAY DINING CARS

WINNIPEG, Man. April 19.—Similarities and differences in food habits as between countries are revealed by food orders received in railway dining cars. On British railways roast beef is the favourite dish and the same holds good in dining cars of the Canadian National Railways. While chicken comes second best in Canada, across the water roast lamb is next to roast beef in popularity. The Scot when travelling however, is likely as not to ask for ham and eggs, the Manchester man goes in for hotpots while the West Country man stands by roast beef. For the Irishman it is good old Irish stew. Fish is popular on railway dining cars in both countries. In the case of desserts, the Britisher, like the Canadian goes in for pie, apple being the favourite variety with patrons in Canadian National diners. As regards beverages, tea is tops in both countries.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go
The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk. A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else.

HEIR PRESUMPTIVE TO THRONE OBSERVES 11th BIRTHDAY

WINDSOR, Berkshire, April 21.—Princess Elizabeth, heir presumptive to the throne celebrated her 11th birthday Wednesday with joy at a make-believe "coronation" which may some day be turned into reality for her.

There were presents from her mother and father and a surprise package from "Uncle David" whose abdication as Edward VIII [illegible] December brought her [illegible] the throne [illegible] tion of her parents. [illegible]

In [illegible] Princess Margaret [illegible] Westminster [illegible]

The [illegible] with Princess Margaret [illegible]

Later [illegible] watch the [illegible] changing of the guard and receive a [illegible] birthday salute.

The [illegible] day was a party [illegible] room of Windsor castle [illegible] the royal family [illegible] Princess Elizabeth [illegible] Queen Mary was [illegible] guests to watch her cut a pink, white-iced cake with 11 candles set in silver sconces.

25-YEAR WAIT FOR JOB FAILS; MAN TOO OLD

BOSTON, April 21.—Patience had its reward [illegible] Boston plumber [illegible] service appointment 25 years.

In examinations [illegible] he was too far [illegible] appointment. Charles W. Foley, labor superintendent [illegible]

But this week his chance came. A job became [illegible] at Long Island hospital and the man's name was high enough to make him eligible.

Then came the shock. Foley read a regulation barring appointment of men over 60.

The plumber had waited too long. He was 71.

MAN SORROWING FOR DOG DIES IN TRACK MISHAP

CHICAGO, April 21—Arthur Hansen, 44, followed his pet dog in death today. The dog was killed yesterday, crushed by a train. It broke away from a leash in Hansen's hand.

The unemployed electrician brooded over his loss. Today his wife said, Hansen went for a walk.

He was killed by a passenger train in precisely the same spot the dog had died.

[illegible] said he [illegible] their warning signals.

McPHERSON TO BE TEMPORARY BOARD CHIEF

[illegible] L. McPherson, S.C. Vegreville, [illegible] act as chairman of the Social Credit Board during the absence [illegible] MacLachlan [illegible] was made Wednesday [illegible] Mr. McLachlan.

The [illegible] Major Douglas [illegible] the subject of [illegible]

[illegible] date had been set, Mr. McLachlan said that it had not been definitely fixed but would be as soon as could be arranged.

Replying to a question as to action by the Board during his absence, Mr. McLachlan [illegible] drafted [illegible]

[illegible] members of the Board [illegible] with the legislative committee [illegible] draft a brief [illegible] taxation to [illegible] before the Royal Commission on taxation to be appointed by the [illegible] government.

Asked if the Board had authority to come to terms with Major Douglas [illegible] agreement can be reached, Mr. McLachlan said the Board had power under the Act to do so, although the government was charged with keeping an eye on expenditures.

However he said that at present the main thing was to engage Major Douglas and he would bend every effort in that direction.

WEST VIRGINIA FARM WOMAN DISCOVERS NEW KIND OF WORLD

NEW YORK, April 16—There have been essay contest winners before, but never one like Mary Flanagan, wife of a farmer, mother of 10 children, and one of the 200 inhabitants of the little mountain town of Montrose, W. Va., who starts on a cruise to Havana on Saturday under the sponsorship of the Pro-Roosevelt Association of Woman Lawyers, Inc.

A modern Cinderella Mrs. Flanagan sat in her tower apartment at Essex House and explained all about it. She never went beyond elementary school. She has only once before been on a trip outside Randolph County. She had seen one motion picture in six years. She has no running water, no bathtub, no electric light, no radio, no telephone, no automobile. Her one regular contact with the outside world is the weekly newspaper in her little town.

Her home was saved by an $800 loan from the Federal Government, and when she read about the essay contest in the November presidential campaign she wanted to set down on paper what she thought about President Roosevelt.

"I never dreamed of winning," she said simply, as she told how she got a child's school tablet of blue-lined paper, a pencil, and set to work. There was no address on her essay and when the women magistrates, who acted as judges in the contest gave her the prize no one could find her. A cousin read in a Pittsburgh newspaper about the hunt for Mary Flanagan and sent her the clipping whereupon the writer of the winning essay took her pencil in hand again and explained that she was found, but that she could not accept the prize of a cruise, for she had only the clothes she was wearing and no money to get to New York City.

New York City may seem cold and hard, but there is no more sentimental place in the world, and when Mrs. Flanagan's letter was received there came a great outpouring of gifts, money for the railroad ticket, an entire cruise outfit from a big department store, an apartment in a hotel, a permanent wave and a complete outfit of cosmetics, the first Mrs. Flanagan ever had, and invitations to all sorts of places.

Mrs. Flanagan, who milks four cows, takes care of chickens, hoes in the garden, cooks and sews for her brood at home and teaches in the Methodist Episcopal Sunday school in Montrose, began her first day in the big city at 5.30 o'clock in the morning her usual hour for getting up. She looked at her first electric stove, thought of her woodfire cook stove at home and dallied with the idea of making her own breakfast. But she decided upon having it in bed and in the 20 minutes it took her tray to appear she sat in the window facing Central Park and counted automobiles—239 of them sweeping around the curve before her.

Her husband wanted her to see the zoo so she added that to the big schedule before her, expressed the hope that there might be something blue in the new outfit which was to be presented to her, and then settled down to tell reporters about the ten children, ranging from a daughter of 20 to a son of two.

Anyone seeing her self-possession could understand her husband's farewell words, "I guess you can take care of yourself anywhere."

LONG HATPIN IS TAKEN FROM THROAT

HAMILTON, Ont. April 21.—A six-inch steel hatpin, swallowed by Fred R. Pursel while he was swabbing his throat with cloth at the end of the pin was removed today in an operation here. The pin became embedded in Pursel's throat and worked its way toward the stomach.

RIDICULE IS USED INSTEAD OF LASH

GRANITE, Okla. April 21.—Pink bloomers and Mother Hubbard dresses supplanted ball and chain Tuesday for four youths who tried unsuccessfully to escape from Granite reformatory. Laughter laid on by fellow inmates substituted for the lash.

Warden Fred Hunt prescribed the feminine dress as punishment and ordered the offenders placed in the reformatory rotunda.

"It's really setting them afire" he said. "We have them rouged and prettied up and the other prisoners who walk past them to their cell blocks almost die laughing."

"We're getting good results from this method of punishment," Hunt said "because the ridicule from their fellow prisoners is is worse to them than anything else."

BROTHERS MEET IN HIGHWAY MISHAP AFTER 37 YEARS

COLLINGWOOD, Ont. April 21.—Two brothers who had not seen each other for 37 years were reunited last night, thanks to a "happy accident" on a highway near here.

[illegible] E. Marlow of Great Falls, Mont., began to "bawl out" Claude Marlow of Walkerton, Ont. after their automobiles collided.

Then the two were gripping hands. Joe left his home at Bruce Peninsula at the age of 15 and at the time of the accident was on his way to surprise his brother at Walkerton.

LECTURE ON SWEDEN

On Thursday evening last Donald Cameron of the University of Alberta gave a lecture on Sweden. There was a good attendance and the audience was interested in the lecture and lantern views shown. The event was held under the auspices of the C.C.F.

KING TRIES ON HIS CROWN; IT FITS HIS HEAD PERFECT

LONDON, April 21.—King George tried on his crown today.

Driving to Garrard and Company, the Monarch spent half an hour inspecting and adjusting the 2½-pound Imperial crown with its priceless blaze of jewels.

The crown has been made over completely so it will fit. In it are such famous stones as the Black Prince's ruby which is 2½ inches long and 1½ inches wide.

SHOT GIRL FATALLY TO WATCH HER FALL

SOPERTON, Ga. April 21.—William Calhoun 16, was under a life sentence Wednesday for fatally wounding a 14-year old girl to "watch her fall."

State witnesses at the trial said young Calhoun was returning from a hunt when he stopped near the home of Birdie Lee Darley, rested his .22 calibre rifle on a fence and shot the girl after telling companions to "watch her fall." Calhoun said he had not intended to hit the girl.

NEGOTIATIONS WITH DOUGLAS SATISFACTORY

Expressing satisfaction at negotiations so far conducted with Major Clifford H. Douglas, who has been invited to come here and act as technical adviser to the commission establishing Social Credit, Gen. L. McLachlan, S.C. Coronation, chairman of the Board to name the commission on Monday said that the Board met on Monday to consider the next step to be taken.

"Negotiations with Major Douglas are not yet finished," said Mr. McLachlan, who, however still declined to publish the text of the reply from the Major received last Friday.

"Have you opened negotiations with any other expert save Major Douglas?" Mr. McLachlan was asked.

"No, not yet," he replied.

Asked if any progress could be made by the Board toward implementing Social Credit, pending engagement of Major Douglas or some other expert, Mr. McLachlan declared that work would be pushed ahead and that much could be done.

"Do you anticipate frequent meetings of the Board?" he was asked.

"Yes," he replied, "we will meet

Modernize your Home... or your Farm Buildings!

Check over this list . . . .

You give the orders—we can provide the money

When you have decided on what jobs you want to carry out either in your home or your farm buildings, come to the Bank of Montreal, which is co-operating with the Government in financing this work . . . our manager will be glad to talk over your plans with you with a view to arranging a loan for the purpose. Loans are repayable in easy monthly instalments.

A FEW SUGGESTIONS

YOUR HOME

1. Foundation walls sound and in good condition? . . . .
2. Roof weather-tight and without leaks? . . . .
3. Exterior walls and trim in good repair? . . . .
4. Woodwork or masonry in good condition . . . .
5. Have you all the room you need? . .
6. Bathroom facilities sufficient and modern? . . . .
7. Floors modern, attractive, and in good condition? . . . .
8. Interior walls and ceilings in good condition? . . . .
9. Woodwork painted? . . . .
10. Doors and windows weather-tight, easy to operate? . . . .
11. Walls and roof insulated against heat and cold? . . . .
12. Enough closet space? Built-in conveniences? . . . .
13. Chimneys drawing properly and in fire-safe condition? . . . .
14. All stairways convenient, safe, well-lighted? . . . .
15. Gutters, down-spouts, and flashing in sound condition? . . . .
16. New driveway or walks? . . . .
17. A garage? . . . .

YOUR FARM

1. Do you need a new barn, hen house, pig pen, lambing pen, milk cellar, vegetable and fruit cellar, ice house? . . . .
2. If you already have all of these, are they in good repair . . . new roofing, enlarging, painting, etc., needed? . . . .
3. Silo in good condition . . . or do you need a new one? . . . .
4. Water supply efficient and convenient . . . do you need to put down well or erect windmill? . . . .
5. Have you a proper shelter for farm machinery? . . . Tool shed and workshop? . . . .

LAKESHORE

Among Edmonton visitors this week end were Mr. and Mrs. Lester Noland and Alice and Mr. and Mrs. L. H. Graham and Lawrence.

We are glad to see Mrs. Bertha Seale home again from the Royal Alexandra Hospital.

Miss Grace MacKinnon spent the week end at her home in Mannville.

Mrs. Bert Swift who has been visiting her parents, Mr. and Mrs. Booth has returned to Fallis.

George Abernethy took Oscar Ack-

(Continued on back page)

MUCH ACTIVITY IN COUNTRY—TOWN DULL

East, west, north and south—in which ever direction one goes there is now, and has been for the past week, much activity in the country. Farmers, taking advantage of good spring weather are seeding, plowing or discing, as the case may be, as fast as they can. Tuesday was an unpleasant day to be in the field, wind from the east sending clouds of dust through the air. In contrast with the activity in the country things in general are dull around town throughout the day. Saturday night of course quite a large number come in and for a few brief hours it is just the same as New York.

LOCAL & PERSONAL

The Holy Trinity W.A. will meet at the home of Mrs. W. Bailey, Tofield on Thursday, May 6th at 2:30.

A. Hummel, barber, is a patient in an Edmonton hospital. Not feeling well for some days, he went to Edmonton over the week end for examination. The doctor there considered it wise for him to stay there for a few days.

Mr. and Mrs. Forman spent Sunday with their daughter, Mrs. J. Chevraux, at Killam.

Mrs. Kirpatrick is visiting her sister Mrs. Law here for a few days.

Mr. and Mrs. McCauley, Marjory Stewart and Annie Swift motored to Lamont to visit Margaret McCauley, who is a patient at the hospital there.

Bill Taylor, Harland Thompson, Lee Burnett, and T. McIlratney motored to Elk Island on Sunday last.

Muriel Malcolm spent the week end visiting in Edmonton.

Mr. A. R. Thompson of Leduc spent the week end here.

Miss V. Phipps, Mr. A. Machtmes, and W. Schultz motored to Strome on Sunday.

Mr. H. Bethel of Edmonton spent the week end at his home here.

Miss Jerry Thomlinson from Stettler visited Tofield this week.

Misses Joan Ellis, Joan Martin, Pat Walker and Mr. Bob Wheeler visited Muriel Malcolm on Sunday.

Mr. Alexander, boiler inspector, made an official visit to the local creamery this week.

Miss Arline White spent a few days visiting at the Scott home this week.

Miss Lola Wilson, Arthur Beirnes and Max Rogers returned from University last week.

Little Lorne Kendall suffered a painfull accident this week. While playing around the plow, he fell on it, cutting his face quite badly. It was necessary to have two stitches taken to close the wound.

PRECIPITATION REPORT
(Searle Grain Co.)

Week ending Wednesday, April 28th

	Inches
Thursday	
Friday	
Saturday	
Sunday	
Monday	
Tuesday	
Wednesday	
Total	
Previous Total	44

Note: last week we gave the rain fall for week ending April 21st, at .33. The .33 reading was taken in the afternoon, before the 22nd, more rainfall making the total for the 21st .44 inches.

In the month of April 1936 4 inches of snow fell which equals .40 of rain so up to the present we are about equal with last year.

During the whole season of 1936 8.2 inches of moisture fell which is low for this district, which has a 20 year average of 13 inches. During the whole season of 1935 12 inches fell.

It is considered by experts that it requires 8 inches of rain to mature a crop. There is some variation in this as 6 inches at the right time is as good as 8 inches at the wrong time. The kind of soil also plays some part.

On a rain chart just issued by the Searle Grain Co., and covering the three prairie provinces, this district is in the area of 13 inches and over. The chart has been carefully compiled and drawn from records gathered over a period of many years.

TO LET—100 Acres of Pasture, 2 miles south and 7 miles west of Tofield. Apply to Geo. Yeager, Tofield.

KETCHAMOOT

The purse of money that was lost two weeks ago was restored to its rightful owner, thanks to the honesty of Mrs. Leslie Jones who lives North of Tofield.

Miss Annie Lindsay motored over from Innisfree on Friday. Her sister Miss Nellie returned home with her to spend the week end at her parental home.

Mrs. Weir and little daughter of Edmonton spent several days at the Nomeland home last week. Mrs. Weir is Mrs. Nomeland's niece.

Miss Ada and Mr. Dick Turner returned home Saturday after several months visiting their old home and relatives in England.

Mr. and Mrs. Mattson and son and daughter visited their daughter and sister, Mrs. Elsie Carlisle on Sunday.

Mr. and Mrs. Tom Schultz of Tofield were Sunday guests of Mr. and Mrs. A. F. Schultz on Sunday of last week.

Miss Marie Hansen of Round Hill is assisting Mrs. F. Sutton with her spring house work.

Mr. and Mrs. Henry McGinnis and family were Sunday dinner guests of Mr. and Mrs. John Lee.

Miss Kathleen Ingram returned on Sunday after a two week's stay at the home of her sister, Mrs. Les. Ovelson. Mrs. Ovelson is now recuperating from an attack of bronchitis at the home of her parents, Mr. and Mrs. J. H. Ingram.

Miss Hazel Sears, Stanley and Charley, Angus Mitchell and Torvel Nomeland were Sunday evening guests of the Schultz family.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, May 5, at the home of Mrs. L. J. Carlisle. A cordial invitation is extended to all.

Mr. and Mrs. T. D. Ferguson and son Lloyd, Mr. and Mrs. Wendell Wiley were Sunday guests of their parents, Mr. and Mrs. J. H. Ingram a week ago Sunday.

Miss Ruby Grahn of Kingman is assisting Mrs. C. A. Ingram with her spring work.

At the recent Edmonton Livestock show, Mr. J. H. Murray purchased the purebred bull, Popular Sim, from K. Allenby.

Mr. G. A. Trent recently purchased the purebred bull Princeton Quitter from the E.P. Ranch. The purchase was made at the Edmonton Livestock show.

WHY TOWNS STAGNATE

The town that does not have the support of its citizens can not develop, writes the editor of the Mc Gregor Herald. He says

As a corporation a town exists to better the conditions of its inhabitants, to make life more pleasant for them. Its business is to improve itself, to better its facilities, to increase its attractiveness and to protect its citizens and their property. The success of a town in its endeavor toward these ends depends on the efforts of its citizens, on their willingness to use the same effort for public good as they do in their private interests. The good citizen will not be content to leave well enough alone, but will try to keep his town moving ahead. Organized effort can bring about practically any condition if set out to develop if the effort is backed up by organized determination, by the combined persistence of loyal and public spirited workers. A town is climbing up to an ideal, or sliding down into a rut, according as it possesses or lacks organized community spirit. The town that does not have the support of its citizens cannot develop. Let us remember that our private interest and our highest duty lies in the same direction, and add each his weight to the forces which are working in the public welfare.

WAINWRIGHT WELL MAKE DEEP TEST

WAINWRIGHT, April 21—Deepest ever made in this district is under way at the well of the Montreal Alberta Petroleum company, four miles west of town. K. Homath of Preston, Ont. and J. W. Bailey of Kitchener, Ont., are here in charge of operations.

The well has been drilled to depth of 3,400 feet which is about 1000 feet deeper than any others in this field. It has penetrated the limestone about 1,200 feet when a break was reported, necessitating a test being made.

Some difficulty has been experienced setting the packer, which shuts of water from above thereby making it possible to test oil or gas which has been encountered at the bottom of the hole. Reports indicate that a very heavy pressure has been encountered but the well is being kept nicely under control, and the work is continuing, a final test being expected this week. It will then be ascertained the amount of production that may be expected.

The orchestra has spread its [illegible] Royal York Hotel [illegible] among the [illegible] on the individual radios in bedrooms [illegible] the hotel [illegible] that [illegible] at the hotel from all over the continent. The Royal York's fame [illegible] for this type of hotel [illegible] attracted [illegible] from all over the country later in the year.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

TONSILS AND ADENOIDS

Is the removal of tonsils and adenoids a recently devised operation?

As a matter of fact it is one of the earliest surgical operations, dating back to at least Celsus A D 10. We have been told that in one of the Eastern countries the tonsils are removed from every infant. A slip knot is formed of a piece of horsehair and placed around the tonsil. The slip knot is then pulled tight and the tonsil is cut off and removed. These people have great belief in the value of this operation and to it they ascribe the great stature of their men.

In Canada however, only forty years ago a child whose tonsils had been removed was a rarity, but now when every child receives medical supervision, this operation is very common. Well may a thinking parent find it difficult to believe that there is need for such a wide spread attack on a structure of the body.

Of what good are the tonsils? Does their removal do any harm? Surely they have been given to us for a purpose?

The tonsils and adenoids are a kind of tissue which grows in the throat to protect us against the spread of germs, but only as long as it is a healthy tissue is it protective.

The position of tonsils and adenoids readily exposes them to infection and often they become harbours of poisonous material. Therefore, the removal of these damaged and harmful pieces of tissue will not be any loss to the defences of the body. It is, as statistics show, a great benefit to the children as a whole even though occasionally the individual may not seem to be benefitted.

It is the experience of doctors with large practices that after a child has had his unhealthy tonsils removed he requires medical attention much less frequently on the average than hitherto.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

TOURISTS ASK CHAMPION FOR INFORMATION ON ALL PARTS OF CANADA

WINNIPEG, Man April 26—Back in Winnipeg after one of the most novel experiences in his long years of revolver shooting, Sergt. R. G. "Bop" Pickrell, of the Canadian National Railways Police Department, Winnipeg, is all smiles. Although he has steeled his nerves to capture world's championships with revolver, and Canadian and United States championships with revolver and pistol, he had his first experience recently at Fort Wadsworth, United States army post, of shooting for the movies. He was in rare form and got a big thrill from outlining the cameraman with his revolver at 15 yards, while the nonchalent camera [illegible] ground out hundreds of feet of [illegible] film.

While in the Eastern States giving exhibitions at Sportsmen's Shows [illegible] New York and Philadelphia, [illegible] besieged with questions on Canada. "The minute I would get [illegible] with my exhibition shooting I was kept busy for two hours after [illegible] answering questions about hunting and fishing in Canada," said Sergt Pickrell. "People [illegible] to be very much interested in all parts of Canada, but especially Alberta, British Columbia and Jasper National Park in the west, and [illegible] Quebec and New Brunswick in the east. They appeared to be hungry for information on good fishing grounds and big game country.

"Many were particularly interested in the new speckled trout waters of Jasper National Park because of the success in the cultivation of the thousands of small fingerlings which were placed in the Maligne watershed several years ago. Big game hunting in the Rockies also came in for much attention and my guess is that our tourist industry in 1937 will be the greatest in the history of the Dominion," declared Serg. Pickrell.

BANK BRANCH AT GOLDFIELDS

First bank to be opened in all the new mining areas of the north is a branch of the Bank of Montreal which was established this week at Goldfields, Sask. on Lake Athabasca.

F. J. Cooke is manager of the bank which will handle a large part of the business for mining and trading companies.

Seeding begins in Argentine—Large citrous fruit exports from Palestine—Navigation reopens on the Great Lakes—Corn planting starts in the U S

SPECIAL FARES FOR CORONATION DAY

WINNIPEG, Man. April 26.—The observance of Coronation Day throughout the Empire on Wednesday, May 12 will include celebrations at important points across Canada and, to facilitate economical travel for this occasion, the Canadian National Railways will place in effect reduced fares.

These fares will consist of single fare and one-quarter for the round trip, good in coaches; or in sleeping cars or parlor cars on payment of the regular charge for such accomodation. Fares will be good going during the period from and including Tuesday, May 11 up to 2 p.m. of Wednesday, May 12. The return movement will be good to leave destination up to midnight of Thursday, May 13.

PRICE AND PRECIPITATION

The spring wheat crops now being seeded in Western Canada and in the northwestern parts of the United States will be anxiously watched by the whole world, for the progress of these two crops will unquestionably have an important effect upon wheat prices during the coming months.

As these crops flourish, price will tend to decline, but should their prospects be one lessened, then price will tend to rise.

What are the actual prospects at this moment?

Moisture records collected and compiled daily from over 700 rain gauges in Western Canada by the Research indicate that probably never has the Canadian crop—and this refers to the U S A crop also—started with so little moisture reserve in the soil.

The records show that Alberta has only 80 per cent of the normal subsoil moisture, Saskatchewan 57 per cent and Manitoba 68 per cent.

This means that if an average crop which would be about 400 million bushels on our present Western wheat acreage is to be secured, that very much better than average rainfall which average is about 8 inches—must occur between this time and and August 1st next.

Rainfall therefore, will be the important fact to watch.—Searle Grain Co. Ltd.

MANITOBA HIT BY SNOWSTORM; TRAFFIC HALTED

WINNIPEG, April 24.—A snowstorm swept through Manitoba today while weather was clear over the rest of the prairie and Calgary recovered from yesterday's heavy snowfall.

The Manitoba storm disrupted communication lines east of Winnipeg and hindered traffic in the province.

Regina reported weather clear with temperature rising. Saskatoon was bright and clear and Moose Jaw cloudy. It was a fine day at Prince Albert following three days of snow and rain.

So much has been done in synthetic foods by chemists overseas we are wondering if it will be possible to send an empty T-bone out for a refill.—San Francisco Chronicle.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

THE SPANISH NATION PAYS—

IT IS DIFFICULT for the casual reader of current newspapers and periodicals to fully realize the intensity of the Spanish civil war. Each day news despatches are published telling of some fresh horror, the latest being the wholesale bombing of Guernica by a fleet of insurgent planes. This has aroused indignation both in England and France, as, so it is claimed, no special military advantage was gained. And the pitiless killing of women, children and non-combatants went on with barbaric savagery.

The causes of the Spanish civil war goes back a long way. Originally, no doubt, it was purely a Spanish problem with extreme progressives on one side and the old time established order on the other. But since a number of Spanish people under General Franco first decided to obstruct the government by open revolution, things have been going from bad to worse, until today the Spanish people, or at least that portion of them in the zones of military and naval activity, seem to have become experimental victims for the benefit of several of the other great powers. Using Spain and Spanish incidents as a sort of checker board, first one and then the other make moves in an attempt to enhance their own importance. Italy, Germany, Russia, France with Great Britain as an interested bystander, all seem, in some manner or other, to have put their finger in the Spanish pie. Madrid by almost superhuman effort is daily holding out against the seige of the insurgents—in fact a short time ago government troops from Madrid appeared to be on the offensive. This, despite the fact that Italian troops and German planes are reported to have taken part in the various attacks upon the capital. During the past week shipping events of much interest have occurred. Bilboa, a government held town, was on the point of starvation, and British merchant ships ran an insurgent blockade in order to supply food. The merchant ships were protected by naval vessels as far as the three mile limit and from then in ran the gauntlet of mines and insurgent warships. They were afforded some protection by shore batteries.

The feeling as between insurgent and loyalist is very intense and human life is valued lightly when Spanish people of conflicting political beliefs clash. Civil wars have occurred before and it is well known that for sheer intensity they equal, and sometimes surpass wars as between nation and nation. But they have generally been considered much in the nature of a private quarrel and the intrusion of outside nations into the quarrel is resented. When the Spanish people—no matter which side—first permitted outside interference, they made a grave error. No matter who wins, loyalists or insurgents, the Spanish people as such will pay the terrible price of civil war—a price paid in agony and blood. Outside "help" is prolonging their agony and Spanish nationalism should refuse to be the pawns of other powers. What the Spanish people should do is to sink their quarrels, bury their hatereds and give notice to all warriors from other countries that their room is preferred to their company. As long as other countries, in spite of non-intervention agreements, are puttering around in Spain, things are likely to go from bad to worse with the Spanish people paying the shot.

DEMOCRACY ON THE DEFENSIVE—

IT IS NO longer possible to say that it is inevitable that political, parliamentary democracy should triumph. What has brought about the end of political democracy in the European countries has been the class struggle. There has come about a demand for a new integration of economic and political life. This necessity for integration has divided the country into two camps—the haves and the have-nots. A strong authority had to break the deadlock between political and economic power under one shibboleth or another.

Political freedom is the basis and the condition of all freedom. I have come to the conclusion that civil rights are the basis of all rights—that there are none existing apart from that. If Russia is Utopia, I have been deluded as to the merits and demerits of human slavery. I have decided that public ownership of property is a complete mirage, if not accompanied by political freedom.—Dorothy Thompson, addressing the Undergraduate Association at Barnard College.

LO, THE POOR FARMER—

FOOD can no longer be regarded as one of several means for providing a livelihood for those who produce it. So topsy-turvy is the world, in fact, that the production of certain forms of foodstuffs may be greatly in excess of the purchasing power of a large section of mankind, while still remaining far below the ....needs of consumers.—World Review (London).

LONDON BIRDS NOT GETTING ENOUGH SLEEP

Professor William Rowan, former head of University of Alberta's department of biology, who frequently broke into print with his sagacious observations on bird life, is up to his old tricks at University College, London, an English paper reveals.

Professor Rowan, interviewed by a London reporter announced sadly that London starlings aren't getting enough sleep. Scientific tests on a dozen of the birds captured from their roosts in the West End of the Empire's hub showed that they stayed awake into the small hours of the morning scolding at the traffic noises.

The lack of rest didn't seem to trouble the birds the puzzled professor discovered. In fact their offspring were much stronger than those of their cousins the country starlings who managed to get a full night of sleep in rural surroundings.

Professor Rowan left University of Alberta last year.

AIRMAN TAXIS TO GAS STATION FOR FUEL NEEDS

LOS ANGELES, April 24—Leslie Buckner, 26, was flying the 130 miles from Santa Rosa, Calif. to Albuquerque, N M. when he ran out of gas.

It looked like an unpleasant forced landing and a night in the desert until he saw a distant highway with a filling station near it. He landed on the road and taxied his plane to the station.

"Ten gallons of gas, please" he said to the dumbfounded operator.

CROWD GIVES ADVENTURERS BIG SEND-OFF

With a huge crowd gathered below the low level bridge to bid them "bon voyage" two stalwart Irishmen and a husky German pulled away from the north shore on a water journey from Edmonton to the Atlantic ocean Saturday morning.

Their sturdy 21-foot boat, which they built themselves pulled from shore about 11:30 a m with two pairs of oars chopping into the water of the North Saskatchewan river and Skipper Jack Peters handling the tiller. Cheers of the crowd gave them a royal send-off.

Besides the skipper, the two crew men were Anton Glaser, first mate and Fred Peters, cameraman and son of the skipper.

In their travelling outfit were mattresses and two plush-covered chesterfield cushions, which indicated that, rather then dudes they were experienced travellers. "We believe in solid comfort," Skipper Peters said.

They will travel the water courses down the North Saskatchewan river to Lake Winnipeg, across that huge lake to the city of Winnipeg for the Great Lakes journey but, to cross Lake Winnipeg they will row and hoist a leg-of-mutton sail.

They expect to take seven months for the round trip, reaching Halifax before freeze-up and then getting a car and trailer and pulling the boat back to Edmonton overland.

They carry a huge autograph book and expect their well-wishers on the route to see them through for food and equipment. The grub box when they departed carried a month's supplies.

"We'll make it all right" the skipper said. "You can't kill an Irishman and we're used to this business."

WORLD TRADE LARGE

Broomhall, the British grain statistician, suggests that if the present world demand continues his trade figures will have to be raised substantially from the last estimate of 568 million bushels for the season. He estimates that the figures may run as high as 632 million bushels.

Chicago news sources state that France may soon be in the market for supplies of American wheat and already sales of new crop hard winters for export via the Gulf of Mexico have been reported.

Navigation opened on the Great Lakes this week and a fair volume of tonnage has been chartered to carry wheat down the Lakes. Stocks of Canadian wheat in the east are disappearing and it is anticipated that the surplus supplies available in the west will meet with ready demand.

Italy and Germany continue their purchases, the former country having bought 63 million bushels so far and it is said to require at least 17 million bushels additional.

SIAMESE TWIN CALVES BORN AT LOUGHEED

LOUGHEED, April 22.—A red poll cow owned by James Harney, gave birth to a pair of Siamese twin calves, perfectly formed and joined at the rear ends. They were dead when born and Mr Harney is having them mounted. More than 200 people visited the farm to see the curiosity.

During his farming operations, Mr. Harney has had two sets of twin calves and one pair of twin colts but this is the first Siamese pair.

PRINT SHOP GRADUATE IS TIMES CHIEF

NEW YORK, April 22—The New York Times announced today.

"Since the death of Rollo Ogden on February 22 John H. Finley has been acting as chief editor of this newspaper. Today he assumes the title of editor-in-chief of the New York Times.

"Arthur Hays Sulzberger, publisher."

Dr. Finley joined the Times staff as associate editor in 1921. Prior to that time he had achieved distinction as editor of Harper's Weekly as an educator, historian and economist.

He began his career in the print shop. He was born on a farm near Grand Ridge, Ill. in 1863. He was graduated from Knox College in 1887 and in the same year entered Johns Hopkins University. In 1892 he was named head of Knox College, holding that position seven years. He then became editor of Harper's Weekly.

NEW MACHINE USED TO REVIVE HUMAN HEARTS

ST. LOUIS, Aprill 22.—A new machine in which human hearts are revived after death and made to resume their normal blood-pumping function was demonstrated today before the American College of Physicians.

Dr. William B. Kountz of Washington University described how he had brought more than 100 hearts back to normal functioning after they had ceased beating in the human body for as long as six hours and induced them to again take up their rhythmic beating.

He described the device as different from the "glass heart" developed by Dr. Alexis Carrel, Rockefeller Institute Nobel prize winner and Col. Charles A. Lindberg. The Carrel-Lindbergh device acts as a pump to carry nutrient solutions to a piece of tissue to make it continue living, Dr. Kountz said.

MAN PLANNED HIS FUNERAL ON SCHEDULE TIME

ORANGE, N J. April 22.—Giuseppe Fiore's funeral was just as he wanted it, for he planned it in anticipation of death, which came on the day he predicted.

Some time ago Fiore, 84, picked a solid oak casket. He chose a tuxedo for his funeral clothes and ordered flowers for his funeral.

Fiore told members of his family last week he would die the last of the week. Saturday after noon he took a walk, telling his family he wanted "to take one more walk before I die."

That night he collapsed and died of a cerebral hemorrhage. He was buried yesterday.

BOY MILLIONAIRE'S WEALTH PILES UP $40,000 MONTH

CHICAGO, April 21.—John L. Grant jr. [illegible] Chicago's youngest millionaire is watching his wealth increase at the rate of about $40,000 each month, an inventory in file in probate court revealed.

Last August 31, when the boy succeeded to two-thirds of the estate of his mother and his share of the trust estate of his grandfather, his fortune was estimated at $1,213,333. The latest inventory shows his estate will exceed one and one half million dollars, [illegible] an increase of more than $250,000 since last fall, due to the appreciation of securities.

STEVE CONICK, TIGER PUCKSTER DIES IN MISHAP

HAMILTON, Ont. April 21.—Steve Conick, member of Sudbury Tigers, Dominion senior hockey champions, was killed early today in an automobile accident here. Five others were injured and rushed to hospital, but their injuries were not believed to be serious.

Conick was riding in a touring car which turned over in a collision, crushing the young hockey player beneath it. Former member of Hamilton Tigers' great Joe Blake-Marie Bennet-Conick line, Steve recently returned from Calgary where he helped Sudbury defeat North Battleford Beavers for the Allan cup.

BRITAIN GUARDS SECRET OF NEW GAS PROTECTOR

LONDON, April 23.—The existence of a secret form of gas mask which will be distributed to troops and civilians in Great Britain on the day a war is declared was disclosed by Dr. H. Dolonce Woodruffe, [illegible] director to Oxfordshire branch of the British Red Cross Society, in an address at Oxford.

Dr. Woodruffe made the revelation in replying to the Cambridge critics who have charged that gas-proof rooms and respirators suggested by the Home Office are useless.

"There have been reports of work done by what has been described as a group of Cambridge scientists," he said. "They have produced rather alarming statements that gas-proof [illegible] suggested by the Home Office [illegible] and [illegible] absolutely useless against mustard gas.

"The answer to the second criticism is that the respirator [illegible] will be issued to civilians and troops is 100 per cent protection against any gas that is known. The gas service container which will be used in the event of war which is only in the possession of a very few people and it will not be issued to troops and civilians until the day war is declared."

PRODUCERS GOT BENEFIT FROM GRAIN HOLDUP

CALGARY, April 28 —Holding of surplus supplies of wheat brought greater benefits to producers than selling the wheat at distress prices, said C. W. Peterson, Calgary farm journal publisher and farmer in concluding his evidence before the Turgeon Royal Grain Commission today.

Mr. Peterson said Canada might find lessons in Australia's reduction of interest rates, control of dividends and currency depreciation. Referring to his plans for international co-operation by wheat exporting countries, he said he believed this pr[illegible] held the solution to international marketing problems.

Declaring there was no market for surplus supplies of wheat, Mr. Peterson told M. M. Porter K.C. Calgary counsel for the Alberta Wheat Pool that consumption of wheat varied greatly. In the long run he said production and consumption balanced.

DUST CAUSE OF HORSE'S DEATH

OYEN, April 28. T. E. Bishop, farmer near Excel, lost one of his best horses due to a dust storm. The team had been hitched to a harrow when a dust cloud sprang up, blinding the driver, horses and dog. The dog [illegible] in the harrow and its yelping caused the horses to bolt, one of them breaking its leg so that it had to be shot.

STATE SCHOOL BAN LIFTED BY CANADIAN MENNONITES

OSLER, Sask. —One of the problems of state government in northern Saskatchewan is being cleared up with the gradual acceptance of state education by the Mennonite colonies in this district.

In their early years in Saskatchewan, the Mennonites were conscientious objectors to state educational systems. In recent years this attitude has gradually changed. New schools have become overcrowded in the past two years and additional quarters must be built in some districts. Evening classes for adults are conducted in many schools.

COW TOOK STAIRS UP TO HAY LOFT

GRANT'S PASS, Ore. April 28— O. B. Cox bought a cow and locked her in his barn. She was missing today and the barn was still locked. The mystery remained unsolved until Cox went to his hay loft. The cow had climbed the steep steps and was contentedly munching hay. Cox needed a block and tackle to take her down.

Reactionaries are speaking of the [illegible] deal, as opposed to the New Deal, but what they really want is a great deal.—Louisville Times

YOUR MOVE?

The last week or so has seen quite a few moves by Tofield residents. The Malinosky family started things when they moved out of town. Mr. and Mrs. Morton from east of town moved into the house vacated by the Malinosky's. The Hosler family then moved to the house vacated by Mr. and Mrs. Morton, and the Cowell family moved into the cottage vacated by he Hosler family. Mr. and Mrs. Ray Coatta from the hotel moved into the house vacated by the Cowell's. The Thompson family have moved to Leduc, Lois moving into bachelor quarters here at Tofield, and the A. P. Moen family have moved into the house vacated by the Thompson's. Who's next?

Born: To Mr. and Mrs. Art Foss, on Thursday April 22nd, a son

LINDBROOK

The weather just now is "not so hot" from the crop's point of view although literally it is too warm for either the crops or the fellows that are putting them in, sweat and dust are a rotten mixture.. Add to this, everywhere one looks a fire is going merrily, doing a lot of good no doubt and so far we have yet to learn of anything being burnt up that wasn't meant to be. Still there's lots of time for rains yet and maybe soon we'll be kicking about the beastly mud and waste of time.

Mr. and Mrs. A. Whibley and J. Leaky arrived at the Coast OK and we learn that Mr. Whibley has located and bought a place to his liking there and is by now settled on same.

(Continued on back page)

KINGMAN

The Evangelistic meetings which are being held at the Baptist Church will continue until May 16th.

There will be a Coronation program in Kingman on May 12.

Born: To Mr. and Mrs. Ray Fleming, on April 29th, a daughter.

Miss Marion Simonson is home again after visiting Edmonton for two weeks.

Mr. and Mrs. Asp and family drove to Wainwright on Sunday to visit relatives.

EXPLOSION DESTROYS AIRSHIP HINDENBURG

At Lakehurst, New Jersey at 7:20 Thursday evening the large Zeppelin Airship, the Hindenburg was destroyed just as she was about to land. The ship had been cruising around in a rainstorm and was within 10 feet of mooring. An explosion occurred immediately followed by others and in a few seconds the big ship was ablaze. Forty-one people lost their lives, 24 passengers and 17 of the crew. There were 96 souls on board. The ship was scheduled to start a return flight to Europe at midnight with a full passenger list for the coronation. The ship made ten Atlantic trips last season and ambitious plans for a regular passenger schedule had been made.

CORONATION CELEBRATION FOR WEDNESDAY NEXT

In line with very many towns and municipalities throughout Canada, Tofield will celebrate the coronation event with a parade, singing, sports and bonfire and fireworks.

As many people will, during the morning, listen to the coronation radio programs, the commencement of the celebration here is timed for 1:30. At this time school children from surrounding schools as well as local school children will form a column and march to the fair grounds where the group singing contest will be held. The patriotic song chosen for the contest is "Rule Britannia." At this time coronation buttons will be given the school children. This will be followed by track events which will be a series of elimination contests for school competition between schools from Bruce to Tofield. Then will come baseball and softball. For those desiring to wait in for the bonfire and fireworks, hot coffee and cocoa will be served free. With fine weather prevailing a really nice afternoon and evening will be spent here next Wednesday.

UNITED CHURCH NEWS

Sunday, May 9th is Mothers' Day and also Coronation Sunday.

In Tofield at 11 a.m. the Sunday School will use the splendid program prepared for Mothers' Day.

Recitations—Pageant— and special music. All will be cordially welcome.

In the evening, the special and appropriate service issued by the United Church will be used. It is a Coronation Service. There will be fitting and special music.

Remember Mother! God Save the King!

At Ketchamoot the theme of Mothers' Day will be observed. Service begins at 11:00 a.m. The Sunday School will be organized for the summer months. A good attendance is expected.

At 2:30 p.m. the Lakeshore Service will be assisted by the Tofield Junior Choir. The Choir will render suitable and appropriate anthems and a quartette. Sunday School will resume on the following Sunday, May 16th at 2 p.m. A cordial invitation is extended to all to this Mothers' Day Service.

Word has been received of the death of Mrs. (Dr.) McClurg. Dr. and Mrs. McClurg resided at Tofield for a number of years, the Dr. practising dentistry here.

LOCAL & PERSONAL

We are glad to report that Mr. Ted Gray is back from the hospital in Edmonton after a lengthy stay there.

Miss Edythe Barden who is training in the General hospital in Edmonton is spending her holidays at her home here.

Mrs. Malcolm and Muriel, Mrs. Hammond, Mrs. Taylor, Wes Taylor and Bob Evans motored to Edmonton on Friday night.

Mr. and Mrs. Hergott of Bruce visited at the Paul Thomas home on Sunday last.

Mrs. Larson and children visited at the Rufus Wilson home over the week end. Friends will remember Mrs. Larson as Miss Ora Mahaffey.

Mrs. Bud Hannan and children spent a few days in Camrose visiting with Mr. and Mrs. J. D. Hannan.

Mr. and Mrs. Cap Lee left this week for Calgary.

Mr. and Mrs. Abbott motored to Edberg on Sunday to visit their daughter, Mrs. Brady.

Messrs A. Machtmes, Bill Taylor, W. Schultz motored to Edmonton on Monday.

Florence Kendall is spending a short time at her home here.

Mr. and Mrs. A. Thompson and family left Thursday morning for Leduc where they will make their future home.

Mr. G. Allan spent a couple of days visiting in Edmonton last week.

While practising softball with the high school students last week, O. P. Thomas unfortunately injured his ankle. At first it was believed to be a sprain but an x-ray showed it to be a fracture of one of the small bones. The leg was placed in a cast, but Mr. Thomas is bravely carrying on with his duties, getting to and from school by the aid of crutches.

Mr. Hummel who spent last week in an Edmonton hospital is back home again.

Reeve Glenn, Councillor McSporan, and secretary Letourneau visited the Department of Municipal Affairs, Edmonton, on Tuesday. The trip was made regarding the department's approval to the sale of some land by the municipality.

WORLD OF WHEAT

By H. G. L. Strange

A great scarcity of wheat exists! —The world is [illegible] 500 million bushels for its consumptive needs!

Such are the types of newspaper headlines that have appeared in recent months. They afford to most people a satisfactory reason to explain why price is [illegible] up from $1 00 last fall to $1 [illegible] recently.

During the last three weeks, however, price has fallen some 20 cents a bushel. Many are wondering why this should be if there really exists such a deficiency of wheat in the world as the newspaper headlines indicate.

The answer is that the headlines have given an entirely the wrong impression. There [illegible] scarcity of wheat in the world as most people understand the word "scarcity." The truth is simply that the supplies available for [illegible] export are scarcer than usual, but are far from being actually deficient.

The average world carry-over on August 1st each year is about 500 million bushels. On August 1st next the carry-over will be scarcer than this, but will still be about 300 million bushels, which, of course, is a lot of wheat. The United States will have about 100 [illegible] and Canada some 40 million [illegible] on hand.

Following factors have tended to raise price: Dry weather in the southern hemisphere. Expected curtailment of Argentine exports—Many complaints of unfavorable European weather—Uruguay [illegible] import duty on wheat—[illegible] purchases Australian wheat.

Following factors have tended to lower price:—Improved political situation and lessened European demand—Indian government wheat estimate 30 million bushels above last year—Expect Indian wheat shipments of over 10 million bushels by July—U S winter wheat crop progresses favorably in most areas. Rumania permits further wheat exports. Grain shipments resume from Montreal—Spring rains occur in Northwestern U S and Western Canada.

The dramatic critic was approached by the producer whose show had been panned the previous evening.

"You were very severe on my play" said the producer. "What was really so bad about it?"

"I didn't like the way you handled your lights" replied the critic.

"What was wrong with them?"

"They were on!"—Wall Street Journal

WANT A GOOD LAWN? HERE'S HOW TO GET IT

[illegible] as soon as the soil is dry and [illegible] enough to walk upon [illegible] the snow has disappeared is the time to [illegible] operations for securing a good lawn. The first thing [illegible] is to [illegible] the dead grass [illegible] a thorough raking [illegible] [illegible] fresh [illegible] seed [illegible] [illegible] a fine [illegible]

[illegible] Kentucky Blue [illegible] Red Top at the rate of [illegible] four pounds per 1000 square feet of lawn. If it is desired to include White Clover one-eighth part [illegible] be added to the mixture. Where the above mixture does not give satisfactory results owing to local conditions, Rhode Island Bent grass should be used at the rate of two to three pounds per 1000 square feet. For shady areas, one third the quantity of Rough Stalked Meadow grass should be added. Failure to grow grass in shady places is due more often to condition of low fertility and lack of moisture than to the shade itself.

Whatever trouble Adam had
No man in days of yore
Could say when Adam cracked a joke
"I've heard that one before."
—Cotton Ginner's Journal

SEED TREATMENT REDUCES HEAVY LOSS

Farmers are now busy making preparations for spring seeding. Good crops and heavy yield are directly associated with the use of clean and healthy seed of the best quality. The annual losses, due to the ravages of seed borne bacterial and fungous parasites, are much greater than the average farmer realizes. For this reason, all seed should be treated before it is sown regardless of its quality.

Seed treatment of wheat, oats and barley has been greatly simplified in recent years with the appearance on the market of organic mercury dusts. These dusts, when properly applied effectively control the smut of oats, covered smut of barley, bunt or stinking smut of wheat and the other seed borne fungi and bacteria that are responsible for the blights and [illegible] commonly found in our cereal crops. Due to their easy application, effectiveness and stimulating effect on germination, they are rapidly replacing formalin and copper carbonate. They are not, however, recommended as a control for the loose smuts of wheat and barley. These smuts are not affected by the use of the ordinary seed treatments but can be controlled by the hot water treatment.

In applying organic mercury dusts [illegible] should be exercised to follow directions as outlined on [illegible]. The amount of dust [illegible] be evenly distributed [illegible] seed coat. Insufficient [illegible] will be ineffective in controlling [illegible] excess will injure germination. Grain after being treated with [illegible] should not be fed to [illegible] or used for [illegible]. It may however be kept [illegible] suitable storage [illegible] used as seed the following year.

Further [illegible] concerning seed treatment may be obtained by writing to the Dominion Botanist, Division of Botany, Central Experimental Farm, Ottawa, Canada.

RHUBARB IN THE MENU

Canadian forced rhubarb is now available on the market and may be used in various ways in the household. Apart from rhubarb stewed or baked, rhubarb gives the distinctive [illegible] to tapioca puddings, tarts, [illegible] gelatin and shortcakes. The [illegible] makes a delicious cooling drink. Also the juice combined with sugar and the stiffly beaten white of an egg makes an enticing creamy sauce, and some people declare that one of the finest combinations ever tasted is rhubarb and strawberries cooked together.

Rhubarb Sauce

The easiest way to prepare rhubarb is in sauce. One method consists of that making a thick syrup of sugar, cutting the rhubarb into pieces about half an inch long, dropping the pieces into the syrup and cooking until tender. This takes only a few minutes. Another method is mixing two parts of the fruit to one part of sugar and cooking them until the liquid comes out and forms a syrup.

Baked Rhubarb

Baked rhubarb may be made when the oven is cooking some other food. Butter a covered baking dish, spread a layer of rhubarb over the bottom, sprinkle a layer of sugar, then add another layer of rhubarb and so on until the dish is filled. Sprinkle sugar over the top, then add small pieces of butter and the grated rind of a lemon. Cover the dish and bake slowly until the fruit is tender. Long slow baking gives rhubarb a rich red colour.

Apple and Rhubarb Jelly

Cut Canadian-grown apples into quarters. To every pound of apples add one cup of rhubarb juice. Simmer until the apples are soft. Strain through a jelly bag without pressure. To each pint of juice add one pound of sugar. Boil slowly, removing all scum until the juice will jell. Pour into tumblers and seal with paraffin.

CAR LICENSES ARE REDUCED

Strong protests against governments "soaking the motorist" are being voiced all over the country. Too long, it is felt, have administrations endeavored to balance their budgets at the expense of the car owners.

For this reason, motorists are hailing the action of the Ontario government which has announced a 25 per cent reduction in license fees for commercial vehicles and trailers.

Ontario plans to follow this up with a general flat reduction in license fees for passenger automobiles after a complete survey to be made next summer.

It is significant that Ontario is willing to grant these concessions to motorists while at the same time it is budgeting for a surplus of $7,200,000 in the present fiscal year.

In this province, the Alberta Motor Association has recorded its strong disapproval of the high license fees, particularly as the returns are put into the general revenue fund instead of being "earmarked" for highway improvements.

Undoubtedly action by other provinces in following Ontario's lead would bring increased returns in other ways. Reduction of taxation is generally more than balanced by increased trade. In the United States, the benefits of reduced motor levies have been demonstrated through a greater volume of licenses being taken out. Alberta might well follow suit.

THIS ENOCH ARDEN BACK— BUT BRINGS WIFE ALSO

SHERRINGTON, Que April 30 — The boy who ran away to war in 1914 came back today with Armand Pierre [illegible].

[illegible] Maurice, who had slipped out of the house as a war-thrilled youngster of 18, walked into the house last night a man of 41. In the 23 years, the Pierres of Sherrington had had no word from their boy.

Long ago, Armand and his wife had [illegible] him dead. They had heard, eventually of his going overseas and when no word came back, they gave [illegible] up.

But all the time Maurice was wandering. He went to western Canada and began dealing in farm lands finally. Then, when he had a good stake he came home to the habitant farm [illegible] miles south of Montana.

At 11 o'clock last night, he tapped on the door. The Pierres were aged, and been asleep long before.

Old Armand opened the door to a stranger. Twenty-three years had changed Maurice and it took the traveller a long time to convince the two elderly farm people they were his parents.

He did it, though, spanning the gap of love to a quarter century in the old couple's minds. And now he is home to stay.

MULLEN WILL TAKE UP DUTIES TUESDAY

Hon D B Mullen, sworn in by His Honor Lt.-Gov. John Campbell Bowen on Saturday as minister of agriculture will formerly take over his duties on Tuesday.

The minister, following his swearing-in, visited the department and met his predecessor, W. N. Chant, H. A. Craig, deputy minister and other officials of the organization.

Interviewed on Monday regarding his plans, the new minister said that beyond taking over on Tuesday he had nothing to say. "I want formally to take over before making any announcements regarding policy or other departmental matters," he said.

LONDON GREETS CANADA PARTY FOR CROWNING

LONDON, May 3.—Canada's delegation to the coronation and the imperial conference was met at Waterloo station on Saturday night by Malcolm MacDonald, secretary for the dominions, as they arrived from Southampton where they debarked from the liner Empress of Australia.

A crowd gathered to wave enthusiastically as Prime Minister Mackenzie King, accompanied by four cabinet ministers, left the station by car.

At Southampton in an interview he said the great movement of people from the dominions to Britain for the coronation was a voluntary and unique in its expression of good will and loyalty to the King and Queen.

It was an object lesson for the world, he said.

HOBOES TOLD GO SEE MOTHER OR LOSE CARD

CHICAGO, April 30—The grapevine of hoboland carried the warning today the "Jungle 'boes" would be on the lookout for the "buzzards" who don't scamper home for Mother's Day, May 9.

The "jungle 'boes"—the hoboes' own policemen—received their instructions—an ultimatum—from Jeff Davis, "king" of the Hoboes of America since 1906.

His order said that all hoboes within 1000 miles of home who don't arrange to visit their mothers on Mother's Day would have their Hoboes of America cards taken from them. Those more than 1000 miles from home were instructed to write.

The "Buzzards" the "king" explained, were the fellows who "won't help get the eats in camp, but will help consume them." He contended they were the kind who wouldn't go home.

ELK ISLAND GAME SANCTUARY IN PERIL OF FIRE

LAMONT, Alta May 3.—Forest fires on three quarter sections of land just north of town seriously threatened the game sanctuary of Elk Island Park Sunday afternoon. The under brush at this time of the year is very dry and with a strong wind blowing the fire spread very quickly. Crowds of people flocked out from town to the dark clouds of smoke rolling in the heavens. Change of wind this morning has improved the situation.

BRITISH VESSELS PROTECTION FOR NON-COMBATANT

LONDON, May 3.—Foreign Secretary Anthony Eden told the House of Commons this afternoon that British warships had been instructed to "afford all possible protection on the high seas to any ships leaving Bilbao with non combatant refugees on board" despite the protest of General Franco, leader of the Spanish insurgents.

Cheers greeted the announcement.

"A reply has been received from the insurgent authorities recognizing the humanitarian and impartial motives of His Majesty's government and rejecting the proposals for a number of reasons and making alternative proposals," Eden stated.

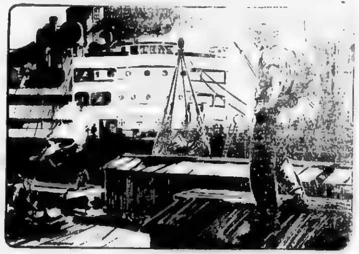
CANADIANS AND THEIR [illegible]



CANADA'S TRADE WITH THE WORLD

In the last calendar year Canada had a foreign trade amounting to $1,663,093,000, an increase of [illegible] as compared with an average of [illegible] trading countries. In this exchange the Dominion had a favourable balance, excluding exportation of gold as a commodity, of $[illegible].

Another feature of international trade was the tourist business, incoming and outgoing, totalling $[illegible], the balance in Canada's favour being $[illegible].

With the figures for tourist trade added to those for ordinary commerce, our international trade rose to $2,010,661,000, with a total balance in Canada's favour of more than half a billion dollars.

Banking plays a vital part in the upbuilding of the foreign trade of Canada, and foreign trade is the backbone of the native industries which are the foundation of Canadian economic structure.

In providing financial service for this enormous trade a leading part is played by the Bank of Montreal, which with its 500 branches throughout Canada, its own offices in financial centres abroad and its own banking correspondents throughout the world, carries through promptly and smoothly the task of financing the movements of an infinite variety of commodities.

The Bank's services include: Loans to importers and exporters, purchases of bills of exchange representing exports, providing commercial credits for purchases abroad, purchase and sale of exchange "futures" for protection against price fluctuations in foreign currencies, special wire facilities with the important exchange markets to speed transactions, reports of character and standing of foreign firms, commercial accounts, foreign collections, [illegible] safekeeping of securities.

THE CORONATION—

"THE ARCHBISHOP of Canterbury speaks thus to the people. "Sirs, I hereby present unto you King George the undoubted King of this realm, all you who are come this day to do your homage, are you willing to do the same?" The people signify their willingness by loud and repeated exclamations, all with one voice crying out, "GOD SAVE KING GEORGE."'

Within Westminster Abbey on Wednesday, May 12th, a ceremony, hundreds of years old will take place. In many respects unaltered since William the Conqueror ascended the throne nearly 900 years ago, this ceremony is the centre of activity that spreads out from Westminster Abbey to the far corners and remote places of the earth. Outside the Abbey and along the streets through which the coronation procession on its way to the Abbey from Buckingham palace, must pass, will stand hundreds of thousands of people, cheering, cheering, cheering.

In this vast throng there will be visitors from all points of the compass and as the detachment representing their particular portion of the globe passes by, a surge of pride and a tightening of the heart strings will result to find release in vocal exuberance. From Canada, Australia, India, New Zealand, South Africa, West Indies and from other places, the pick of their manhood, the flower of their youth, have gone to represent their country. In the procession will be the King and Queen, followed by distinguished visitors from all walks of life and from all climes, and the glittering panoply of pageantry will be seen in all its glory and at its best.

But while the crowds along the route of the procession are vast, they will but represent a small proportion of that mammoth, even though scattered group of people, who throughout the whole world will be listening to the description of the procession to and the ceremony within the Abbey, emerging from their radios. To these untold numbers, science has given a marvelous gift.

It is reported that a million people have gone to London for the coronation. Tens of thousands have purchased seats in the Mall or other places along the route of the procession and a throng greater than any previous coronation throng is expected. To London, visitors are always coming and leaving and dense crowds are no new novelty, but rarely, if ever before have so many visitors from so many divergent points arrived to help celebrate the crowning of a King and Queen.

But while it must be wonderfully gratifying to all British peoples to have the crowning of their King and Queen taken so much notice of, and while British business in general must benefit greatly by the immediate expenditures of so many visitors, there are other phases of the coronation that deserves to be noted. While the hundreds of thousands of people are milling around London's network of streets with visible signs of the coming coronation on every hand, there are scattered throughout the world, on the prairies and within valleys of the hills of Canada, on the veldt of South Africa, the sheep stations of Australia, the plains of India, among the dairy farms of New Zealand, in the aggregate, thousands of school houses. Often with only a single room and one teacher, these school houses stand isolated. The scholars, rarely very many, are far from the roar of London's crowds, far from the display of pageantry, but they have two connecting links to the coronation, strong and vibrantly alive. One is the flag which may be on the wall or flying atop of the building, and the other the teacher. From a store house of knowledge gained by study of books, he or she will tell the scholars about Kings past and present. The scholars will most likely be told of good kings who ruled wisely and levied light taxes and bad kings who ruled unwisely and levied heavy taxes. They will perhaps be told something of the glamour of kings and courts and that King George and Queen Elizabeth who are to be crowned next Wednesday, are worthy of the high honor and responsibility placed upon them. If by any chance during the coronation teaching, their gaze should wander to a wind swept prairie or rocky hillside, or to settlements in which the common lot is hard labor, and should they contrast the glamour of coronations with what they see around them, it is to be hoped that as they grow older a sense of proportion will come to them and that they will know for sure that "all that glitters is not gold."

The place of the Royal Family within the hearts of the British people is a unique one. With the passing of the years, one could say centuries, Kings and Queens of England have come and in due time passed from the scene. And with their coming and going there has evolved a changed but none the less sincere attitude by the people towards royalty. His Majesty King George VI., says "My People." The people say, not with servility born of fear, but with intense pride of national companionship "Our King and Queen."

May the ceremony which will be performed on Wednesday next officially mark the commencement of a long and happy reign by King George and Queen Elizabeth.

CHANT REPLACED BY MULLEN AS AGRICULTURAL MINISTER

Faced with an order in council, signed on Saturday morning at 11 o'clock, and which cancelled his commission as minister of agriculture for the province of Alberta, while at the same time appointing D B Mullen, Edmonton Social Credit member of the legislature to the vacated post, Hon W N Chant announced at noon that he would abide by the decision.

"As the order-in-council has been signed by the Lieutenant-Governor cancelling my commission and appointing Mr Mullen to the post, there is nothing for me but to abide by that decision and I will vacate office," said the deposed minister.

Previously it had been reported that Mr Chant would refuse to vacate his office and as late as Saturday morning he had been branded charges by Premier W A Aberhart that his department was inefficient as "ridiculous and unwarranted."

At the same time he stated that he had not complied with Mr. Aberhart's request for his resignation and had no intention of so doing. He declared that if the premier would hand in his own resignation, he would hand in his with "very great pleasure."

"I understand that an Order-in-Council is being prepared to retire me," he said.

"I understand that such orders are only passed when there has been mal-administration or serious misdemeanors. I have no knowledge of either and if others have knowledge of them I should be informed. I consider the allegations ungentlemanly and I would like more reasons for the request for my resignation. As far as I know I don't know where the complaints are coming from."

The Minister further stated that he had received communications supporting him from his constituency.

Faced at 11.30 with the information that the order cancelling his commission had been signed and that Mr. Mullen had already been sworn in Mr. Chant decided that there was nothing further to say in the matter except that he would abide by the decision.

"I have some correspondence and other matters to clear up but I should be able to get that done late today or on Monday," he said. "As soon as I have cleared my desk I will hand over." Mr Chant also stated that he would go to his farm at Camrose over the week-end and in the very near future would confer with his constituency executive.

"From information I have received I will have no difficulty in getting their support," he added.

The order in council which brought the portfolio of Minister of Agriculture to Hon. Mr Mullen carried also the cancellation of Hon. Mr. Chant's commission to that cabinet post. In this it was unusual, but the action was made necessary when Mr Chant refused to resign.

Shortly before 11 o'clock Lieutenant Governor J. C. Bowen, accompanied by his aide, Captain Dacre, arrived at the lieutenant governor's office in the buildings. Mr. Mullen was already on hand and shortly afterwards met the governor with Premier Aberhart.

Meantime Hon. Mr. Chant remained at work in his office and made no move to send in his resignation to the premier. This necessitated a slight delay and it was not until 11:30 that the new minister was sworn in and Mr. Chant's commission cancelled.

Hon. Mr Mullen thus becomes the second minister of agriculture in the Social Credit government. Mr. Chant was sworn in on Sept 3, 1935. Hon. Mr Mullen was elected to the legislature in 1935.

David Bertram Mullen was born on Nov 7, 1885 at Peterboro, Ont. He was educated at Peterboro schools. He is in the livestock business, a director of the D. B. Mullen and Company, Ltd.

He is a member of the Masonic and Oddfellow Societies. He was president of the Edmonton Exchange for four years, the National Livestock Association for one year, of the Edmonton Exhibition Association for four years and is also a director of the Cattle, Sheep and Swine [illegible]tions.

DISTRESS SEEN IN SEED GRAIN GRANT REFUSAL

FALHER, May 3.—Considerable distress will be felt in the Falher, Girouxville and Donnelly districts following the refusal of seed grain relief to many farmers in these areas. Only about one-half of those farmers who applied for seed grain relief received it and many who asked for grain for feed purposes were also refused.

When the government sent a collector in last fall and seized for taxes and seed grain relief repayments many of the farmers were not left with enough for feed for their stock for the year. The collector assured everyone that they would receive seed grain relief this spring so that they did not have to keep a supply on hand but now that the seed grain relief has been refused many of them are in dire straits.

FARMER ALIVE AFTER HARROW RUNS OVER HIM

LAMONT, April 30. A set of drag harrows bounced clean over Alvin Yerex, prominent farmer of this district, and he is alive to tell of it.

When he was unhitching his horses from the harrows, Mr Yerex said, they bolted, knocked him down. When he picked himself up the horses were considerable distance down the field.

He was treated at the Lamont hospital for cuts made when the newly sharpened teeth scored gashes across his body.

HEAVY DAMAGE FROM ALBERTA TIMBER FIRES

Roaring bush fires swept along by high winds spread destruction in districts southwest of Edmonton [illegible] the week end, farm buildings and timber tracts falling prey to flames which left damage running into thousands of dollars in their wake.

Prevailing hot weather and warm winds have dried out the bush country and fires were reported Monday in the Breton, Onoway, Winfield and Rimbey districts.

Royal Canadian Mounted Police, fire rangers and townspeople have been called out to fight the menace which is sweeping through tinderdry bushlands and destroying valuable timber and farm property. Lumber reserves west of Edmonton are threatened by the flames, and lumber firms have sent out fire-fighting crews to protect timber tracts and saw mills.

Farm Folk Flee Path of Bush Fire

RIMBEY, May 3.—Bush fires which blazed three miles north of the Leedale post office and which were driven through the spruce timber by high winds Saturday destroyed the farm buildings of E. R. La Pearre, 10 miles west of Rimbey. A granary on a farm of Ernest Ja[illegible] adjoining the La Pearre property was also burned to the ground. Occupants escaped before flames reached the buildings.

Mrs. La Pearre and her three children, who were alone at the time, looked out of her log cottage window to see heavy smoke sweeping across the farmyard. In a few moments fire [illegible]

ALBERTA FARMERS PRESENT PRESENT VIEWS ON WHEAT TO TURGEON

(By Sam Ross)

CALGARY, May 1st —Proposals for co-ordination of all divisions of the grain industry, arguments for and against wheat boards and suggestions for international co-operation between wheat exporting countries were placed before the Turgeon royal grain commission here last week.

Three Alberta farmers—Walter S. Morrison of High River, William Denton of Benton and Alfred Rawlins of Turin—were heard and C. W. Peterson, Calgary farm [illegible] publisher and farmer [illegible] Paul Brett, president of Maple Leaf Pool Elevators Ltd. returned to the witness stand for further examination.

Mr. Peterson made the proposal for international [illegible] between Canada, Australia, Argentina and the United States [illegible] farmers the cost of production [illegible] to maintain prices at [illegible] high level. If wheat were held at [illegible] high a price, he said, the [illegible] of securing production costs would [illegible] probably by action of [illegible] countries.

Farmers of [illegible] minimum price [illegible] board [illegible] Mr. Peterson [illegible] a wheat board [illegible] problems. The [illegible] exports but the [illegible] continue as at [illegible] guaranteed minimum price [illegible] was the cheapest insurance against business dislocation and [illegible] unemployment.

Under cross-examination Mr. Peterson said [illegible] co-operative was the only [illegible] to wheat marketing problems. He admitted carryover of [illegible] might open the way for [illegible] dispose of their [illegible] he claimed holding was more beneficial than sale at distressed prices.

In connection with his own farming operations Mr. Peterson said, under cross-examination, that he had not marketed his own grain through the pools or the voluntary Wheat Board of 1935-36.

Mr. Denton doubted value of a wheat board to producers and said he favored less government in business. A ballot might be taken to decide the question he said after declaring he did not think any government agency could bring him more revenue than he obtained selling through private companies. A wheat board and grow- [illegible]

OTTAWA MAN GETS OVER 134 MILES ON GALLON

OTTAWA, May 3 —Paul Emile Desrochers, 22-year-old [illegible] claims he secured an average of 134 [illegible] to a gallon of gasoline [illegible] ing a heavy car [illegible] his own invention. The [illegible] fog [illegible] shape.

"With my invention gasoline is blown into fine bubbles and the engine utilizes a much larger percentage of the power of gasoline," Desrochers explained.

[illegible] their wheat production. He agreed with Mr. Justice Turgeon that wheat board [illegible] whereby the producer was assured a certain return for his wheat [illegible] by the government.

L.C.C. NEWS

The April meeting of the Lindbrook Community Club was held at the home of Mrs. A. Smith.

Owing to the approach of the busy season only twelve members were present.

The roll call was answered by Garden hints, with an exchange of lovely plant slips and flower seeds.

A reading was given by Mrs. Leslie Herndon on "The difference between French and American Societies." A basket of fruit was delivered to Mr. T. J. Glenn in the hospital with best wishes for a speedy recovery. Mrs. W. Hooper and Mrs. A. Scott will visit Mrs. Woonecraft during the month of May.

After the business a tasty lunch finished up a delightful afternoon.

Next meeting will be held at the home of Mrs. Theo Gonaski on May 26.

CONGOLEUM RUG CONTEST

The congoleum rug contest held at two local stores last week was brought to a close at nine o'clock Saturday night.

The object of the contest is to guess a number between 1 and 5000 which is covered by a seal on the rug. The person guessing the correct number or the closest to the one covered by the seal wins the rug. Guesses were free and were open to all.

At Brace's store the rug was won by Mrs. F. Griswold with a guess of 2050, the correct number being 2043.

At the Crown Lumber the rug was won by Harland Thompson with a guess of 2817, the correct number being 2807.

FREIGHT BUSINESS INCREASING

[illegible]

MONTREAL, Que. May 3.—The first of 1000 box cars ordered by the Canadian National Railways from the Canadian Car and Foundry, Montreal was turned out of the shops of that company a few days ago. This "sample" car was inspected and approved by John Roberts, Chief of Motive Power and Car Equipment of the National System, and members of his staff and quantity production will be commenced immediately. In addition to the 1000 box cars to be built by the Montreal company, 2000 cars of the same type are on order from other firms.

The new box cars are of 40 tons capacity and are somewhat wider and higher than the old type of freight cars. They are 9 feet 2 inches wide, 40 feet 6 inches inside length with a 10-foot inside clear height. They are all-steel cars, with outside sheathing steel and inside lining of wood.

The new cars were ordered to take care of the increased business now being handled by the National System as well as to meet future requirements anticipated as a result of improved conditions in the industrial and commercial field.

On Saturday evening last while playing on the road near the feed mill, Olga Sawchuk, a young girl was hit by a car driven by John Macihorski. The child was knocked down and immediately taken to her home nearby. Dr. Law was called and was quickly in attendance. Fortunately however, it was found that the child was not seriously hurt, suffering chiefly from shock and minor bruises.

Coronation Celebration

—SPONSORED BY THE TOWN OF TOFIELD—
WILL BE HELD AT

TOFIELD

Wednesday, May 12th, 1937

COMMENCING AT 1:30 P M

Coronation Well Celebrated Here--- Splendid Weather--Many Children Enjoy Sports

For so early in May, glorious weather greeted residents of this district on Wednesday. Earlier in the week there were some misgivings as regards the antics of the weather man but after giving the district a good soaking, he turned on the sun's rays and Wednesday afternoon, for outside sport, was simply perfect.

The "doings" commenced with a parade of school children. The parade was formed up near the town hall. From this point it proceeded south to the hotel corner, turned east and made its way to the fair grounds. Here the singing contest was held and proved to be very enjoyable. Eight singing groups took part, the competition for first place position being very keen. The judges awarded Beach Creek first place with Tofield High School room a close second.

First races and events general to track meet were then commenced. [illegible] baseball games also got under way. Bardo and Tofield met in the first game which was very one-sided, the score being heavily in favor of Tofield. The second game was played between Ross Creek and Ministik, the score being 4-1 for Ross Creek.

The final game between Tofield and Ross Creek was tight ball, the final score being 2-1 for Ross Creek.

The bonfire and fire works added interest to the day and the inevitable dance, which was well attended, finished the day off right.

There was a prize awarded for the best marching group, this being won by

AMISK CREEK

A group of Camrose Young People's League rendered a very interesting program in our church on Sunday, May 2nd. There was a good crowd present and all enjoyed the program.

The Ladies' Aid was held at the home of Mrs. B. Moen on May 4th. Most of the members and several visitors were present.

Mr. and Mrs. A. Patterson made a business trip to Viking on Tuesday of last week.

Mrs. P. O. Flaaten journeyed to Viking on Thursday to visit her sister, who is ill in the Viking hospital. She returned the same evening.

Mr. and Mrs. Sam Olson from Dinant were visitors at the A. Patterson home one day last week.

Mrs. L. Watt from Edmonton visited with her mother, Mrs. K. Olson, for a couple of days recently.

The Young People's League of this district gave a nice program in the church on Sunday evening honoring the Mothers. Each Mother present wore carnations. On behalf of the Mothers hearty thanks are extended to the young people.

Mr. and Mrs. N. Sand and daughter Ellen and Ruby Berg were visitors at the R. O. Berg and the P. O. Flaaten homes last Sunday.

Mr. E. A. Moen was a city visitor last Monday.

Grandma Moen visited with Mrs. P. O. Flaaten Friday afternoon.

Albin Pearson from Bently is home, with his parents putting in the crop.

TOWN COUNCIL

A regular meeting of the town council was held on Monday evening, May 10th. Present were Mayor Swift and Councillors Law, Hammond, Lovell, Coatta and Brace. A number of routine communications were dealt with and some accounts passed. A statement of receipts and expenditures for the month of April was read and ordered incorporated in the minutes. Secretary was instructed to mail notices to abate nuisance where certain unsanitary conditions of premises had been reported. The property committee was given further instructions to look into the feasibility of erecting an outdoor skating rink. The Health committee were requested to inspect the nuisance grounds and to bring in a recommendation as to the best means of rectifying conditions there which had been a subject of complaint.

Coronation celebration matters were discussed and final arrangements made for the proceedings to be held on May 12th.

WORLD OF WHEAT

By H. G. L. Strange

"To save the Prairie farmers from losing some sixty million dollars worth of wheat in rust years."

Such was the problem set for the Rust Research Laboratory which was established at Winnipeg with resolution and earnestness in 1925.

Well equipped, well staffed with competent scientists, plant physiologists, pathologists, geneticists, plant breeders and statisticians the Laboratory started to work with energy and vision. The nature of the rust spore itself was studied. It was found that the spores consisted of many families and strains which affected different varieties of wheat each to a greater or lesser degree.

Soon the barberries in the west were eradicated yet the rust spores still appeared. Now it was found these were air-borne, coming from the United States, perhaps from as far south as Mexico.

Finally out of all the work, several new varieties of rust resistant wheats were developed. They are still being tested for milling and baking quality, yield, stiffness of straw, earliness and resistance to plant diseases; it is hoped too, they will be resistant to all known forms of rust.

One new variety, Renown has been licensed and released for use. This year at hundreds of points it is being tested by farmers against Thatcher and Apex.

Factors which have tended to raise price.—Broomhall increases estimated importers' requirements—More rain needed in Southern Hemisphere—Small wheat crop expected in Spain. Heavy rain and high temperature causes rank growth in the Yangtze Valley (China). Decided decrease in Argentine shipments—Expect below average wheat and barley production in Iraq.

Factors which have tended to lower price: Further rains in the United States. Indian wheat estimate 30 million bushels above last year—U.S. private estimate spring wheat acreage increased two million acres—U.S.A. winter wheat estimates high—Some rains received in Argentina—Increase in 1936 production Germany than hoped.

WHAT PRICE SPEED?

The cost of high speed! Is it worth the risk and the extra money cost as well? Here are some startling figures on gas [illegible] consumption at various speeds in the average motor car:

At 10 m.p.h. 18.8 miles per gallon
At 20 m.p.h. 18.8 miles per gallon
At 30 m.p.h. 18.0 miles per gallon
At 40 m.p.h. 16.4 miles per gallon
At 50 m.p.h. 14.6 miles per gallon
At 60 m.p.h. 12.0 miles per gallon
At 80 m.p.h. 8.0 miles per gallon

FRESH STRAWBERRIES ARRIVE BY PLANE

LE BOURGET, France, May 1.— Bearing 1500 pounds of fresh strawberries to be served at coronation dinners, a British airplane took off here today for London.

PRESIDENT CANADIAN NATIONAL RAILWAYS SPEAKS WELL OF SYSTEM

TORONTO, Ont., May 5.—"I do not believe that the Canadian National Railways is such a millstone around the necks of the Canadian people as some would lead the public to understand it is," declared S. J. Hungerford, Chairman and President of the Company, at a dinner tendered in his honor here tonight by W. A. Kingsland, Vice-President of the Central Region which was attended by more than one hundred [illegible] business, financial, industrial, mining and professional men.

It will be generally admitted that the lines now comprised in the Canadian National System have contributed much to the industrial progress and wealth and to the development of Canada as a whole. The Canadian National Railways, as now [illegible] has always more than [illegible] past [illegible] expenses. In addition it has [illegible] varying amounts, ranging from small to large sums, [illegible] charges.

In opening his address Mr. Hungerford [illegible] in a general way [illegible] railway affairs and mentioned that in recent years new forms of transportation have been developed [illegible] with the railways. "Undoubtedly, these new agencies have come to stay," he admitted, "and the problem now is to employ each one for that particular purpose for which it is best adapted. Apparently, this can only be accomplished by some form of common control. I am an advocate of reasonable control of the [illegible] forms of transportation. I am also an advocate of trial [illegible].

"While recognizing the difficulties, I am hopeful that co-ordination of all methods of transportation will [illegible] by the authorities. Obviously it is desirable that transportation [illegible] air, water, highway and rail should be employed as largely as possible within their respective zones."

Mr. Hungerford was optimistic in regard to the future of the Canadian National Railways.

"That our contribution toward fixed charges in recent years has not been greater has been due to the shrinkage in general business and not to inefficiency in operating. The fixed charges are largely made up of securities issued to raise funds for the construction of various sections of the railroad initiated by private enterprise. The private enterprises which proved to be unable to sustain themselves were not put through the process of receivership [illegible] the fixed charges remained as an apparently inescapable burden. With the return to traffic levels of [illegible] years ago the operating costs of the National System will be more [illegible] sufficient to meet those fixed charges.

If the railroad were closed down, or given away to other interests, the fixed charges would remain a burden on the country and, unless those other interests could contribute more toward their payment than is contributed by the present system the country would be worse off financially.

The speaker commented upon the fact that railway management everywhere has had little success in securing permission to abandon lines which are unprofitable and that although a great deal is heard about the [illegible] upon the finances of the country made by the railways, little is said about the great cost of public investment in canals and facilities for inland navigation, which function only for six months in the year.

"Considering our position as an agency of service in all parts of the country, a large proportion of which we serve exclusively," he added, "and [illegible] the national system as an agency which provides a cheap and efficient form of transportation [illegible] position as a [illegible] and as the largest purchaser of materials and commodities [illegible], it is my conviction that the Canadian National Railways [illegible] present and still greater [illegible] value to Canada."

"In referring to the early development of the country," Mr. Hungerford continued, "our own generation has had ample evidence of the value of the steam road in opening up new territories. I need but mention briefly the rich mining districts, the wide clay belt and the pulp and paper mills of Northern Ontario. North of North Bay, more than 100,000 people live and have gainful occupations. It would have been impossible for them to have developed industrially and agriculturally without the railways and to have made their great contribution to the national wealth.

"I would here like to pay respectful tribute to those identified with the mining industry. By their initiative, effort and courage they have performed a great service for Canada. During the recent depression the development of gold mines was the most encouraging factor in our economic life. It provided much-needed employment, both directly and indirectly, and the gold produced was of great assistance in maintaining our foreign exchange position. In view of this, mining men have earned the gratitude of the nation."

Mr. Hungerford drew attention to the suggestions that the National System had been built too far north, but he added, the most recent mining developments were beyond the most northerly lines. Any map showing the location of the principal mining fields indicates the dominant position occupied by the National Railways in the mining fields and he declared that this position will be maintained by both the quality of the service given and meeting the demands which ever increasing developments require.

"Undoubtedly the prospects for additional mining developments are bright," he said. "Activities in this field along the lines of our System are such as to make it difficult to keep adequately informed. Gold production is rapidly increasing and the production of silver is substantial.

In touching upon base metals, he pointed out that it was a matter of satisfaction that the Dominion has become the largest producer and the world's foremost exporter of industrial metals other than iron. In the total output of lead, zinc and copper Canada's production is exceeded only by that of the United States, while in addition the Dominion produces nearly all of the world's supply of nickel. Although Canada now imports about a million tons of iron ore per year from the United States it has been predicted that the merchantable grades of iron ore in the republic will be exhausted within a measurable space of time. As there are several known deposits of iron ore along the lines of the National System, he was hopeful that the time was not far distant when Canadian iron deposits will be drawn upon and another large industry established.

Sir Joseph Flavelle, in introducing Mr. Hungerford, spoke of the early days of government ownership when he was chairman of the Board administering the Grand Trunk Railway System. He recalled the fact that at that time he wrote a letter to the then Prime Minister in which he proposed in principle what has been put into effect by the Parliament of Canada under the advice of the Minister of Transport. This was that the railways be relieved of the capital sums and accumulative annual charges for deficits and investments in various units of the National System which had little practical value or earning power in the operation of the System. Sir Joseph pointed out that the Canadian National was the largest single employer of labor in Canada and that by its policy it reflected the rules of life that of goodwill and understanding and the desire to work for the benefit of all. He believed that the National System was now given a fresh start under more favorable conditions than has been evinced in the past and that some of the load of the annual charges been dispensed with will give the railways an opportunity of making a better showing.

BANK OF MONTREAL CROP REPORT

General—Wheat seeding is now well under way in the Prairie Provinces, although it was retarded by wet weather in Manitoba and northern Saskatchewan. Surface moisture generally, is adequate for germination, but owing to deficiency in subsoil reserves rains are urgently required, particularly in southern and central Saskatchewan and eastern Alberta, where there has been very little rain so far this spring. In Quebec Province the season is late and field operations are not as forward as usual. The maple syrup crop generally was above average in quality but the run was small. In Ontario field operations are about two weeks late. Fall wheat wintered satisfactorily and old meadows and alfalfa are in excellent condition. In the Maritime Provinces seeding operations will not be general before another two weeks. In British Columbia field operations have been retarded by cool, wet weather. Fall wheat and hay crops wintered well. Details follow—

Alberta—Wheat seeding commenced about two weeks earlier than last year and is now fairly well advanced. Surface moisture is considered sufficient to start germination. Except in the northwest and Peace River districts there is practically no subsoil moisture and frequent rains in the growing season will be necessary. Wheat acreage is about the same as last year. Saskatchewan— Seeding operations, on the whole are now well under way. Surface moisture is sufficient for germination in most sections. Apart from the northern districts, little rain has fallen and as subsoil reserves are inadequate, good rains will be required throughout the growing season. Manitoba—Field operations were delayed to some extent by a heavy snowfall and general rains towards the end of April, but seeding has commenced and is progressing favourably. Seed bed conditions are satisfactory for early growth, but subsoil moisture reserves are low and further rains would be beneficial.

CANADA MIGRATION AGAIN DISCUSSED IN ENGLAND

London, April 13, 1937—Special cable to The Star by Windermere. Copyright.)— The question of migration to Canada was raised again in the House of Commons this afternoon when two Labor members, C. G. Ammon, North Camberwell, London and W. Lunn, Rothwell, said that the time for discussion was opportune in view of the forthcoming Imperial Conference.

Specifically they asked Government support for settlement of 5000 British families in Saskatchewan, as contemplated by the Government of that province.

In reply, Right Hon. Malcolm Macdonald, Secretary for the Dominions, said that while the Saskatchewan Government had approved of the proposal, in principle they had made no specific move to put it into practice. No communication on the matter had been received from the Dominion Government, he said. The question of support from the British Government did not therefore arise.

Mr. Macdonald added: "We have no indication that the responsible authorities are ready to encourage the resumption of immigration at the present time."

WINDERMERE.

The above news-clipping is circulated for general information. It indicates clearly how necessary it is that Canada should be more specific in her representations and more concrete in her proposals.

It would be advisable that organizations and bodies throughout Canada, as well as M.P.s and M.L.A.s should get in touch immediately with the Honourable T. A. Crerar, Minister of Immigration and outline to him specific and concrete proposals. The Honourable T. A. Crerar is now in London, England c.o. The High Commissioner for Canada, Canada House Trafalgar Square, London S.W.1. Presumably he will be in a position to carry on negotiations with the United Kingdom Government, which it is hoped may lead to an early resumption of British Family Settlement in Canada.

The Right Honourable W. L. Mackenzie King, and the Honourable Charles Dunning are also in London, and may be expected to take part in discussions on Empire migration.

VERY EARLY ACTION IS DESIRABLE. CABLES ARE PREFERABLE TO LETTERS AT THIS STAGE.

TOY SHOPS

The report showed that Boy Scout Christmas Toy Shops operating in 161 towns and cities across the Dominion last Christmas provided gifts for approximately 100,000 children of needy families.

SOCIAL SECURITY FOR ALL

SOCIAL security is today available to YOU—and to every man and woman, young or old, rich or poor—through savings in Life Insurance.

In fact, Life Insurance offers you a triple measure of social security—protection for your wife and children in the event of your death—a cash reserve to tide you over emergencies—and financial independence for your own old age.

No other plan of social security can give you such complete peace of mind. And only Life Insurance enables you to create an immediate estate with modest savings.

Today Three and a Half Million thrifty Canadians are banded together for mutual protection through Life Insurance. Ninety-three per cent. of these policyholders are insured for amounts of from $500 to $5,000.

To you and your family, Life Insurance offers the finest form of savings and security.

OUR DAY—

IN THE WORLD encircling broadcast of greetings and expressions of loyalty to their Majesties, the King and Queen, one Canadian province through it's announcer, mentioned that it was only a microscopical portion of the British Empire. This being so, it would leave the district and town of Tofield more microscopical still. We were thrilled early Wednesday morning when listening to the radio broadcast of events in London, England. The description of the procession to Westminster Abbey, the roar of the crowds, the ceremony within the Abbey and the return of the procession to Buckingham Palace. It was all very wonderful. But we were EQUALLY THRILLED when we stood on main street, Tofield, in the early afternoon and saw the parade of school children march by. Amisk Creek, Hastings Lake, Ketchamoot, Lakeshore, Lindbrook, McKenzie, Tofield, Westlake, Woodlawn, are everyday names—home names—and to see the school children marching, with their particular banner flying was an inspiration. We missed Bardo, who unfortunately was prevented from coming by quarantine trouble.

And here is a story regarding the coronation celebration here, worth recording. For some reason or other the transportation arrangements for the Hastings Lake school pupils did not function, thus creating a situation that called for heroic action. Here was a coronation celebration to be held at Tofield 10 miles away, school children all dressed up to go, and no way of getting there. Small children in grade two and others of varying ages were NOT going to miss that Coronation ceremony—so they commenced to walk. For a mile and a half to the gravel road, they got a ride in a hay rack. Then they walked to Lindbrook where they were halted and rides arranged into Tofield. But if you can imagine anything more thrilling than a second grade youngster clad in low shoes, pink silk frock with patriotic trimmings, starting out to walk to a coronation celebration ten miles away, your imagination is keener than ours.

The day itself at Tofield was a complete success. The singing contest proved quite interesting and the judges were faced with no easy task to place the winner. The success of the day very largely can be attributed to three main things, the glorious weather, the sheer hard work of the teaching staff of country and town schools, and the interested planning of the town council. There has recently been formed a school athletic organization. It takes in Bruce and district schools, Holden and district schools, Ryley and district schools and Tofield and district schools. After a series of eliminations in each district, the winners meet, this year at Bruce, coming years at one of the four points to be arranged. It was the elimination contests between the schools of this district that provided such a splendid children's programme on Wednesday, and incidently a hard days work for the teachers. Races were being run as dusk fell.

The baseball games as usual were a centre of interest, the final game especially being very close. The crowd was not quite the same as other celebrations, there being a larger proportion of children, which led an old-timer of buffalo roaming days to remark, kids, kids, kids, I never saw so many kids here before.

The bon-fire and fireworks at night created much interest among both children and grown-ups. Many were the Ahs! and Ohs! as the rocket stars broke.

All who had anything at all to do with the day are to be congratulated upon its complete success.

SAFEGUARDING THE FORESTS—

WHILE MOST people have a hazy idea that there are certain organizations devoted to the cause of forest preservation, it is doubtful if the average Canadian knows much more than that about the general problem of safeguarding our forests. Yet the Canadian Forestry Association is busily engaged in an educational work that ought to be attended with beneficial results and that merits encouragement. It operates five itinerant schools on wheels—caravans—and a railway lecture car, and the Association's officers have been touring up and down the rural areas of the Dominion during the past year and addressing audiences which in the aggregate total several hundred thousand. The lecturers deal directly with the matter of safeguarding the forests, streams and wild life of the country, with particular attention paid in the prairie provinces to the building up of shelter belts of trees around farm houses so that gardens and orchards may be established behind these living windbreaks.

When it is borne in mind that eighty per cent of the total area of this Dominion is designed by Nature for forests, lakes and rivers, and that these altogether produce more wealth than all our mines, the importance of preserving such areas must be manifest to all thinking citizens.—The Montreal Daily Star.

METHOD OF CONTROL OF CABBAGE MAGGOTS

The cabbage maggot attacks cabbages, cauliflour, turnips and radishes. The adults, which are two-winged flies lay their eggs on the stems of the plants about the time the European plum tree first comes into bloom in the spring. These insects can be controlled by the use of corrosive sublimate which can be procured at most seed houses. When used the sublimate is diluted in water at the rate of one ounce to ten gallons. It loses much of its strength when brought into contact with metals, so it should never be used in metal containers, either in mixing or in distributing. Glass, earthenware, or wooden vessels must be employed. This is a very important point.

Two or three days after the cabbage and cauliflower plants have been set out in the field, the solution should be poured over the stem and around the base of each plant, using about half a cupful per plant. Care should be taken to wet the stems thoroughly as well as the soil immediately surrounding the base. Two subsequent applications should be made, the second 7 days after the first application and the third 7 days later, making three treatments in all. It is very important to make the first application early as the success of the control depends largely on this point.

In the case of radishes, the solution should be poured over the young plants about three days after they appear above the ground, and a second application a week later. The radishes should not be treated when they are nearly ready for use because it is a dangerous practice. In view of the fact that corrosive sublimate is a deadly poison to human beings and animals, great care should be exercised in its use.

ALBERTA AUTO CAMPS IMPROVED

In various parts of the province municipal authorities are making plans to improve their auto camps this year.

Though funds are limited for such programs in most cases, there is a strong belief that these outlays form a splendid investment and will build up an asset that will prove of increasing value.

Edmonton, which has one of the most beautiful auto camp sites in western Canada, plans to expend $14,000 on improvements this year. The program includes the erection of 10 new cabins, increasing the total to 72 besides making various other improvements of a structural nature in addition to further beautifying of the grounds.

Owing to the steadily increasing popularity of this camp, improvements have been financed out of revenue while a substantial surplus is carried into the next year. The camp is operated by the Edmonton branch of the Alberta Motor Association, in co-operation with the South Edmonton Business Men's Association.

Various Alberta towns and other centres might well follow the lead taken by the cities in improving their auto camps. One of the sure ways of making the tourist enjoy his stay, which means he will be back, is to see that a good auto camp is available.

This year when the tourist flow into Alberta is certain to prove the biggest volume in years, there is every justification for improvements at our auto camps and the opening of new ones in centres now lacking this accomodation.

$700,000 FOR MAIN ALBERTA ROAD PROGRAM

The federal grant, mainly for highway construction purposes in Alberta will amount to $350,000 it was reported recently. Matched dollar for dollar by the province, this means a $700,000 program to be financed this year by the two governments.

Under the agreement at least 50 per cent of those engaged on the work must be relief recipients.

A draft of Alberta's projects has been sent to Ottawa by the provincial public works for consideration so that there can be a selection of those to be included on the current season's program.

In the meantime the provincial government has announced that it is starting work immediately on various projects of its program.

The intention is to hard surface the main highway stretch between Edmonton and Millet on which considerable reconstruction was done last year.

In the north there will be gravelling of the Peace River highway for a 22-mile stretch around Lesser Slave lake.

Hard surfacing of various links of the main highway system also is on the program for southern Alberta.

Officials of the Alberta Motor Association have expressed their satisfaction over the announcement that the government's hard surfacing program will be extended this year.

SCOUTS READY WITH CORONATION BEACONS

OTTAWA, May 8.—Arrangements are complete for the national contribution of the Boy Scouts to Canada's coronation celebration, a coast-to-coast chain of old-time beacons, dominion headquarters of the Boy Scouts Association said today.

The first of these beacons will flare at nightfall on Atlantic coastal headlands and travelling with the dusk will flame across the Dominion skirting the St. Lawrence and the Great Lakes to the lakehead at Fort William, and from Winnipeg across the prairies in 50-mile jumps to the Rockies and through to the Pacific.

In Alberta a north and south chain from Edmonton to the international boundary will lead into the Rockies at Jasper and Cardston and the final fires will flame over the Pacific at Uplands Point and overlooking Duncan, tended by the Scouts of Victoria, Qualicum and Duncan.

BENNET WAVERS IN HIS INTENTION TO QUIT POLITICS

PLYMOUTH, May 8.—R. B. Bennett arriving here today enroute to London to attend the coronation, said his future as leader of the Canadian Conservative party depended entirely upon his health.

"While in London I shall consult heart specialists," the former Prime Minister said. "If they say my heart is strong enough to stand the strain of another general election I may not retire."

Asked if he thought a general election imminent or thought the Conservative party might be returned to power, Mr. Bennett said "The Liberal government seems to be strongly entrenched but the freaks and idiosyncrasies of the electorate are beyond human understanding."

RETIREMENT OF CARLYLE BODES OTHER CHANGES

First steps in a reorganization of the provincial agricultural department became evident on Friday when Hon. D. B. Mullen, minister in charge, announced the retirement on superannuation of S. G. Carlyle, livestock commissioner.

A successor will be appointed in the immediate future, although there is a likelihood that the minister may attend to this himself.

Further reorganization is expected in the immediate future.

Lack of reorganization is said to have been a contributing factor to the split between Premier William Aberhart and N. W. Chant, former minister of agriculture. [illegible] it was stated that the department was to be reorganized [illegible] the first step toward that end.

Since taking office, Mr. Mullen has been busy getting his finger on the pulse of the department and some further changes are expected. Mr. Carlyle laid down the reins of the livestock commissionership on Friday.

He came to this province in 1911 from Ontario, having been brought west by the then minister of agriculture, Hon. Duncan Marshall. Mr. Carlyle for six years was in charge of the various provincial farms and then was appointed livestock commissioner.

LONDON PAPER PHONES BOSS HIS OWN FIRE

SAN FRANCISCO, May 11.—London, in the midst of all the coronation business, took time out to let Mayor Angelo J. Rossi know his city waterfront was on fire

"Europe calling" said the telephone operator yesterday

"Europe" was the London Daily Mirror

"Tell us about the fire on your waterfront," asked the caller

[illegible] said the mayor "I hadn't heard about it

[illegible] checked up and sure enough there was one, a $200,000 blaze

POISON WHISKY TAKES LIVES OF 3 TORONTO MEN

TORONTO, May 13.—Death of 73 year-old Alexander McKinnon from alcohol poisoning last night after a visit to a bootlegger's was [illegible] Toronto [illegible] to death this week from [illegible]

[illegible] said he and his father were drinking a place on Elm and Edward streets. He was convinced they were only rubbing [illegible] alcohol [illegible] his own vision was impaired and he was rushed to St. Michael's hospital fearing blindness

FATTEST MAN IN WORLD WEDS 361-LB BRIDE

LONDON, [illegible]—The world's [illegible] Barney Worth [illegible] and [illegible] fattest woman, have [illegible] Queensland [illegible]

[illegible]

Now [illegible] with her husband who is [illegible] some pounds a week in an effort to regain her former weight

Barney's bulk makes it a little difficult for him to get through doors and into buses. When he sailed from Capetown to England, he had to be taken aboard the ship by a crane and from Folkestone to London he had to ride in the baggage car.

A TALE OF A PIPE

Really this is hardly the week to tell of tragedy, but a newspaperman has no choice. Frank Pruden's famous pipe is broken. About six years ago, Frank, who as Tofield's water man is as steady as the rock of Gibraltar, blossomed out with a new pipe. It was a small one, so small in fact as to cause comment and some good natured ragging. The pipe, slightly flattened, always reminded us of a story told us at school regarding the [illegible] Birmingham. One of the large hammers, weighing several tons could be controlled at will, so much so that on one occasion, when a notable was visiting the works, he was asked to put his watch under the hammer the operator promising to bring the hammer down, touch the glass but not break it. He did so, and Frank's pipe always caused us to imagine it had received so much downward pressure and no more. Anyway it was a good pipe though small and even if its original cost was only 25 cents. For six years it has been Frank's closest companion. But what an appetite it had, let me see. A fifteenth of a pound package of tobacco in two days, a pound a month, 12 pounds a year, six years 72 pounds oh boy! But only this was too good to last— and the bowl burned out. But the top of the bowl was good and the mouthpiece was [illegible] Frank [illegible] was just as good as new. We really started looking for the demise of this pipe about four years ago and would repeatedly ask after its condition, but [illegible] and the pipe was going strong. [illegible] condition of af-[illegible] enough [illegible] ALL the [illegible] time before [illegible] day we [illegible]

GANDER KEEPS EGGS HOT FOR FAIR SPOUSES

FAUST, May 10.—A gander on the farm of Mrs. C. Iden of Enilda takes his domestic duties seriously.

Mrs. Iden placed two geese on settings of eggs, their nests side by side. At feeding time the gander comes to the nests and they leave. He rolls all the eggs into one nest and keeps them warm until the ladies return

When they come back they divide the eggs again and resume the work of hatching them.

1937 EDITION OF ALBERTA TOURIST HANDBOOK ISSUED

The new 1937 edition of the Alberta tourist handbook, setting forth the province's attractions "from sunny prairies to snow-capped mountains" and telling in details many provisions "for an exhilarating holiday" is ready and has been issued by the publicity section of the government.

Paying tribute to coronation year, the booklet has a brilliantly illustrated cover with red, white and blue predominating.

Information is given on motor routes, on the national parks, lake resorts, canoe trips, golf clubs, bus routes, hotel and camp accomodation, fishing, big game hunting, oil and other natural resources, agriculture and other industries.

Copies of the booklet have been widely distributed to motor associations, boards of trade, chambers of commerce and railways.

SPANKING OF CHILD RESENTED BY CAT

PETERSBURG, Ind., May 8.—Mr and Mrs. Robert Lashbrook don't know what to do with the family cat. It doesn't like to see the parents spank their 3 year old son

Mrs. Lashbrook attempted to paddle the youngster for being disobedient. The cat flew into a rage and chased her about the legs until she [illegible] Mr. Lashbrooke told her [illegible] and he, too, tried to reprimand the child—and was also chased by the cat

30,000 WATCH TELEVISION OF GREAT PARADE

LONDON, May 13.—Marking an [illegible] age of invention 30,000 persons watched the gorgeous spectacle of the coronation parade in the comfort of their homes, in offices, or in halls hired for the occasion far away from the actual panorama.

They were a new ilk which the [illegible] generation has dubbed "televiewers" and enjoyed the distinction of being the first group in history to view a coronation on a television screen

It was the supreme triumph of the invention to date. The experiment was acclaimed a success although the elements conspired against

ARRESTED? YES, BUT ONLY FOR TRY AT MURDER

HAMILTON, Ont., May 8.—Carole Logan, 18-year-old New York girl was arrested yesterday as a vagrant and admitted having been in jail for three months in the United States

"It was only an attempted murder charge," she told Magistrate H. A. Burbidge

"A trifling matter" remarked the magistrate. "Whom did you attempt to murder?"

"My real husband" replied the girl. "He was running around with other ladies."

The magistrate ordered her detained one week for a mental examination

KING CABLES HIS SYMPATHY TO GERMANY

LONDON, May 8.—The King today sent the following message of condolence to Chancellor Hitler of Germany:

"I am deeply shocked by news of the disaster which has befallen the airship Hindenburg and I hasten to [illegible] Mr. Chancellor, my [illegible] condolences on this tragic event, involving as it does, the loss of so many lives." The message was signed "George VI."

THE OLIVER STANDARD "70"

Here's How the "70" Earns More Money the Year Around

There's no end to what the smooth-running, easy-handling, powerful Oliver "70" does for you. The more work you give it, the more money it makes you month after month.

On drawbar jobs, the "70" pulls two 14-inch plows at 3½ to 4½ miles per hour in average soil. It harrows, drills and plants at high speed, too. With power take-off, plenty of power is provided for a two-row corn picker-husker, small combine, grain or corn binder, pick-up hay baler, potato digger or power sprayer. On the belt, the "70" is just right for driving a 22 x 36 thresher, for shredding or shelling corn, hammer milling, filling silos and sawing wood. Efficient six-cylinder power means a saving of fuel on every job, and it makes every job lighter. Choose either the "70" HC (high compression) for regular gasoline, or the "70" KD for kerosene or distillate. The same money-saving, money-making operation is yours. Come in and get all the facts about this great tractor today.

Hikers Take The Sky Line Trail

Peter Whyte, prominent [illegible] artist whose paintings [illegible] many drawing rooms [illegible] and the United States, [illegible] the Sky Line Trail Hikers of the Canadian Rockies on a [illegible] interesting four-day holiday [illegible] year to Larch Valley [illegible] beautiful Moraine Lake and the Valley of the Ten Peaks.

Plans have been completed for the annual outing, from August 6 to 9, of this unique organization [illegible] Canadian Rockies [illegible] happy [illegible] the [illegible] and [illegible] country above the timberline

[illegible] popularizing beauty spots off the beaten trails. Like explorers of old, they cover the country for [illegible] particularly interesting sections of the Rockies. On the closing evening they will have a pow-wow and election of officers.

Mr. Glenn Sr., Old Timer, Passes Away, Funeral Sunday

LINDBROOK

Lindbrook loses one of its old-timers this week by the death in an Edmonton hospital of Mr. J. Glenn sr. The late Mr. Glenn was one of the earliest settlers here, in fact before the railroad came here. He was 74 years of age at his death and is survived by his widow, Mrs. J. Glenn and four sons, Wellington (well known to all here as reeve of the Council) Harry and Reggie, now residing at Bonnyville, Alta., and William, a locomotive engineer of Winnipeg. Mr. Glenn was well liked and respected by all who knew him and will be sadly missed. The funeral service was held on Sunday at Holy Trinity Church, Tofield. The Rev. A. Wallis conducted the service. The coffin was covered with floral tributes and the pall bearers were: Messrs Rogers sr., W. Bellamy, A. J. H. McCauley of Tofield and Messrs. Asa Rogers, O. Lindgren and H. Stine of Lindbrook. Chief mourners were his widow, Mr. and Mrs. Wellington Glenn, and his sons, Harry and Reggie of Bonnyville. The church was full with old friends who came to pay their last respects to him. The service was choral after which the funeral procession started for the Tofield cemetery with quite a following of autos. At the cemetery the final interment service was conducted by the Rev. Wallis. The sympathy of all of us go out to the widow and family in their sad loss.

The sympathy of the district is extended to our school teacher, Miss Yvonne Phipps on the sad death of her mother at Strome, Alta. Miss Phipps got a sudden call to proceed at once to her mother's bedside as she was marshalling her pupils for the Coronation programme in Tofield on Wednesday. Mrs. Jas. Bracegirdle took over the job of seeing to the children and Miss Phipps was taken to Strome by Mrs. A. Smith of Lindbrook, Secretary-treasurer of the school board. Interment will take place at Strome on Tuesday. Floral tributes from the school children, school board and people of the district have been sent along with deepest sympathy to our young teacher in this her sad loss.

Coronation day here was royal weather alright, absolutely ideal. Most of the folks here either celebrated in Tofield or Edmonton but those who perforce had to stay at home enjoyed the CBC broadcasts probably as much as those in the thick of it, it brought it so close. It might be mentioned here apropos of your editorial last week, Mr. Editor, re the Hastings Lake children and their "Coronation March" that it was Mr. J. Bracegirdle of Lindbrook who took these same marchers into the Tofield celebrations, thus doing his bit as he did before as a Briton should.

We hear that Mr. Fred Roland has recently joined the ranks of the Benedicts and that his bride is a Montreal girl. If such is the case we wish them both long life, health, wealth and happiness for the years to come.

Starting on May 18th, Lindbrook becomes a Post Office, and will have a daily service of mail and will sell stamps and Postal notes but not Money Orders. The office will be at the Lindbrook Store with Mr. Jas. Bracegirdle as Post master.

FOR SALE—Reg. Clydesdale Stallion, three years old. Apply Wm. McCutcheirn, Lavoy, Alta.

LOCAL & PERSONAL

Messrs. Les and Norman Glover and Reg. McCarthy went on a fishing trip up the Sturgeon River on Sunday last.

Miss Edna Gray spent the week end in town.

Mrs. Norman Scott and Norma spent Monday in Edmonton.

Mrs. Russel spent the week end at the home of Mr. and Mrs. Bruce. Tofielders will remember Mrs. Russel as a resident of Tofield when her husband was the principal of the Tofield school.

Mrs. W. Hay and Reta of Edmonton spent the week end with her mother, Mrs. Kendall.

Miss Margaret McCauley was a member of the graduation class at the Lamont hospital. The graduation took place on Monday.

Helen McCauley, nurse at the Ponoka hospital attended the graduation of the nurses at the Lamont hospital on Monday.

Mr. and Mrs. Harmon Lewis and children are visiting at the Art Young home.

Mrs. George McLaughlin of Wetaskiwin entertained the Tofield Ladies' Bridge club on Wednesday. Those present, Mrs. Hammond, Mrs. Law, Mrs. Firth, Mrs. Beirnes, Mrs. McCauley and Mrs. Bruce.

PARADE PRIZE WINNERS

The names of the parade prize winners were inadvertently omitted from the coronation celebration report. These were Lakeshore first, Tofield primary room second. For a second prize Mr. A. A. Beirnes is giving a picture of the King to each family having a child in the primary room. Mr. Beirnes has also presented a picture of the King to each room in the Tofield School. The school board are having these suitably framed.

KETCHAMOOT

Edmonton visitors on Friday were, Mrs. Whallans and daughter Joyce, Mr. and Mrs. J. H. Ingram and daughter Kathleen, Mrs. Sears, Hazel and Stanley.

Mrs. L. Carlisle entertained the Ladies' Aid at her home on Wednesday, May 5th. Most of the members and quite a few visitors were present. The June meeting will be held at Mrs. J. H. Ingram home on June 2.

Master Douglas Barnes had the misfortune to fall off the chicken house on Saturday and broke his arm. Dr. Law set it at his office in the evening.

Mrs. E. McMullen, Mr. and Mrs. C. Coombes and family, visited their daughter and sister, Mrs. Mabel Brown and family near Bawlf on Sunday.

Mr. and Mrs. Roy Lee and family and Miss Nellie Lindsay were guests at the Lorne Lee home Sunday.

Mrs. Henry McGinnie entertained the Social Hour club at her home Thursday of last week.

Miss Margaret Mitchell spent several days in the city last week, shopping and visiting relatives

[illegible] Mr. Lester Noland and [illegible] of Lakeshore, Mr. and Mrs. [illegible] Schultz, Mrs. Sears and [illegible] were Sunday afternoon [illegible] of Mrs. M. McConnell

[illegible] and Mrs. Coombes, daughter Ethel, Mrs. Barnes and son Douglas motored to Edmonton Monday. An X Ray was taken of Douglas' arm and was found to be knitting satisfactorily.

[illegible] Mothers' Day services on May 9th, christening services were also held. These were: Mr. and Mrs. Stanley Brown's infant son, Peter Stanley; Mr. and Mrs. Roy Lee's infant daughter, Shirley Margaret, Mr. and Mrs. Robert Berreclough's infant son Marvin Wayne. A large congregation was present, there not being standing space for all.

Mr. and Mrs. Stanley Jack, nee Helen Schultz, of Edmonton, Mrs. John Carlisle and son of Wainwright, spent a week at the home of Mrs. Minnie McConnel.

Practically all the seeding has been done except the green feed, gardens made, the wheat fields are all green and a nice rain would be greatly appreciated

Mr. and Mrs. Patterson of Amisk Creek visited at the home of Mr. and Mrs. C. A. Ingram Sunday evening.

LAKESHORE

Mrs. Latam of Edmonton was a visitor at the home of her son, Owen Eaton and Mrs. Eaton over the week end

Henry Tiedeman jr. and Lynn Phillips left with Jim Hooper for Penticton, B.C. on Sunday.

The Lakeshore school were successful in winning the prize for the school marching best in the parade on Coronation day

Mr. and Mrs. J. H. Johnston were guests at the R. J. Phillips home on Sunday.

Mrs. W. E. Seale has been spending a few days in Edmonton

Harold Anderson was a patient at the tonsil clinic held last week in Tofield.

PRAIRIE COUPLE OBSERVE 50th WEDDING ANNIVERSARY

On Wednesday, April 28th, the Golden wedding of Mr. and Mrs. Noland, Alberta pioneers from Tofield, now residing on Marshall road, was celebrated at the home of their daughter, Mrs. E. Urquhart. An invitation party thoroughly enjoyed the occasion cards and music being the order of the evening. Congratulations were showered upon the happy couple by all [illegible] which included Mr. and Mrs. [illegible]; Mr. and Mrs. Bourke; Mr. and Mrs. T. Jackson; Mr. and Mrs. G. T. Busby; Mr. and Mrs. J. Wiens; Mr. and Mrs. J. E. Busby; Mrs. Hoon, Mrs. Urquhart; Mr. and Mrs. Noland, Miss M. Thorne; Messrs. R. Urquhart; 'Ted' Carvell and J. Morel. Lunch was served at midnight, the table being very attractively arranged and centred by a beautifully decorated wedding cake which bore the numerals 50.

CORONATION BABY BORN AT MRS. GRAY'S NURSING HOME NEAR TOFIELD

A coronation baby, the daughter of Mr. and Mrs. Robert Bowick was born at Mrs. Gray's nursing home on Wednesday May 12th. Mrs. Bowick who was the former Miss Josie Thompson of Kingman is doing well as is also the baby

IMPORTANCE OF QUALITY OF CANADIAN WHEAT IN RETAINING MARKETS STRESSED BEFORE TURGEON ROYAL GRAIN INQUIRY

By Sam Ross

[illegible] Calgary session [illegible] with examination [illegible] J. M. McFarland, former [illegible] agent and Wheat Board chairman [illegible] Pitblado K. C. counsel [illegible] Grain Exchange [illegible]

He also declared against mixing grain, now permitted in the [illegible] "We have got to keep up our loss," [illegible] Canada's wheat [illegible] quality. "We [illegible] grades," he [illegible] would move [illegible]

[illegible] Mr. McFarland [illegible] McFarland told [illegible] K. C. Montreal [illegible] "Our hope of [illegible] quality [illegible]

I. W. Brockington, K. C. Winnipeg, counsel for North-West Grain Dealers' Association set forth the attitude of his clients on regulation of the [illegible] Exchange which [illegible] by witnesses.

His clients, he said had supported a suggestion of supervision made by Sir Josiah Stamp in 1931, endorsed approval of the institution of such supervision by the exchange immediately after the Stamp report and also the later suggestions by Mr. McFarland for supervision.

Thorough examination was required before any regulatory measures were taken, he said. "To rely at the outset, on experiences in the United States where conditions are not identical with our own and to regulate before thorough examination and overseeing, would be illogical" he said.

"It would be equally illogical to frustrate supervision and resist such [illegible] regulation as might, after careful examination by the supervisor, be found desirable," he added. He contended however, there were many "misconceptions and misunderstandings" about the exchange.

W. T. Mooney and McDermid Rankin farmers of the Grand Coulee district advocated a national grain board in time to handle the 1937 crop. The board would pay a small initial payment with interim payments on March 1 and when the crop is sold. They also suggested crop insurance to protect farmers suffering uncontrollable losses.

NEW OFFICIALS SURVEY ROADS

Through promotions announced recently at Edmonton, two new officials will have supervision of Alberta's 72,000 mile highway system.

G. H. Monkman is new deputy minister of public works succeeding Homer P. Keith who has retired from the [illegible]

The new commissioner of highways is N. W. Macpherson, bridge engineer for the province who will combine the two posts. He succeeds C. A. Davidson who has also retired from the service.

The construction and maintenance of highways is the special responsibility of the public works department, the [illegible] bringing Alberta's extensive system under the direction of the officials named for administrative purposes.

Officials of the Alberta Motor Association have been advised that one of the first acts of the minister, Hon. W. A. Fallow and the new officials is to make a visit to various districts in the course of a general survey for [illegible] studying projects [illegible] undertaken [illegible] location [illegible] contemplat-

GENERAL MOTORS RE-ORGANIZE WESTERN SALES SYSTEM

Oshawa, May 14.—Centralization of sales activities for Western Canada, with headquarters in Regina in [illegible] at Winnipeg, Calgary [illegible] announced today [illegible] F. McTavish [illegible] general [illegible] of General Motors [illegible] Canada Limited.

This reorganization, according to Mr. McTavish, expands the scope of the Company's sales department throughout Western Canada, to take care of the growing demand for General Motors cars and trucks, and to [illegible] service [illegible] dealers [illegible] the West.

The existing parts depots and sales [illegible] Calgary, Winnipeg and Vancouver will be retained. The entire staff of sales, service and parts [illegible] will [illegible] Regina.

Appointment of E. R. Birchard, formerly assistant general sales manager at Oshawa, to take charge of Regina headquarters is also announced. Mr. Birchard is to be regional manager with supervision over all Western Canada from Port Arthur west.

Mr. Birchard has been with General Motors for 17 years and was general sales manager for Pontiac for some time prior to his appointment as manager of the Oshawa Zone. [illegible] he was manager of the Toronto Zone [illegible] recently assistant general sales manager at Oshawa. He knows Western Canada well, having supervised the Western sales, parts and service organization for the past few years.

The regional manager's headquarters staff at Regina will include: A. H. Brett of Winnipeg, assistant manager; [illegible] service manager; [illegible] Webster, business manager; [illegible] D. McTavish, parts and accessory manager, and A. R. Fortin, car distributor.

[illegible] formerly Zone City Manager [illegible] Toronto is appointed Zone Manager at Vancouver. C. P. Johnson of Calgary, will be [illegible] Calgary office and [illegible] recently at Calgary will have [illegible] of the Winnipeg office. W. D. Fielding, Winnipeg, is transferred to be assistant manager of the Montreal Zone.

WHALERS ARE BUSY ON PACIFIC COAST

Vancouver, B. C. May 17.—Whaling [illegible] on the high seas off Canada's Pacific Coast, according [illegible] Canadian National Steamships, [illegible] announces resumption of calls at Rose Harbor summer base of the whaling fleet in the Queen Charlotte Islands.

Rose Harbor lies deep in a lovely lagoon, yet only the hardiest tourists go ashore here. A whale reduction [illegible] much for the average olfactory organ, even though a piece of whalebone is the shoregoing prize. The average catch for the season is 500 whales.

★ WORLD OF WHEAT ★

By H. G. L. Strange

Bushels threshed can never be more than the rainfall will warrant.

That is a fundamental, natural law operating in Western Canada, and in any other semi-arid wheat area in the world.

Yields per acre of course, are partly dependent upon many conditions which vary with each district; quality of soil, amount of evaporation, occurrence of frost and hail, amount of insect infestation and of disease infection.

But the rainfall which occurs during the growing season and during the previous fall months, has been found to be by far the most important factor governing bushels harvested.

How much rainfall is required to produce an average wheat crop.

Investigations that have been made by the late Sidney Barnes at the Dominion Experimental Farm, Swift Current, and by the Research Department of the Searle Grain Company, seem to indicate that about 12 inches of rainfall is required to make an average crop. Of this some 8 inches is necessary during the growing season, from April 1st to July 31st, and about 4 inches during the previous fall months of August, September and October.

More rainfall than this brings about a higher yield, less rainfall brings smaller crops, less than 10 inches produces a small crop, less than 8 inches a complete failure.

The following factors have tended to raise price:—Unfavorable new crop prospects in importing countries—Complaints of rust in France—Corn planting delayed in the Balkans—Deficient rainfall in Australia and complaints of grasshoppers—Forecast of slight reduction in Canadian grain areas sown—Spanish pickled olive crop abnormally small — Irish Free State abolish customs duty on imported wheat.

The following factors have tended to lower price:—General rains in Russia and Balkan States—Argentine wheat arrives in U. S. for probable trans-shipment to Mexico—Seeding progresses and large acreage expected in Argentina—U.S. Government winter wheat well-maintained.

REX BEACH'S STORY WAS HARD ON MIKE'S FINGERS

HUDSON, Ont. May 17.— P. H. (Mike) Ament, internationally famous outfitter and owner of Kenneall Lodge and camps here, is nursing a set of sore fingers and wondering whether he will be able to limber them up in time to assist bass and muskie fishermen with their tackle this coming season. Mike's sore fingers resulted from an article by Rex Beach, published in the April issue of Cosmopolitan. Within a few days after the publication of Beach's story of a fishing trip to Cliff Lake, letters began coming to Ament's camp asking for information and Mike, in addition to filling his ice-house, building new camps and other spring labors has spent long hours hammering out replies on the old camp typewriter.

Each and every enquiry required a lengthy answer and Mike, who uses the "hunt and poke" system of typewriting, now would like to find in his mail a letter telling him what to do about sore fingers.

C.N.R. AIR-CONDITIONS FIRST CLASS COACHES

Montreal, Que. May 17.—An order of 30 air-conditioned first-class coaches for main line service on the Canadian National Railways has been placed with the Canadian Car and Foundry Co. Montreal, it is announced at headquarters of the National System here. Construction of the new cars will be started immediately and a number of them will be in service this summer.

The new cars will be 73 feet 3 inches in length with a vestibule platform at each end. They will have a total seating capacity of 64 with the latest type of reclining seats. They will have a ladies' lounge at one end of the car and a smoking section partitioned off from the main body of the car and separated from it by a swing door at the opposite end. They will be completely air-conditioned with the ice cooling system which was found best adapted to Canadian climatic conditions by the equipment engineers of the company.

The structural details embody the best features of modern car construction. The bodies will be of special high tensile steel which permits reduction of weight while retaining the maximum of strength. The cars will have the latest type of turtle-back roof. They will be mounted on six-wheel trucks which give better riding quality than the four wheel type and at the same time increase the factor of safety. The interior decoration will be in the modern style.

RUST RESISTANCE IN WHEAT VARIETIES

(Experimental Farms Note)

Now that wheat varieties resistant to stem rust have been produced the question of how they manage to resist rust may arouse some interest. Rust is caused by a minute fungous parasite of microscopic size which has the power of penetrating into the tissues of resistant and susceptible varieties alike. This fungous is a true parasite in that it thrives only in the living tissues of the plant. In susceptible wheat varieties the plant tissues are not immediately killed but show a remarkable tolerance to the rust fungus which spreads rapidly and absorbs nourishment from the still living plant cells until the plant riddled with its infections, dries up and dies. Resistant varieties show no tolerance of the fungus. The rust fungus enters their tissues in the same manner as in susceptible varieties but there the similarity ends. The invaded portion of the plant tissues dies almost immediately and its death is soon followed by the death of the invading rust fungus which, as already mentioned, thrives only in living plant cells. So small are these areas sacrificed to stop the spread of the rust that frequently they are invisible to the naked eye. Thus the damage done by the rust to highly-resistant varieties is almost negligible.

The question of resistance and susceptibility is complicated by the fact that stem rust of wheat is composed of a large number of strains which differ from each other in their parasitic powers. More than 140 such strains are now known. To be rust resistant a variety must possess resistance to all strains of stem rust prevalent in the region where it is grown. Marquis is classified as a susceptible wheat, for, although it is resistant to about one-half of the known strains of stem rust it is very susceptible to many others. That resistance, although it is considerable, does not suffice to save it from the ravages of stem rust.

The new rust-resistant bread wheat varieties possess various degrees of resistance. Thatcher is immune from a great number of rust strains but is moderately susceptible to others. Renown and Apex, while susceptible to some rust strains in the seedling and early stages of growth acquire a high resistance to apparently all strains by the time the plants are about half grown. The susceptibility of these varieties in the early growth stages is of little significance as stem rust does not usually arrive in the spring wheat region until the plants have acquired this resistance.

LOSS BY THEFT OF FREIGHT DECREASES

MONTREAL, May 17.—Claims paid in 1936 by the railroads of Canada and the United States as a result of robbery of freight in transit were the smallest on record for any one year, according to George A. Shea, director of investigation of the Canadian National Railways, and vice-chairman of the Protective Section of the Association of American Railroads, who has just returned from Washington. The total amount paid last year was $488,702 which was 18 per cent less than the amount of claims paid in 1935, and was an average of only 1.8 cents for each carload.

Credit for the decrease in robbery losses goes largely to the efficient police organizations which have been established by the railroads, Mr. Shea said, and the vigilance of those organizations in guarding the billions of dollars worth of freight transported annually over the rail lines of this continent.

MULLEN WILL DIRECT WORK STOCK BRANCH

Work of the livestock commissioner's branch formerly carried on by S. B. Carlyle, who retired 10 days ago on superannuation, will be administered directly by Hon. D. B. Mullen, minister of agriculture, according to an announcement made on Monday by the Minister. At the same time the Minister announced the retirement on superannuation of W. Holdsworth, chief clerk of the branch. Mr. Holdsworth has been with the department for 24 years. He enlisted with the 51st Battalion in the Great War and went overseas with that unit as a sergeant. He was wounded at Vimy Ridge and as a result lost one leg. He is retiring with one month's pay in lieu of notice and superannuation is being arranged.

Notice of superannuation was given Mr. Holdsworth verbally by H. A. Craig, deputy minister of agriculture.

[illegible] Mr. Mullen announced the appointment of M. Metzer as a clerk to the department, whose duties will include compilation of weekly reports submitted by the district agriculturists.

MYSTERY OF BANDED BIRD NOW SOLVED

The mystery of "who banded the blue jays?" is a mystery no longer.

Making his rounds on February 9th last, [illegible] J. Miller of 11518 87th st., Edmonton [illegible] carrier [illegible] one of a [illegible] jays which he had been watching all winter fluttering along the ground at 91st street, between 87th and 89th avenues. Noticing that the bird was wounded and that it was leg banded, he caught it and took the number of the band, B252[illegible] The United States Bureau of Biological Survey at Washington was notified and today word came through that the bird had been identified. It was one of a band of blue jay fledglings banded at Edmonton in April 14, 1935 by Dr. and Mrs. J. E. Horning.

The family of blue jays had evidently kept together and returned to their old nesting grounds two years after being banded.

HIGH TONED HITCH-HIKER WANTS RADIO

ATLANTA, May 17.—A hitch-hiker stopped Major Trammell Scott as he was driving out of Atlanta yesterday. Scott stopped and opened the door. The hitch-hiker looked in.

"Got a radio in there?" he asked.

"No," replied the Major.

"Go ahead," replied the hitch-hiker. "I'll get another car."

GIRL HEROINE AS 2 BROTHERS DROWN IN NEW BRUNSWICK

NEWCASTLE, N.B. May 17.—Joseph Losjack, nine and his brother August, 11, were drowned at Newcastle creek last night and a companion, Henry Mowatt, 17, was saved by Eileen Giles, 16.

The girl rescuer pushed out in a boat on hearing Henry's call for help after the boys' rowboat capsized in an inlet of Grand lake. She managed to pull Henry and Joseph into her own boat but Joseph was dead when brought to shore.

A DRY SUMMER?—

THE STRONG winds of the past few days have caused a certain amount of apprehension among farmers—not exactly nervousness, except in those cases where actual soil drifting has taken place, but a slight uneasiness. With practically all of the wheat sown and a large percentage of the other grains also, the natural reaction is to look for and hope for moisture to hasten growth. Already most of the wheat is above ground and most of it doing very well, but a succession of cutting winds such as we have been having during the past few days can play havoc with a perfectly good wheat field. Fortunately, today, Thursday, is much better and so it is reported, considerable rain fell over night in Edmonton while a very little fell here. While the cutting winds could easily be dispensed with at any time, it is not so vitally important that we have a large amount of rain in the month of May. Generally speaking, there is sufficient moisture left in the ground after winter to give the grain a start. This is proven fairly well by the splendid fields of wheat to be seen throughout the district today. After it starts to grow and commences to draw on the soil for moisture, it is only a question of time before it exhausts what moisture it can reach in the soil and begin to require more. By this time May is pretty well ended and given copious rains through June and intermittent showers throughout July and August, the moisture requirements of a crop can be said to have been met. Last year if we remember correctly our heaviest rains came in May, an unusual occurrence. This year, up to the present, the May rainfall has been quite light, which gives some promise that June will be better. In a 26 year average this district is reported to be in the top class as regards rain, but just the same there have been some years when more rain could have fallen to advantage. Fears of a "dry summer" are based on the fact that some years rain "comes easy". That is, every cloud seems to have its quota of moisture ready to drop. Other years, the visible signs are all there but it simply does not rain. The last week or so has been something like this and it is this "acting up" of the sky that is causing some apprehension. Until a comparitively few years ago it was never deemed necessary to question as to whether this district would get sufficient rain, would it stop raining long enough to let the crop ripen before frost? was more of a problem. Times, customs and apparently even the weather must change. No, we are not going to make any weather predictions, this by popular consent is the prerogative of new comers and fools. We simply suggest that the district hope for the best and expect the worst—thus avoiding disappointment.

MONKEY BUSINESS—

MADISON SQUARE GARDEN in New York City was the scene of a recent scientific experiment in which the modus operandi included a box filled with sand, a rope, a pulley, a monkey and a circus trainer. Men have a habit of theorizing and sometimes proceeding without a basis of definite proof; but on this occasion a disputed theory underwent a visual demonstration before dozens of onlookers.

What happens when a monkey climbs a rope, threaded through an overhead pulley, with a box of sand of the same weight as the animal attached to the rope's other end? The conductor of a radio program had presented this problem to a contestant who had answered that the box would rise as the monkey climbed upward. Unfortunately, it was this reply which kept the man from winning the first prize.

Physicists and mathematicians throughout the United States volubly protested the decision; but still other experts upheld the judgment already delivered. Now when experts fail to agree, what should be done to arrive at the truth? Said the professor who had done the quizzing on the air-wave show: "We'll find a monkey and some sand and let the animal give us the answer."

At the appointed time professors from many universities appeared, but most of them were shy about expressing a definite opinion. Following the afternoon performance of a circus in the Garden came this show without additional charge. "Gratis" was the word for the monkey business.

Sam, the climber, came perilously near to making monkeys of the men watching him. For some reason he disregarded the commands from his anxious trainer and perversely climbed every handy thing but the dangling rope. He dashed the sand out of the box which had to be refilled and weighed again. Two attempts were declared false starts when a rechecking of the sandbox revealed it to be heavier than the monkey. The animal had been weighed in with a collar, taken off later.

On the third effort Sam climbed in perfect style and the box of sand rose to meet him. Thereupon the professor admitted his error in believing that the weight would move neither up nor down while the monkey ascended his end of the rope. He announced that the disappointed contestant would receive a belated award equivalent to the first prize given on the night of the broadcast. Was the man happy over this reversal?

"Well," he remarked as his thoughts turned toward a great English scientist and mathematician born almost 300 years ago, "I'm glad that Sir Isaac Newton's third law of motion is not unconstitutional."—Christian Science Monitor.

RUSSIAN WILL TRY RESURRECT HUMAN DEAD

MOSCOW, May 17.—Professor S. S. Bruchelenko, who once startled the International Congress of Physiologists at Moscow by resurrecting a dog after it had been dead for ten minutes, will shortly conduct more daring experiments in his new Institute of Experimental Physiology here.

The possible value of the professor's work in its application to human beings has led the Soviet government to give him unlimited facilities for the perfection of his methods.

His experiments are based on a method of artificial blood circulation and in a recent experiment he claims to have restored life to a dog after a lapse of 40 minutes.

Five dogs to whom he gave second life five months ago are stated to be still alive and healthy.

OCTOGENERIAN PREACHES HIS OWN FUNERAL SERVICE

COATESVILLE, Ind. May 17.—Wade Millman had the time of his life today—he preached his own "funeral sermon."

The 88-year-old eccentric farmer—minus a collar and tie, but wearing a striped shirt and an unpressed suit—became so worked up he squeakily sang a solo, "When the roll is called up yonder I'll be there."

"When my time comes all I ask is that they let me die unremembered and let me lie in my grave unmolested," he said, pausing to bite into an orange and take a swig of water from a medicine bottle.

Millman opened his "sermon" with the statement, "This is a very prominent occasion. There never has been such occasion in the world."

He stood erect at the pulpit. In front was his casket fashioned from a tree on his farm. Nearby were the pallbearers, who received $5 in advance. About 5000 persons attended.

"Columbus wanted to preach his own sermon. So did Napoleon and Napoleon's wife," he shouted, "but they didn't. I am."

He declared he never worried about anything, because worrying "makes you roll over and wear out the bed clothes."

"IRRESPONSIBLE" GOVERNMENT

Pages 109-10 of "A new History of Great Britain and Canada," one of our Alberta school textbooks, tell us that Canada finally achieved, after bloody rebellions and rotten-egg demonstrations, true "responsible" government in 1847. Meaning that the Ministers of the Crown were made responsible to the electors via their chosen representatives, the M.L.A.'s.

This is interesting to anyone who sat through the last session in Edmonton. The ministers of the Crown are supposed to do what the members want them to do. But when the unprecedented display of "school room" politics finally ended to resume again June 7, here is what we found.

The ministers of the Crown, the cabinet, had brought in a budget, providing for another tax increase of approximately 20 per cent. This was refused by the members. The budget has yet to be passed. And until it is, no special funds like that required for a general election can be passed. The province carries on, working from a hand-to-month existence for three months. (Any other cabinet, of course, would have resigned when this happened.) But that's not all.

The Attorney-General introduced a debt reduction bill. It got as far as second reading and hit a snag. It stands unfinished now. It provided for the man who owes money and the person to whom he owes it, the creditor, getting together and making an agreement acceptable to both of them.

Then the Minister of Municipal Affairs opposing his own cabinet colleague, the Attorney-General, introduced another debt reduction bill, which only got first reading. It stands unfinished today, too. It would provide, if passed, for a blanket reduction of 30 per cent of all debts, no matter whether the man who owed the money was able to pay or was not willing to pay, or what.

But both these bills failed to pass because the House knew the ministers themselves couldn't agree which one was wanted. The Cabinet finally, seeing this mess, brought in a moratorium——a bill to stop payment of all debts for the time being. This means that outside of Alberta people think that Albertans are either all bankrupt, or are "crooked" and don't want to pay their bills, even if they can. And it is only a temporary solution to this most important problem.

Where is the responsible government established in 1847, and made more binding in 1867 when the British North America Act was passed?

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

INDIGESTION

Everybody, at some time or other, has suffered from indigestion. It is, perhaps, the most common of all complaints, yet it is not a disease in itself. Rather is it a loose term with no definite meaning, for it is used to indicate digestive discomforts which may arise from a score or more of different causes.

The patient is conscious of pain, of bloating, or discomfort, of "heart burn" or acid eructations, of belching, of nausea, or of constipation. In one patient, a combination of several of these symptoms may be due to a gastric ulcer; the same symptoms in another may be due to a diseased gall-bladder; or to a type of appendicitis, or to a general sagging of the abnormal organs or to anxiety and worry. The experienced physician can usually find the cause although in obscure cases, sometimes only after careful X-Ray and other examinations and tests.

With gratuitous advice thrust upon one from every angle, including the urgent entreaties of well-meaning but uninformed friends, the sufferer is apt to try many useless remedies and, in the long run, spend considerably more money than were good advice obtained early and perhaps find the opportunity for a speedy cure irretrievably lost.

Sometimes the symptoms do yield readily to simple remedies. Over-acidity and certain kinds of pains may yield to baking soda, for instance, but the real underlying cause may go on undetected. In fact, acidity in the stomach is needed for digestion and its complete neutralization by alkalis only causes further indigestion.

Because of the danger of ulcers, cancerous growths, gall-bladder disease, appendicitis and other serious conditions, early, accurate diagnosis cannot be stressed too strongly. At the same time, one should not become a nervous wreck from worrying over these less common conditions for a great many cases of indigestion—the large majority—are due to simple causes and easily corrected.

Over-eating, rapid eating, bolting of food, over-seasoning, over smoking, unnoticed air-swallowing while eating, washing food down with liquids—all cause indigestion. Constipation may be the main factor. Sometimes roughage in food does more harm than good to those with sensitive "spastic" intestinal tracts. Each person must determine what should be avoided and should not let politeness override his judgment.

Above all, do not fear the truth. It is much more likely to allay rather than confirm your fears.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

HOME STILL THERE: GUARDING DOGS GONE

MONTREAL, May 18.—Content that his two bulldogs were at home against intruders, Alfrede Frechette went to the country for the weekend. His faith in the pets was somewhat shaken when he returned today to find someone had entered, rifled his home and stolen the bulldogs.

GEORGE COINS ARE SENT OUT FROM OTTAWA

OTTAWA, May 17.—Canada's new George VI silver, nickel and copper coins are now jingling in the cash registers and pockets of the nation, having been issued from the Canadian mint in three of the five series on May 17.

The shiny new coins have aroused favorable comment. Dies for the 50 cent and one dollar pieces have not yet been received but will be here shortly.

When the series is complete, it was made known today by mint master J. H. Campbell, it is his intention to make available through the Bank of Canada, specimen sets for collectors.

The new coins which began to make their appearance in general circulation Friday are copper cents, small, large nickels, dimes and quarters. They are the same size as the issue of the same coins which preceded them. The large cent and small silver five cent pieces have been abandoned although many are still in circulation.

For the silver dollar, first minted in Canada in 1935 to mark the silver jubilee of King George V, the only change will be on the obverse side which will bear the effigy of the present King instead of that of his father.

The reverse is a canoe manned by an Indian paddler and a voyageur, with an islet in the background on which are two wind-blown firs, and the aurora borealis streaking the sky.

Obverse of all the new coins are the same, a profile likeness of George VI facing the left. For the 50 cent piece the reverse bears between supporters the ensign armorial of Canada in a shield surmounted by the royal crown with well-spaced lettering for the value and the year, and Canada which appears on all the coins.

For the 25 cent piece the reverse is a caribou head with the value figures placed between the antlers. A fishing schooner is reproduced on the reverse of the 10 cent piece, a beaver on the five cent nickel with maple leaves while the copper cent bears a two-leaved maple twig.

The nickel and copper are smooth-edged and the others grained.

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name. Stubbornly refuse anything else. 25c.

5% PROFIT ON GOLD IS HERE PERMANENTLY

Declaring that the concentration of gold in the banks of Great Britain and United States, estimated an [illegible] ... in favor of world peace, Joseph Errington, president of [illegible] Lake Gold Mines, and [illegible] Toronto mining financier, expressed the view there would be no reduction in gold from $35 an ounce in an address before the Port Arthur Chamber of Commerce.

Mr. Errington who has just returned from an extended trip to the British Isles and South Africa, based [illegible] his own [illegible]

"Reduction in the price of gold [illegible] ... to be reduced. In United [illegible] ... If there [illegible]

[illegible] would be worked profitably in Africa was because of black labor. [illegible] Porcupine camp at 1000 and it takes [illegible] there. Not more than [illegible] of the Reef made any [illegible]

[illegible] Canada," he said. "We may be smart but not smart enough [illegible] production in twelve [illegible] You can't open up fifteen [illegible] months."

Mr. Errington gave his hearers some advice about speculation, urging them to resist the tendency to buy at the top and in fear sell at the bottom. An investment was all right, but a man had to be reasonable and [illegible] for himself. "All the governments in the world can't protect the public," he pointed out.

BOY 12 TAKES POISON DOSE

TROCHU, May 18.—Although Ted Koster, 12-year-old son of Mr. and Mrs. Rudolph Richter of Trochu is [illegible] of danger, mystery still surrounds the manner in which he obtained and took strychnine which, but for the united efforts of Drs. T. P. [illegible] and J. B. Snyder would undoubtedly have proved fatal.

While playing uptown with youthful friends the boy complained of feeling unwell and started for home. [illegible] gone a block when he [illegible] the doorway of his home lapsing into an unconsciousness immediately. Both doctors were called, and the boy was rushed to hospital where [illegible] stomach pump was used following the diagnosis of acute strychnine poisoning. The boy was in a dangerous condition for several hours and will be kept under observation for the [illegible] month.

[illegible] himself can give no explanation [illegible] how he obtained the poison, although he has given a full account of his actions during the day [illegible] time he collapsed, nothing [illegible] the source of the poison [illegible] of his playmates also [illegible] and the investigation still proceeding.

FISHERIES SKIPPER TOOK JOB TO HELP PALS POACH

MONCTON, N.B., May 17.—Admission by a former fisheries patrol [illegible] captain that he had falsified his reports was heard Saturday night at the final session of the Royal Commission investigating illegal lobster [illegible] smelt fishing.

The witness was J. Edward Kenny, Waterfront, P.E.I., captain of a P.E.I. B. No. 1 from Sept. 21 to [illegible], last operating out of Tig[illegible], P.E.I.

[illegible] took the job so all my [illegible] had been poaching with [illegible] could have a little comfort fishing il[illegible] [illegible] Cully declared.

[illegible] he made no attempt [illegible] poaching after his appointment. He and his brothers canned [illegible] catch in his father's fac[illegible]. He [illegible] the job as "a joke" [illegible] the fishermen were "having a [illegible]" said the witness. "I know [illegible] prior to my starting to poach [illegible] could not buy a package of tobacco."

WITNESSES IN FUR ROBBERY TRIAL LEAVE

W[illegible] in the trial of two men [illegible] connection with the armed robbery of the Hudson's Bay fur post at Fort Nelson last summer were flown to Prince George, B.C. Monday after[illegible] by Pilots Grant McConachie and Ernest Kubicek of United Air Transport from Fort St. John.

[illegible] of the robbery in which $12,000 worth of furs were taken from the isolated post and new [illegible] startled the whole north last July. Two company clerks were ordered by masked bandits to remain quiet for an hour after they left and were trussed up in the basement of the building.

When the clerks had gained sufficient nerve to attempt to free themselves they managed to work loose [illegible] the ropes and pushed up the trap door above their heads. A sudden clangour terrified them and they [illegible] where they were for another [illegible]. When they emerged they found the bandits had piled oil drums on the door which had tumbled with a crash when they moved it. Tommy Clarke, post manager was absent at the time of the robbery.

Pilot Sheldon Luck left Edmonton [illegible] for Fort St. John and will fly from there to the Omineca district [illegible] Fort St. John on charter for [illegible] B.C. police.

ALBERTA GIRL GIVEN THRILL OF CROWNING

LONDON, May 19.—Two Indian girls among the Canadian boys and girls that took part last night in the empire youth rally in the Royal Albert Hall, Nora Gladstone of Cardston, Alta. and Ida Vandall Neuf of Prince Albert, Sask., said the rally was the high point of their trip to the coronation.

They were impressed by the "greenness of England."

[illegible] Boswell, Nelson, B.C. said: "London has taught us a lot about the modern world but this night alone is an education."

The youngest Canadian girl attending was Penelope Chipman, 14, of Montreal.

The Canadians were members of the 1,000 school boys and girls from all over the empire brought to London to view the coronation procession and take part in the rally.

Those attending from outside the United Kingdom will be guests of various schools for two or three weeks before leaving for their homes. Plans have been made also to let them spend a brief vacation at the seaside.

BLUE SKEETERS CAUSE OF PANIC IN TRANSVAAL

JOHANNESBURG, South Africa, May 19.—The appearance of dark blue mosquitoes struck terror in a certain area of northern Transvaal, where a severe epidemic of malaria was already raging.

Local residents feared some new horror until the clerk of country store [illegible] something wriggling in an inkwell, discovered it to be full of mosquito larvae in which apparently they had bred.

Malaria is raging over a wide area [illegible] Transvaal, where the majority of [illegible] are laid low by the disease and few Europeans are still able to carry on.

All hospitals within the stricken area are filled to over-flowing, including large marquees erected in the grounds. In some cases private homes have been converted into temporary clearing stations.

EMBRYO THUG ASKS COP TO END CAREER

NEW YORK, May 19.—It seems that "Old Man Remorse" hit Harold Cohen 29 and as a result he was in the police lineup today charged with violation of the Sullivan Act.

His strange story came out when he approached Patrolman Ponce on a downtown street corner and said:

"Officer you had better take this thing and keep me out of trouble." The "thing" was a .32 calibre pistol which was empty.

Cohen explained he held up a man in a subway station and got $2 but the victim pleaded so touchingly for return of the money he could not refuse him and gave it back.

"I was afraid I might do something which I would later regret so I decided to give up the gun" he said.

TREASURE TROVE IS FOUND COUNTERFEIT

NEW YORK, May 17.—Three young adventurers on a driftwood raft found a "treasure" far beyond their boyish dreams on the Hudson River Sunday, and until an itinerant flower peddler refused a fistfull of it, their illusion was complete.

"Counterfeit!" sniffed the peddler when the trio came ashore to spend the 500 $1 bills found floating in two packages. He was right, though police described the spurious currency as better than average imitations.

PARALYZED GIRL RECOVERS WHEN ACCIDENT SHOCKS

BADFORD, Eng., May 19.—Cured by the shock of an accident, Anita Butcher, 22, who has been paralysed for four years can now walk again.

Miss Butcher fell down steps at the mill where she was employed in 1932 and severely injured her spine. She lost the use of both legs. Doctors held out little hope of her recovery.

Last November a truck ran into the spinal carriage in which her niece was wheeling her to the theatre.

Since then her progress has been steady. Today she can walk about unaided.

Social Credit Zone Meeting Well Attended

While Monday evening was an evening of a holiday, a very good number attended the Social Credit Zone meeting held at the Variety Theatre on Monday night.

The chair was taken by Mr. A. C. Dodds, who after a few brief introductory remarks, introduced the first speaker, the president of the Tofield organization, Mr. Johnston Ferguson.

Mr. Ferguson said he would first apologize for not calling the meeting sooner. According to arrangements made at their last meeting, this meeting should have been called in April. There was no use denying it, he said, a split had occurred in the social credit ranks, and after he had discussed the situation with others interested, he had decided to wait and see what would take place. He had found recently that when meetings like this was taking place, it was hard to get away from a debate as between loyalists and rebels. He really was against the word rebel as it signified rebelling against law and order and in this case it was not so, but just a difference of opinion. The speaker went on to relate incidents connected with the U.F.A. when bitter debate was smoothed out by a man with an "oil can" meaning diplomatic action and tactful language. He had followed, he said, the division in the present case and felt sure it could be straightened out, in fact was being straightened out. He was not, he said, interested in politics, social credit is not a political question, it is an economical one. Speaking relative to the fact that social credit had not yet been implemented, he said the premier did not know before the election that 65 per cent of the farms were heavily mortgaged and did not know that the government was in such financial straits. He had asked the premier if cutting debt was a part of the social credit plan and the premier had answered yes. Then why are we asking for a resolution supporting the governm't?

because, he said, they did not know how long social credit would take—in other words how long before dividends would be paid. The premier was aware before the 16 months was up he could not pay dividends, and he, the speaker, thought the premier should have been a little more candid with the government and then perhaps there would have been no insurgents. If the government were studied carefully it would be found they had done something, not only here, but caused other countries all over the world to think along the lines of financial improvement. There was no question in his, the speakers mind, that Social Credit can and will be done. It is up to the people, not the government. The people, he said, must be unanimous about it. He spoke at some length regarding resolutions supporting the government and also resolution dealing with the governments attitude toward the debt problem.

Mrs. McPherson, president of the Vegreville Social Credit Constituency organization, spoke briefly, saying in part, that she was both pleased and surprised to see so many in attendance on a holiday night. These zone meetings are being held in twelve zones throughout the constituency, and the resolutions passed would be embodied into one and presented at the constituency convention and given out over the air Sunday. She was still for the government and did not believe the insurgents were disloyal

LOCAL & PERSONAL

Miss J. Hennessey visited at the Green home for a few days last week.

Mr. and Mrs. Green and Miss J. Hennessey visited Viking over the week end.

Dercy Letourneau of Calgary visited his home here over the week end.

Blake Clutterham of Edmonton visited home folk over the week end.

Max Rogers of Edmonton was home over the week end.

Miss Betty Thompson of Ledue attended the school union dance held here last Friday.

Mr. and Mrs. Thompson of Leduc and son Harland motored to Tofield on Monday.

Mrs. J. Whyte is in an Edmonton hospital having undergone an operation.

Miss Isabel Robinson who is attending normal school at Edmonton was home for the week end and attended the school union dance held on Friday.

Mr. Alex Ross, creamery inspector, one time resident of Tofield paid an official visit to Tofield this week.

Miss Loret Ross left Sunday for Edmonton from which point, with her parents she will motor to Halifax, Nova Scotia. Miss Ross expects to be gone for two months.

Mrs. Firth left for Toronto last week-end where she will attend a conference of the Women's Missionary Society.

Miss Gwen Firth who has been attending business college in Edmonton returned home last Friday.

Miss Aileen Allen and Mr. and Mr. Provost and son visited at the Allan home over the week end.

A handkerchief shower in honor of Mrs. Burnett who is shortly leaving for a holiday in Eastern Canada was held at the home of Mrs. Ed Hicks on Tuesday. Cards were the order of the evening, three tables playing. A splendid lunch was served.

Miss Helen McCauley of the nursing staff of the Ponoka hospital is home for three weeks holiday.

A baseball game was played between Tofield and Bardo high school teams on Saturday last. The score was 11-7 in favor of Tofield.

Bill Swift of Camrose recently underwent an operation for appendicitis in the University hospital, Edmonton. Last reports were he was convalescing nicely.

Mrs. Schmaltz returned home on Saturday after being an inmate of Misericordia hospital, Edmonton.

Mr. and Mrs. R. Whyte of Wetaskiwin spent the week end at Tofield.

TOFIELD BASEBALLERS WIN FIRST MONEY AT RYLEY

On Monday the Tofield baseball aggregation took part in the Ryley Annual sports baseball tournament. They won their first game from Holden by a score of 10—4. In the evening they met Dodds in the final game for first money. At one stage of this game Tofield was on the short end of a 7—0 score, but holding their opponents scoreless, they gradually brought the score to 7—4. At this stage Burke went to bat with the bases loaded and knocked out a three bagger, scoring all those ahead of him. With the score tied, and new hope instilled into the Tofield crew they went on to win the game by a score of 11—9, thus winning first money.

On Sunday at Tofield there will be a game between the Pucksters and the colts, both local organizations. The game will be held in the afternoon at the exhibition grounds.

Children Do Well at Camrose Musical Festival

On Friday, May 21st, fifty-six Tofield children competed in the Annual Camrose Inspectorate Musical Festival. Eight hundred and forty children from sixty-five schools competed. Certificates were given for the following gradings: 70-80 per cent, Very Good; 81-90 per cent, Excellent; 91-100 per cent, Superior. Tofield secured a goodly share of certificates. In former years the First, Second and Third places only received certificates. It is anticipated that this new system will be much more satisfactory since competition is very keen.

The dramatization "Five who pass While the Lentils Boil" by Room III received an award of Superior and was presented at the evening concert in the High School Auditorium. Frances Hardy received the highest award in her recitation.

The staff and Board of Tofield School wish to thank all those who so kindly donated their cars to make the entries from Tofield so successful. They would also like to thank the accompanists for the music.

JUBILEE OF SPEED CLASSIC

The silver anniversary of the 500-Mile Race on the Indianapolis Speedway will be observed this year. The date is May [illegible]. As in former years, the famous Al [illegible], driving the newest Pontiac model, is making a [illegible] through the United States in the interests of the great racing classic. The actual trip of Mr. [illegible] covering [illegible] comparatively [illegible] Pontiac [illegible] the Speedway [illegible] Indianapolis [illegible] the Speedway [illegible] highways [illegible] with [illegible] last year [illegible] 115 [illegible]

THE AGE OF RUBBER

According to H. Eric Miller, chairman of the United Serdang (Sumatra) Rubber Plantations, took 375,[illegible] manufacture [illegible] whereas in [illegible] make [illegible] development of [illegible] Unfortunately the price at is higher, but [illegible] Mr. Miller [illegible] rubber roads would be cheaper and [illegible] safer.

CATTLE-DRIVING BY TRUCK

The [illegible] of [illegible] cattle [illegible] change. [illegible] cattle [illegible] on them [illegible] the highway to the market centre. But today the truck has shown itself to be so economical and so effective that it now transports a large percentage of all livestock. The U.S. Department of Agriculture report shows that during last year 56 per cent [illegible] half of all cattle and 47 per cent [illegible] marketed at the principal markets of the country arrived by truck. A similar change in method is noticeable in Canada, and Chevrolet has contributed greatly to this movement. More and more Chevrolet trucks were put into service in the Dominion's cattle-raising districts last year, sales figures revealed.

PEOPLE'S LEAGUE APPROACH POLITICAL GROUPS

Editor's Note: We have been requested to publish the following [illegible] ... [illegible] the proposals of the People's League to the other parties.

The People's League of Alberta [illegible] at Calgary [illegible] March [illegible] political party [illegible] government in Alberta [illegible] League would endeavour [illegible] act as a [illegible]

In the first place, the People's League is of the opinion that there [illegible] difference [illegible] average Liberal, the [illegible] All are [illegible] fight is going on [illegible] of the Province must suffer. The People's League, therefore, in an attempt to bring these [illegible] together has written to the secretary of each of the parties the following letters:

To the Secretaries:—
Provincial Liberal Association
United Farmers of Alberta
Provincial Conservative Association
Dear Sir:

At the March meeting of the Provisional Provincial Executive of the People's League of Alberta, the following statement of objectives was drawn up:

"The People's League of Alberta believes that political party [illegible] are preventing united action by persons holding as individuals the same views on the more important Provincial issues, and is a destructive force detrimental to the best interests of the Province. It is therefore abundantly clear that some unifying force is required to bring about sane, sound and progressive government. With a view to attaining this object the People's League of Alberta as a non-partisan organization offers [illegible] but [illegible] as soon as [illegible] this [illegible] effect [illegible] this statement of objective, our executive has decided to forward to the central executives of all political parties opposed to the policies of the present government a plan of action for the [illegible]

The People's League of Alberta, as a non-partisan organization, will not, if it can be done, enter the political field as a new party. Its members however feel that it is necessary in order to ensure the election of a [illegible] of reasonable and responsible men or party representing the [illegible] that all persons and organizations [illegible] good government [illegible] as far as Provincial [illegible] concerned. Accordingly [illegible] suggest that through [illegible] constituencies [illegible] conventions be held [illegible] understood that each [illegible] would conduct [illegible] as Independents [illegible] moderate and [illegible] and that each [illegible] the support of the People's League.

We [illegible] committee [illegible] executive [illegible] parties to work [illegible] of nominating [illegible] constituencies [illegible] discuss [illegible] broad principles of [illegible] People's League [illegible] the attached [illegible] although we feel that [illegible] dispute between [illegible] between the parties [illegible] League with regard [illegible] principles. The main [illegible] Executive of the People's League is that the policies [illegible] promises [illegible] fulfilment.

[illegible] events a [illegible] proposal and we [illegible] mentioned the [illegible] such a proposal.

[illegible] plan does [illegible] approval of your party, may we suggest that you submit an alternative plan for the [illegible] parties?

Kind [illegible] we desire to co-operate in those things which we believe to be in the best interests of the Province.

We would appreciate having a reply to this letter as soon as the matters set out herein have been considered by your Executives.

Yours truly,

PROVISIONAL PROVINCIAL EXECUTIVE OF THE PEOPLE'S LEAGUE OF ALBERTA

[illegible] that the League [illegible] party organ [illegible] only that the [illegible] forces in or [illegible] return of a major [illegible] reasonable men at [illegible]

Everything else has been tried—[illegible] give Alberta the [illegible] government she deserves. [illegible] the scheme for one election at least. If it works, and the [illegible] it will work, then Alberta's troubles are well on the way to solution. Think it over.

REINDEER HERD IS INCREASED BY THOUSAND FAWNS

OTTAWA, May 1[illegible].—The Canadian government's reindeer herd has wintered [illegible] and 1000 fawns have already been [illegible] this [illegible] was reported today by Dr. [illegible] Urquhart, government agent [illegible]

The herd was [illegible] Richard's Island on the [illegible] late [illegible] Fawning started April [illegible] [illegible] 1935 [illegible] arrived [illegible] miles [illegible] the Mackenzie Delta.

CLEAN PLUGS LESSEN COST

[illegible] spark plugs and [illegible] emphasized in [illegible] the AC Spark Plug division of General Motors, showing that the average cost of gasoline in countries other than U.S.A. is 36% cents per gallon. When [illegible] are dirty and their [illegible] waste of [illegible] results [illegible] cost [illegible] figures [illegible] and Turkey is high at 92 cents a gallon.

WOMEN HAD LOWER FLOOR IN TREE TOP RESIDENCE

CANBERRA, May 19.—These oddities of life among the aboriginal natives of Papua were culled from the annual report of Lieut.-Governor Sir Hubert Murray to the commonwealth government.

The first native appointed a village constable in Kerema district arrested his own ward for murder.

On a tributary of the Purari river a patrol found a two-storey house 75 feet long built in living trees. Women occupied the lower floor and men the upper.

Women on the upper waters of the Bariji river cut three foot lengths of bamboo. These they fill with food, cork up one end and put in flames. When the bamboo blackens and begins to crack they regard the food as cooked.

At the village of Marau, pigs have abnormal feet, apparently because they walk on soft sand. On each foot are long horn-like growths five inches long and turned up at the tips like a Turkish slipper.

DOUK BOY 16, ADMITS TRAIN WRECK PLANS

NELSON, B.C., May 19.—British Columbia police in this West Kootenay centre said today they had been told by Constable J. W. Hooker of the Grand Forks division that a 16-year-old Doukhobor boy had admitted piling three railway ties and seven telegraph pole cross-pieces on the main line Canadian Pacific Railway tracks near Grand Forks, 80 miles southwest of here.

Constable Hooker said the lad was "quite frank" in his admission and accompanied the officer to the railway yards to explain how he placed the material on the rails. Hooker said the boy accepted full responsibility, claiming he had not received assistance from other persons.

The track destruction was discovered early yesterday morning near the city limits. A railway sign had been pulled down, a danger signal damaged and a coal-oil lamp broken and placed between the tracks with a bundle of [illegible] soaked cotton waste.

POOLS SEEK WHEAT BOARD WITH SELLING OFFICES OVERSEAS

(By Sam Ross)

Regina, May 22.—Suggestions the commission seek development of overseas markets by visiting Great Britain, Ireland, and European countries, arguments for and against wheat boards and criticism of wheat pools were received by the Turgeon royal grain commission during its sittings here last week. The commission is expected to adjourn at the end of the week until September [illegible]

On behalf of the Saskatchewan government, Hon. George Spence, minister of agriculture, recommended the commission visit the Old Land countries with a view to developing sales of Canadian wheat. A satisfied customer was the best way to retain markets and learning of requirements at first hand was the best method of approach, Mr. Spence suggested.

Returning to the witness stand after giving some evidence the week previous, Hon. W. R. Motherwell, M.P. for Melville, urged the present wheat board be authorized to receive and handle wheat until the present inquiry report is made. James G. Knox, Tuxford, president of the Saskatchewan association of rural municipalities, submitted a resolution asking for appointment of a wheat board.

Nine farmers opposed all forms of [illegible] marketing agencies and [illegible] the open market and futures methods of trading. Some of them recognized the right of others to voluntary pools and boards but declared they wanted to retain their individual liberty to sell their grain as they wished. Private grain companies, it was contended, had given good service.

The nine were George W. Stock[illegible] of Carlyle, Harold McNally of Regina, L. R. Zurowski of Southey, T. A. McCusker of Regina, G. F. [illegible] of Regina, W. E. Jones of Yellowgrass, Joseph Marshall of Yellowgrass, W. J. Orchards of Tregarva, and Ira B. Cushing of Bechard.

Criticism of the wheat pools came from William Robinson, a farmer of the Duna district, former director of the Saskatchewan Co-Operative Elevator Company and former delegate to Saskatchewan pool meetings. He declared the pools failed to evolve a marketing system superior to the open market and futures method of trading.

Mr. Robinson urged reorganization of the pools as co-operative elevator companies and establishment of a federal department to foster wheat sales in foreign countries. He suggested a government guaranteed minimum wheat price which, he contended, could be paid through present facilities. He had no objections to voluntary boards or pools and thought government supervision of the Winnipeg Grain Exchange should be undertaken to prevent unwarranted speculation and possible price manipulation.

Recommendations of the Manitoba, Saskatchewan and Alberta wheat pool organizations were submitted by J. H. Wesson, president of the Saskatchewan pool. They included a national wheat board to handle the entire crop with a subsidy to growers in times of depression.

The board would pay an initial and interim payments, pay a uniform price to all growers, establish overseas offices to develop export sales and keep the door open for co-operation between exporting and importing countries in dealing with world problems. A processing tax of [illegible] cents a bushel netting $12,000,[illegible] a year on home-consumed wheat would be one means of partially setting up a subsidy fund, he suggested.

There must be either the futures method of trading or a wheat board handling all grain, said Mr. Wesson under examination. A board could not achieve any more than a wheat pool in normal years but he thought it would be more effective in abnormal years. No board could alter the laws of supply and demand, he admitted, [illegible] price competition [illegible] board were established and the Winnipeg Grain Exchange closed, then the Liverpool market would be the main price factor.

When it was suggested use of the futures market by the pools was not consistent with their criticisms of that method, Mr. Wesson said the pools did not use the market because they liked it. The Winnipeg futures market was used because under the circumstances, the pool officials believed it in the interest of producers. He recognized there were farmers who preferred to sell their wheat on the open market and opposed a compulsory board.

Urging a wheat board and a minimum price, Walter E. Wiggins of Winnipeg submitted the views of the Communist Party of Canada. A marketing board could not cure all [illegible] he said. Eventually farmers would re-establish the pooling system and take full charge of marketing, he declared.

SOAKING RAIN GIVES AID TO ALBERTA CROP

Empire Day for western Canada and especially Alberta was an occasion for greater than usual rejoicing, following week end rains that brought renewed vigor to greening crops freshened the parched prairies in sections that have not felt rain for several years.

Drenching rains soaked this province Saturday night and most of Sunday, the heaviest being at Lethbridge where an inch of precipitation was recorded.

Edmonton's rain began at 5 p.m. Saturday and continued intermittently until 1 p.m. Sunday, with 21 of an inch being measured on the gauge.

Heaviest fall of the week end was reported from the Lethbridge district of southern Alberta where an inch of rain fell since Saturday morning. The rain was steady in southern Saskatchewan but not so heavy, Swift Current reporting a fall of .[illegible] inches in five hours and Shaunavon, centre of one of the worst drought districts had .35 inches.

The Saskatchewan rains were good from Regina and Moose Jaw north but the southeastern portion of the province was missed with no rain reported from Weyburn east.

NEW TILLAGE IMPLEMENT TRIPLES SUBSOIL STORE OF RAIN FOR FUTURE

MINOT, N.D., May 25.—A newly developed farm tillage implement, which tests have shown, doubles or triples subsoil storage of rainfall for future needs, was watched with increasing interest today by wheat farmers.

Lack of moisture during the growing season long has been one of the principal worries of plains state farmers.

With this in mind engineers designed the Basinlister, which by an ingenious arrangement dams the furrows at intervals of about every 10 feet, creating thousands of shallow holes in a field—all potential mud-puddles, ready to receive and hold the rain water until it drains into the [illegible]

Immediately after harvest season last year agricultural engineers came into this and other plains state areas and fields were basin listed. Within recent weeks holes dug in these fields have revealed moisture to a depth of 40 to 50 inches, compared to four to 12 inches where no attempt has been made to store the rainfall.

Stands of wheat on basin listed fields are reported in excellent condition through the area, excepting the "dust bowl" where blowing dust cut the young plants to pieces or smothered them.

PET GOOSE HEARS CALL OF THE WILD

RIMBEY, May 25.—T. N. Wright, who farms one-half mile south of Rimbey, is this week lamenting the loss of his pet wild goose "Cousin" who soared away early Wednesday morning and has not yet returned.

[illegible] joined the flock of tame geese at the Wright farm on October 16, 1931 and since then has been as much a part of the flock as any of them, feeding and splash-bathing just as they did.

Last spring, when wild geese were much in evidence Cousin returned from a flight, accompanied by a mate. The new-comer stayed for two weeks and then apparently unable to persuade Cousin to elope deserted him and went back to her wild haunts.

Again this spring Cousin has shown an inclination to rove, and has spent much of his time soaring aloft, often at a distance, but has, until Wednesday always returned by nightfall.

Whether he has met with foul play or found a new mate is a matter for speculation but Mr. Wright is broadcasting an appeal for any information concerning him. Cousin is gleaming white with black tipped wings, is slightly smaller than the average wild goose and is not leg-banded.

ALBERTA ENVOYS AT YOUTH CONGRESS

TORONTO, May 19.— About 1500 delegates will attend the Canadian Youth Congress three-day convention at Montreal May 22-24, headquarters of the organization estimated here today.

British Columbia will be represented by 22 delegates, Alberta by 25, Saskatchewan 15, Manitoba 40, Ontario 600, Quebec 850 and the Maritime provinces 50.

IMPERIAL CONFERENCE—

(Locally Contributed)

FOR THE past week the news has been carried to us of another Imperial Conference. This year marks the half century mark since the first Colonial Conference was held. At that time the experiment was tried in the year of the Golden Jubilee of Queen Victoria's reign.

The half century that has passed since this has been noticeable in many ways. At the first Colonial Conference the only Dominion in the British Empire was Canada. To-day there are Canada, Australia, New Zealand and South Africa. India still has a unique status, differing from the rest of the Dominions. No longer is the conference a "Colonial Conference." When Rt. Hon. Joseph Chamberlain called that conference, we were, in the eyes of Downing Street, a colony.

This change that has taken place can be classified into three stages. There was first the "Colonial" stage which reached its zenith at the time of the conference in 1897. This was called at the time when the colonies were all represented in England for the Diamond Jubilee of Queen Victoria's reign. That conference really marked the step from Colonial conference to Imperial conference. During the nineties, there had been a continually increasing imperial feeling. The high point of this was reached at this jubilee. It was accompanied by much flag raising and drum-beating. Then it was that Kipling was the poet laureate, if not in name certainly in actuality. It was then that one heard of the white man's burden and the necessity of ruling the lesser breeds of men. Rule Brittania was the popular song of the day.

A movement was started at that time for an Imperial Parliament. This was to include all the chief parts of the Empire. The idea was carried along until 1911. The plan was put before the Imperial Conference of 1911 by Sir Joseph Ward, of New Zealand. It was squelched by Sir Wilfred Laurier, of Canada.

The third phase of this development came with the conclusion of the Great War. At the Peace Conference, Sir Robert Borden took the attitude that, as Canada's sons had won, on the battlefields of France the right to be given the status of a nation, this should not be denied them by the mother Country. In the League of Nations Canada obtained this status. The other Dominions of the British Empire were given the status of lesser of nations of Europe. Out of this movement came the third stage of the Imperial Conferences. The Dominions of the Empire were to be regarded as parts of a commonwealth of nations. This was finally recognized by the Statute of Westminster, in 1926. This Statute was passed in the British Parliament after the Imperial Conference which was held in England in that year. By this statute the King became the only link between the Empire's parts.

This is only one further example of the unreality of the British Constitution. On the face of the Constitution it would appear that the British Parliament has the last say in all our legislation. All acts passed by our parliament must be referred to the British House for approval. As a matter of fact on only two or three occasions since Confederation has there been any question of changing the acts as passed by the Dominion government. Again, over the Supreme Court of Canada there is the Judicial Committee of the Privy Council. As a matter of fact, all this Council hears are cases involving the validity of the laws as passed by the governments of Canada. It is recognized more because of its excellence of judgment than by any feeling of subservience to the British Judiciary. In the matter of treaties with other nations the only restrictions that are placed are that they must not discriminate against other parts of the British Empire. Thus the only real tie binding us to Great Britain, or the other parts of the British Empire is the Kingship.

When one looks over the personnel of the Imperial Conference of 1937 one is struck with certain pertinent facts. Rt. Hon. W. L. MacKenzie King is the grandson of a man who was a rebel in 1837. Another representative for Canada is Hon. Ernest Lapointe. He is a descendant of a race who were conquered in 1759. From South Africa comes Generals J. B. M. Hertzog and Jan Smuts, both of whom were leaders against the British in the Boer Wars at the end of last century and the beginning of this century. Australia is represented by Hon. J. A. Lyons, while New Zealand has Hon. M. J. Savage. These two men are descendants of Irish Fenian refugees who emigrated from Ireland. These are the men who are sitting around a conference table with turbanned Indians to decide upon the policies to be used in governing a fourth part of the world's people.

While the one desire common to all of them is peace, there are forces at work in the world today which make it imperative that defence must be strengthened. This defence is necessary to show the world that peace must be maintained. The question then, before the Imperial Conference of 1937 is: How can the defences be built to their maximum with a minimum of over-lapping and cost? How far must each nation of the commonwealth be expected to share? Each nation in the commonwealth has certain problems that must be faced. In Canada, there is a large proportion of the population made up of French Canadians. They are quite loyal to the crown. However, they are opposed to any further expeditions out of our country to fight in wars of Europe. No Canadian delegate can overlook this fact. When it is realized that last year there was over $500,000,000 worth of trade carried from Canada and to Canada by ships, it can be readily seen that some protection to our shippers and traders must be maintained. With our huge navy of four ships it can be seen that either we must build a navy or co-operate with Great Britain to look after our rights and the disciplining of our trade routes. For our own security, then, we must stand by Great Britain.

South Africa is a worried spectator of the attempts of Italy and Germany, to wrest colonies in Africa. They must face the fact, that if Germany regains its lost colonies they will have dictatorship at their very doors. On the other hand Mussolini offers still less hope of democracy. The Nationalist movement which was so prevalent a few years ago in South Africa has been submerged by fear of these things. They, too, need the co-operation of Great Britain.

So much has been said of the yellow peril in the Pacific, that little needs to be added to show the anxiety of Australia, and New Zealand. The Chinese, being a peaceful people and anxious to settle questions by arbitration, called on the League of Nations to settle their disputes with Japan. As a result they lost Manchukuo. Japan, on the other hand intends to capture the whole of the Eastern coast of Asia. If nothing is done, where will Australia and New Zealand find themselves? In addition these two countries would like to have more markets for their produce. These things then must, of necessity, be uppermost in the minds of the delegates of the Antipodes. Premier Lyons has suggested a conference to bring about a regional understanding non-aggression pact to replace the Washington agreement and bring about more friendly relations between Japan, the United States, Great Britain, and interested Dominions. If the conference does nothing more than this it will be worth the effort that has been spent in coming together.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MISSED TUBERCULOSIS

People may have tuberculosis and not know it. In other words, tuberculosis is often missed. Among the patients who are admitted to Sanatoriums for tuberculosis there are always a good many who are what the doctors call "advanced" cases. What does that mean? Generally they have had tuberculosis a long time, but it had not been noticed. It had been missed.

It should not have been missed. But it was, and still is, in spite of all our work.

The late Doctor D. A. Stewart, one of the best authorities in Canada [illegible] tuberculosis, said that one hundred middle-aged men who had tuberculosis were studied and it was found out that on an average they had had the disease for eight years before they thought they were sick enough to go to the Doctor.

They should have known sooner. Either the man has felt tired—tired all the time, tired when he wakened in the morning and tired all day, or else he has seemed to have lost energy and vim and initiative. He has not been able to "get into the game" as he used to do.

Or else he has lost the good colour he used to have. He used to be sunburned in summer, but this summer he has been pale. His good red blood which used to give him the colour in his cheeks, is not as red or as good as it used to be.

Or else he has lost weight. His weight was about eight [illegible] year, but he has lost five or ten pounds since then.

He has had a little short cough in [illegible]

[illegible]

The safest procedure is to have a [illegible] medical examination [illegible] X-ray [illegible]

Questions [illegible] addressed to [illegible] Canadian Medical Association [illegible] Street, Toronto, will be [illegible] answered personally by letter.

TRIPLETS WILL WED IN ONE CEREMONY: 2 BROTHERS GROOMS

WATERTOWN, N.Y., May 1[illegible].—Triplet [illegible] of Mr. and Mrs. William [illegible] will become brides in one ceremony June [illegible] and two of the three bridegrooms are brothers. Inez Zehr will wed Francis Kloster, Dorothy Zehr will wed Sherman Kloster and Doris will marry Dewey [illegible] of Lyons Falls.

The girls are 24. Three of their sisters will attend as bridesmaids. The brides will be gowned alike.

30-HOUR WEEK IN U.S. LABOR ROOSEVELT PLAN

WASHINGTON, May 25.—Preference for setting [illegible] maximum work week for United States workers at 30 hours was expressed today by Chairman William Connery of the House Representatives labor committee [illegible] arranged [illegible] consideration of the Roosevelt [illegible] wage and [illegible]

"Both chairmen [illegible] of the [illegible] committees [illegible] for a 30-hour week," said Connery, Massachusetts Democrat. "If necessary, though I would go as high as 40 hours."

"TO LONDON TO SEE THE QUEEN"

Bound for London and the colourful ceremonies attendant upon the celebration of the Coronation of H. M. King George VI, 156 High School girls from Canada and Newfoundland sailed from Montreal Friday, April 30, in the Canadian Pacific liner Duchess of Atholl.

Travelling under the aegis of the Overseas Education League the students start their tremendous adventure by viewing the Coronation procession from a stand in Hyde Park. Then will follow in quick succession an Empire Youth Rally at the Albert Hall, May 18, the [illegible] of Youth to be held in Westminster Abbey which will [illegible] the Coronation [illegible] at which the Archbishop of Canterbury and Dean of Westminster will speak [illegible] London [illegible] weeks [illegible] England [illegible] schools, and two weeks sea bathing and hiking interspersed with lectures by [illegible] British authors at Eastbourne. They return to Canada [illegible] the Empress of Australia [illegible] Southampton June 26 arriving at Quebec July first.

Every province of Canada is represented in the party which represents [illegible] of Canadian students. [illegible] equal number of boys sailed [illegible] earlier and will return [illegible] the Montcalm from [illegible] June 25 arriving at Montreal [illegible] Educational authorities throughout the Dominion co-operated in the selection of the students. Students who were unable to leave [illegible] for the coronation will have an opportunity of visiting the country during [illegible] Those who leave in the [illegible] of Australia July 2 [illegible] tour of Scotland, England and Germany, and girls specializing on Great Britain, sail from Montreal the same day aboard the Duchess of Bedford. Each tour will be under the direction of the Overseas Education League.

SOCIAL CREDIT ZONE MEETING WELL ATTENDED

(Continued from front page)

to social credit.

Dr. McPherson M.L.A. said he was pleased to again be in Tofield and to see [illegible]. As a Board [illegible] to say [illegible] the [illegible] difficulties [illegible] to have [illegible]. No person has a right to do this. They wanted to get away from the present financial system which was a debt creating system. The colossal debts of present day civilization will never and cannot be paid. The speaker spoke at some length on the split [illegible] suggesting that it was the result of the work of those who desired the downfall of the government. He knew whereof he spoke as he had sat in [illegible] that [illegible] had been made to wean members away from the government. It was wise, he said, sometimes to keep our own counsel. This he had done, [illegible] was able to understand the whole situation from beginning to end. Mr. Hargraves was reported as saying in Ottawa that if the premier resigned [illegible] ago to [illegible]

[illegible] breaking of the payments of dividends he said he was not sorry himself if they were not paid in ten [illegible] smaller [illegible] perhaps. [illegible] credit included other things. [illegible] lends. In order to carry out social credit all [illegible] people would have to be of one [illegible]. When the people were asked [illegible] sign up it was found that they were not. When the signup [illegible] was on last fall, manufacturers, wholesalers, jobbers, etc., [illegible] Finance told them [illegible]

[illegible] of the past three years [illegible] the land [illegible] farmers of the province [illegible] explained that the government [illegible] care to see that [illegible] when the debtor [illegible] than the creditor. He [illegible] some of the administration of the Farmer and Creditor Arrangement Act saying that [illegible] the mortgage companies. The Alberta Act had been declared [illegible] If this [illegible] takes. [illegible]

Alberta debt act was declared ultra vires, the government had to [illegible] a moratorium. This was hard on some people but they had to take it as well as the other fellow. If matters became worse they [illegible] interest and [illegible] prior to 1932. The moratorium [illegible] until July 1st. He [illegible] would be extended until [illegible] He did [illegible] but if the government was defeated, social credit would be defeated for 20 years. The eyes of the world are on Alberta. Finance is looking towards Alberta and why are they fighting social credit? When social credit is established here it will sweep across the country.

A resolution by Mr. Edwards was [illegible] but was incorporated into a general resolution supporting the [illegible].

Four resolutions were then passed.

A resolution endorsing the premier [illegible].

A resolution endorsing the reduction of debts.

A resolution endorsing the "Clover Bar" resolution (endorsing the government).

A resolution instructing the M.L.A. [illegible]

The [illegible] had [illegible] with some government farm credit organization and was sponsored by Mr. Ferguson.

DOG'S BARKING PLAYS PART IN RESCUE 2 LIVES

OTTAWA, May 25.—The barking of a [illegible] dog early today played a prominent part in the rescue of [illegible] from drowning in the Ottawa river.

[illegible] and Gervais [illegible] were in a home made motor [illegible] and [illegible] Lemoine endeavored to start the engine it blew up, throwing both men into the water. David Seguin, operator of a ferry four miles east of here, awakened by the barking of his dog, put out in a rowboat and found Gillisle clinging to an air cushion, while Lemoine had swum to shore.

SALVATION ARMY URGES EMIGRATION

LONDON, May 25.—The Salvation Army today presented a memorandum to members of the Imperial Conference. It dealt with empire emigration and settlement, calling for early renewal of such movements of people from Great Britain on a large scale.

UNIVERSITY OF ALBERTA BENEFICIARY OF JOHN D.

NEW YORK, May 25.—John D. Rockefeller, sr., 97, who died yesterday at his Florida home gave away during his lifetime more than $500,000,000. Included in the total was a gift to the University of Alberta.

"I believe it is a duty," he said, "for a man to get all the money he honestly can and to give away all he can."

Rockefeller's giving was planned. Practically all his philanthropies were made through five great channels [illegible] play a definite part in contributing to a planned investigation for an improved civilization.

In round numbers, Mr. Rockefeller's large contributions totaled [illegible]. They included Rockefeller Foundation, $250,000,000, General Education Board $130,000,000; Laura Spelman Rockefeller Memorial [illegible]; Rockefeller Institute for Medical Research $60,000,000; University of Chicago $35,000,000; American Baptist Home Mission Society [illegible]; American Baptist Foreign Mission Society $5,750,000; Ministers and Missionaries Benefit Board of the Northern Baptist Convention $6,500,000; N.Y. Chapter American Red Cross $250,000; University of Alberta, Edmonton $500,000.

ALBERTA MAN, WORLD CHAMP RIDER, KILLED

HAYWARD, Calif., May 25.—Pete Knight, 34, of Crossfield, Alta., world champion bronc rider and [illegible] all-round cowboy champion, was thrown and trampled to death [illegible] before 5000 persons at a rodeo here yesterday.

He was tossed over the animal's head as it reared and plunged. One of its hoofs came down on his body. Knight died shortly afterward.

He was one of 100 nationally-known cowboys participating in the finals of the 10th annual Hayward rodeo. Knight had ridden the horse, Slow Down, eight or nine times.

Knight was widely known in the United States where for 10 years he had won most of the major bronc riding events.

His former title of all-around cowboy champion is held by Johnny Bowman, Oakdale, Calif., one of the contestants here.

Two months ago, Knight and his wife established their home in Hayward.

LINDY REVEALS SON WAS BORN OVER WEEK AGO

WEALD, Kent, May 25.—Col. Charles A. Lindberg today told United States embassy officials in London by telephone the closely-guarded secret of [illegible] Mrs. Lindbergh [illegible] week ago.

There [illegible] friends to [illegible] details and [illegible] "Longbarn" [illegible] the Kentish hills. Local authorities said the baby [illegible] but the couple [illegible] weeks for registration.

[illegible] were the baby was [illegible] England. The vicar of Weald [illegible] "understood" "there has been a birth, but not here."

BRUSSELS, May 25.—Fire destroyed today the stratosphere balloon in which Dr. Auguste Piccard and Max Cosyns, who first invaded the upper layers of air, planned to make a new ascent.

AMISK CREEK

Nearly everyone around here has finished their seeding except perhaps for a small amount of greenfeed. The farmers are feeling quite contented after the nice rain we had this week end.

Mr. A. Patterson and Emil Vangaard motored to Youngstown in Southern Alberta a short time ago. Mr. E. Vangaard remained at his farm there and Mr. A. Patterson returned the next day. They report it as being very dry there.

Several from here attended the Sons of Norway festival held in Ryley on Monday evening, May 17th.

Ruby Berg from Edmonton spent Sunday and Monday at her parental home here, returning Monday evening by train.

Miss Edna Moen spent several days in Edmonton last week visiting with her friend R. Smeelie.

Agnes and Hennie Annobo spent Sunday and Monday at their home here.

Mr. and Mrs. J. Holtie and son were week end visitors at the C. Erickson home.

Mrs. P. O. Flaaten visited at the J. Moen home in Bruce on Wednesday of last week. On the same afternoon a number met at the cemetary and cleaned it up and planted some plants.

Hearty congratulations to the Teacher and children of our school who obtained prizes at the Coronation day in Tofield.

The Amisk Creek school children visited the Ingram school to play a friendly game of ball on Friday last. Ingram had the long end of the score.

Mr. and Mrs. Derdock and children were callers at the P. O. Flaaten home one evening last week.

Anthony Lefro from Viking was a visitor at the Berg and Flaaten homes last Monday.

Those visiting the city since my last correspondence are Mr. E. A. Moen, Mr. A. Erickson, Mr. and Mrs. R. O. Berg and Mrs. P. O. Flaaten.

ROCKEFELLER DIES IN FLORIDA HOME IN HIS 98TH YEAR

ORMOND BEACH, Fla., May 25.—John D. Rockefeller sr., founder of one of the world's most colossal private fortunes and benefactor of humanity died in his 98th year Sunday at his winter home, "The Casements." His physician, Dr. Harry I. Merryday, attributed it to sclerotic myocarditis, a hardening of the heart muscles.

For the man who had fought his way up from the farm, who had seen wars and panics, booms and depressions, it was a peaceful, painless death.

Unexpectedly—he had been in comparatively good health since coming south last October—he drifted off into a coma at midnight.

When Dr. Merryday arrived Rockefeller was unconscious. Gradually his pulse grew weaker, finally stopped and the man who pyramided his savings from a $4.50 a week job into the Standard Oil Trust which once controlled three-fourths of the United States output, was dead.

He once wrote:

"I believe it is every man's religious duty to get all he can honestly and to give all he can."

True to the credo, he bestowed more than $500,000,000 on carefully chosen philanthropies, transferred much of his holdings to the present head of the clan, John D. Rockefeller Jr., and died leaving what a family spokesman described as a "relatively small, very liquid" estate.

Plans were made to return the body to the Rockefeller estate, Pocantico Hills, Tarryton, N.Y. for funeral services, attended only by members of the family. Burial will be in Cleveland, where Rockefeller began his business career as a $4.50 a week bookkeeper's assistant in 1855.

In addition to his son, the immediate survivors include a daughter, Mrs. E. Varmalee Prentice of New York, eight grandsons and three granddaughters.

Rockefeller had not been taking his usual rides in his automobile on the beach and through the country lately but this occasioned no speculation because invariably in other years Rockefeller has remained at The Casements for a two week period before attempting the long ride north. Plans this year were for Rockefeller to return to his Lakewood, N.J. home on June 1.

When Rockefeller celebrated his 97th birthday last July 8 at his estate in Lakewood, N.J. he appeared serenely confident he would carry out his prediction of several years ago that he would live to be 100. He celebrated the milestone quietly with a few members of his family and intimate friends.

"I know I will live to be 100 just as I predicted several years ago," he was quoted as saying then.

The care and attention to detail which he exercised to amass what was popularly supposed to be the largest fortune ever controlled by one individual was directed in later years to prolonging his life.

He planned his fight against infirmities of old age as carefully and as methodically as he had mapped out business coups.

As the years passed the millionaire curtailed his activities to fit his waning strength.

TOFIELD STUDENTS UNION HOLD SUCCESSFUL DANCE

The Tofield High School Students Union held their high light social function of the year in the form of an invitation dance at the Variety Theatre on Friday night last. There were quite a large number present and a delightfully pleasant time was spent. At midnight the usual lunch was served dancing being resumed shortly after. The music was by the Melody Makers.

DUAL FAREWELL PARTY

A dual farewell surprise party was held at the curling rink hall on Wednesday night, the guests of honor being Winnifred Worton and Kenneth Munro. Winnifred Worton left Thursday evening for Banff, Alberta, where she will be connected with the Crag & Canyon, Banff's newspaper. Kenneth Munro is leaving soon for Vancouver, B.C., where he will work with a lumber firm. Mr. Machtmes, on behalf of those present presented both parties with farewell gifts, to Winnifred Worton, an exquisite white handbag and to Kenneth Munro a splendid shaving set. Both recipients suitably responded, expressing their grateful thanks for the company's thoughtfulness and generosity. Dancing was the order of the evening and a most enjoyable social time was had by all. Music by the Melody Makers assisted by the Edwards Bros.

TOFIELD H.S. GIRLS' SOFTBALL TEAM LOSE TO RYLEY IN KEENLY CONTESTED GAME

The Tofield high school girls' softball team competed at the Ryley Sports on Monday the 24th. For several innings of a hotly contested game they were ahead but lost eventually by the score of 15—11 to Ryley. The latter team won the second and final game against Holden by a score of 12—8.

TRACK MEET FRIDAY

The highway 14 School Track Meet will be held at Bruce on Friday the 28th. Approximately 40 children from the Tofield school will compete. Other winners of the eliminations from surrounding districts will also be at Bruce.

TOFIELD BROADCAST ON C.J.C.A. INTERESTS MANY

Through the enterprise of the makers of Wakefield Castrol Motor Oil, Tofield and district residents were able to hear a dramatization of some of the early scenes in the town's history. The name Tofield as is well known was taken from the late Dr. Tofield, a pioneer settler here. The broadcast reviewed Dr. Tofield's early life in England and his journey from Winnipeg to Fort Edmonton, his services in the Riel rebellion and his subsequent settling in the Beaver Hills district which later became the Tofield district. Here he ministered to the sick assisted by his first wife and later by his second wife who is with us still, and who can recall many stirring stories of nursing under primitive pioneer conditions. Mrs. Clutterham and Mrs. H. E. Rogers are daughters of the first Mrs. Tofield and the Doctor, and Mrs. May Simmons a daughter of the Mrs. Tofield now living. Mr. A. J. H. McCauley was given mention as was also the coal mining enterprises just south of town. In the hall of sport fame mention was made of Laurie Scott, former Tofield hockey player who went into the western professional league and from there to the National League playing with the New York Rangers. Necessarily limited to 15 minutes the broadcast, historically speaking, was not wholly complete, but those residents of the district hearing it derived much pleasure from it.

NEWPORT, R.I., May 26.—Harbor craft and factories tied down their whistles when T. O. M. Sopwith's Endeavour I, after 1000 miles of lonely sailing sometimes in gales, reached this port from Gosport, Eng.

LINDBROOK

The crops are in and up here and not looking so bad either, thanks to the recent rains. Sheep shearing is in swing now and to judge by the cream trucks the cows are on the job too.

The Lepine family have moved to Edmonton as is also their house which went up in sections on a truck.

The Sutton well drilling outfit is busy in the district now. They have sunk a well for Mr. J. H. Brown and are now drilling one for Mr. Bracegirdle just west of the store here.

Miss Dena Simmons of Forestburg, Alta., is visiting her friend, Miss Yvonne Phipps who is teacher here. She is staying at the home of Mrs. E. W. Hooper of Lindbrook.

The monthly meeting of the LCC was held last Wednesday at the home of Mrs. T. Gonsaki. It was here that the Club was started and so it seems here endeth the first round and everything going fine. Good luck to you ladies and best wishes for another successful year.

A meeting of the local Social Credit Group was held here last week but the members on hearing that the member for the constituency was speaking in Tofield, decided to journey there to hear him and also Mrs. MaPherson who gave an address as well.

Lindbrook school children attended the impoterate track meet held at Bruce last Friday. The children were very successful too winning:
1st prize, relay race, junor girls.
1st prize broad jump, boys 9 yrs. and under.
3rd prize 60 metre dash, boys 9 yrs. and under.
This entitles the two first mentioned to partake in the Camrose track meet June 4th. Olympic stuff, eh.

LAKESHORE

Mr. and Mrs. J. B. Warner and family were visitors to the city on Friday.

The Ladies' Aid met at the home of Mrs. Booth on Wednesday, May 26th. The program consisted of items by the school children, with the object of entertaining the mothers of the district.

Mr. and Mrs. Ted Grey and children were guests of Mr. and Mrs. Lester Noland on Sunday.

Mr. and Mrs. T. D. Ferguson and Lloyd were guests of Mr. and Mrs. Russel Ferguson on Sunday.

Mr. and Mrs. Graham and Mildred visited the J. H. Johnston home on Sunday.

Lloyd Ferguson was successful in winning 2nd and 3rd in the high jump and the dash, respectively, at the track meet held in Bruce on Friday.

Mrs. Bertha Seale, Mr. and Mrs. R. H. Phillips and Miss MacKinnon accompanied the Lakeshore entrants to the field meet in Bruce.

LOCAL & PERSONAL

DON'T FORGET THE SUMMER STORE WEDNESDAY HALF-HOLIDAY IS NOW IN EFFECT.

Miss H. Shultz is visiting Miss McCauley for a few days.

Mrs. Martindale of Edmonton is visiting Mrs. Geo. Coatta this week.

Miss Ann Robinson of Holden visited Miss Muriel Malcolm over the week end.

Mrs. Barnett left Monday evening enroute for Montreal where she will visit her daughter and other relatives.

Mr. and Mrs. J. Yakabuski left Monday for Renfrew, Ontario. They will visit Mr. and Mrs. Yakabuski senior, as well as other relatives.

The fire brigade made a quick response to an alarm on Wednesday. Fortunately the outbreak was not serious, the chimney being on fire at the Smaltz home.

Mrs. Barden is in Edmonton visiting her daughter Edythe, who we understand is unwell.

Mr. and Mrs. Wallis attended a church meeting in Edmonton this week.

Mrs. Gordon from Medicine Hat visited Mrs. Lovell this week.

Rev. Allan and Mr. J. E. Stinson attended the United Church convention held at Calgary. Mr. Stinson returned Tuesday, Rev. Allan remained a few days longer.

Mrs. W. J. Tennant of Calgary is visiting at the home of Mrs. Emery. On Tuesday a number of friends were invited to afternoon tea.

The local baseball nine played at Ross Creek on Sunday afternoon. The game, a friendly one, resulted in a 12—4 score for Tofield.

LOST.—A purse containing a sum of money, driver's license, bills, etc. Lost somewhere around main street. Finder please return to Frank Sidar, Tofield, or leave at Mercury Office.

Mr. and Mrs. Emery Phillips and family visited Owen Eaton's on Sunday.

TOFIELD C.C.F. CLUB MEET

(Contributed)

The regular meeting of the Tofield C.C.F. Club was held in the Institute rooms last Thursday night. The meeting was one week late on account of the School Festivals. The chair was ably filled by Mrs. Torrie. We hear that some of the male members lost track of the discussion when watching the fair chairman.

The subject "The A.B.C. of Socialism" was ably led by Mr. A. J. Harrison, followed by a general discussion enjoyed by all. The largest part of the discussion was on the question of what the Socialists would do with the farms. Mr. B——— took the part of the poor fish that preferred to work long hours day after day all of his life to acquire the title to 160, or more, acres of land by the time that he had passed to the land of no return. No one happened to remark that the piece of parchment would not last very long in the climate where we think that the other fellow is going.

During the evening Lorine Wood and Marjory Murray favored the Club with a reading and a solo respectively, which were very much enjoyed by all.

Following the discussion some of the ladies supplied an enjoyable lunch during which the members divided into groups and discussed everything from Social to Heavenly Credit, until an unmentionable hour; before all went home wondering where they would get the money credits to keep them from starving until the next meeting.

KINGMAN

Complimentary to them on the happy occasion of the celebration of their silver wedding day, a large number of friends and relatives gathered at the Kingman Hall on Sunday afternoon May 30th in honor of Mr. and Mrs. Clarence Simonson. There was a short program which consisted of an address by Rev. Mr. Berg; a song by four girls, a talk by Mr. Chant of Camrose, a talk by Rev. Anterbus of Camrose, a song by Marina and Lavina Simonson, a talk by Rev. Windblate of Wetaskiwin. Mr. Albin Anderson acted as chairman. Mr. and Mrs. Simonson were presented with a lovely set of silverware. Mr. Simonson's uncle and aunt, Mr. and Mrs. Hans Simonson of Edmonton were present at the celebration. Mr. Dan Simonson of Edmonton was also here for the occasion.

Mr. and Mrs. Hans Simonson called on friends at Kingman on Monday.

Mrs. Quailey of Henden visited with her sister, Mrs. Thur Horse last Sunday.

Miss Gertrude Asp has returned to Calgary. Her brother Herbert and sister Muriel went back with her and spent the week end there.

Mr. and Mrs. Thomas Rognses and Arnold spent Sunday afternoon at the Asp home.

There will be a Ladies' Aid meeting at the Kingman Hall June 11.

Mr. J. K. Dettwiler has built a new garage for Mr. Loyal Kauffman.

MR. AND MRS. HENRY TIEDEMAN CELEBRATE GOLDEN WEDDING

June 1st was a happy day for Mr. and Mrs. Henry Tiedeman of Tofield for it was the day of their golden wedding anniversary. Children, grand children, and friends had gathered at the home of the aged couple and observed the anniversary with joy, happiness and thanksgiving. Their pastor, Rev. H. L. Hennig of Vegreville was present and preached a sermon to the couple.

Mr. and Mrs. Tiedeman were married on June 1, 1887 at Crookston, Minnesota. In 1902 they came to Alberta settling at Walsh and in 1919 they moved into the Tofield district. They have nine sons, two daughters and 30 grandchildren.

SCHOOL TRACK MEET at BRUCE

On Friday last quite a number of school pupils journeyed to Bruce to participate in the the elimination track meet there. Both town and country students from this area did well obtaining a fair share of the "wins." A complete report of all events will be published next week, time and space preventing publication this week. The next step in this track meet competition is for the winners at Bruce to go to Camrose on June 4th.

SPORTS DAY COMMITTEE MEETING FRIDAY, JUNE 11

A meeting of the Sports Day Committe will be held on Friday, June 11th at the Town Hall at 8:00 p.m. This is a GENERAL MEETING and ALL interested in a Sports Day are requested to attend.

LINDBROOK COMMUNITY CLUB MEET

The May meeting of the Lindbrook Community Club was held at the home of Mrs. Theo Geneskie, Mrs. William Robinson assisting hostess.

Sixteen members were present. Business consisted of minutes of previous meeting.

The Club donated flowers to the late Mr. Glenn, Mr. A. Rogers also contributing to this.

A motion was passed that a small gift be presented to the new babies in the district.

After the business a very nice reading was given by Mrs. Evans on the coronation.

Mrs. Arthur Gill also supplied a reading for the afternoon but being absent herself, Mrs. Earl Wilson presented same to the club. The topic was on "Mothers' Day" and we understand very nicely chosen being a story on the different mothers of our country. The meeting was closed as usual by the Lord's Prayer and after a very nice luncheon the members departed for home.

The next meeting will be held at the home of Mrs. Stine where it is presumed suggestions will be passed for our annual picnic.

The Roll Call will be answered with suggestions of a prize for the essay winner of the "Origin and History of Lindbrook" to be composed by the school children of the district. Readings to be given by Mrs. A. Smith and Mrs. J. Pruden.

PROVINCE TO DEFAULT ON BOND ISSUE

Turned down by the Bank of Canada and the Dominion government on its application for a $1,650,000 loan to meet a bond maturity on Tuesday, the province will default in its payment, according to Hon. Solon Low, provincial treasurer. Interest will be paid.

The bank in rejecting the application stated its policy was to make advances only to general rehabilitation of provincial finances.

The M[illegible] who made the announcement [illegible] caucus meeting Monday, regretted the action was necessary.

"I can well understand that any refunding scheme now must include the previous [illegible] defaulted issues as well as this [illegible]," said Hon. Mr. Low. "We are exploring every avenue and hope in due time to arrange for meeting the three issues."

TRACTORS GO POP-POP AND THE PLOWS TURN OVER THE SOIL

An interesting demonstration of tractors and tiller was held at the Davison Stair farm on Saturday last. Three new and one old John Deere tractors were on the go and the dirt rolled over. The demonstration was chiefly with rubber tired tractors and they certainly seem to be able to do the work. One tractor pulled seven 14 inch plows quite easily [illegible] for general work only four is recommended. A smaller tractor with fewer plows made light work of [illegible] The tiller put a [illegible] the top of the soil, the tractor handling this big implement easily. Rubber tires are now popular in the U.S. and are becoming more popular here. Quite a crowd attended [illegible] demonstration being sponsored by M. C. Hammond, the local John Deere Agent.

THE WORLD OF WHEAT

By R. G. L. Strange,

Director, Research Department, Searle Grain Company Limited

The [illegible] States and in Canada.

The yield of the Canadian crop will [illegible]

If this total precipitation [illegible]

[illegible]

All this means that better than average rains will soon have to occur if an average crop is to be harvested. There is, however, still time for good rainfall to take place to overcome the deficiency, for the wheat plant does not begin to call for abundant moisture until after the middle of June. From that time forth, however, until [illegible] described as prodigious.

The following factors have tended to raise prices.—Smaller winter wheat [illegible] wheat estimates reduced. Excessive moisture several European countries. Rain still needed in Argentina. Dry weather delays [illegible] work in Australia. Holland [illegible] Turkish and [illegible] Uruguay abolish wheat import duty. Morocco prohibits soft wheat exports.

[illegible] have tended [illegible] increase in [illegible] and in de[illegible] Wheat harvest be[illegible] wheat exports. Esthonian crops satisfactory and larger outturns anticipated.

FOR SALE—Ten Head of purebred registered Shorthorn cattle. Fe[illegible] 2 years old. Also one grade milk cow freshen about April 15th. Apply to J. Veghtlin.

NEW ZEALAND PREDOMINANTLY BRITISH SAYS VISITOR FROM WELLINGTON

If Great Britain ever is at war again, New Zealand will probably be the first nation of the Commonwealth [illegible] rally to her defence, prophecied J. H. Hall, editor of "The Dominion", daily newspaper in Wellington, New Zealand.

[illegible] Canada "just to gather in[illegible]," the newspaperman chatted amiably Monday with John Blue, secretary of the Chamber of Commerce, agreeing with him that people [illegible] country are a good deal [illegible] Canadians [illegible]

[illegible] New Zealand is predominantly British in its population [illegible] tendency [illegible] look through [illegible] England [illegible] this country but as the [illegible] Whenever I say I am [illegible] I am now on [illegible] people think I [illegible] to New Zealand."

Pointing out that the first ship [illegible] the Great War fell prey to [illegible] vessel conveying New [illegible] the Western front, [illegible] Hall [illegible] his conviction [illegible] ties of Empire would again withstand the pressure [illegible]

Oh, no, there is only one paper in all New Zealand that supports the Labor government and that is published in the mining areas."

The people from New Zealand, which by the way is only one-third the size of Alberta, have grappled manfully with two deep-rooted symptoms of industrial disorder—unemployment relief and the debt problem, he indicated.

His countrymen have placed a special tax on themselves to bear the cost of relief. In that way, he said, the burden of looking after the idle is brought home with vivid instancy to every worker earning more than a specified salary, and when he finds his pay check short a few dollars "he [illegible] will" wants to know why people unemployed don't do something to better their position.

That attitude, coupled with a steady [illegible] in the business pendulum, [illegible] resulted in a marked curtailment of unemployment, though there are still about 20,000 able bodied [illegible] on the relief rolls the editor remarked.

The burden of excessive interest levies which robs men of their equities in mortgage-covered homes, he continued, drove New Zealand to take [illegible] action.

"The government has cut interest rates to [illegible] per cent for first class securities. This reduction has been effected mainly by government pressure on the lending corporations. At first the banks opposed the move, but in the end they yielded gracefully."

This reform, linked to a devaluation of currency, has contributed to New Zealand's recovery, he said, while qualifying the remark by the modest admission that no civilized man is sufficiently ingenious to unravel the money tangle.

RADIO DIRECTS CANADA'S FASTEST PLANE

THE fastest airplane in Canada became the property of the Dominion Government this month as officials of the Civil Aviation Branch of the Department of Transportation accepted the sleek silvery Lockheed 12 A from Fairchild Limited. This ship is shown at St. Hubert Airport, Montreal, where it will undergo exhaustive tests before flying to its home base at Ottawa to become the first of the Trans-Canada passenger service.

Propelled by twin 420 horsepower constant speed motors, the adjustable pitch propellers drive this silver streak at a top speed of 245 miles an hour and a cruising speed of 212 miles an hour at 11,000 feet. Every modern improvement for comfort and safety, including the latest Northern Electric Radio Beacon and two-way communication equipment have been built into this ultra modern aerial argosy, which will be recognizable by its letters "CF-CCT", and is similar to that which guided and kept Dick Merrill in touch with land during his latest triumphant dash across the Atlantic with historic news films.

In the lower photo, left to right, are officials present at the handing over ceremonies. They are: Squadron Leader A. Ferrier, of the Department of Transport; H. Passmore, president of Fairchild Aircraft; Major Tudhope and Alec Snyder who flew the machine here, and S. Chiswell, of the Airways Branch of the Department of Transport.

Pick the QUALITY CAR in the Lowest Price Field
"... for Economical Transportation"

ONE of the best things about Chevrolet quality is the way it saves you money on gas, oil and upkeep—and assures you of higher "trade-in" value later on.

For instance, the quality design of Chevrolet's Valve-in-Head Engine saves you as much as 10% on operating costs! Knee-Action, on Master De Luxe models, saves you dollars on "tightening-up"—because it cushions the car, as well as the passengers, against the pounding of rough roads. The Unisteel Turret Top Bodies by Fisher are solidly built to "stand up", without developing annoying rattles and squeaks.

From perfected Hydraulic Brakes to genuine Fisher No-Draft Ventilation, Chevrolet is every inch a quality product—famous for dependability! See it and drive it yourself ... listen to what owners say ... and you'll never be satisfied with less!

ALL OF ONE MIND—

ONE OF THE speakers at the recent social credit meeting here stated that for social credit to work successfully, the people would have to be all of one mind—presumably on the subject of social credit. This is a remarkable statement. It is quite possible to believe that the world would be a better place in which to live if there was more harmony and less discord in it. It is also possible to believe that a simplifying of life rather than complicating life would tend to more if not complete happiness. One of the marvellous things about nature is its variety. Everyone has read of the numberless designs of snow flakes, also the countless number of species in the insect, animal, feathered and marine realms. In the realm of thought much the same thing occurs. Isn't there a famous quotation somewhere to the effect, "so many men, so many minds?" Whether for good or ill this fact crops up in almost every walk of life and is something we have to take for granted. It may not please, it might even hurt, but apparently it is a part of nature's plan for a "harmonious whole," and there is nothing anyone person or group of persons can do about it except recognize it as it is. If unanimous thought were possible one would expect to find it in strictly religious circles. Yet while all peoples, white, red, black, yellow, believe in a Supreme being, we have the peoples of the world divided up into several great systems of worship. Then again within each system, certainly within Christianity, there are numerous creeds and sects. Even with such a wide base as Christianity to stand on, difference of opinion is so pronounced that humanity has deliberately shed its own blood in support of, or opposition to, various beliefs. And again in the world of government. Here we find large main divisions such as democracy, facism, socialism, communism, dictatorship, etc., these being in turn split up into numerous rights, lefts, centres, moderates, extremists and whatnot. Even in business, industry and agriculture you find pronounced opinions. A young auctioneer once said to us, and in a way was justified too, "but an auction sale" meaning the responsibility of an auctioneer to his client was an exalted one. He probably never thought of the responsibilities of ministers, doctors, lawyers, to say nothing of journalists. And by the way, did you ever know a keen Shorthorn enthusiast to give much praise to the Holstein, or a keen Barred Rock enthusiast laud the Leghorn. And so it goes. One could write almost indefinitely regarding differences of opinion and yet not exhaust the subject. And after it was all written, if the writing was ever finished, the writer would be faced with one great paradox, for on one thing at least we all do agree. We all agree on self preservation, so much so, that self preservation has been called the first law of nature. Self preservation can and do take unto itself many forms, but the most common form is for the individual to acquire for himself or herself the maximum amount of creature comforts. Sometimes the aim is true, sometimes the mark is missed and sometimes fortunate? individuals do not even have to go to the trouble of shooting. In this great game of self economic preservation because humans are endowed with reason and are unlike animals who eat their fill and leave the pile, some form of economic anchorage seems necessary. By common consent throughout the ages, gold has been chosen for an anchor. We know well enough that as regards the finances of the average individual, gold is as far removed as is Tofield from the South Sea Islands. We do not worship gold because it is found in a free state, or because it can withstand the ravages of weather and time, or because it can be beaten or drawn exceedingly fine. We do not worship gold at all, but we do see in gold an article that plays a part in the affairs of men, as a foundation to a building or an anchor to a ship. It may not be the wisest choice for a foundation or anchor, men in the mass are not particularly gifted with wisdom, but if one has anything to sell they never refuse gold for it and if gold were offered as a gift, no one in his senses would refuse it. Whether gold as a foundation or anchorage will stand up under the stress and strain of modern economic storms, only time will tell.

THE ROMANCE of the open range, of the cowboy, of the rodeo willl be kept alive a long, long time in Alberta. There are still many people who delight to see the battle of skill between horse and rider within a coral or out on the open range. To these people and many others the death of Pete Knight, an Alberta man and world champion, will bring regret. Pete Knight was killed in California when, to him, he was performing his work, a work extremely dangerous, but a task he must have loved, else he would never have reached the top.

"Nine out of ten explorers in the South American jungle have stumbled across ancient ruins," remarks a writer. The tenth, we suppose looked where he was going.—Humorist.

POOL RATHER THAN WHEAT BOARD GETS MURRAY'S APPROVAL

Wheat Board Head Says Compulsory Board or Pool With Grain Exchange Closed Would Fail

(By Sam Ross, Special Correspondence.)

Regina, May 29th—With a score of proposals for extending grain markets and altering methods before it, the Turgeon royal grain commission stands adjourned until the autumn.

Sitting for 71 days in Winnipeg, Saskatoon, Regina, Edmonton, Calgary and Vancouver, the commission heard 136 witnesses and received 460 exhibits and heard about 2,250,000 words spoken into the evidence.

Last week's major witness was James R. Murray, Winnipeg, chairman of the Canadian Wheat Board since Dec. 2, 1935. Mr. Murray said Canada must purchase the products of other countries if she is to sell her wheat. Among other causes for loss of markets, he said, were increased production in normally importing countries and disinclination of Canada to meet the competition of other exporting countries in recent years.

Canada's normal production could not be marketed abroad, no matter what the marketing system, unless trade relations with principal wheat importing countries were improved. Every market counted in selling grain, he declared.

Advertising and publicity work now being carried out by the board should be taken over by a wheat institute endowed by the federal government and free of politics. He hoped the inquiry would make some recommendation for development of overseas markets.

The policy of the board which he headed, said Mr. Murray, was to offer wheat for sale on world markets continuously in such quantities as the market could take reasonably. The board sold wheat to any and all when it considered the price satisfactory.

Declaring a compulsory board handling all the wheat crop and with the grain exchange closed was certain to fail, Mr. Murray said he was quite prepared to see the experiment tried but was certain it would fail. The wheat board as at present constituted could not function successfully, he said.

There was no reason, he said, why the open market and futures method of trading and producers' co-operative wheat pools on a contract basis could not satisfactorily sell the Canadian crop. Some supervision of the grain exchange should be undertaken, he added. In the event of recurrence of low prices, the government should lend assistance to producers.

George H. McIvor, Winnipeg, a member of the wheat board, detailed the board's advertising and publicity campaign to develop Canadian wheat sales in the United Kingdom. The commission also viewed a motion picture describing farming in Western Canada and showing the trade routes to Britain.

Describing the campaign as "the first real effort" to sell to the consumer—the baker and British bread eater—Mr. McIvor said co-operation was being given by British interests although some millers had offered resistance. Friendly reception had been accorded the board's representatives and the objectives of tying in the campaign with British-directed bread campaigns.

Geo. F. Edwards, Regina, spokesman for the On-To-The-Bay association, urged greater use of the Hudson Bay route through Churchill, Man., for wheat exports. Neil McTaggart of Gull Lake, former M.P. for Maple Creek, urged a guaranteed minimum price to protect against a "price crash"; a vigorous sales policy, tariff changes, fostering of use of low grade wheat as livestock feed and urged the commission go overseas during its inquiry.

EDMT. CHAMBER OF COMMERCE GETS LETTER MAILED DECEMBER 5th, 1911.

Will the faces of Canadian Post Office officials be red when they read this one!

The Edmonton Chamber of Commerce received a post card Monday that was written and mailed December 5th, 1911.

It came from the Board of Railway Commissioners for Canada and was addressed to F. T. Fisher, secretary of the Chamber in the distant days of long ago.

The postman brought it in without any apology, nor was there any mark on the letter to indicate that the usual flawless service had slipped up on this one.

The letter read: "I beg to acknowledge the receipt of your letter of Dec. 1, 1911, which will receive the attention of the department." It was signed A. D. Cartwright.

Mr. John Blue, present secretary, doesn't think he will answer the communication.

ALBERTA GOVERNMENT CROP NO. 2.

Issued by Alberta Department of Agriculture, Edmonton, May 28, 1937

Commencing May 22nd, rains have been fairly general over the Province. The crop outlook is, therefore much brighter than earlier in the month when dry conditions were the cause of some concern, especially in east central and southern districts. Amount of rainfall has varied from one quarter to almost two inches even within comparitively small areas, and benefits derived vary accordingly. All districts have had more or less rain with the exception of that portion of the south east from Youngstown south to Brooks and east to Schuler, and a small area north of the North Saskatchewan river from Waskatenau east, where no rain of consequence has fallen for some time. Though present conditions on the whole are reasonably good, there is little reserve of moisture except in the Peace River district, and crop prospects are dependent upon precipitation at intervals through the growing season. The weather now continues showery.

A limited amount of damage from soil drifting previous to rains is reported by several districts from the U.S. boundary north to Edmonton, but this seems now to be definitely checked.

Seeding is practically completed as far north as Edmonton, some coarse grains still remaining to be seeded in northern districts. Summer fallow [illegible] south.

Growth of pasture, hay crops and range grass has been slow due to early dry conditions, but is now making rapid progress. Hay crop on the whole is likely to be fairly light. Farmers are seeding more grasses and clover this season, particularly in the centre and north.

The grasshopper hatch in southern areas has been checked by recent rains. Heaviest outbreak to date is in the Claresholm district. Mixing stations to supply poisoned bait are now in operation where required and the situation is under control. Some slight amount of cutworm damage is reported from a few points in the south.

Condition of stock is steadily improving with better range and pasture. Calf crop is reported short on south ranges with colts and lambs above normal. Reduction in hog production is evident throughout the Province because of feed shortage and high grain prices. Dairy production is increasing with good pasture, but is not yet up to the usual average.

WHO SAID CALLENDAR HAS THE ONLY SET OF QUINTS?

Vancouver, B.C., May 31.—The little village of Callendar, Ont., was made world-famous three years ago when the now famous quintuplets were born at the home of Mr. and Mrs. Oliva Dionne. A few days ago a thoroughbred shorthaired fox terrier was being shipped from Edmonton to Vancouver over Canadian National Express and, upon arrival here, the Queen of the Canine world had a surprise for her owner, Mrs. James Wylie, East Hastings street. Quintuplets had arrived en route! The mother and frisky little pups were given careful attention by the train crew and all concerned are doing splendidly.

SPECIAL RAILWAY FARES ON KING'S BIRTHDAY

Winnipeg, Man., May 31.—To meet the convenience of the travelling public, which always takes advantage of holidays to travel from one point to another, the Canadian National Railways have offered special fares for the King's birthday holiday, June 9th.

For this holiday, special fares go into effect Tuesday, June 8, and tickets are good for return leaving destination not later than midnight, Thursday, June 10.

CANADA LARGEST SUPPLIER HONEY TO BRITISH MARKET

Montreal, Que., May 31.—Over 45 countries supply Great Britain with honey, the largest supplier last year being Canada with 20,494 cwts., an increase of 33 1-3 per cent over the previous year. Jamaica ranks second with 14,587 cwts., and Australia third with 12,271 cwts. Jamaica occupied first position in 1935. Canadian honey is well liked in the British market, especially for blending purposes, according to the Agricultural Department of the Canadian National Railways. New Zealand honey, which occupies fourth place as a source of supply (6,206 cwts.), commands the highest price, although Canadian honey brings a better average price than most other bulk honeys imported and sold on the London market.

PROTECT YOURSELF FROM INSECT BITES

The season has now arrived during which those "winged demons" of forest and field, the bloodsucking mosquitoes, black-flies, and biting midges appear, and often make life uncomfortable for man and beast. Outdoor workers and others, whose occupations or pleasure seeking activities expose them to the attacks of these insects may secure considerable relief by the use of one of several repellant mixtures recommended in a pamphlet prepared by the Dominion Entomological Branch, Dominion Department of Agriculture, Ottawa. These preparations are made by mixing certain essential oils in a base or carrier, and are applied to the skin. Their effect is only temporary but they are of great value in warding off attacks, especially when the insects are very numerous. Several of the recommended formulae follow:

1. Oil of citronella, 3 ounces; spirits of camphor, 1 ounce; oil of tar, 1 ounce; oil of pennyroyal 1 ounce; and castor oil, 4 to 6 ounces, depending on the sensitiveness of the skin.
2. Oil of citronella, 2 ounces; castor oil, 2 ounces; oil of pennyroyal [illegible]
3. Oil of lavender, 1 ounce; alcohol, 1 ounce; castor oil, 1 ounce.
4. Gum camphor, 3 ounces; salol, 3 ounces; petrolatum, 4 ounces.
5. Another popular repellant is made by mixing together 1 ounce of oil of citronella, 1 ounce spirits of camphor, and 1-2 ounce oil of cedar.
6. Still another formula is oil of cassia 1 ounce, camphorated oil 2 ounces, vaseline 3 ounces.

Investigators also report satisfactory results from using a preparation made as follows: melt together over a gentle fire, vaseline, 1 ounce; beeswax, 1 ounce and medium hard paraffin, 1 ounce. Cool until the mixture is just fluid, then stir in one [illegible] or one-quarter teaspoonful of [illegible] and 2 grams or a half-teaspoonful of citronella.

[illegible] for relieving [illegible] ammonia [illegible] vaseline [illegible] and alcohol are widely used [illegible] when [illegible] applied over the puncture.

The pamphlet which is entitled "Methods of Protection from Mosquitoes, Black-flies and Similar Pests in the Forest, also gives advice on the selection of camp sites; the erection of fly-proof tents and shelters; the use of smudges; proper clothing; the value of headnets, veils and gloves, and sprays that may be used in cabins and tents.

NEW BABIES TO HAVE NAMES BURNED IN BY QUARTZ LAMP

Vancouver, May 29.—Future Vancouver babies will have their names burned on their backs at birth with rays of a water-cooled quartz lamp, it was announced today after a meeting of the board of directors of the Vancouver General Hospital last night.

This removes any possibility of babies going to the wrong parents. The sunburn name lasts for six months, and after that time can be brought back by the lamp.

BATTLE OF JUTLAND FOUGHT TWENTY-ONE YEARS AGO

London, May 31.—Twenty one years ago today the battle of Jutland was fought and the anniversary finds all Germany mourning a tragedy on a crack battleship that succeeded the fleet whose fate was sealed on May 31, 1916.

The only major naval engagement of the Great War, the battle left the British fleet complete master of the North Sea and the German fleet bottled up in Kiel, only to emerge at the end of the war, and be scuttled by its own seamen.

Germany disappeared as a naval power.

Six years ago this month the armored cruiser Deutschland was launched. Known as a "vest-pocket" battleship, she was the fore-runner [illegible] of a new modern navy.

DR. DAFOE 53, FETES OWN AND BIRTH OF QUINTS

North Bay, Ont., May 29.—Dr. Allan Roy Dafoe, three years ago an unknown country doctor, celebrated his 53rd birthday today as a world famous radio orator and hoping the five little girls he had nursed along from premature babies into three-year-olds' affection soon would be re-united with their family.

He told a gathering of newspapermen here last night at a dinner party in honor of the Dionne quintuplets "We are looking forward to the day, perhaps less than a year from now, when the whole Dionne family will be reunited." Oliva Dionne, father of the quints, smiled at the remark. It was the first time he had attended such a gathering.

CANADA MUST TAKE LEAD IN IMMIGRATION

Winnipeg, May 31.—Great Britain is ready to co-operate with Canada in an immigration plan, but the lead must come from this country, Sir Francis Floud, British high commissioner for Canada, said last night in an interview here.

"There has been much talk regarding the British government sending out emigrants under some financial plan [illegible] is entirely rumor," said Sir Francis.

"Such a plan would not be at all desirable as it would tend to make the wrong type of citizen who would not feel a responsibility and would not feel a part of the country for a mutual benefit."

EAST CANNOT SEE DRIFT OF MULLEN PLAN

Toronto, May 28.—Doubt that provincial ownership and control of stockyards would assure competition for the cattle trade was expressed today by Ontario department of agriculture officials, commenting on a scheme proposed at Calgary by Alberta's new minister of agriculture.

Hon. D. B. Mullen, the Alberta minister indicated in a speech the Alberta government might, if necessary, take over ownership and control of public stockyards to assure competition.

Ontario officials, however, said that inasmuch as stockyards only offer facilities for the care of and trading in cattle without buying any, this scheme would not have the result Mr. Mullen expected.

"All Canadian stockyards are owned by private companies and operated under regulations of the livestock branch of the federal department of agriculture," a high official of the Ontario department commented.

"The only way to improve competition would be to increase the number of buyers of cattle; to find more outlets for Alberta cattle."

Ottawa, May 28.—An official of the department of agriculture was puzzled today as to just how the Alberta government could take over ownership and control of public stock yards in the province as indicated yesterday by Hon. D. B. Mullen, Alberta agriculture minister.

Mr. Mullen said at Calgary last night there was no competition in public stockyards today and added he would, if necessary, advocate the government own and control the yards.

TOURISTS BOOST FARMER RETURNS

More consumers must be brought to this province, if the demand is to be increased for farm products. That will mean higher prices to the farmer as a result, in the opinion of officials of the Alberta Motor Association.

It is argued that Alberta needs more eaters. And it is generally known that "every tourist brings his stomach with him."

Did you ever wonder why farmers who live near big cities get more for their poultry and dairy produce than those who live a great distance away.

Naturally. He lives closest to the market. He can sell from door to door his eggs and chickens and he gets retail prices for them, not wholesale.

More tourists boost the prices farmers get for their produce because tourists consume the surplus produce.

Alberta farmers have to take small prices for poultry, eggs, vegetables and so forth because surpluses of these things are raised in Alberta. The supply exceeds the demand. Therefore to increase the demand and thus increase the prices paid to the farmer, more eaters must be brought to Alberta.

All of which again demonstrates the fact that hard surfacing of highways is a primary need of this province at the present time.

Give the tourist the hard surfaced highway, similar to what he has in the United States, and watch him make the dollars fly in purchases in this country. To undertake anything far removed from this policy is going to have detrimental results.

TWO GIRLS LOSE WAY WHILE LOOKING FOR CATTLE

Pelly, Sask., May 28.—Eleven year old Hazel Scraba, missing since Sunday when she became lost in [illegible] north of here, was found alive late yesterday but suffering from hunger and exhaustion. Ludwina Machishyn, 10, her companion, was found alive Wednesday.

Spurred by the finding of the younger girl by a party of Indians, hundreds of searchers took up the hunt with redoubled vigor and were rewarded when Hazel was found 16 miles north of her home.

The girls, who became lost Sunday after starting out to look for stray cattle, parted on Monday when Hazel could not keep up the pace set by her companion.

Ludwina was in surprisingly good physical condition when found, apparently having suffered no serious effects, but Hazel was in poor condition.

The four days of aimless wandering had taken toll of her strength and there was no immediate indication her condition was serious.

FOR SALE—Reg. Clydesdale Stallion, three years old. Apply Wm. McCutcheon, Lavoy, Alta.

DUKE OF WINDSOR AND WALLIS WARFIELD MARRIED

Thursday, Edward, Duke of Windsor and Wallis Warfield were married in the chateau of Touraine, France, at noon. The service was first a French civil one which was followed immediately by a religious service performed by Rev. R. Anderson Jardine, "poor man's vicar", of Darlington, England.

The wedding breakfast was an informal one, no member of the royal family was present. A few friends of the duke came from England.

The bridal couple disappeared for a brief time and then returned to their company. The Duchess had changed to another costume and the Duke had doffed his cutaway for a blue serge suit.

The bridal couple will spend a honeymoon in Austria.

BISHOP FEARS WHOLE WORLD IS BRUTALIZED

London, May 29.—The fear that the world is getting "hardened to cruelty and that human nature is becoming brutalized" is expressed by the Bishop of Chelmsford, Dr. Henry Wilson, in his Diocesan Chronicle.

"It is taken as a matter of course" he writes, "that if this country becomes involved in war, London will be drenched with poison gas and set on fire with incendiary bombs. The wholesale slaughter of women and children will be the master stroke of the next war.

"All the decency and chivalry have departed from life and our civilization has become bankrupt. It is often said that the next European war will end civilization.

"The cynic might well be excused if he replied that if Russia, Germany, Italy and Spain are samples of 'western civilization' the sooner it is destroyed the better."

"The moral clearly is that 'civilization and progress,' divorced from the control of Christianity, is the gravest danger of humanity.

"We are not nearly so wise as we thought we were, and instead of our civilization and education turning the world into a paradise we are rapidly making it into a hell.

"That is the lesson poor, distracted mad Europe is teaching us, and I believe we are learning."

CANADA MUST TAKE LEAD IN IMMIGRATION

Winnipeg, May 31.—Great Britain is ready to co-operate with Canada in an immigration plan, but the lead must come from this country, Sir Francis Floud, British high commissioner for Canada, said last night in an interview here.

"There has been much talk regarding the British government sending out immigrants under some financial plan but this is entirely rumor," said Sir Francis.

BOYS' ZIPPER SWEAT SHIRTS 98c.— PENMAN quality. Scarlet, green, copen, wine. Sizes 6 to 12 years. Reduced to .. 98c.

H. E. ROGERS

Canadian Pacific New Freight Service

Montreal freight shippers are enjoying the fastest pick-up and delivery service in Canada since the inauguration of the Canadian Pacific Railway's new Cartage Department for the pick-up and delivery of railway freight.

Sixty-two brand new trucks, of a heavy type, from two to five tons, were built especially for this new Canadian experiment, which is designed to handle freight with all the speed and efficiency of express shipments. Built for local delivery and pick up of freight, in carload lots or less, the 32 trucks form a rapid and steady stream of communication between the Canadian Pacific freight sheds in Montreal and the city's shippers. By eliminating much of the handling of freight and instilling the Canadian Pacific motto for fast service into this end of freight traffic the new trucks are speeding up the service to a degree previously unknown. Although this service has also been introduced to Ottawa and Sherbrooke, Montreal will be the main testing grounds.

Illustrations above show a section of the line of trucks at Place Viger freight sheds in Montreal, two of the trucks being loaded from the warehouse, and a loaded truck on its way to the door of some business house.

KINGMAN

Rev. Solheim of Camrose will hold services at the Lutheran Church on Sunday afternoon at 3 o'clock, June [illegible]

Mr. Alex Asp and son Herbert visited Edmonton last Tuesday.

Miss Dorothy Thompson of La Glace, Alta., is spending her vacation at her home with Mr. and Mrs. Melvik.

Rev. Milo Stutzman left Sunday evening for a trip to the United States.

Miss Malinda Dettwiler attended the sewing circle meeting at Mrs. Jake King's last Thursday.

Edmonton visitors last Friday were Mr. Egelgin and daughter, Myrtle, Mr. Heie and Borgild and Oscar Johnson.

Mr. J. K. Dettwiler is building a new kitchen for Mr. Fenwick.

Mrs. Ingvald Ness called on her mother, Mrs. Horte last Wednesday afternoon.

We are glad to see Mr. Oley Bartness back again from the hospital much improved.

Mr. Hans Boness is at home, after being at the coast all winter.

There will be a sports day at Kingman, June 19th.

Mrs. Eric Erickson went to Edmonton on Monday.

SPORTS DAY COMMITTEE MEETING

ALL THOSE INTERESTED PLEASE NOTE THAT MEETING WILL BE HELD AT SEVEN O'CLOCK FRIDAY NIGHT. This has been arranged so as not to conflict with the show.

LAKESHORE

LAKESHORE

Among the Grad fans at the Saturday game in the city were: Mr. and Mrs. Murray, Douglas and Malcolm; Mr. and Mrs. M. C. Wood, Lloyd Wood, Miss M. Wood, R. C. Phillips, George Abernethy, Oscar Ackley, J. Campbell, Melvin and Ronnie Walker.

Mrs. Bertha Seale and Miriam spent the week end in the city.

On Friday MacKenzie school children defeated Lakeshore in softball.

Mrs. L. H. Graham entertained Mrs. J. H. Johnston Mrs. T. D. Ferguson and Mrs. John Wood at bridge on Tuesday.

TOWN COUNCIL

A regular meeting of the Town Council was held in the Town Hall on Monday, June 7th. Members present were Mayor Swift, Councillors Bruce, Coutts, Lovel and Bellamy. The business coming before the meeting was much less than usual and the meeting consequently a short one.

This was the first meeting held since the Coronation celebration, and the secretary was instructed to write the teachers of the various schools participating and express the appreciation of the committee in charge for their work on that occasion and in preparation for it.

The Mayor and Secretary were appointed delegates to attend the annual convention of urban municipalities to be held at Edmonton on Thursday and Friday June 10—11.

Some accounts were ordered paid and some routine correspondence dealt with.

Financial statement for the month of May was presented and read, and ordered placed in the minutes of the meeting.

LOCAL & PERSONAL

DON'T FORGET THE SUMMER STORE WEDNESDAY HALF-HOLIDAY IS NOW IN EFFECT.

Mr. and Mrs. J. W. Robinson went to Edmonton on Friday and attended the graduation exercises of the Edmonton Normal school.

Dr. Richardson will be away during the entire month of June taking post graduate course in Seattle.

Mr. and Mrs. Patterson visited the city on Friday.

Miss Margaret Whyte, who is in training at the Royal Alexandra hospital at Edmonton, is home for a vacation of three weeks duration.

Mrs. Whyte returned home last Saturday from the Royal Alexandra hospital, Edmonton, where she underwent an operation. She is improving nicely.

Mrs. Roy Fulmer of New York, U.S.A., is visiting her sister, Mrs. John A. Lee. Mrs. Lee and her sister have not met for 14 years.

Aileen Allan is at home for a few days.

Mr. and Mrs. Daly and family and Mr. Mertz of Duhamel visited with Mrs. Snell on Sunday. Miss Lucille Snell accompanied them here from near Camrose.

Mrs. Wm. Kallal arrived home on Saturday morning from Illinois, U.S.A., where she has been visiting her mother who is ill.

Mr. Joseph Rogers, left last Thursday for Calgary where he attended the Liberal convention. Mr. Rogers came in for much complimentary attention, being one of the oldest men to attend, being 83. He proposes to visit with friends and relatives in the south before returning home.

Mr. and Mrs. Bill Swift and family of Camrose visited at the Swift home on Sunday.

Rev. D. K. Allan returned from attending the Alberta Conference of the United Church on Wednesday. The conference was held at Wesley Church Calgary and was well attended by ministers and laymen.

A moving talkie picture by the Bailey Shows is billed for Friday night. The story is one of thrilling adventure above the clouds, and stars Ralph Bellamy, Wiley Post and Tala Birell. Friday, June 11th at the Variety Theatre.

At the evening service of the United Church last Sunday, Mr. J. E. Stinson, who was lay delegate to the United Conference in Calgary gave a most interesting and comprehensive report of its proceedings.

Miss Elspeth Allan of Westlock is spending part of her holidays visiting with her parents at the Manse.

The Lakeshore Sunday School is venturing in a new method of Sunday School work. It is based on the Enterprise method of teaching. Miss McKinnon, the teacher of Lakeshore School is helping the teachers and scholars very much by her counsel and her experience. The attendance was never better and all are enthusiastic over this way of imparting biblical truth. For the summer the Church service is a combination of Sunday School and Worship. The service at Lakeshore now begins at 1:30 p.m.

The Rev. D. K. Allan was chosen "Chairman" of the Wainwright Presbytery at a meeting held in Calgary during conference. The Rev. W. Bell, Holden is secretary.

Much favorable comment is being heard of the service conducted by the W.M.S. during Mr. Allan's absence at Conference.

KETCHAMOOT

Ketchamoot annual picnic under the auspices of the Ladies' Aid will be held Wednesday July 7. Please keep this date and spend the day with the Ketchamoot people. We do not plan this day as a Ladies' Aid affair but for all the people of Ketchamoot to join in to make it a success as the proceeds go to a worthy cause. We particularly ask all the ladies of the community to kindly donate towards the dinner. More complete details will be made later.

Miss Edith Dawe returned to her home in Edmonton Friday after a weeks visit at the home of her uncle Mr. W. A. Mitchell and cousins, the Murray family of Lakeshore.

Mrs. J. H. Ingram entertained the Ladies Aid at her home on Wednesday afternoon of last week, around 20 members and visitors being present.

Mr. and Mrs. A. F. Shultz were passengers to Edmonton on Friday.

Mr. John McGinitie, Mr. and Mrs. Maurice McGinitie, Jr. and Mrs. Leslie McGinitie motored to Edmonton on Saturday last to attend the basketball game.

Mrs. L. Carlisle, Mrs. Earl Carlisle and children, Merna and Vernon, visited Mrs. Elsie Carlisle at the Sears home Monday of last week.

Mrs. Henderson, Mr. and Mrs. W. A. Mitchell, daughter Margaret and Miss Dawe, visited at the John Ness home in Bardo on Tuesday of last week. Mrs. Ness' brother, Peter Haugen is very ill at the Ness home.

Misses Janet and Ethel Brown are entertaining the Social Hour Club at their home Thursday afternoon of this week.

Mrs. William Ingram spent Monday at the home of her aunt, Mrs. Sears.

It would be worth your while to visit at the home of Mr. and Mrs. Maurice McGinitie and see what can be accomplished in a few years in the way of fruit trees, shrubbery, flowers, etc. They are very courteous to show you around and tell of each particular plant or flower.

Mr. and Mrs. Nomeland entertained a number of friends Sunday evening, May 30, in honor of Torvel's 21st birthday.

Mrs. J. Younie and son, Misses Edith Dave and Maud Wildman of Edmonton, spent Saturday and Sunday of last week at the Mitchell and Henderson homes.

Mr. Perry Owen of Holden was calling on relatives in our district Thursday of last week.

The members of the Ladies' Aid are planning a strawberry ice cream social to be held at the home of Mrs. J. Appleby in the near future, when the strawberries are at their best in about two weeks time. Yumd yum! who could resist strawberries, ice cream and cake.

All teachers, scholars and members of the Tofield School Fair Association please note that Tofield's school fair date has been set for Saturday, September 11th.

Mr. Baker of Edmonton visited at the Worton home this week.

AMISK CREEK

Mrs. L. H. Olson entertained the Ladies Aid on Tuesday of last week. All the members and many visitors were present. Rev. Haversteen read the Scripture and led the singing.

Hilmar Moen left last week for Daysmore, where he is going to stay for a few weeks and attend to [illegible] elevator while the elevator man [illegible] on his vacation.

Mr. R. O. Berg, Mr. A. Erickson, Mr. J. Annelo and Arnold Berg left last Thursday on a motor trip to Calgary and some other points. They planned to stop and attend the Liberal Convention in Calgary. Arnold Berg was to visit the aviation school at High River.

Rev. Haversteen conducted a service in the church last Sunday.

The school softball team went to Camrose last Friday for the Camrose field day. They played and won three games but were too tired to play another one. Messrs. Ward and [illegible] were kind enough to lend their cars and take them to Camrose.

Mr. and Mrs. [illegible] Erickson motored to Edmonton last Saturday and attended the Grad—Tulsa basketball game.

Mr. and Mrs. Will Bolton from Leduc visited at the L. C. Olson, R. O. Berg and P. O. Moline home last Sunday.

Mr. and Mrs. O. Kjellund, Mr. and Mrs. U. Garthee from Viking visited at the R. O. Berg and Flaaten homes last Sunday.

The young people held a program in the church last Sunday evening. There was a pretty good attendance and the program was very good.

Doris Glasiner spent the week end with her parents at Dodds.

Arthur Patterson and R. O. Berg visited the city last week.

Mr. and Mrs. E. A. Moen and Edna were visitors at the R. O. Berg home last Sunday evening.

Mrs. U. Garthee from Viking is staying with her sister, Mrs. P. O. Flaaten for some time, until she can [illegible] strength after a long stay at the hospital. We are glad to report [illegible] improving.

CORRECTION

In a report of the April meeting of the Cornhill Council the resolution dealing with $7000 appropriated for power road work is likely to be misinterpreted. The meaning of the resolution was that $7000 was apportioned for road work with the power equipment and not for the purchase of additional equipment.

ADDITIONAL LOCALS

Driving east on Sunday morning Messrs. Cymbaluk, Sokalan and E[illegible] overturned in the car in which they were riding. Cymbaluk and Sokalan were hurt and were taken to hospital. [illegible] escaped with a shaking up. The car was [illegible] by Mr. Chernyknych and was considerably damaged.

The Board of Stewards of the [illegible] Church will meet at Mr. [illegible] office on Monday June 14 at 8 p.m.

Among the honor students at the [illegible] normal school was Miss Isabel Robinson. Miss Robinson was awarded a medal for general proficiency in physical training, theory, teaching and performance. She also was awarded a scholarship at the U of A summer school for receiving highest marks in physical training.

Harry Bowick and Joe Snell overturned while driving immediately west of town. We understand the car swerved in loose gravel. Fortunately both escaped injuries, the car damaged somewhat.

The quality of the meat we sell is hard to beat. In addition to carefully chosing the animals we desire, our facilities for keeping the meat in first class condition is modern and efficient.

A purchase from us assures satisfaction in every particular.

THE DEADLY WATER HEMLOCK

(Experimental Farms Note)

Of all our poisonous plants, water hemlock is responsible for more deaths than any other. So rapid and intense is its action, there is seldom time to [illegible] to counteract the poison. [illegible] able wet situations [illegible] enough to be a frequent [illegible] of trouble. In [illegible] developing shoots with the [illegible] of tuber roots which [illegible] from the [illegible] active [illegible] within [illegible] appears [illegible] through the [illegible] of all the [illegible] that every [illegible] recognize [illegible] other plants of [illegible]. All too often [illegible] and death result from [illegible] discriminate [illegible] ble tubes or [illegible] they are mistakenly [illegible].

Description: Water hemlock [illegible] plants belonging [illegible] family, and is [illegible] carrot or parsnip [illegible] may [illegible] when the [illegible] by the [illegible] cross parts [illegible] taken as clear [illegible] to find [illegible] of safety. Members [illegible] family are a [illegible] having [illegible] small flowers in [illegible] clusters [illegible] less flat [illegible] form a conspicuous [illegible]. In most [illegible] the flowers [illegible] but the harm [illegible] in having [illegible] with broader leaves than [illegible] water hemlock. Water [illegible], but less dangerous [illegible] water hemlock, bears [illegible] resemblance to it [illegible] simple [illegible] ending [illegible] the leaf [illegible] compound having [illegible] leaflets on laterals [illegible]. Examination [illegible] shows the presence of small [illegible] at the base of the [illegible] but not in water hemlock. There is another [illegible] water hemlock, also [illegible] be known by [illegible] in the axils of the leaves [illegible] quite narrow leaflets. One other extremely [illegible] plant, the poison hemlock of the Old World, is occasionally to be seen, and may be distinguished [illegible] by the much more finely [illegible] compound leaves [illegible] than the [illegible] chiefly [illegible] marshy [illegible].

Symptoms: The [illegible] after [illegible].

Protective measures: [illegible] while waiting for a physician [illegible] water hemlock [illegible] should be submitted to the Division of Botany, Central Experimental Farm, Ottawa.

BLACKFOOT INDIAN BOY SCOUT HERO

A Blackfoot Indian Boy Scout, Arthur Yellow Fly, of the Old Sun School Scout Troop at Gleichen, Alberta, has been recommended for recognition for [illegible] and helping [illegible] the lives of his father and two younger [illegible] when the [illegible] was [illegible] during a night in April. A baby [illegible] and a farm [illegible] could not be reached in time.

CITY BELL TO SUMMON SCOUTS FOR EMERGENCY SERVICE

A bell call system by which in an emergency local Boy Scouts of troops that may be called out for public service, has been established at Galt, Ont., by Chief of Police [illegible] with the cooperation of the local Scout association. The call will be fifteen strokes, in groups of fives, on the City Hall bell. The step was a result of the splendid work done by the Scouts during the serious spring floods in western Ontario, and earlier in finding lost children and in other forms of public service.

FAMOUS BRITISH FARMER-AUTHOR TO SPEAK AT EXPERIMENTAL FARMS

Arthur G. Street, who is a dairy farmer near Salisbury, Wiltshire, England, but perhaps best known to many as the author of "Farmer's [illegible]" and several other books on farm life and [illegible], is now in Canada, and, during his comparatively brief stay in the Dominion, will address several meetings of farmers in Ontario and the three prairie provinces. His first public appearance will be at the Central Experimental Farm, Ottawa, on Saturday afternoon, June [illegible]. At the field day he will be introduced by Hon. James G. Gardiner, Dominion Minister of Agriculture. From Ottawa he will go to Ontario Agricultural College at Guelph, where he is scheduled to speak on Tuesday, June [illegible]. While in Western Canada he will speak at each of the Agricultural [illegible] Manitoba, Saskatchewan and Alberta, and will be the principal speaker at Field Days to be held at the Dominion Experimental Farm, Brandon, Friday, June 11; at the Dominion Experimental Farm, Indian Head, Saskatchewan, on Saturday, June 12; at the Dominion Experimental Station at Lethbridge, on Thursday, June 17th.

[illegible] are as a [illegible] farmer on a [illegible] about [illegible] of [illegible]. His first [illegible] to Canada as a young man of 18. He returned to England in the early days of the war and after the Armistice he took over his father's farm which he has since operated with [illegible]. He began at [illegible] a few articles to British newspapers on farm topics. One day he was asked [illegible] some of his [illegible] in book form and "Farmer's [illegible]" was the [illegible] and in 18 months it had run [illegible] the demand [illegible]. Since the publication of his first book, he has written several others which have been great sellers. He is now a regular contributor to the "Farmers' Weekly", one of the most widely read farm papers published in the British Isles, and his column, "Rural Philosophy" is popular among farmers throughout the country.

Mr. Street was induced to come to Canada and speak to meetings of farmers in different parts of the Dominion by Hon. Duncan Marshall, Minister of Agriculture for Ontario, who visited the farmer author last summer and was impressed with the [illegible] Mr. Street has among his fellow countrymen.

[illegible] programs have been [illegible] for the Field Days at the different experimental farms.

SHORT COURSE FOR FARM WOMEN AND FARMERS AT THE VERMILION SCHOOL OF AGRICULTURE

A new course is being added to the [illegible] of Short Courses [illegible] at the Vermilion School of Agriculture. For some years now, both [illegible] and letter, many [illegible] have asked for a Short Course in Agriculture somewhat similar to the Farm Women's Course, but [illegible] dealing with the [illegible] of Agricultural work. The Provincial Department of Agriculture is [illegible] such a course at Vermilion for four days, beginning July 20th [illegible] on the 23rd.

The [illegible] will be made as [illegible] and practical as possible and will include two talks on Animal [illegible] and Animal [illegible] by Dr. [illegible] Talbot, Prov. Vet.; Hog [illegible] and Feeding Farm [illegible] by [illegible] Andrew; Forage Crops, [illegible] and Weeds by A. M. W[illegible]; [illegible] of Soils and Fertilizers by [illegible] Bentley; Some Practical Blacksmith Exercises by D. A. Mc[illegible]; Planting Windbreaks and Laying Out the Farmstead by W. J. Elliott, and [illegible] other features as required.

There will be ample time for discussion and with the special [illegible] to correct the moving picture periods, [illegible] and softball games, there will be [illegible] of useful information and recreation. The two courses will be held at the same time so that Dad and Mother may have this little holiday together.

The Women's Course will [illegible] cooking, laundrying [illegible]. One of the main ideas behind the [illegible] is rest and recreation, and all women who have attended the course will agree that the time was most pleasantly spent in the class rooms and on the beautiful grounds of the School of Agriculture.

FOR SALE—Ten Head of purebred registered shorthorn cattle. Females from 2-8 years old. Also one grade milk cow freshen about April 15th. Apply to J. Vaughtlin.

THE WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan"

The quality of Canadian wheat is in danger!

Such was the fear expressed in 1905 by some who observed how rapidly the production of wheat was expanding throughout the Prairie Provinces, and how so many new varieties—some quite inferior—were being brought in and seeded by farmers.

What could be done to assure that the sterling wheat, Red Fife, the veritable foundation of wheat quality could be kept true-to-variety?

Dr. James W. Robertson, then Dominion Commissioner of Agriculture set his mind to work. He studied the seed and crop improvement systems of other countries, and finally conceived an idea that he thought might be suitable for Canada.

So in 1899 he put aside one hundred dollars of his own private funds in order to encourage boys and girls on their fathers' farms to pick the best heads of the standing crops of wheat and oats, the heads to be sent to Ottawa. Prizes were awarded for the best collection of true-to-variety head.

Out of this plan soon came an organization that has steadfastly and continuously, for over thirty years, assisted in maintaining the high quality of Canadian wheat and other grains in world's markets—The Canadian Seed Growers' Association.

Following factors have tended to raise price: Germany again purchasing Australian wheat. Official Indian wheat estimate reduced by 25 million bushels—Possibility war again looms in Europe—Average of U. S. private winter wheat estimates 640 million bushels compared with 652 million a month ago—Canadian shippers buying back Dutch barley sales.

Following factors have tended to lower price: Indicated increase of 10 per cent in Northern hemisphere wheat acreage excluding Russia and China—France exports wheat to Germany and Spain—More favorable European weather and crop advices—Good rains in some parts of North America—World supply of summer oranges plentiful. Large lemon crop in Sicily.

FERTILIZERS NO LONGER JUDGED BY THEIR SMELL

Long ago our "rude forefathers" on the land became manure-conscious and began to measure their worldly wealth by the size of the carefully conserved pile in the barnyard. That was before the dawn of the 19th century and the realization that something besides manure was needed for the maintenance of soil fertility. Bone was the first supplement, and crushed bones brought phosphate, albeit in a slowly active form, to make up partly for the lack of this plant food in manure. Next came guano from Peru, excreta and remains of distinctly defunct sea-fowl, a foul-smelling stuff that proved a "knockout" as a fertilizer, and some still live who whiffed it.

The year 1843, remarks B. Leslie Emslie, saw the birth of superphosphate in England, the "Disruption of the Kirk" in Scotland and the advent of guano in that rugged country. John [illegible] to b[illegible] Gushet Neuk", a [illegible] classic and tale of those times, records that Peter Birse of Clinkstyle, on his way to church one Sabbath morning, tarried at a neighbor's to inspect the "new manure" and rashly carried away a sample in his pocket. [illegible] and romance are entwined with the growth of the fertilizer industry, for martyrdom was to be added, for Peter's better half was a veritable virago whose fury on this occasion knew no bounds.

The odour of guano while undoubtedly odorous at church, was regarded as evidence by the farmer of the 19th century, who was literally led by the nose in appraising the value of fertilizers and did not realize that the [illegible] gratified the escape of ammonia from the product. To him fertilizers were supplements to or substitutes for manure, and unless the fertilizer could gratify his sense of smell it lacked virtue. Measured by this standard, guano excelled. But Peruvian guano was an excellent fertilizer which decomposed readily in the soil, yielding up to the growing crops its stores of phosphate and nitrogen, and there is probably some truth in the statement that crops grew up quickly to get away from the stench! One is reminded, too, of the fertilized melon patch in which the vines grew so rapidly they wore the melons down by dragging them around!

The high grade fertilizers of modern times are practically odourless, being based with superphosphates, processed, blended and cured with the skill and science of long experience and they are more effective than the guano of fragrant memory.

SCOUTS A HELP IN UNIFYING CANADA

"By organizing Scout troops in remoter places, it seems to me we are doing one more fruitful service for the Dominion. We are one of the forces which make for the unification of Canada,—which, as much as any other organization, contributes to the growth of national spirit."—His Excellency Lord Tweedsmuir.

INSURANCE COMPANIES DISLIKE LIFE INSURANCE PREMIUM TAX

Toronto, June 7—Pointing out the provincial taxation of life insurance premiums increased the cost to Canadian policyholders by $3,500,000 annually, Victor R. Smith of Toronto, president of the Canadian Life Insurance Officers' Association, today termed the provincial tax "unjust, iniquitous, and a tax on thrift" in his presidential address before the annual convention at the Royal York Hotel.

Mr. Smith warned that insurance [illegible] may be forced to introduce [illegible] premium scales for [illegible] unless uniformity is [illegible] provincial taxation, which [illegible] from [illegible] to 3.3 per cent.

He strongly urged governments to [illegible] thrift as a means of reducing future relief rolls. With this in mind, he suggested that insurance [illegible] would likely consider [illegible] before the Quebec and federal commissions on taxation their [illegible] arising out of what he said was discriminatory taxation of insurance policyholders.

[illegible] should encourage, not [illegible], he stated. In [illegible] thrift was encouraged [illegible] from income taxation [illegible] in life insurance premiums [illegible] of their income, said Mr. Smith. He urged [illegible] of income tax on the [illegible] of policies paid by instalments and objected to taxing the contributions of employee or employer to [illegible] pension funds. In Canada, legislation had passed which would never have been effected "if the public [illegible] the true situation of insurance in this country's social and economic life," Mr. Smith contended.

Illustrating the stabilizing effect of insurance, Mr. Smith pointed out that more than a billion dollars was paid to Canadian policyholders [illegible] of the depression, more than twice the entire sum expended on direct relief.

TWEEDSMUIR MISSES DEATH BY MINUTES

Campbellton, N.B., June 3.—A 500 pound coping stone fell from the top of the Campbellton station building yesterday, crushing an express truck on the spot where Lord Tweedsmuir had stood a few seconds previously.

Lord and Lady Tweedsmuir and their entourage were on their way to Halifax. The Governor-General was about 30 feet away when the stone toppled.

Firestone TIRES FOR EVERY PURSE

GET the most for your money. Firestone tires, with all their extra features for longer and safer mileage, do not cost one cent more than ordinary tires.

DRIVING THAT CAR—

REGARDING THE driving of an automobile we cannot speak from experience—only from observation. Yet driving automobiles have become so universal in this day and age that one is forced to view with some interest if not concern, the course in which this universal driving is taking us. Not so very many years ago when someone had produced a high grade piece of machinery of any kind, it was recognized as a matter of fact that only those with training and experience should be permitted to operate it. Damaging a machine was recognized as incompetence. As regards driving automobiles this belief apparently does not hold good for we have every kind of driver from the most suitable to the most unsuitable. Certainly as long as automobiles run, there will be a certain percentage of accidents—unavoidable accidents—accidents happen in the home, but the problem before the authorities today is to reduce the number of preventable accidents. Automobile manufacturers have produced a very elaborate and highly efficient piece of mechanism—produced them by the million—and the human element in order to use these vehicles to best advantage must adapt itself mentally and physically to a new transport era.

One thing which should be needless to stress is that it is foolishly criminal to undertake to drive a car when under the influence of alcohol. Day after day one reads of incidents where serious and semi-serious accidents have occured, that were entirely preventable had ordinary common sense been used. The automobile is a speedy, efficient piece of mechanism—but it cannot think. All the judgment neccessary must be exercised by the driver. The following taken from an exchange shows that the railways have their problems too concerning auto traffic.

"More persons were killed last year at railway grade crossings than in any year since 1931, according to reports by the safety section of the Association of American Railroads. Nearly five thousand persons were injured, and 1,786 were killed while trying to cross railroad tracks ahead of a train. Most of these were careless, impatient motorists, who either disregarded warning signals or took reckless chances in the effort to beat the oncoming train to the crossing. Many of them even crashed through crossing gates, a form of recklessness which can only be accounted for by insanity or intoxication.

Of all the different kinds of accidents which befall people, it would seem that there is less excuse for those which follow the attempt to dispute the right of way with a railroad train, than for any other. Yet many of the reported deaths occurred because the motor driver ran his car square into the side of a moving train!

The railroads are doing a great job of guarding crossings with bells, flickering lights and other unmistakable warnings, and with gates and crossing watchmen wherever there is even moderate motor traffic. Motoring recklessness seems to reach its peak when crossing watchmen holding up their "stop" signals are run down and killed. That has happened a number of times.

The ultimate solution, of course, of the grade-crossing problem will be the elimination of all crossings of highway and railroad on the same level. But in some states where a program of grade-crossing abolition has been under way for years, the number has actually increased. One crossing is eliminated by a highway viaduct or underpass and somewhere else a new country road is opened which crosses the railroad at grade. Cost enters into the question, of course. It would take billions to abolish all the grade crossings in America and where is the money coming from? The railroads can't do it all, and states and counties are reluctant to spend highway funds for that purpose. Moreover, the question always arises as to whether the highway should cross above or below the railroad tracks. In thickly settled districts such questions give to endless and obstructive local disputes.

Meantime, the old rule of "stop, look and listen," is the only safe one for motorists to follow."

In the final analysis the reduction of automobile accidents rests with the individual driver. It is wise therefore, for every driver to realize his or her responsibility, not only for their own safety but for the safety of others also.

Melburn Van Buskirk's pony is home again—but it took an eight mile walk for this Kinkaid, Kansas boy, a $5 bill, and some tears to bring it back.

The 13-year-old lad's mother needed a work horse and traded the pony and some other stock for the heavier horse. Learning the pony was to be sold at auction at Blue Mound, Melburn took $5 of his own money and walked the eight miles to Blue Mound. When the bid went beyond $5 the lad began to cry. Spectators, who heard the story, told the auctioneer, who dropped the bid back to $5 and sold the pony to Melburn.

Budding Athletes Compete for Honors at Bruce

The following are the placings of the track meet held at Bruce on Friday, May 28th, 1937.

Class A Boys, 1, 200 Meter Dash—
1. Clifford Pepper, Ryley
2. Allan Harrison, Tofield
3. L. R. McLeod, Bruce

Class A Boys, 3, Running Bd Jump—
1. Cliff Treadway, Ryley
2. Clarence Teare, Ryley
3. Jas. McAllister, Tofield

Class A Boys, 5, 100 Meter Dash—
1. Mike Mulick, Holden
2. L. R. McLeod, Bruce
3. Roy Olberg, Bruce

Class B Boys, 2, running high jump—
1. Leonard Stauffer, Anderson
2. Jack Stambaugh, Bruce
3. Adolf Behrens, Ryley

Class B Boys, 4, Run, Hop, Step, Jump—
1. Adolf Behrens, Ryley
2. Will Pepper, Ryley
3. Jack Parfett, Bruce

Class C Boys, 1,100 Meter Dash—
1. Stan Clark, Bruce
2. Martin Booth, Ryley
3. Harold Curry, Anderson

Class C Boys, 3, Running Bd. Jump—
1. Mat Engleshom, Tofield
2. Bobby Geddes, Ryley
3. Martin Booth, Ryley

Class D Boys, 1, 60 meter dash—
1. Bill Waggoner, Tofield
2. Albert Sagert, Bruce
3. Paul Grycon, Holden

Class D Boys, 3, Running Bd Jump—
1. Geo. Yakupack, Tofield
2. Joe Gusta, Bruce
3. Don Manderson, Ryley

Class A Boys, 2 Running High Jump:
1. Clifford Pepper, Ryley
2. Fred Lerl, Ryley
3. Allan Swinton, Tofield

Class A Boys, 4, Run, Hop, Step, Jump—
1. Clarence Teare, Ryley
2. Don Bendikson, Ryley
3. Henry Webb, Bruce

Class B Boys, 1, 200 Meter Dash—
1. Morley Nord, Ryley
2. Walter Rabby, Bruce
3. Tied: Jack Parfett, Bruce, Will Pepper, Ryley

Class B Boys, 3, Running Bd Jump—
1. Jack Parfett, Bruce
2. Tied: Stan Chomik, Bruce; Arnold Swift, Tofield
3. Ralph Chetney, Holden

Class B Boys, 5, 100 Meter Dash—
1. Morley Nord, Ryley
2. Walt Rabby, Bruce
3. Adolf Behrens, Ryley

Class C Boys, 2, Running High Jump:
1. Tied: Gordon Hendrickson, Anderson; Pete Hraber, Ryley
2. Bud Coleman, Bruce
3. Herman Otto, Bruce

Class C Boys, 4 60 meter dash—
1. Stan Clark, Bruce
2. G. Fredericks, Bruce
3. Pete Hraber, Ryley

Class D Boys, 2, Running High Jump:
1. Merril Sommers, Ryley
2. Ted Gaudet, Bruce
3. Joe Gusta, Bruce

Class E Boys, 40 meter dash—
1. Leroy Finseth, Anderson
2. Bill Parfett, Bruce
3. Lloyd Ferguson, Tofield

Class E Boys, Running Bd. Jump—
1. Jack Coleman, Bruce
2. Pete Fundytus, Bruce
3. Percy Pepper, Ryley

Class F Boys, Running High Jump—
1. Gerard Schroeder, Ryley
2. Tied: Dan Teske, Bruce; Roger Gaudet, Bruce
3. Tied: James Nichols, Ryley; Leo Laskoski, Holden; Phillip Hendel, Holden.

Class A Girls, 100 meter dash—
1. Alice Anderson, Ryley
2. Lois Young, Ryley
3. Eileen Davis, Bruce

Class A Girls—Running Bd. Jump—
1. R. McLennan, Ryley
2. R. McBratney, Tofield
3. Lois Young, Ryley

Class B Girls, 100 meter dash—
1. Flora Sagert, Bruce
2. Hilda Teare, Ryley
3. Elizabeth Findlay, Ryley

Class B Girls, Running Bd Jump—
1. Kath Bendikson, Ryley
2. Hilda Teare, Ryley
3. Flora Sagert, Bruce

Class C Girls, 60 meter dash—
1. Alberta Minchau, Bruce
2. Sophie Diniayk, Bruce
3. Josie Kushner, Ryley

Class C Girls, Running Bd Jump—
1. Eileen Tanberg, Ryley
2. Sophie Diniayk, Bruce
3. Gladys Johansen, Anderson

Class D Girls, Running High Jump—
1. Eunice Wiksen, Tofield
2. Evelyn Minchau, Bruce
3. Ann Mulemoka, Holden

Class E Girls, 40 meter dash—
1. Nellie Stefanik, Bruce
2. Lila Bailey, Tofield
3. Stella Sirdar, Tofield.

Class E Boys, Running High Jump—
1. Neil Jevening, Ryley
2. Jack Coleman, Bruce
3. Lloyd Ferguson, Tofield

Class F Boys, 40 meter dash—
1. Delmar Lee, Tofield
2. Orest Shyba, Ryley
3. Don Bailey, Tofield

Class F Boys, Running Bd Jump—
1. Don Bailey, Tofield
2. Orest Shyba, Ryley
3. Ross Coleman, Bruce

Class A Girls, Running High Jump—
1. Doris Treadway, Ryley
2. Clara Lutz, Bruce
3. Eva Hay, Ryley

Class A Girls, 60 Meter dash—
1. Alice Anderson, Ryley
2. Eileen Davis, Bruce
3. Lois Young, Ryley

Class B Girls, Running High Jump—
1. Hilda Teare, Ryley
2. Edith Bennett, Bruce
3. Thelma Bratrud, Holden

Class B Girls, 60 Meter Dash—
1. Flora Sagert, Bruce
2. Elizabeth Findlay, Ryley
3. Annie Gusta, Bruce

Class C Girls, Running High Jump—
1. Mavis Bennett, Bruce
2. Luella Tiedeman, Tofield
3. Tied: A. Minchau, Bruce; G. Johanson, Anderson

Class D Girls, 40 Meter Dash—
1. Olive Armstrong, Holden
2. Evelyn Rabby, Bruce
3. E. Podoborozny, Ryley

Class D Girls, Running Bd Jump—
1. Lina Anderson, Tofield
2. Nabel Chomik, Bruce
3. Gladys Armstrong, Holden

Class E Girls, Running Bd Jump—
1. Stella Sirdar, Tofield
2. Dorothy Stevenson, Tofield
3. Joan Oslund, Ryley

Girls' Softball Throw—
1. Bruce, 491-6
2. Holden, 478-2
3. Ryley, 473-6

Boys' Softball Throw—
1. Holden, 471-10
2. Ryley, 434-9
3. Bruce, 410-2

Class F Girls, 40 meter Dash—
1. Rita Sagert, Bruce
2. Vera Clark, Bruce
3. Gladys Piper, Tofield

Class F Girls, Running Bd Jump—
1. Vera Clark, Bruce
2. Leona Hulbert, Ryley
3. Agnes Komarnisky, Holden

VISITORS ARE AFTER BLACK-TAILED SHEEP

Winnipeg Man., June 7. En route to Edmonton, from which point they will journey northwest through the Mackenzie river area and into parts of the northwest territories and Yukon, George Goodwin, Assistant Curator of Mammals at the American Museum of Natural History, New York, and Carl Stein, also of New York, passed through Winnipeg over Canadian National lines a few days ago.

"We propose to spend about three months up in that country. We will be joined in a few days by four others who will be with us during the trip", said Mr. Stein. "We are very much interested in obtaining a good specimen of the blacktailed sheep and hope we are successful. We are also anxious to get good specimens of other interesting and rare animals we may come across.

"Of course, shooting will be only a small part of our journey. We have excellent cameras with which we hope to get something outstanding of the famous grizzly and his habits. We propose to obtain much wild life photography which will be extremely helpful in our work," declared the distinguished visitors.

NEW ILLUSTRATED BOOKLETS DESCRIBE CARIBBEAN RESORTS

The vacationist who has any notion of a cruise to the Caribbean Sea this year will find in two booklets just issued by the Canadian National Steamships a wealth of information concerning the various southern resorts served by the "Lady" liners and "Vagabond Cruise" ships of the Company, according to Victor E. Kho, Passenger Traffic Manager. One of these booklets bears the title "Jamaica, Nassau, Bermuda Cruises," and the other "West Indies Cruises" to the Leeward Islands, Barbados, Trinidad and British Guina.

The booklet dealing with the Jamaica route describes a series of 23-day all-expense-included voyages fortnightly from Montreal by the liners Lady Somers and Lady Rodney via the St. Lawrence River and Gulf to Bermuda, the Bahama Islands and Jamaica. A day or two in historic Montreal previous to sailing will well repay the passenger who takes one of these cruises, for this city is the Metropolis of Canada and delightfully combines the old with the new. The historic and scenic St. Lawrence River and Gulf also has its many attractions. This great inland seaway, 1,000 miles long, was born millions of years ago and famed from the earliest historical days of Jacques Cartier as a great artery of commerce and one of the scenic wonders of the world. Sailing from Montreal every other Wednesday evening, the cruise liners of the Canadian National Steamships combine the delights of a voyage presenting a panorama of Canadian inland scenery along the mighty river with the more smooth tropical loveliness of Bermuda and the Caribbean isles of the Bahamas and Jamaica, with sufficient time in each port to enjoy the many interesting sights at these tourist resorts.

BROILER MARKET MAY BE CONGESTED

According to present indications there will be a tendency for producers this year to market as broilers a larger proportion than usual of their young cockerels. For the past two or three years in Canada the broiler market has been congested, the proportion of chickens offered for sale as broilers being greater than the demand would seem to warrant for either fresh or frozen stock. It is suggested that this year, even more so than in 1936, a concerted effort is needed on the part of all interests concerned to induce producers to hold over and finish a considerable portion of these chickens as medium weight roasters.

Medium weight roasters are those most in demand on the British market, states Poultry Services, Dominion Department of Agriculture, and, if Canada is to hold the place gained in that market, it will be necessary to plan the poultry program so that there is a fair supply of the weights most in demand. It is confidently believed that a greater demand can be created for their weights in the home market also. In Nova Scotia and New Brunswick practically all chickens of the heavy breeds intended for market are sold within the four and five pound weight range. The tourist trade is largely responsible for this and it seems logical that whatever the tourist trade is an important factor a similar demand can be created.

INDIA'S MILLIONS ARE JUBILANT AT DUKE'S MARRIAGE

Calcutta, India, June 8.—India's teeming millions Hindus and Moslems demonstrated enthusiastically on celebration of the wedding of the Duke of Windsor and Wallis Warfield.

While Anglican prelates in England frowned and disavowed the religious ceremony, India's staged demonstrations on behalf of the duke all over the country and particularly in Bengal.

SIR ROBERT BORDEN'S DISTINGUISHED CAREER ENDED

Ottawa June 10.—Sir Robert Laird Borden, distinguished statesman and prime minister of Canada throughout the Great War, died at 7.30 a.m. today. He would have been 83 years old June 26th.

Bedridden for three weeks when he suffered a heart attack, Sir Robert made a gallant fight. On three or four previous occasions his physician Dr. Laidlaw, and relatives at his bedside feared death was approaching but each time he rallied.

His serious condition was learned with deep concern by the people of Canada. In every province, in every city in the Dominion, friends and admirers awaited the bulletins issued twice daily telling how the battle was going with the veteran statesman.

The bulletins came from the stately colonial home on Wurtemburg street in Ottawa, with its trees and garden where he had lived since before he first became Prime Minister and where he died.

They were carried to every part of the Empire, to United States and other foreign countries where friends, many of whom he had made during the dark days of the war, anxiously awaited the outcome.

The serious illness of one who played so great a part in the constitutional development of Canada and in fact, the entire empire set-up cast a gloom over the sittings of the British and Dominion ministers in London at the Imperial conference.

SOCIAL CREDIT BOARD MEETS WITH EXPERTS

First meeting of the Social Credit Board, with George F. Powell, technical expert representing Major C. H. Douglas in assisting in the establishment of Social Credit in this province, was held on Thursday afternoon at the legislative buildings, after which the Board was scheduled to meet the Premier and members of the cabinet.

Mr. Powell, with Glen L. MacLachlan, chairman of the Board, arrived here on Thursday morning from England following negotiations with Major Clifford H. Douglas, regarding establishment of Social Credit here.

Following their arrival Messrs. MacLachlan and Powell proceeded to the legislative buildings and paid a courtesy call on the Premier during the morning.

The members of the Board then met Mr. Powell for an informal discussion.

All members of the Board were in the city, save S. A. Berg, S. C. Alexandra, who arrived in the afternoon.

Other members of the legislature were also met by Mr. Powell and the Board.

Messrs. Powell and McLachlan have started preparation of the report which will be filed with the government on the London trip.

Summery Ready To Wear

LADIES SHEER FROCKS $2.95—

E. L. GRAY ACCLAIMED AS PROVINCIAL LIBERAL LEADER

Before a crowd of 500 accredited delegates and as many more interested people from all parts of the province, Mr. E. L. Gray of Brooks, Alberta, was unanimously acclaimed as the new leader of the Alberta Liberals. Some six names were placed in nomination, but all the others withdrew, pledging their support to Mr. Gray. The convention was held at the Victoria Pavilion, Calgary, on Friday and Saturday, the nomination of the leader taking place in the late afternoon Friday.

In accepting the nomination Mr. Gray said, in part:

"Before closing the door on the leadership choice I want to make a fairly frank statement and you should consider fully what I have to say, before you make your decision," he warned.

"I did not seek this honor," he added quietly and in earnest sentences. "But after ten years in the public service in Alberta and seeing what has been done to that service I feel that a crisis is here in the affairs of Alberta and that if I can be of any assistance I should not step aside.

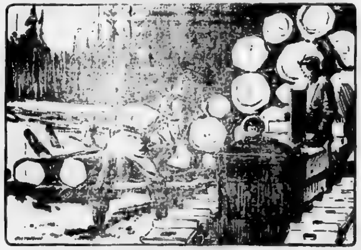
"At the same time I must say this, and in saying it I am [illegible] my position clear and plain. If you are nominating today the leader of a narrow political party with an inflexible platform and a limited membership of only the followers of that party I warn you not to consider my name at all. I have neither the time nor the inclination to go into such a party. If on the other hand the movement you are asking me to lead is a movement of wide liberalism—and I use wide in the fullest sense of the word with only one object, the establishment in Alberta of a good [illegible] government run on good business lines, I will go into public life [illegible]."

Lee station on Wednesday afternoon. The desk sergeant looked up his files. Oyler had been enquired for by his sister Mrs. Ethel M. Lee of Melton, Oregon, who asked the police to locate him.

"He had been left a $2,000 legacy and we want to give it to him," wrote Mrs. Lee. It was a complete surprise to Oyler.

"Glad I didn't have a guilty conscience and keep away when I heard the police wanted me," he said.

CANADIANS A [illegible] AND THEIR BANK



THE FOREST INDUSTRIES

The forest area of Canada on which there is timber of merchantable size is larger than the total area of France and Germany combined, the standing timber on this is estimated at 274 billion cubic feet. An area of even greater extent is covered with young growth.

This vast resource of wood is the source from which Canada drew wealth in excess of $[illegible] in 1934 (*the latest figures available*) in the form of primary products such as

- raw material for saw-mills, pulp mills, wood distillation, charcoal plants
- logs, pulpwood, bolts, etc., for export,
- firewood, railroad ties, posts, poles, fence rails, mining timbers,
- maple sugar, balsam gum, [illegible] cascara, sphagnum moss, etc.

The total value of manufactured products made principally from raw materials of forest origin was $404,435,948.

Forest products in 1936 afforded an excess of exports over imports—$158,560,000—very important to Canada's international trade.

The Bank of Montreal has co-operated with every activity of the forest industries—assisting in every phase of production and marketing. The Bank has had the privilege of financing a large share of the export business of these industries. Thousands of workers are depositors, trusting to the safety and facilities of the Bank with their employing companies.

* * * * *

Some of the Bank's services most frequently used by employers and employees in the forest trades: Commercial accounts, [illegible] accounts, financing of shipments, commercial loans and discounts, collections, trade and credit information, safekeeping of securities, savings accounts, personal loans, money orders, travellers cheques, banking by mail.

LINDBROOK

The borough of Lindbrook had its first real movie show here last Tuesday night in the school. There was once before a reel or two depicting the Dairy Pools activities shown by Mr. R. Love, but it was in no sense a movie show, just a kind of dessert to garnish a bunch of statistics, etc., re the pool. The show on Tuesday was put on by Mr. Parker of the Watkins Products Co. The show was very interesting; movies of life in other lands, big game hunting with the camera, Eskimos fishing in the Arctic, a feature play taken from the book called the "Wizard of Oz," and last but not least our old friend Mickey Mouse, which suited the youngsters; in fact it was all pretty good and lasted two hours or more.

Congratulations to Mr. and Mrs. L. Gill on the birth of a baby girl last week.

Mr. and Mrs. H. R. Hobbs of Edwardsville, Alberta, paid a flying visit here to their friends Mr. and Mrs. E. W. Hooper. They wish to be kindly remembered to all their friends here whom they could not see on account of lack of time.

Members of the Mennonite Church here attended a service held in the Tofield curling rink last Friday, June 10th, where all the surrounding districts gathered. Two visiting preachers from Coaldale, Alberta were present, the names being Rev. B. B. Young and the Rev. John Poews.

Divine Service (Anglican) was held at the school here Sunday afternoon and was conducted by the Rev. A. Wallis of Tofield.

Some of the children journeyed to the Camrose track meet and did pretty well, in fact Don Bailey passed high enough to enter the Provincial meet, whether he will is undecided.

The weather is very dry despite the odd showers and its beginning to show it too. The sloughs are drying up fast, in fact we hear of cattle and horses getting bogged even at this early date.

Mr. Asa Rogers who has been undergoing treatment at an Edmonton hospital is home again and we hope much improved by the treatment and that results will be permanent.

There is quite a bit of clearing and breaking being done here lately and it seems as if despite the dry weather we are still as optimistic as ——— or ever.

Tofield Sports Day, July First

HORSE RACING REVIVED

COMMITTEE HOLD ENTHUSIASTIC MEETING

A meeting of the Tofield Sports Day Committee was held at the town hall on Friday night last and proved to be one of the best organization meetings so far held.

The Secretary's report of the 1936 sports day was read and showed a comfortable surplus. The report was adopted.

The election of officers and committees was then proceeded with and were as follows:

President—W. Werton.
Secretary-treasurer—J. W. Chapman.
Baseball Committee—Stan Burke, Tom Shultz.
Softball Committee—W. Bailey, W. P. McIntyre.
Foot Race Committee—O. P. Thomas, W. Bailey.
Basketball Committee—F. Dunn.
Hot Dog Stand—W. Bellamy, D. J. McCarthy.
Midway—Milk Bottle game, D. J. McCarthy; Ring game, Leo Glover; Selling Novelties, M. C. Hammond.
Advertising—President and Secretary.
Dance Committee—T. McBratney, J. W. Chapman, A. E. Allan.
Grounds Committee—T. Wallington.

After some discussion it was decided to call for tenders for the large booth concession.

Considerable discussion centred around the admission price and the amount appropriated for baseball prizes, the final decision being that $50 be appropriated for baseball prizes and the admission charge to be all over 15 years of age 25c, under 15 years of age FREE.

It was decided that farmers' horse racing be included in this years sports, T. Shultz and John Morton being appointed a committee to take charge.

Given fine weather the 1937 Sports Day should be the equal or better than any we have had so far. The committees are enthusiastic and have already commenced to lay their plans.

Paste this date in your hat or use other means of remembering the date—take a day off, come to Tofield — you'll feel better for it.

NEW FINANCE IS SOUGHT BY HAIL BOARD

Following an announcement the Alberta Municipal Hail Board was ceasing operations for this year on account of financial insecurity, Hon. [illegible] E. Low stated in the legislature that some new system of financing was being sought.

The minister said the province had submitted a proposal to pay the Canadian Bank of Commerce $60,000 to reduce the board's bank loans to $165,000, while the board applied to the bank for a credit of $500,000, from which would be met obligations for this year. This proposal was on the basis that during the year insurance would be written covering 1,000,000 acres and involving a risk of $5,000,000.

Board borrowings are guaranteed by the government and it was found by the government that none of the banks to which application was made for funds would meet the terms.

The Minister declared that "it is estimated that of the taxes levied and hypothecated to the bank, some $300,000 uncollectable and while it is evident that the board would write a larger volume of business this year, there is little likelihood of it improving the position. Assuming the losses would not exceed 10 per cent of the risk, namely $500,000, the borrowings from the bank would be increased by this amount and probably only $100,000, or 25 per cent of this amount would be repaid from collections this year."

After a seven-month sojourn in England the Werton brothers, Bill and Sid arrived home on Wednesday. Most of the time was spent in London with two trips of two weeks duration to Great Yarmouth. They also visited Norwich, Bristol and Nottingham. In addition to seeing most of the show places of London, Buckingham Palace, Westminster Abbey, Piccadilly Circus, etc., they obtained a good view of the Lord Mayor's procession in November and the Coronation procession in May. They say it was a wonderful procession with the R.C.M.P. detachment the pick of the lot.

Most of the time Sid worked as a linotype operator and Bill as a skating rink attendant. Their hockey experience included playing at Wembley Stadium, [illegible] games at [illegible]. The National League hockey is of a high standard.

FOR SALE—One 3 year old Hereford [illegible] part and don't break [illegible] market price; also 14-yr-old bay gelding about 1300 lbs. $35.00. Apply to H. J. Martin, R. 4, Tofield. Phone 1106. 20c

EDMONTON BARRISTER, LEGISLATOR IS DEAD

[illegible] Harold Van Allen, K.C., Liberal member of the legislature for this [illegible] and one of the most brilliant practitioners at the Alberta bar died at Rochester, Minn., on Tuesday following a long illness. He was 47 years old.

He fought a long lingering unconquerable illness with the same fortitude, the same courage, optimism and unquenchable spirit that characterized his whole life and only after months of suffering did he yield.

The body will be brought here for burial and the funeral will be held on Saturday.

As news of Mr Van Allen's death reached Premier William Aberhart

VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plan" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots.

See the nearest Searle (Home) agent about the plot in your district.

Former Tofielder Wed In Neighboring Province

Scarlet coats of the Royal Canadian Mounted Police against a background of honey suckle and deep-shaded lilacs in tones of mauve and purple formed an attractive setting for the military wedding one day recently at the Third Avenue United church, in North Battleford of Verna Lauretta Sherwood only daughter of Mrs. Mary Sherwood and the late Mr. Sherwood of Dungannon, Ontario and Detective Constable Arthur George Cookson, son of Mr. and Mrs. George Cookson, of Tofield.

Mr. Cookson is well known in Alberta and has brought his bride here where they will spend their honeymoon visiting both in Edmonton and in Tofield, where his parents reside. They will return to their home in North Battleford late in the month.

Given in marriage by Captain S. R. Bell, the bride made a charmingly lovely picture in a gown of white satin, fashioned on princess lines with insets of lace. Her veil of lace was caught at the head with a coronet of orange blossoms and fell to the floor in graceful folds. Sheaves of calla lilies were her flowers.

Matron of honor, Mrs. Cyril Cairns wore a floor length gown of sheer material and lovely picture hat of matching shade. She carried a bouquet of gladioli.

Yellow and mauve were the delicate colored organdie dresses the two flower girls, Barbara Creasy and Ruth Bell, wore and they carried baskets of flower petals.

Ushers were Constable Birkmore and Constable Dawson of North Battleford division.

Rev. A. E. McCutcheon officiated during the marriage ceremony.

Constable B. L. Bower supported the bridegroom as best man.

Wedding music was played by Mr. Reome and Constable W. H. Kelly sang during the signing of the register.

Following the ceremony a reception to the many friends of the bride and bridegroom was held in the Library hall, and receiving with Mr. and Mrs. Cookson were Captain and Mrs. S. R. Bell and Mr. and Mrs. Geo. Cookson, senior.

Spring flowers and tall tapers were the lovely decoration of the bride's table which was centred with the wedding cake. Toast to the bride was given by the Rev. A. E. McCutcheon. Later dancing was arranged.

Among out-of-town guests present at the wedding were Mr. and Mrs. George Cookson and Miss Helen Cookson of Tofield, Mr. and Mrs. Jack Cookson of Edmonton, Mrs. Cyril Cairns of Saskatoon, Constable and Mrs. Seamons of Hafford, Constable Brough, Wilkie, Constable Robertson of Radisson, Constable MacDonald Glaslyn and Constable Millbank of Maidstone.

The wedding is of special interest to Tofielders as Arthur Cookson was raised and received his education here. Joining the R.C.M.P. some years ago, he has made good progress and is a popular and valuable member of the Saskatchewan body.

LOCAL & PERSONAL

Miss Helen McCauley returned this week to the Ponoka hospital to resume her nursing duties. She was visiting her home on her annual vacation.

Mrs. O. P. Thomas assisted the Holden telephone exchange by serving as relief operator while Mrs. Forsythe attended her husband's funeral.

Mr. J. W. Chapman returned home from an Edmonton hospital on Sunday.

Mayor Swift and Secretary Chapman attended the Municipal Conference held at Edmonton last week.

Messrs. Matchmees and Evans visited at the former's home at Strome over the week end.

Mrs. J. Letourneau, Mrs. C. Letourneau, Mrs. Hammond, Mrs. Malcolm and Mrs. Bruce visited Edmonton last week.

Reg. McCarthy, the Glover boys and Mr. Gardner from Edmonton were fishing at Lac La Non over the week end.

The Woodlawn Goodwill Club have made a wool comforter which will be awarded before June 20th. Proceeds will go towards the children's community picnic. Quilt is on view at Taylor's store. There is a concealed unknown number of three figures, correct or nearest guess wins the rug. Guesses 10c.

Mrs. E. P. Peck and son Harold, of Vancouver are guests of Mr. and Mrs. H. McDonald for a few days.

At the recent conference of clergy and laity held in Edmonton, the Bishop appointed Rev. A. Wallis as Rural Dean of the Wainwright Deanery.

Mrs. J. W. Robinson attended the Edmonton Diocesan W.A. meeting which was held at St. Luke's Church and Parish Hall on June 15th.

Mr. and Mrs. J. T. Bulloch and family spent Sunday at the home of Mr. and Mrs. J. W. Robinson.

Edythe Barden underwent an operation in Edmonton last Tuesday.

Among the visitors to Edmonton last week were Mesdames Allen, Sinclair, Kennedy, Barden and Hicks.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CONQUEST OF TYPHOID FEVER

Typhoid fever is a preventable disease. Its history in this and other countries shows that it can be stamped out. As typhoid fever is an expensive disease, its average duration being eight weeks, the elimination of typhoid would be a great economic saving.

How can the disease be prevented?

1. By the use of pure water, pasteurized milk from well-managed dairies and the use of clean food.
2. By vaccination of yourself and the members of your family against typhoid.
3. By having all cases reported at once to the health authorities so that necessary steps against the infection of others may be taken.
4. By immediate disinfection and removal of the discharges of persons ill of typhoid and their disposal in such a way that they cannot infect food or water.
5. By keeping flies away from food.

A friend's young daughter had just been selected as one of the representatives of her school at the coronation. Her father, wise to the value of prevention, was on his way to the health department when the writer met him. He was seeking a supply of typhoid vaccine to have administered to his daughter before she began her journey. Such a vaccination ordinarily protects the individual against the disease for from two to three years. As it is made from dead typhoid germs, it is harmless and a valuable measure of prevention. Typhoid fever was rarer in the Canadian forces during the war than in the civil population at home because the soldiers were vaccinated against infection.

The discharges from a typhoid patient, if not carefully disposed of, may reach the local water supply and carry the disease to users of the water. Milk may be infected from a similar source; flies may carry the germs to one's food. Certain persons apparently quite well, carry the germs of typhoid in their intestines or urinary tract for a long time and many cases of the fever occur through the unwashed hands of such persons. Such are called "typhoid carriers" and should be under the supervision of the health officer for in the capacity of cooks, waiters and the like, they form a distinct menace to the public health.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

BANK OF MONTREAL CROP REPORT

June 10th 1937

General—Wheat seeding is generally finished and the seeding of coarse grains is nearing completion in the Prairie Provinces. The total acreage seeded will probably be slightly less than last year. Beneficial rains have been received in most districts during the past ten days, and apart from southern and western Saskatchewan and a part of southeastern Alberta crop conditions on the whole are satisfactory for the present.

Alberta—Cool weather has prevented rapid growth but crops generally are ahead of last year. Substantial general rains during the last fortnight have considerably improved conditions and checked soil drifting which had become serious in some areas. Frequent rains are essential owing to sub-soil moisture deficiency. Pastures are progressing favourably. Sugar beets are good and thinning has commenced.

Saskatchewan — The growth of wheat and other grains is satisfactory in districts where moisture conditions are good. While some moisture has fallen in all areas rainfall in the south central and southwestern sections has been scanty, and heavy rains are urgently required to offset lack of sub-soil moisture. Soil drifting has caused some damage.

Manitoba.—Crop conditions are satisfactory at present throughout the Province. Generous rains have occurred and, with ample moisture, early sown grain is showing vigorous growth and a thick stand. Pastures are good.

AUTOMOBILE GAS HUMANE KILLER

Galt, Ont., June 15.—Inspector O. Jeffrey Monday demonstrated before Humane society officials a method of using carbon monoxide gas from an automobile exhaust to kill animals painlessly.

A tube was used to carry the poison gas from an automobile exhaust to an expansion tank surrounded by water, where the gas was washed. The gas was then piped to a closed chamber where a large dog had been placed. In the demonstration it was killed in one and one-half minutes.

WORLD OF WHEAT

By H. G. L. Strange, Director "Crop Testing Plan"

From October last to April, 1937, wheat rose like a rocket from $1.10 to $1.50. From April to this June it fell like a rock from $1.50 to $1.14.

Why these great changes in price?

The supply of wheat has been about as expected, practically unchanged. There have been no important changes in money, currency, or in foreign exchange.

The simple answer is that the price fluctuations were caused solely by fluctuations in turn of that most important factor—the DEMAND for the product.

From October to April certain European countries suddenly and unexpectedly most feverishly increased their demands for wheat. After April these extra demands began to fade away until today they hardly exist. Perhaps the waxing and waning of the "fear of war" was at the bottom of it all.

The situation reminds us forcibly that price is governed not alone by SUPPLY but equally well by DEMAND.

Good judgment is all we can use, and good judgment, of course, is an exceedingly rare human attribute.

Following factors have tended to raise price:—Presence of black stem rust spores in winter wheat belt in northern Texas, Oklahoma and Kansas, and spring wheat area at Mandan, North Dakota—Rains badly needed in Canadian West—Argentine corn and linseed rapidly going into consumption abroad—Hungarian wheat estimates below 1936—Heavy rains in U.S. southwest cause widespread lodging.

Following factors have tended to lower price.—Decrease in Chinese wheat imports—Prospects of large U.S. wheat crop—Favorable development in U.S. spring wheat belt—Continental buyers anticipate largest U.S. crop in several years—Cuban pineapple crop large—Good apple crop indicated in Nova Scotia.

COLOUR NOT A FACTOR IN HONEY FOOD VALUE

The increased use of honey, as a food, for instance, and as a developer of energy for athletes, and as an ingredient in home cooking, has not yet dispelled many popular fallacies connected with it. Contrary to general opinion, color does not affect the food value of honey in any way. Honey varies in colour, from water white to a very dark brown, according to the kind of flowers from which it is gathered. The difference in colour is caused by certain substances in the nectar of different flowers that absorb the rays of light in varying degrees.

The flavors of honey vary just as much as its colour, and there is no difficulty in finding a flavor to suit the most discriminating taste. As a rule, the lighter the colour of the honey, the more delicate its flavour. Therefore, when honey is to be substituted for sugar in cooking, it is the light coloured honeys that are recommended. When honey is used in place of jams and marmalades, each and every colour or flavor has its advocate.

Granulation of honey, as many people seem to think, is not an indication of adulteration. Rather, it is a sign of purity. All Canadian honey granulates sooner or later, depending largely upon the proportion of the two invert sugars it contains. The greater the proportion of levulose to dextrose the longer the honey will remain in liquid form. Levulose, or fruit sugar found in honey, is non granulating and is the sweetest sugar so far found in nature. It is usually the predominating sugar found in honey. Dextrose, or grape sugar, is a rapid granulating sugar and is predominant in commercial syrups. Granulation of honey is hastened by low temperatures and high temperatures retard it.

Honey sold in glass containers is usually heated when packed, for the purpose of keeping the honey liquid for as long a period as possible. Rapid granulation usually produces a fine texture while slow granulation tends to coarseness. Granulated honey can be brought back to its liquid form by standing the container in water and heating it to 150 degrees Fahrenheit. A higher temperature is likely to darken the colour and drive off aroma and flavor. Further information on honey will be found in bulletin "Honey and Some of the Ways it May be Used" and may be obtained free on application from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

WHEAT BOARD CONDUCTS CAMPAIGN TO PROMOTE SALES TO GREAT BRITAIN

Millers, Bakers and Consumers Told of Nourishing Qualities of Canadian Wheat

Efforts of the Canadian Wheat Board to popularize the use of Canadian wheat in the Bread of the British Isles is depicted in an attractive brochure forwarded to this publication by the Canadian Wheat Board.

Recognizing Great Britain as the most important market for Canadian wheat the present Board within a few weeks of its appointment commenced a survey in which millers, importers, bakers and retailers in all parts of the Old country were contacted. As a result of this survey a European office was established in London and the Board embarked upon a comprehensive advertising and motion campaign to promote the popularity of Canadian wheat.

One of the first steps taken was to advise the consumer that the improvement in the quality of bread compared with recent years was due to the freer use of Canadian wheat in Britain's flour. In a series of newspaper advertisements the British consumer was told that the nourishing quality of Canadian wheat was made possible by the rich soil and penetrating sunshine of Western Canada from which the wheat absorbed stimulating vitamines for the building of healthful bodies. Advertisements under the captions of "Canadian Sunshine Comes in Ships" and "The North Winds Blow out there's Sunshine in your Bread", coupled with recipes making use of bread and appealing to the palate, stirred new interest of the British consumer in Canadian wheat.

In Scotland, where Canadian Wheat had always been freely used, the campaign stressed the robust qualities of the Scottish people whose diet had included Canadian wheat bread and pointed out that wheat was first grown in Canada by Scotsmen.

In addition to newspaper advertising, Baking and Milling trade papers were utilized to keep these trades fully informed of the progress of the campaign. Promotion material was supplied to the bakers to assist them in adding to their sales of bread. In this, "Bloom" and "Vienna" loaves which require the use of a strong flour were featured. A three reel talking picture film entitled "Beyond the Sunset", replete with Canadian scenes relating particularly to wheat growing and handling, was made available free of charge to bakers, millers and importers. This film is being shown at community gatherings and so popular has it been that three sets of the film are already booked until next October.

Reprints of articles which had appeared in the British press reviewing the part Canada took in supplying Britain with food during the Great War and outlining the importance of Canada as a granary for British wheat supplies, both in times of war and peace, were circulated widely in booklet form throughout Great Britain. The brochure outlines the manner in which large posters advertising Canadian wheat were made available to bakers and millers for delivery-wagon displays. This spring and summer and during Coronation hundreds of vans in London carried attractive displays featuring the quality of bread made from Canadian wheat. In addition blotters carrying wheat advertisements were provided to the schools and "The Story of Canadian Wheat," written by Dr. E. Cora Hind, circulated.

The vigorous campaign developed by the present Canadian Wheat Board coupled with the pleasing reception and encouraging results obtained should be of interest to every wheat grower and business man of Canada.

GOVERNMENT CLOSES SPLIT RANKS TO BEAT NON CONFIDENCE MOTION

With the government forces closing their ranks, a non-confidence amendment moved in the debate on the budget by J. H. Tremblay, Lab., Grouard, was defeated in the legislature Monday by a vote of 40 to seven.

Thirteen members who have been regarded as "insurgents" were absent from the House when the vote was taken, besides one "loyalist". Insurgents' absence was premeditated, it was rumoured.

Supporting the Tremblay amendment were four Liberals, two conservatives and one "ousted" Social Crediter, James Hansen, of Taber. Opposed were all other Social Credit-ers who were in the house at the time of the decision.

Without a recorded division shortly afterward, the house adopted a motion moved by Hon. Solon Low, provincial treasurer, to consider the voting of supply, thus ending the budget debate and opening the way for consideration of departmental estimates.

"No," came from the opposition benches when Mr. Low's motion was put, compared with a great volume of "ayes" from the government side. Speaker Dawson declared the motion carried.

Preserved or fresh tomatoes are an excellent source of vitamins and minerals.

THE STATESMANSHIP OF LIFE INSURANCE

(Excerpts from Address by Grattan O'Leary, Editor, Ottawa Journal, at the Annual Meeting of Canadian Life Insurance Officers' Association.

From the standpoint of the individual, life insurance is the finest, wisest and safest investment that a man can make. It gives him security, a greater self respect, a higher reserve of character. It confers upon him what the world most needs today—a sense of individual human responsibility. In those bleak, bitter years when fortunes and savings were swept away, life insurance was the one mooring, the one sheet anchor that held for hundreds of thousands of families.

I am in favor of it because it gives a man an estate, because it purchases security, increases confidence, removes fear, and establishes credit. More than that, and from a national standpoint, it is a check and balance against periods of inflated prosperity and of extreme depression.

But I am in favor of life insurance for one other reason—to my mind the greatest reason of all. I am in favor of it because it is one of the greatest factors in our national life today in the creation of a sense of individual responsibility. That, to my mind, the sense of responsibility in the individual himself—is one of the great needs of our times.

The old idea of thrift, the old notion of our fathers that a man must make his own way, that he was responsible for himself and for his family, that he must depend upon his own energy, his own foresight and his own courage—these things have begun to give way to a coming towards paternalism, toward a tendency to have the state or the government do for us what we should be prepared to do for ourselves.

That is why we are turning to such things as old age pensions, to state control of this and that; that is why we have talk of state old age insurance, talk of scores of other things, the responsibility for which, in an individualistic society, should fall upon the individual, and upon no one else.

SAY BIG BUSINESS NOT MONEY-MAKER

New York, June 15.—The idea big business always makes immense profits was contradicted by the 20th Century Fund, a non-political foundation devoted to study of public issues.

A corps of economists who studied the question for two years reported conditions much different from those commonly supposed. Even during the heyday of the "trusts" in the early 1900's, the report said big corporations did not live up to their reputations of infallibly piling up vast returns at lightning speed.

Some "trusts" did make exceptionally rich profits for their investors, the study showed, but "the majority" of 93 corporations—formed before 1904, each with $10,000,000 or more capital—analyzed were "not profitable for investors in their common stocks" over a 10-year period.

The report came from a group which is better known for its disagreement with than for its approval of big business methods. The 20th Century Fund was founded by Edward Filene—New England shoe merchant who advocates co-operatives—for the purpose of studying and advancing "the next steps forward in the social and economic life of the people."

The project's research economists found the common stocks of the 93 averaged only 4.2 per cent up to 1914; 24 of the 93 paid no dividends at all; only 16 paid as much as seven per cent, and only 22 paid as much as could have been obtained from industrial bonds at the time, five per cent.

On the stock exchange 48 of the 93 stocks dropped during the 10-year interval, and 45 rose. But the gains to stockholders in the successful companies were so great that an investment evenly spread over all 93 would have made a profit of $205,000—about 41 per cent—by 1914. He would in addition have received about $470,000 in dividends.

No money required!

Under our Flour Exchange System you don't need money. Just bring your wheat to our elevator and take home a load of high grade flour. It costs less. Use "Gillespie Maid" Feed products. SEE OUR NEAREST ELEVATOR AGENT.

TOFIELD SPORTS DAY, JULY 1st

WE suppose if one asked a school boy, how long is a year?, he would reply 12 months, 52 weeks or 365 days. If you asked a sports day committeeman, he would probably answer — not very long. Here it is again, sports day time, committees all appointed and laying plans for a big day on July 1st. From the very first it has been the intention of the committee to make this day as attractive and enjoyable to Tofield and district residents as possible and this year have reduced the price of admission and added attractions. It is quite a few years since horse racing was part of a Tofield celebration day, but by popular request it has been revived and already considerable interest is being created. There is no elaborate racing card but there will be some very interesting races with local horses. The day's programme will follow along lines that have proved such a success in other years, fun for old and young, with sportsmanship interest keen throughout the day. Arrange to be at Tofield July 1st.

MR. BALDWIN, PRIME MINISTER

MR. STANLEY BALDWIN'S retirement from the British House of Commons, announced today, means the disappearance of a commanding figure from the rough and tumble of political life at Westminster. Mr. Baldwin has been a giant among his contemporaries. It has been in a personal character that he has especially excelled. He has won the confidence of men and women of all parties in the House of Commons.

His strength has lain in the sturdy belief he has held that it is unnecessary to hurt one nation or group of persons in order to help another. It has been this faith that has enabled him to give Britain a national government containing representatives of all the parliamentary parties thereby bringing about at least partial political unity upon a scale not previously equalled in time of peace.

Until the year 1935, he pursued a policy of reducing Britain's armaments, hoping thereby to induce other nations to do the same. He then experienced severe disillusionment. A scheme for applying sanctions to Italy — designed to prevent that nation from destroying the Ethiopian Empire —broke down completely. He also came to realise that so far from Britain's disarmament leading to similarly desirable action elsewhere, entirely the opposite was occurring. He was then driven to adopt for his own government precisely those measures of rearmament which he had condemned in the case of others.

Mr. Baldwin has often painted himself in the role of a somewhat lethargic Worcestershire farmer mainly interested in hogs. But in real life he has been an acute statesman. Vast crowds at the recent Coronation procession greeted Mr. Baldwin with an affectionate enthusiasm which left no doubt as to the remarkable nature of the popularity he enjoys. That popularity rests upon general recognition of the good work he has done throughout a long career.—Christian Science Monitor.

MONDAY'S A HOLIDAY

HOLIDAYS are to human beings what summer rains are to parched mill streams—fresheners, invigorators. Why not, therefore, place them where they will do us the most good? The English, wiser than we in the art of living, have arranged matters so that all their holidays (except Christmas, and Boxing Day, which immediately follows it) come on a Monday.

Why we Americans havn't eagerly adopted this highly civilised notion of the "Monday holiday" is an unanswerable mystery. . . . If we really want to confer the benefits of long, leisurely holidays upon ourselves, we need not seek historical precedents; we need only extend a principle already in effect. At present, when a legal holiday falls on a Sunday it is customary to transfer it to the next day, Monday. Now to atain our goal of a long week end, with its benison of relaxation and extra playtime for everyone, all we need to do is declare that when certain holidays fall on any other day than Monday, we shall take a full day off the following Monday. In other words we shall be intelligently planting our holidays where they will do us the most good. . . .

If we fix upon Monday, everyone will get at least a two-day respite, and many would find themselves with a full three days for pleasuring, freedom or recuperation. And if these aren't the most substantial forms of riches that human beings can acquire, then the whole movement toward the larger leisure is based on fallacy. . . . I maintain that we are being wantonly stupid when we let these holidays fall at random and neglect to plan their occurrence so that they can be put to the maximum enjoyment.

The legislative stamp of approval upon the Monday holiday can be quite simply obtained. The steps required to enact a holiday law would be no more complicated or difficult than the daylight saving bills that are passed by our assemblies each year. —Henry Morton Robinson in the "Reader's Digest."

POWELL TO CONFER WITH OPPOSITION

Scheduled conference of all opposition members of the legislature with G. F. Powell, Major C. H. Douglas' representative here, was postponed Tuesday until Wednesday when Mr. Powell was delayed and Liberal members were unable to make a later appointment.

Conservatives D. M. Duggan and John Irwin conferred briefly with Mr. Powell and with G. L. MacLachlan, chairman of the Social Credit board, but all termed it later "just an informal and confidential meeting" and would join the Liberals in the full conference now set for Wednesday.

Mr. MacLachlan said that, up to noon Tuesday, 48 of the 56 Social Credit members of the house had signed the pledge of unity drawn up by Mr. Powell.

Social Credit members who have not yet signed the pledge include W. N. Chant, former minister of agriculture; Charles Cockroft, former provincial treasurer; C. C. Ross, former minister of lands and mines; A. L. Blue, S.C. Ribstone; A. E. MacLellan, S.C. Innisfail; S.A.G. Barnes, S.C. Edmonton; James Hansen, S.C. Taber.

"I have the matter under consideration," said Mr. Chant. "It is not my intention to sign it immediately." Mr. Cockroft said he had the matter under consideration.

HOUSE VOTES CHANGE FROM R.C.M.P. POLICING

Motion which would oust the Royal Canadian Mounted Police from Alberta was passed by the Alberta legislature in committee of the whole house Monday night, defeating the government on the issue, but was disallowed by Mr. Speaker Dawson when it was reported to him as the house rose.

Five opposition members, including one independent Social Crediter, and the cabinet with the sole exception of Hon. Dr. Cross, voted against the motion in committee and lost by 23 votes to 20 as the motion was passed.

D. M. Duggan, Conservative leader, told the house after the vote had been taken that the motion was out of order, since the committee was dealing with estimates which it only could accept or reject, and that in any case such a motion dealing with government policy could only be brought into the house after notice of it had been placed on the order paper.

Hon. N. E. Tanner supported this view, and the sponsor of the motion rose then to protest that "if the motion had been defeated you never would have called it out of order." He asked why the government had not registered a protest while the motion was being debated, and characterized the delayed protest "a government alibi."

GATHERING OF 500 FOR FEEDERS' DAY

Observing latest developments in livestock feeding, 500 Edmonton district farm enthusiasts attended the University farm Tuesday.

Demonstrating results of experiments performed by U. of A. animal husbandry experts, the program was under direction of Prof. J. P. Sackville and animal husbandry department associates.

Included in the visitors were 75 farmers and their wives from Westlock, members of the Westlock Agricultural society. They arrived in Edmonton early Tuesday in a motor calvacade.

One hundred and fifty rural Albertans attending the university's farm young people's session also were present.

Hon. Duncan Marshall, Ontario minister of Agriculture, and Arthur Street, noted British agricultural author and farm expert, witnessed part of the afternoon program.

Purpose of the project is to acquaint Alberta farmers with knowledge pertaining to most effective feed formulas for livestock raising.

LODGE IS OPENED AT JASPER PARK

Jasper Park Lodge, June 15—With the unfurling of the large Union Jack under a bright morning sun, Jasper Park Lodge, internationally known mountain summer resort, officially opened for the season Tuesday. The weather was ideal. The grounds are weeks ahead of their usual time and the golf course is in superb condition.

Manager Robert Sommerville expressed the opinion that this will be one of the heaviest years Jasper has had. With the arrival of trains Tuesday the lodge already presents a busy appearance. Among the arrivals are a large party of the California press association which will hold a three-day convention here before returning to the Coast via Prince Rupert.

BEAR IN KITCHEN HAD COSTLY MEAL

Duffield, June 15.—Awakened in the early morning hours by a noise in her kitchen, Miss Nora McDougal, Burtonsville, went to see what was the cause of it and found a black bear feeding at her cupboard. She did not disturb him, but hastened to call a neighbor who lives a short distance away. Bruin was still in the kitchen when they returned to the house, and there, in the act of thieving, he was shot.

FARMS IN ENGLAND WORLD'S QUAINTEST

Traditions and methods of England's agricultural industry makes the island's farms the quaintest in the world, said Arthur Street, noted British agriculture authority and author, addressing a public meeting in Convocation hall, University of Alberta, Tuesday.

Although 65 per cent of farm lands in Britain are rented, English country people devote their entire lives to cultivation of property owned by upper class landlords, he declared.

"It is a funny system", he said. "There still are remnants of the old feudal order. People with money own land for many reasons, but the people who work on farms devote their lives to them because they wish to make farming a success or err to maintain the country's agricultural industry in step with other developments in Britain.

"Spiritual value and beauty of rural life is fully realised there," the speaker said.

Fourth Ranking Industry

England produces nearly as much farm produce as Canada and four times as much as South Africa, making farming the island's fourth largest industry.

"The English know how to farm more per acre than anybody else in the world, because they have been farming for centuries," he said. "It is a tradition with them and the cleverest son in a family is always selected to stay on the farm."

Mr. Street ridiculed "a popular idea that English farms are just small plots. It is hard to realise how large farms there are in such a small country. I can take you to a farm of 7,000 acres there."

W. IRVINE HEADS PROVINCIAL C.C.F.

Former U.F.A. member of parliament, William Irvine, Wetaskiwin, was elected president of that provincial council of the C.C.F. at a meeting in the U.F.A. offices in Calgary Saturday. Robert Gardiner, U.F.A. president, was elected vice-president of the council and Fred J. White, Calgary secretary-treasurer.

Mr. White is president of the Alberta Labor party. The two latter succeed Norman Priestly, Calgary, and Elmer E. Roper, of Edmonton, respectively.

Intensive educational campaign was planned and policies, in case of an early provincial election, discussed. Alberta C.C.F. council is composed of executive officers of the U.F.A., C.C.F. and Labor party.

TO TEST AIRLINER IN WESTERN CANADA

Ottawa, June 15.—Government's new all-metal transport aeroplane, modelled after those which will carry on the coast-to-coast passenger and mail service, will leave this week for western Canada where test flights will be made over the trans-Canada route between Winnipeg and Vancouver.

Preparations for inauguration of at least a section of the trans-Canada service are going forward rapidly with installation of the radio beam services approaching completion. The pioneering aeroplane will make exhaustive tests of radio and other scientific flying aids being established, preparatory to launching the service later in the summer.

WANT SEE SHIP; TRY HALT SAILING

Southampton, June 15.—Officials of the Cunard-White Star line were asked Tuesday to delay the sailing of the Queen Mary with nearly 2,000 passengers for New York Wednesday so that 26 women from the Hampshire Village Institute could inspect the liner.

"It is understood the Queen Mary sails at 1:00 p.m. and as our motor coach cannot arrive until 4:30 p.m. please arrange to hold the ship," a letter from the organizer of the outing requested.

The women may get their wish. It was announced the liner could not sail on schedule because of the state of the tide.

O'CONNOR PLEADS FOR DEVELOPING NORTH BONANZA

Declaring that by the position as a gateway to the north, Edmonton would become one of the largest cities in the Dominion, Gerald O'Connor, Liberal, Edmonton, in the legislature on Tuesday, moved that the government take steps to improve the existing facilities of all kinds giving service to the northern mineral areas.

The resolution as originally presented to the house called for "active steps" to be taken, but on an amendment by Hon. Lucien Maynard, minister of municipal affairs, the "active steps" phrase was removed, it being contended that this would commit the government to an expenditure of money.

Mr. O'Connor's address was a strong appeal for the development of this city and the northland.

Mr. O'Connor said in part:

To appreciate what development of mining in the North West Territories will mean to Alberta, I propose to sketch briefly the mining development in Canda, and its beneficial effect on Canada during the depression.

Canada will become in a very short time the greatest mining country in the world.

The mining development north of Alberta will change Alberta from a purely agricultural province to one of industry and agriculture.

And by reason of its location this in turn will make Edmonton one of the great cities of Canada.

Mineral Empire

Mr. Crerar has pointed out that only about 15 per cent of Canada is fit for agricultural purposes and that in the remaining 85 per cent lies Canada's mineral bearing empire.

The Canadian shield extends for approximately 250 miles northwest of Quebec city to Great Bear Lake. It is the largest mineralised region in the world. Its surface has not been scratched and yet the development that has already taken place produced in 1936 360 million dollars, that is a mineral production of nearly one million dollars for every day in the year. In 1901 the production was only 25 million.

Growing Industry

Our primary farm products exported in 1935 totalled 256 million and the primary mineral products totalled 210 million. In Ontario in 1935 the mineral production exceeded the value of field crops. The mining industry has already produced over one and one-half billion dollars.

These mines have nothing in common with the development that took place in the Yukon, where for example a man with a pick was able to go out, stake a claim and develop it.

The success of these mines lies in the fact that they are developing both for gold and base metals and this in turn means a tremendous expenditure to put them into development.

EDMONTON BARRISTER—

(continued from front page)

leading the house in discussion of estimates, he held an immediate conference with John J. Bowlen, Liberal house leader and D. M. Duggan Alberta Conservative leader and arrangements were made to adjourn the session until 3 p.m. Wednesday.

Outside the house Mr. Bowlen stated that about two or three weeks ago he had received a letter from hospital bed and stating that he was feeling well after a recent operation and expressed hope that he would soon be able to resume his seat in the legislature. [illegible]

Last autumn Mr. [illegible] Allen was a sufferer from a [illegible] of influenza which became rampant, and turned into pneumonia. For weeks he was in a serious condition and for several days he fought, in a city hospital, a battle with death. But he won.

Early in the new year he left for California and under the bright sunny skies of southern skies he appeared to have regained his strength and vigor.

He returned and took his place in the legislature, which had gone into session.

A few days in the house and his final illness came upon him. The [illegible] of the mighty battle earlier [illegible] was too great for a [illegible] physique.

He left Rochester in May and remained a hospital patient until the end. Only a staunch heart and indomitable will carried him so far.

AUTUMN HOUSE SESSION PREDICTED BY PREMIER EARLIER THAN OCTOBER

Autumn session of the legislature was predicted by Premier Aberhart during debate on the motion for investigation of the public works department.

He could not set a date, he said, but "it might be earlier than October."

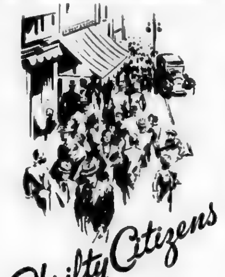
Premier Aberhart speaking in the debate, observed that before Major C. H. Douglas' representative had reached the province the session had been adjourned previously to have British Social Credit experts come to Alberta.

"It therefore will be likely—I would say, probably necessary—to have another meeting of this legislature early in the fall. I do not know exactly what time," he said.

Asked by Conservative leader, D. M. Duggan to be "be a little more definite," Mr. Aberhart added: "That [illegible] rather difficult for me to say just now. An officer of Major Douglas is here on the spot and there is another one coming soon, and when they have conferred with the government on the whole matter, I am quite satisfied they will be asking a session of the parliament early [illegible] the fall.

"It may be earlier than October. I cannot say that without conferring with them and having their advice."

First indication of an autumn session had come a few minutes before from J. H. Unwin, M.L.A. for Edson and government whip when he told the legislature "This house will be meeting again in the late fall."



Thrifty Citizens

IN ALL WALKS OF LIFE

USE THEIR BANK IN MANY WAYS

Employees, as well as employers, find many good uses for their bank. Men and women whose sole or principal income is from salary or wages constitute the large majority of the customers of the Bank of Montreal. They use a wide variety of the Bank's services as, for example.

Personal chequing accounts; savings accounts; personal loans; banking by mail; safekeeping of valuables such as bonds, stock certificates, deeds, insurance policies and jewellery; letters of credit to supply funds as needed when travelling; money orders and travellers cheques.

CHECK CAST UPON WATERS RETURNED ERE MANY DAYS

NELSON, B.C. An auto accident and a high wind conspired to rob H. Moulton of his pay check and failed.

As Pat Ryan drove to Kaslo near here Saturday his car careened from the roadway toward Kootenay Lake, and the check he was delivering to Moulton fell from a purse.

The wind caught the slip of paper and carried it far out over the lake where it disappeared from view.

Sunday afternoon Mr. and Mrs. E. Foster picked it up on the beach four miles across the water. They delivered it to Moulton.

YOUR LITTLE SAVINGS... FINANCE MORTGAGE LOANS

TENS of thousands of Canadian farms and homes benefit from first mortgage loans made possible by the accumulated savings of Life Insurance policyholders.

For every borrower, there are six thrifty people who supply the necessary funds.

This fact affords a striking illustration of the "double duty" performed by Life Insurance dollars. Not only do they ensure financial security for the men, women and children of Canada, but they also help to build and finance their farms and homes.

Life Insurance companies exercise the greatest care in the selection of properties upon which mortgage loans are made. To safeguard the savings of policyholders, security of principal and interest is and must always be the first consideration.

BUDGET IS NEAR FINAL APPROVAL

Approving departmental estimates amounting to $16,085,537 on capital and income accounts, the legislature in committee of supply made substantial progress in advancing the Budget to final approval stage.

The house passed $6,270,312 on income account and $1,814,652 on capital account.

Members placed the stamp of approval on health department estimates representing an outlay in the 1937-38 fiscal year of $1,296,900.

They also passed $2,236,061 for public works department, income account and $1,505,725 on capital account. There was $950,300 voted for the treasury department, income account, with an additional $250,000 on capital account.

For the railways and telephones department, there was $2,321,300 voted for the telephones on income account, besides $30,000 under capital account. The railways branch received a vote of $1,456.

Good Progress

Lands and mines department estimates also were given approval, involving $451,363 on income account. The committee also practically disposed of the votes for the trade and industry department, leaving only the appropriations for the bureau of relief and public welfare, unemployment relief, awaiting final approval.

When estimates for the various forest reserves were considered, J. J. Bowlen, Liberal house leader, urged that more attention should be given to greater precautions to prevent fires, rather than extensive operations in fighting them afterward.

During the discussion of estimates for the mines branch, J. H. Unwin, S.C., Edson, advocated the need of setting up a committee to revise the Mines act.

Mr. Unwin said he believed that the present act had been drawn up at the dictation of operators. He also declared that the inspectors should be changed while the bosses should be government men, he said.

Hon. N. E. Tanner, minister of lands and mines, in reply said the Barlow report of two years ago made certain recommendations in regard to the mining industry.

It would be wise to make a study of the report, he observed. Also, the chief inspector of mines (A. Millar), was in the Old Country at present on holidays and was making a study of conditions and regulations in the mining industry there. If the Barlow report did not cover the situation, other investigations could be made said the minister.

"I will consider the need of a committee when the chief inspector has made his report," said Mr. Tanner in answer to a question put by Mr. Unwin.

J. H. Trembley, Liberal, Grouard, questioned Hon. D. B. Mullen, minister of agriculture as to where provision was made for the salary of the new game commissioner, as it was not shown as such in the estimates.

"It comes out of $12,750 for extra assistance," Mr. Mullen explained.

When estimates for the trade and industry department were being dealt with, Hon. Dr. W. W. Cross, minister in charge, was queried closely concerning the licensing under the Trades and Businesses act.

"It seems to me that we are putting through legislation that is not enforced," observed N. B. James, S.C., Acadia. "I see no sense in putting through legislation if there is no power to inspect or enforce."

KETCHAMOOT

Keep in mind the Ketchamoot picnic on Wednesday, July 7 and come and enjoy a chicken dinner along with the sports.

Mr. and Mrs. Brick and family are leaving the latter part of the week for Nelson, B.C. Mr. Ratigan is there and they have obtained work for the summer.

Mrs. A. F. Schultz had her cousin, Mr. Fawcett from Toronto visit her for a week recently.

Several from our district attended the Kingman sports day on Saturday.

Some 25 ratepayers from Woodlawn and Ketchamoot district held a meeting at the Sears' home Wednesday evening of last week to discuss the new school unit. Mr. Harrison was chairman. A few of the men attended a similar meeting at Holden Friday evening.

While digging a well on Mrs. Simpson's farm Wilfred Sutton was painfully injured on Monday of last week. He had been down in the well to dig out a rock and was coming to the surface when a piece of dirt fell in and struck him on the head and shoulders. Six stitches had to be taken and he has been laid off work for the past week at the home of his aunt, Mrs. F. Sutton.

Mrs. John Lee's sister returned to her home in New York, U.S.A. one day last week after a two week's visit.

Mrs. C. A. Ingram, Miss Lindsay, Mrs. Sears, Miss Hazel, Stanley and Charley visited Mrs. Owen, and at the Lindsay home on Sunday.

FOR SALE.—One 3 year old Hereford bull, quiet and don't break fences, market price; also 14-yr-old bay gelding, about 1300 lbs, $35.00.—Apply to H. J. Martin, R 4, Tofield. Phone 1106. 30c

Good Rains This Week Bring Relief

After a compartively dry May and an unusually dry first half of June, the weather changed on Tuesday evening of this week. The sky "looked like rain" for several hours during the late afternoon and early evening, and it was almost anybody's guess whether rain would actually come from it as an aid to the thirsty fields.

Towards nightfall, however, it commenced to rain and rain fell intermittently all night and the greater part of Wednesday and Wednesday night. Including Wednesday night's rain almost an inch of water fell, not an unusually large amount, but sufficient to revive lagging hopes and to bring life to the growing vegetation and smiles to the faces of farmers.

COMMUNICATION

In fairness to all ratepayers I would suggest to the councillors of this Municipal District that they call a special meeting of the councillors immediately for the following reasons, namely:

1. To stop all expenditures that are not absolutely essential. The first on the list would be all road work.

2. Financial ability to pay taxes this fall. Regardless of the weather from now on, I think that it is generally affirmed that the farm returns this fall will be far less than what we anticipated last spring, (when the budget was passed.)

The mill rate for 1936 was 12 mills—raised to 15 mills this year. I feel safe in stating from a practical point of view that the ratepayers would approve in a general way to the above, and the mill rate dropped to 10 or below.

Respectfully,
C. W. PIPER.

Cornhill Municipal Council Transacts Much Business

The fourth regular meeting of Cornhill Municipal District Council was held at the Municipal Office, Tofield on Friday, June 11th. The meeting was called to order at 10.20 a.m. by the Deputy Reeve, Councillor G. McSporran.

Minutes and accounts of last regular meeting were read and adopted.

Reeve Glenn arrived and took charge of the meeting from this point.

All correspondence as appearing on the agenda was read by secretary.

M. C. Helmstein interviewed the council requesting a further increase be granted for his sustenance.

Mr. Tough interviewed council re road work and his arrears of taxes.

Mr. H. Stephens interviewed council re his arrears of taxes paying some on account.

Mr. Gladue interviewed council re hay lease.

Moved by Councillor McSporran council lease to Mr. J. Gladue the S.E. half of section 7-51-20 w4 for 1937, for hay purposes at a rental of $30, Mr. Gladue to pay $10.00 on or about August 1st, balance Dec. 1st. The N. W. 6-51-20-w4 was also leased for 1937 to Mr. Gladue for hay purposes.

Mr. D. M. Macalister of Edmonton representing the Canadian Institute for the blind, addressed the council re Mr. Harry Donald (blind). After hearing Mr. Macalister, council had the following resolution placed before them.

Moved by Councillor McSporran, council accept program as outlined by Mr. Macalister, namely: That for a period of six months commencing July 1st, 1937, the Institute act as guardian for Mr. Harry Donald, blind, arranging for his board and lodging in Edmonton and provide work as much as possible for Harry Donald, namely, wicker basket work. Institute to provide $10.00 per month and council and district $10.00 per month for his board and lodging. Institute to submit an accounting at the end of each month as to Mr. Donald's earnings and after earnings reach 10.00 Institute to credit district with $3.00 and any earnings over this amount.—Carried.

Mr. Geo. Yaeger interviewed council re Miss Winquist saying that council should provide $10.00 per month as wages for taking care of her younger brothers and sisters. Mr. Yaeger also offered the sum of $200 cash for the S.E. 22-50-20 w4.

Mr. Oscar J. Johnson interviewed council re leasing Miquelon sub-division.

Moved by Councillor Holmberg, council lease during balance of 1937 that portion of Miquelon sub-division, plan 6335A.C. that is under tax recovery procedure for the sum of $5.00 cash to Mr. Oscar Johnson on the understanding that said lease is not to interfere with any land owners' rights. Council also agreed to sell Mr. Johnson all of said sub-division as district may hold title to for the sum of $5.00 per acre. This offer will be binding on the district only after cash payment for said acreage has been made and on the understanding that it is to be used for farm purposes only.

Council adjourned for lunch.

The council was interviewed by representatives of culvert and road machinery firms.

Moved by Reeve Glenn that district purchase one 8-ft. Adam's Rotary scraper for the sum of $833.00 on the following terms: Dec. 1, 1937, $277.66; Dec. 1, 1938, $277.66; Dec. 1, 1939, $277.68, and six per cent per annum.—Carried.

Moved by Councillor McSporran, council pay Mr. Chas. Oliver the sum of $30 for two acres of land taken along east side of the S.W. 12-51-21 w4, for road diversion and that Mr. Ed Stephens be paid the sum of $20 for moving fence over.

Moved by Councillor Walker, each councillor be authorized to deal with any louse wire on municipal owned land in any way he sees fit, keeping in mind the best interests of the district.

Mr. C. R. Burchard interviewed council re road diversion affecting the S.W. 12-51-19 w4.

Moved by Councillor Morden, council sell to Mr. C. R. Burchard, road diversion effecting the S.W. 12-51-19 w4 and old bridge on said diversion for the total sum of $25 cash. Sale of road diversion is made by council subject to approval of Provincial Dept. of Public Works, and on the understanding that the district may enter or have free use of any earth on said road diversion for road purposes at any time.

Mr. Andrew Kozack interviewed council re continuance of his relief. Council requested that written report be submitted to District Office by relief inspector re Mr. Kozack and that Medical Health Officer be requested to submit written report re Mr. Kozack's health.

Messrs Claude Campbell and A. E. Hunter interviewed council re leasing certain M.D. property for hay purposes, also requested certain amount of work be performed on road leading into the Campbell property.

(Continued on page 4)

TOFIELD WIN 6-2 AT HOLDEN

Last Friday the local baseball nine journeyed to Holden to return the game played earlier in the week at Tofield, and came out on the long end of the score 6-2.

Glenn Woods was on the mound for Tofield and really did himself proud, holding Holden to two or three scattered hits. When the Holden team did hit their efforts were taken care of by the outfielders in big league style. Sears, Swanton and Matchett pulled off catches that had the opposition gasping and the infield took care of everything that came their way and put up a real defence when in pinches. The Tofield boys took kindly to the offerings of two Holden pitchers and knocked the ball over the lot to bring in runs when needed.

While not playing in any league this year, the boys are getting in quite a bit of playing and so far have been quite successful having only dropped two games to date. Sunday the boys are billed to play in Dodds against their fast stepping team.

LOCAL & PERSONAL

The Rev. R. K. Allan presided at the induction of the Rev. W. J. Bell, Holden, on Tuesday evening June 22. The Revs. W. [illegible] and R. W. Griffith also took part in the service. There was a splendid gathering of the people from Bruce and Ryley to share in welcoming the new minister.

A splendid social program was provided at the close of the induction service.

The ladies of the Holden congregation providing a splendid lunch.

Mr. Gordon Provost and little son, Allan, were visitors at the manse from Monday to Wednesday of this week.

Miss Evelyn Hillerud of Ryley is visiting with Mrs. C. Patterson of Tofield.

BORN—To Mr. and Mrs. Murray, on Wednesday, June 9th, a daughter.

Miss Lois Thompson visited her parents at Leduc over the week end. Harland Thompson returned with her and stayed a few days.

A number of members of the Eastern Star motored to Pigeon Lake on Tuesday, upon the invitation of Mrs. Somers of Wetaskiwin.

Mr. and Mrs. Robinson, Isobel and Edith visited Ardrossan on Sunday, motoring with Rev. Wallis.

Mr. Alex Ross, creamery inspector and a former resident of Tofield, paid an official visit here this week.

Quite a number of Tofielders spent Sunday at the lake side. A number went to Elk Island Park, while others journeyed to Cooking lake and Lakeview.

TRACTOR PLOWING DEMONSTRATION SEES GOOD TURN OUT

The recent plowing demonstration with rubber tired tractors held by the Massey-Harris Company in collaboration with their local agents, Coatta Bros., was well attended.

The event was held on the farm of A. H. Wideman, south of Tofield and about 125 interested spectators watched the new tractors go through their paces. From a practical point of view the tractors did all the work claimed for them by their makers and the group assembled were quite impressed with the advancement in tractor design over the old iron lug tractors.

Big Day Anticipated For Dominion Day

With July 1st, Dominion Day only a few days away the Sports Day organization are putting things into shape for what is expected to be a genuine holiday of recreation and fun for everyone.

The baseball committee have their teams all lined up and good ball and keen competition can be assured. Ladies' soft ball is on the card too and judging from previous years will create a lot of interest as well as keen playing. The races of course always have their big quota of followers as well as participants and Bill Bailey, the committee-man in charge has through experience got the prize selection down to a science. There is going to be some interest and fun in the farmers' horse race. Messrs Shultz and Morton are lining up entries and—well just see them go!

The basketball, literally and figuratively is "up-in-the-air." Tofield has no team; Lakeshore is playing at Vegreville and there is no one interested enough locally to take charge. If there is a demand from the devotees of this sport for a tournament the committee will put up a reasonable prize.

July 1st, Dominion Day, is a holiday, plan to spend the day at Tofield.

TENDERS WANTED FOR BIG BOOTH

Tenders will be received up to 6.00 p.m. Saturday, June 26th, for the Big Booth concession on fair grounds on July 1st. Highest or any tender not necessarily accepted. Address your tenders to Secretary-treasurer, Sports Day Committee, Tofield.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

DIABETES

The human machine is a sort of a furnace. Human beings are the stokers. Food is fuel.

Sometimes the wrong fuel or an excess of fuel is used. Certain diseases result from the misuse of the fuel or of using [illegible] of the fuel to excess. Sometimes the machine breaks down and [illegible] not burn even the best of fuel.

Diabetes is a [illegible] in which there is improper [illegible] of the fuel supplied as food.

In addition [illegible] foods are of three classes [illegible] such as lean meat, and the [illegible] egg, fats, such as exist in [illegible] am, nuts, yolk of egg and the [illegible] of meat; carbohydrates [illegible] starches and sugars. The [illegible] are found in bread and cereals [illegible] vegetables, such as potatoes [illegible] and in fruits.

These foods [illegible] taken into the body [illegible] taken up by the digestive [illegible] passed through the walls of the [illegible] and carried by the blood [illegible] tissues of the body.

In the [illegible] metabolism, that is, the proper [illegible] up of the food taken [illegible] be full amount of energy [illegible] in the food is supplied to the body. If metabolism be disordered, there is improper burning of the food. One of the diseases of disordered metabolism is known as diabetes.

There is a small organ in the abdomen called the pancreas, the chief function of which [illegible] secrete a substance known as insulin. If insulin be deficient [illegible] little of the starches and sugars can be burned [illegible] necessary [illegible] were. When the carbohydrates are not burned, they accumulate in the body, causing [illegible]. In [illegible] the patient [illegible] large quantities of water, and of course, passes urine frequently. [illegible] not properly nourished [illegible] hungry and, moreover, loses weight, strength, and vigor. He may [illegible] and in aged persons gangrene may follow a slight injury such as the paring of a corn.

The basis of treatment is regulation of the diet. This as well as the use of insulin should be prescribed by a physician.

Insulin is a crutch, not a cure. The diabetic cannot manufacture enough insulin for his needs and artificially supplied insulin takes the place of what the normal person makes for himself.

WORLD OF WHEAT

By H. G. Strange

"The custodians of quality in Canadian crops."

This would be an accurate short description of the many important people and bodies which gather form the Canadian Seed Growers' Association.

The ability to market Canadian wheat, for instance, on World's markets [illegible] premium which it [illegible] the results al[illegible] characteristic [illegible] strength [illegible]."

Wheat quality, in fact, is a matter of a highly bred particular variety. A highly bred particular variety is the product of skilled professional plant breeders. But [illegible] small [illegible] years of [illegible] pro[illegible] valueless if [illegible] thousands of acres.

The [illegible] of the Canadian Seed Growers' Association, with patient [illegible] and application, and under the [illegible] of the Association itself, and of many Government Officials, [illegible] precious handfuls of [illegible] thousands of bushels which [illegible] same high quality [illegible] original handful, and then [illegible] available to farmers at [illegible] prices.

The service thus rendered by the [illegible] of the Canadian Seed Growers' Association, is not only important, but can well be said to be a vital necessity to Canadian agriculture.

Following factors have tended to [illegible] southern Saskatchewan and in Argentina—Reports [illegible] the U.S. Government winter wheat [illegible]—Heat wave in [illegible] Canadian [illegible] past twelve years—U.S. Department of Agriculture forecasts [illegible] wheat and rye [illegible] Export Chinese wheat crop [illegible] 25 per cent below 1936.

Following factors have tended to [illegible] prices: [illegible] rains in [illegible] Alberta and parts [illegible] Saskatchewan—Wheat yields in Texas 20 to 40 bushels per acre [illegible] in U.S. spring wheat territory [illegible] increasing [illegible] production — Large [illegible] crop [illegible] prospect.

[illegible] itself when [illegible] to raw materials in that there [illegible] production in a number of [illegible] and the [illegible] of [illegible]. Canada accounts for more than one-half of the world's total production, according to the Industrial Department of the Canadian National Railways.

ORGAN GRINDER'S POSTLUDE

NEW YORK—The hurdy-gurdy of Joseph Castignoli, that has ranged Manhattan's East Side, West Side and all around the town, today is muted.

For more than 20 years children have danced to its music, men and women in the crowded tenements have leaned from their windows on summer evenings to listen to the ballads that Joseph ground from his organ and which reminded them of their homelands across the sea. For 20 years he blotted out the sight of the teeming, crowded streets for the grown-ups of Little Italy, and with his "O Sole Mio" conjured up for them Naples Bay and Italy's vine-clad hills.

Likewise did he serve the Irish and the Jews of Manhattan's heterogeneous population with Irish songs and Yiddish tunes, for he was a musician, not merely an organ grinder—and national pride was his stock in trade.

Organ Grinder 35 Years

Joseph came to Manhattan from Italy 35 years ago, and during the sequent years he and his organ were familiar sights in nearly every street. They ranged even into the mid-town Manhattan, penetrating "the busiest corner of the world," at Fifth Avenue and Forty Second Street. Hurrying crowds would stop to hear him play "My Wild Irish Rose," "When Irish Eyes Are Smiling," and "It's a Long Way to Tipperary." In each there was a remembrance.

Mayor Fiorello H. LaGuardia loves music, but he dislikes noise, and he classes the hurdy-gurdy as a noise-making machine. Therefore, when he put through his anti-noise ordinance it struck directly at Joseph and the little army of organ grinders here.

Joseph put up a fight for his music and sympathy and support came to him from practically every section of the city. It did not work, however, for the police continued to silence the hurdy-gurdies.

Taken to Court Again

The crisis came on May 6, when Joseph wheeled his hurdy-gurdy almost to the door of the apartment house at Fifth Avenue and Ninety-Sixth street where Mayor La Guardia lives and began to play "O Sole Mio." He was arrested on the Mayor's orders and taken to Harlem court where he had been tried on a similar charge previously and released on a suspended sentence. Magistrate Michael A. Ford ordered him to get rid of his organ.

His organ gone, Joseph reported to Magistrate Ford yesterday that he had sold his hurdy-gurdy. The day he made his application to the Temporary Relief Bureau for a dole.

Only one negro flew during the World War for the allied forces.

Experimental Farms Notes

SOME FUNDAMENTAL CAUSES OF PLANT DISEASES

Diseases have been known to attack plants ever since ancient times. Blights, mildews and rusts have been referred to in the Bible, and the writings of the ancient Greeks and Romans show that the true nature and cause of plant diseases were not understood and that ideas concerning them were of a superstitious nature. In fact, little was known of the origin of disease in plants until about the middle of the nineteenth century when investigators, aided by the compound microscope, made great strides towards associating diseases with their real cause.

Disease in plants may be defined as a disturbance of structure or function which may affect a part or all of the plant, thereby threatening its life or reducing its economic value. Such a definition leads to the assumption that there are different kinds of plant diseases. These are classified according to the nature of the causal agent as follows: (1) Disturbances, due to non-parasitic agents (as nutrition, environment, etc.); (2) Parasitic diseases which result from the attack of some organism, or parasite. (3) Virus diseases, due to infected sap stream (cause unknown).

Among these agencies causing non-parasitic diseases or "ill-health" in plants may be mentioned such things as unfavorable chemical conditions of the soil, unfavorable climatic conditions and mechanical injuries. Unfavorable chemical soil conditions may be due to a deficiency or excess of a certain chemical element. For example, a deficiency of magnesium impairs the amount of starch production thus causing the disease known as magnesium deficiency. In the case of potatoes, it has been reliably reported that this condition may be corrected by employing magnesium limestone in the preparation of the Bordeaux mixture used in preventing blight. Turnip brown heart is another non-parasitic disease associated with a deficiency of boron in the soil, and corrected in most soils by the addition of borax at the rate of ten to fifteen pounds per acre. Unfavorable climatic conditions may cause injury to plants. Very strong sunlight, for instance, gives rise to sunscald. Too much shade on the other hand causes inadequate starch formation. Incorrect air relations in storage are known to be responsible for apple scald and black heart of potatoes. Frost and freezing injuries cause severe injury to leaves, fruits, flowers, roots and tubers. Most gardeners, farmers and orchardists are familiar with the more common injuries of this type, examples being winter killing of fruit trees, twig die-back and frost necrosis of potatoes.

Parasitic diseases, interpreted broadly, include all disturbances in the life of plants inflicted by a living organism, either plant or animal. Fungous plants are probably the most important of such parasites. Being unable to manufacture their own food they steal it from living plants, thus causing injuries known as fungous diseases. Late blight and rot of potatoes illustrate this type of disturbance. Prevention of such diseases is achieved by means of spray applications.

Virus diseases result from infection by a virus which is "sap" transmitted from plant to plant, chiefly by aphids and leaf hoppers or even by plant contact. Falling within this group are such important diseases as spindle tuber, mosaic, and leaf roll of potatoes, peach yellows, bean mosaic, raspberry mosaic, cherry mottle leaf and tobacco mosaic. Destruction of infected plants, insect control and the use of resistant varieties are the main features in preventing the ravages of these diseases.

HOME CANNED BERRIES ON THE PANTRY SHELF

As the berry season advances, the housewife is all anticipation for there is nothing more satisfying to her than the knowledge that in this good berry year there will be a fine array of different kinds of berries on her well stocked pantry shelf of home-canned fruit and vegetables. The berry family is an efficient source of vitamins. Black berries contain vitamins A which is essential to the growth of youth; and currants, gooseberries and raspberries are excellent sources of vitamin C which prevents scurvy.

No equipment for canning is necessary other than found in the ordinary kitchen—sharp knives (preferably stainless steel), a colander, bowls, measuring cups, enamel pie plates, wooden spoons, a wide mouthed funnel for filling jars, and a jar lifter to save burned fingers when taking jars from the sterilizer. The sterilizer itself may be the common wash boiler, the steam pressure cooker, or the oven. Strawberries, raspberries and rhubarb may be canned successfully by what is known as the raw canning method. Pack in jars; cover with boiling syrup; place on newspaper in a tub and pour boiling water into the tub to cover the jars three inches over the top. Place a blanket or rug over the tub and leave until cold. In pouring the boiling water into the tub, care should be taken not to pour directly on the jars.

In the process of sterilizing the berries, there is a choice of one of four methods, namely, hot water bath at 212 degrees fahrenheit; steam pressure of five pounds; oven, or steam cooker. For blackberries and blueberries the time is 20 minutes in the hot bath; or ten minutes of five-pound steam pressure; or 35 minutes in the oven at 275 degrees fahrenheit, or 30 minutes in the steam cooker. Gooseberries require 16 minutes in the hot bath, or 10 minutes steam pressure, or 30 minutes in the oven, or 25 minutes in the steam cooker. The same times apply to raspberries, and strawberries require 35 minutes in the oven.

Full information as to the canning of fruits and vegetables will be found in the household bulletin "Canning Fruits and Vegetables" which may be obtained free on application from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

Province Gives Contracts For Road Gravelling

Alberta's highway gravelling program for this season has been launched, contracts for 170 miles of main roads having been awarded, according to announcement by Hon. W. A. Fallow, Minister of Public Works.

No sooner had the provincial legislature passed the 1937-38 budget than the province embarked upon its gravelling program. It is expected that this will be extended from time to time.

The program includes considerable gravelling in the southern part of the province. Between Macleod and Waterton Lakes, a 61-miles stretch will be gravelled, while similar surfacing material will be laid on a 12 mile stretch between Okotoks and High River.

In the north the program includes a 50-mile stretch of the Peace River highway from Lesser Slave lake westward.

The program also takes in a 7-mile stretch of the Peace River highway from McLennan to Peace River town.

It is expected that the Dominion Government will consent to sharing in the cost of the work 50-50 basis. A list of projects has been forwarded to Ottawa for approval.

"This is good news. We have been urging the importance for years of all weather highways and hope that they are merely paving the way for hard surfaced roads," said an official of the Alberta Motor Association.

More than half a million foreign birds were imported into the United States during 1926, according to the Biological Survey.

SINGLE-FARE-RETURN ON RAILWAYS AND BUS LINES

Holiday in Edmonton Fair Week

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Warten, Publisher

THE SCHOOL MEETING—

THE MEETING held at Holden Friday evening last was unusual, as meetings go, in more than one respect. Perhaps its chief point of interest was the nature of the audience. This included people from towns and districts surrounding towns from as far east as Viking and as far west as Tofield, a rather unusual congregation of people.

The meeting was also unusual because, as we understand, it was called for the purpose of discussing a specific thing—a question of boundaries—but with the exception of the address by Mr. Purvis, of Viking, who dealt exhaustively with the subject, the meeting turned out to be more in the nature of a protest against the enlarged districts themselves. The Deputy-Minister of Education, Mr. McNally, spoke on behalf of the new enlarged areas and in the time devoted to discussion, quite a number voiced their opinions against them. The large map pinned on the wall and prepared with considerable labor to show how advantageous a district running east and west would be over one running north and south, was a rather neglected "exhibit A." The meeting ran along lines as if it was discussing something proposed, whereas from the Edmonton speakers' viewpoint at least, it was a meeting to explain something that was enacted. Only a few of the audience seemed to realize that an act of parliament to bring these enlarged areas into existence was passed and was as much a matter of law as any other statute.

One feature of the meeting that we noticed was the emphasis placed on the power of the Divisional Board to engage and disengage teachers. This was explained by one speaker as being the main difference in power enjoyed by rural school boards now and under the new set-up. The emphasis placed on the Divisional Board taking over this duty gave rise to the fear in some quarters that this power might be used to the advantage of any government. The fears, however, were entirely groundless as the method of electing the Divisional Board is as democratic as the election of a public body could possibly be. When an enlarged area district is formed it is divided into five divisions, the trustees of all the schools in each division then elect one delegate, a single delegate from each of the five divisions constituting the Divisional Board. To this board is added, in an advisory capacity only, a Superintendent of Division, appointed by the Minister.

We have not seen a map of the new enlarged areas as they apply to this section of the province and consequently can't be definite about boundaries. Obviously, when all these new enlarged districts are drafted, some people are going to be left on the edges of districts, this is inevitable. The purpose of the meeting last Friday night was not so much a protest of any one section of the district for being left on the outside, but rather a plea for a reconsideration of the shape of the enlarged district. An excellent example is the area immediately adjacent to Tofield. According to present drafting of enlarged areas, territory immediately adjacent to Tofield would be on the northern edge of the Camrose enlarged district. Consequently any travelling needed to be done by students seeking advanced education would be mostly north and south. This would cancel all the advantages of highway and railway transportation facilities, as they run east and west. How much actual travelling will be done is of course, a matter for the future to decide, but certainly, this Wednesday morning as we write, if a person wished to get to Camrose or nearby point, they would have quite a job in doing so. It is raining—thank heaven—yet the bus just this moment passed the window, on time, from as far away as Wainwright. If the new educational set-up is going to entail any amount of travelling there is no question as to the transportation advantages of an east-west direction. Mr. McNally, said that the government would give due consideration to any suggestion, so perhaps the meeting, as regards boundaries, may bear fruit.

The enlarged school district area scheme has been brewing for a long time. Hon. Perrin Baker several years ago, gave an address concerning it at Tofield. While perhaps the present plan is not exactly the same as his, it is very similar and constitutes a departure from the rural school district set-up that has been in vogue in this province since the province was organised. The object of the enlarged districts, as explained by Mr. McNally, "is to establish better educational service in rural areas than they have had before."

In the change-over ratepayers are going to be affected, ratepayers in some districts will be called on to pay more school taxes, others less, but on the whole it is expected the new set-up "will cost a little more." There are now eleven enlarged districts operating in the southern part of the province. Many people will watch the progress of these eleven districts with much interest.

Probably the most startling statement made at the meeting was that made by the Deputy-Minister when speaking of his early school days in New Brunswick. Mr. McNally said the land was so hilly that scholars when going and returning from school went up-hill both ways.

J. M. McARTHUR HEADS NORTHERN ALBERTA RAILWAYS

The Board of Directors of the Northern Alberta Railways Company has appointed J. M. McArthur, General Manager of the company, at Edmonton, according to an announcement made a few days ago by W. H. Hobbs, Secretary of the company. Mr. McArthur succeeds John Callaghan, who is retiring after many years of faithful service. The appointment becomes effective July 1st. Mr. McArthur will report to the Operating Committee of the company, which consists of A. E. Warren, vice-president in charge of the Western Region of the Canadian National Railways, and W. M. Neal, vice-president, Western lines, Canadian Pacific Railway.

John Callaghan, who was born in Iowa in 1868, began his railway career in 1889 and was at one time Deputy Minister of Railways and Telephones for the Province of Alberta. He became manager of the Northern Alberta Railways Company July 1, 1929.

EPIC FLIGHT OVER NORTH POLE ENDS IN MURKY WEATHER VANCOUVER, WASH.

VANCOUVER, Wash.— Three Russian aviators who braved the north polar wastes in a daring attempt to fly 6,000 miles from Moscow to Oakland, Cal., landed here Sunday, retarded by bad weather, approximately 580 miles short of their goal.

Vancouver is across the Columbia river from Portland, Oregon.

They arose from a long sleep Sunday night, consulted Soviet Ambassador Alexander A. Troyanovsky and decided to fly to San Francisco by aeroplane.

They will complete their interrupted journey to California in the ship which carried the Ambassador north from San Francisco when he received word poor visibility halted the projected non-stop flight from Moscow. Their own machine will be dismantled here.

Their exact whereabouts unknown for several hours in murky north Pacific weather, the intrepid trio glided down to a perfect landing at Pearson field, Vancouver barracks, at 9:22 a.m. Edmonton time, 63 hours and 17 minutes after leaving Moscow.

Through an interpreter, the fliers Pilot Valeri Chekaloff, 33, Co-Pilot Georg Phillipovitch Baibukoff, [illegible] and Navigator Alexander Vassilievich Behakoff, 40, said the landing was made because of poor visibility.

Nothing was wrong with the ship and they were aware of their position, they added.

200-BARREL WELL SEEN AT RIBSTONE

Possibility that a major oil field tributary to Edmonton was in process of development in the Ribstone area was seen by S. H. Roe, manager of N. Bawlf Grain company, who returned from an inspection of Dina well in that field recently.

Tests conducted at the producing well of Dina Oil and Refining Co. Ltd., had indicated a minimum flow of 200 barrels per day as a "certainty" after the well had been placed on the pump, Mr. Roe reported.

At the same time, the Dina company, a Lloydminster organization, had timbers and supplies on the ground and erection of a derrick for their No. 4 well, 20 yards south of the producer, was being rushed with all speed.

Southeast of the Wainwright oil fields and close to the Saskatchewan border, the Ribstone field, if it comes into good commercial production, would be a boon to Edmonton, it was believed.

While Dina well was being tested drilling operations were being carried on by London Ribstone Petroleums on their No. 2 well. Hard shale had been encountered at the 1,800 foot level and it was expected the well would be capped for production tests very soon.

Power plant and pumping station capable of supplying numerous wells were being installed on the ground it was reported.

Located some 11 miles north and seven miles east of Ribstone, properties of the Blackfoot Ribstone Oils Ltd., were enhanced in value as a result of the Dina well production, Allan R. Gillies, Edmonton, official of the company said.

REDUCTION IN RAILWAY FARES FOR DOMINION DAY

With the advent of Canada's mid-summer public holiday, Dominion Day, which this year will be observed on Thursday, July 1, the Canadian National Railways will place in effect reduced fares, providing an opportunity for economical travel according to an announcement made by R. Creelman, passenger traffic manager of the company. These fares will consist of single fare and one quarter for the round trip, good going Wednesday, June 30, and up to two p.m. on Thursday, July 1, with return movement good to leave destination up to midnight of Friday, July 2nd.

The number of motor cars registered in Washington, D.C., as of June 30, totalled 35,256.

A million pounds in bar gold weighs seven tons 8½ cwt., and occupys a space of 17 cubic feet.

Crop Report Shows Need of Moisture

From June 5th to 12th splendid [illegible] were general in south western [illegible] north as far as Red Deer. Highest precipitation [illegible] reported from [illegible] average of from 2½ inches fell [illegible] Lethbridge north. As a consequence prospects are bright for a reasonably good grain crop from Red Deer South provided some rainfall occurs during the next few weeks.

In south eastern districts the rainfall has been much lighter, one inch being reported from Youngstown and [illegible] that amount or less at Brooks, [illegible] and Medicine Hat. From [illegible] to a point north of Medicine Hat [illegible] conditions and [illegible] winds have destroyed much of [illegible] crop and the recent moderate [illegible] are too late to be of much help [illegible] heavy rains at an early date [illegible] avert almost complete crop failure. Conditions are somewhat better [illegible] the main line of the C.P.R. through the south and east central [illegible]. The earlier dry weather and [illegible] winds were the cause of considerable soil drifting. Serious damage was sustained by many fields [illegible] of which were completely blown. Some reseeding has been done [illegible] the recent rains have revived [illegible] crops to some extent, but a [illegible] of the damage is beyond repair. [illegible] storms were particularly bad from Calgary south.

From Lacombe north to Athabasca [illegible] to Saskatchewan precipitation has been limited to [illegible] scattered showers since early in the crop season. [illegible] of this area needs a general rain [illegible]. Prospects are brighter [illegible] Lloydminster district where rains have been heavier [illegible]. The comparatively dry conditions in the central [illegible] of the province are [illegible] in forage [illegible]. Hay yields will be unusually light.

Conditions in the Peace River district are less favorable than earlier in the season. Though there was a fairly good reserve of moisture, little other than local showers has occurred during the last month. Dry winds and high [illegible] are retarding [illegible] growth and late [illegible] grains [illegible] uneven. Hay crop will be light [illegible]. A good general rain would [illegible]

Grain [illegible] in the north and east have [illegible] recent [illegible] outbreaks [illegible] have done [illegible] districts [illegible] apparently being [illegible] reasonably [illegible] some parts [illegible] where range conditions [illegible] Dairy production [illegible] upgrade with cream [illegible]

Sun[illegible] across a dusty [illegible] frequently [illegible]

WON'T BE FIRST SLEEPING JUROR, JUDGE TELLS HIM

OMAHA—A negro, who gave his occupation as night watchman, asked District Judge J. W. Yeager to excuse him from duty.

"Your Honor," he pleaded. "I've been working nights for 27 years and the daylight hurts my eyes. I'm afraid I'll go to sleep in the middle of a case."

Retorted the judge:

"You won't be the first one. We'll take a chance on you. Request rejected."

WAKE UP YOUR LIVER BILE—
And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

MAJORITY HOSTILE TO CHANGE IN SCHOOL AREA

(Holden Herald)

In the neighborhood of 250 rural and town school trustees from points west of Tofield and east as far as Irma, assembled in the Holden Community Hall, Friday evening to hear Dr. G. F. McNally Deputy Minister of Education, deliver an address on the benefits of the larger school district and the new curriculum.

Chairman W. J. Fleming, in opening the meeting calls on Mr. Purvis of Viking to state the views of a previous meeting. He talked for some length on the advantage of a large division [illegible] line extending from Tofield [illegible] Irma taking in [illegible] south, with railway [illegible] way facilities already [illegible] more [illegible] fact that [illegible] inspector also [illegible] and south and [illegible]. He called upon the [illegible] to consider the feasibility of forming a division along [illegible].

Dr. McNally [illegible] opening his address stated that the purpose of the larger [illegible] meet the demands in rural [illegible] for a better educational service [illegible] they can get [illegible] smaller areas. He stated that this was not a [illegible]lated scheme and that no school would be closed [illegible]. This plan was not new [illegible] worked out [illegible] countries and that [illegible] had no desire to go back to the small areas. He also pointed out the duties of local boards, and the authority invested in the Divisional Board. He touched on the hiring of teachers, travelling libraries, advanced training in existing high schools, better supervision, equalization of assessment over the division. In closing he said that the larger division would provide a better educational service for the children, and a service equal to that received in city and town schools.

Mr. Fuller, chief inspector of schools, and Mr. Yule, inspector for Vegreville, assisted in answering many questions.

A vote was taken on the new division [illegible] showed the majority against [illegible].

A proposal to appoint delegates to [illegible] regarding [illegible] was ap[illegible] materialize.

[illegible] assembly [illegible] enlarge the present school area.

C.C.F. GROUP HEAR EDMONTON SPEAKERS

(Contributed)

[illegible] meeting of the local C.C.F. Club was held in the Institute Rooms on Thursday last. Owing to the physical limits of the hall the meeting was not advertised as well [illegible] warranted. There were [illegible] speakers.

The first speaker, Jack Carrigan, gave a talk on the subject "Socialism and Agriculture." He showed that the farmer may own part of the tools for producing and distributing his product, just as a carpenter owns his hammer and saw, but the farmer does not own the utilities of storage, transportation, processing, etc., of his product, and can do so only socially. The farmer is exploited equally with the industrial worker only at a different point.

The next speaker, Clifford Lee, cast his eyes dreamily over the creed of the A.W.I. and took for his text 'Decisions,' showing that the greater part of the voters in the last election had turned their backs on capitalism and with scarcely any other choice voted for Social Credit and that when they found that it would not work they turned to some other way out of the paradox of "poverty in the midst of plenty."

He was followed by Walter Mentz, who took for his subject "Social Dividends" and declared that Alberta was "Social Dividend conscious" and will continue to press to that goal and that if one means fails they will turn to another. We did not know that Walter was Irish but his sense of humor should entitle him to that honor.

He outlined in brief the Socialist Philosophy of dividends "from soup to nuts" showing that the only source of Social Dividends (better standard of living, culture, leisure, wealth, etc.) that could be obtained was the Social Development and distribution of the resources of nature. This was not just an academic theory but a principle that is being carried out successfully in many parts of the world.

A few questions had been asked when some "nut" discovered that it was 11.30 p.m. A hasty vote of thanks was tendered the speakers and the members hurried home to begin work again Friday morning to produce more dividends, a little (they hoped) for themselves, more probably for some one else, one of the big shots.

FORMER TOFIELDER PASSES AWAY

Mrs. Florence McMillan, beloved wife of Mr. Lawrence McMillan of 10743 99 st. passed away in the city on Tuesday, June 22, in her 38th year. She leaves to mourn her loss besides her loving husband, three sisters and six brothers, Mrs. W. E. Powell, Los Angeles; Mrs. F. Harris, Edmonton; Mrs. B. Ramsey, Mirror Landing; John Pruden, Fallis; Chas. Pruden, Los Angeles; Adam Pruden, Chicago; Vernon Pruden, Oakland; Fred and Andrew, both residing in Edmonton.

Mrs. Florence McMillan was a daughter of Mr. and Mrs. Louis Pruden late of Tofield, and was well-known in this district. The funeral service will be held at Edmonton on Sunday, burial service and interment taking place at Tofield cemetery at four o'clock Sunday afternoon.

U.F.W.A. HOLD REGULAR MONTHLY MEETING

The June meeting of the U.F.W.A. was held at the home of Mrs. C. Erickson, east Tofield, when a large number of members and visitors spent a jolly and profitable afternoon.

The roll call was heartily entered into, each member giving her place (and date) of birth and some memories of her childhood. We were thus reminded of how our U.F.W.A. brought together the women of widely separated countries and nationalities to form a happy group of home makers.

The summer conference, to be held this year on July 6th at Vegreville was discussed and Tofield's part in the exhibits of handicrafts arranged for.

A song contest was held, the subject being "Our U.F.W.A." and judging from the sentiment expressed in some of the entries, we sure don't hate ourselves.

An excellent paper, "What the Emigrant Gives to Canada," was given by Mrs. W. Anderson and fittingly bore out the theme of the roll call, stressing the contribution made through arts, handicrafts and commerce by the new Canadian in our midst.

Meetings are held the second Thursday of every month and all farm women are cordially invited to attend or to join.—Con.

MUNICIPAL POUND NOTICE

NOTICE is hereby given in compliance with section 29 of the Domestic Animals Act that the following Animals as described below were impounded in the Municipal Pound, kept on the S.E. ¼, Sec. 36, Twp. 51, Range 19, W4.

One Bay Gelding, white spot on forehead, aged.

One Bay Filly, coming two years old, white spot on forehead, no brand visible. Date of impounding, June 12, 1937.

R. V. BETHEL,
Poundkeeper.

CORNHILL MUN. DIS. COUN. TRANSFERS MUCH BUSINESS

(continued from front page)

perty. It was left to Councillor McSperran to look into request made for road work.

Moved by Councillor Morden, council approve of action taken by Reeve in appointing committee consisting of Reeve, Deputy-Reeve and Secretary to interview Prov. Dept. of Mun. Affairs, Edmonton, with a view to obtaining their approval in connection with selling section 31-50-20 w4.—Carried

Moved by Councillor Holmberg, council approve of Reeve and Secretary having gone to Edmonton to interview Prov. Relief Dept. re City of Edmonton taking action against district for the care of J. Kusnerick.

Moved by Councillor Bonese, council recommend that Mr. Robert John Stirrit be granted full pension.—Carried.

Moved by Councillor Bonese, council recommend that Mr. Andrew Johnson be granted full pension.—Carried.

Councillor Walker stated that he would endeavor to provide Mr. D. W. Jacobs with a drag. Mr. Jacobs stated that he could drag road for one mile running along north side of section 12-51-19, gratis, if district supplied drag.

Mr. K. Woodfield's letter of February 16, 1937, and his day labor pay sheet of 1933, requesting the sum of $25.60 was ordered tabled indefinitely. Councillor Holmberg stated that road work in question was never authorized.

Moved by Reeve Glenn, council approve of arrangement or understanding the Prov. Dept. of Mun. Affairs and the F.C.A.A. contemplate entering into as per Dept's circular dated April 26, 1937 re the consolidation of arrears of taxes.

Council instructed secretary to credit arrears of taxes owing on the N.E. 32-51-20 w4, Curlett estate with proceeds paid by district for road diversion through said property amounting to $10.

Moved by Councillor Holmberg, Councillor Bonese be delegated to interview Mr. Erich Erickson, Kingman, with a view to having Mr. Erickson cancel his application for lots 21 to 24, block 3, as the athletic association have always used said property and desire to retain same.

Moved by Councillor Morden, offer of Miss Inga Johnson, Kingman, for lot 18, block 2, as per her letter of June 10, be tabled until next regular meeting.

Moved by Councillor Bonese lots 23—24, block 4 be sold for $8.00 each, cash, if said property is owned by district.

Moved by Councillor Holmberg, council appoint Mr. Jno. Swabey 1937 weed inspector for divisions 2, 3, 4, and Mr. Freeman Hill 1937 weed inspector for divisions 1, 5, 6. Weed inspectors to be paid at the rate of $5.00 per day.

Letter received from Dept. of Lands and Mines as to ground fires on S.E. 11-50-21 w4 was ordered pending further investigation by councillor concerned.

Moved by Councillor Holmberg by-law No. 3-37 be given third reading.—Carried.

Moved by Councillor Holmberg that Mr. Frank Johnson of Kingman, located on S.E. 9-49-20 w4, be appointed pound-keeper. Moved by Councillor Holmberg, by-law No. 4-37, a by-law for the purpose of authorizing the sale of the south half of section 4-51-20 w4 be given first reading. It was also given second reading.

Moved by by Councillor Holmberg that Secretary be instructed to write to Mr. A. T. McLean, expressing council's appreciation in the attitude he (Mr. McLean) adopted at arriving at a settlement re his fee in defending district against action taken by Mrs. E. M. Don for damages of $7000. —Carried.

Moved by Reeve Glenn, Mr. K. E. Winquist be recommended to Prov. Dept. of Relief and Public Welfare for groceries commencing with the month of June for four months at the rate of $10 per month and necessary clothing, latter not to exceed $15.—Carried.

Moved by Reeve Glenn, council offer to sell the S.E. 22-50-20 w4 for the sum of $400. Terms to be arranged with council.—Carried.

Moved by Reeve Glenn, Mr. A. Anderson, presumably renting the N.E. 10-51-20, be requested by Secretary to pay all rent to this district, proceeds to be applied against the arrears of taxes owing on the N.E. 10-51-20, w4.—Carried.

A number of accounts were passed for payment, after which the council adjourned.

FINE GALLINGER BULL SHIPPED TO MANITOBA

Harry Gregory, of Ninga, who has recently been a visitor at Tofield, Alberta, returned with a fine young bull purchased from Claude Gallinger, named Balmuchy Marquis 2nd, an April yearling by Balmuchy Jasper. This is an admirable bull in color, strength of bone, shortness of leg, natural fleshing, character and breeding. His sire is a grandson of Mossmoor Jasper, by Balmuchy Landlord. The second sire was Broundale Marquis, by Broundale Memory by Broundale Courier, a grand champion at the Royal show.

This is another acquisition to the Shorthorn herd sires of Manitoba.

—Market Examiner.

The United States adopted the Patent Act on July 4th, 1836.

Fine Weather, Good Crowd —Tofield Sports

A SUCCESSFUL DAY

The annual July 1st sports can go on record as being a complete success. A good crowd, the equal or better than previous years, fine weather and hard working committees all compined to make the day an enjoyable one for old and young. From shortly after ten o'clock in the morning until the early hours of the next morning there was something doing every minute. The revival of horse racing proved to be a first rate attraction, and it is hoped to extend this department in future years.

Baseball

Baseball, as usual was the main attraction, six teams competing. There were some excellent games played, the calibre of the play during the day on the whole being high.

The first game was between Bardo and Ross Creek and proved to be first class ball with the result always in doubt. In many respects this was the best game of the day, the score being 2-1 for Ross Creek.

The second senior game brought out some good ball, being played between Ryley and Tofield. Tofield won this game by a score of 11-6.

The third senior game played between Dodds and Holden was won by Dodds by a score of 7-2. Both teams had their quota of supporters with the majority of the spectators cheering good plays as they came.

The semi-final and fourth game played between Ross Creek and Tofield was played with Tofield trailing the northern boys for most of the game. There was a thrilling finish, however, Tofield coming up to one run of tieing the score before the game ended. The score was 7-6 for Ross Creek.

The final senior game was played amid plenty of excitement even though Dodds obtained a fairly easy victory over Ross Creek. Dodds settled right down to business at the start and proceeded to bring in 12 runs to Ross Creek's two, thus taking first money.

There was a Junior baseball game in the morning played between Dodds and Tofield Juniors, resulting in a win for Dodds by a score of 7-3.

Softball

The softball tournament created much interest, five teams taking part: South Edmonton Juniors, Holden, Ryley, Shonts and Tofield. Edmonton S.S. Juniors won the tournament defeating Holden in the final game.

In the first soft ball game Ryley gave the visitors good opposition the game ending 10—9 for Edmonton.

Tofield met Shonts and after a keen game were defeated 6—5.

Shonts then met Edmonton and were defeated 6—0.

Edmonton then played Holden in the final, winning the game.

Horse Racing

The horse racing proved quite a success and many were pleased to see this revived.

Free for all—1, Chester Stover; 2 B[illegible] Phillips; 3 Ruth Jones.

Pony Race—1, Sid Rowland; 2 Art Tr[illegible]; 3, Leo Gardener.

Foot Races

The usual run of foot races were held and of course held the interest of the young folk and those who were not so young. There was a good assortment of prizes and the winners were more than pleased.

Boys 6 years—1 B. Hanson; 2 H. Ross; 3 ——— Kyachuk.

Girls 6 years—1 M. Hanson; 2 D. Ward; 3 A. Bradbury.

Boys 8 years—1 B. Hanson; 2 ——— Lee; 3 B. Lee.

Girls 8 years—1 Joyce Wiltzen; 2 G. Piper; 3 T. Corbin.

Boys 10 years—1 G. Hannis; 2 ——— Hanson; 3 B. Ewanovich.

Girls 10 years—1 S. Sirada; 2 ——— Sokolan; 3 D. Stevenson.

Boys 12 years—1 M. Ward; 2 E. Tiedeman; 3 A. Wiltzen.

Girls 12 years—1 Eunice Wiltzen; 2 M. Seale; 3 M. Kallal.

Boys 14 years—1 A. Tiedeman; 2 J. Berdid; 3 ——— Ewert.

Girls 14 years—1 H. Teare; 2 Eunice Wiltzen.

Boys 16 years—1 D. Moore; 2 D. Teare; 3 ——— Harrison.

Girls 16 years—1 D. Lane; 2 H. Teare; 3 ——— [illegible].

Three legged race, girls: 1 Corbin, ——— Sirada; 2 B. Lee, M. Kallal; 3 Lyla Bailey, E. Thomas.

Three legged race, boys: 1 J. Berdid, M. Ward; 2 ——— Eller, G. McLachlan; 3 F. Campbell, S. McBratney.

The dance was as usual well patronized there being a jolly crowd dancing to good music.

The booths on the grounds did a good business, the big booth run by the C.W.L. and the hot dog stand in charge of W. Bellamy and run by the Sports Committee.

All the departments functioned smoothly and the various committees are to be congratulated upon having completed another successful sports day.

The regular financial statement will be published in due course.

INTERESTING RELIC FOUND ON C. INGRAM'S HOMESTEAD

A relic of military activity of bygone days was found on the homestead of C. Ingram last year. When breaking for Mr. Ingram a man overturned a bayonet that had evidently lain there for many years. The man took the bayonet home and only recently did Mr. Ingram learn of the incident.

Obtaining possession of the bayonet, enquiries were made and it is believed that it was dropped by a French military party that was in this territory many years ago. It was found near what in wet years would be a water course and a likely place for a camp.

The bayonet, while of course rusty, is still solid and in a state of good preservation. Mr. Ingram homesteaded this land 35 years ago and it is believed the bayonet has lain there for over 50 years.

LINDBROOK COMMUNITY CLUB

The meeting of the L.C.C. was held at the home of Mrs. H. Stine. Twelve members were present, also two guests.

The Community picnic will be held at Lakeview on July 18th.

A barn dance will be held at the home of Reub Hammersly on the 7th of July to raise funds for the Club.

The next meeting will be held at the home of Mrs. F. Kortzman. Roll call will be answered by first aid hints.

BUILDING BRINGS FORTH REAL CO-OPERATIVE EFFORT

On the eastern boundary of town, not far from the Tofield school, there is being erected a splendid place of worship for the Mennonite people. A visit to the nearly completed structure on what is likely to be the hottest day of the year [illegible] found twelve men busily engaged in doing interior work. We [illegible] that all the labor was being [illegible] some [illegible] being on [illegible].

They are [illegible] three [illegible] of 12 each [illegible] crew [illegible] days. Mr. [illegible], foreman [illegible] as afforementioned [illegible] the structure.

The building is [illegible] feet with full basement. The foundation walls [illegible] of poured concrete, ten feet in perpendicular. The base is 18 inches wide at the bottom and ten inches wide at the top. The basement wall has about five or six feet [illegible] ground. The top structure is [illegible] and is being sealed inside with [illegible]. The building has a com[illegible]

(continued on back page)

KINGMAN

The Ladies' Aid will meet with Mrs. [illegible] on Thursday, July 8th [illegible] afternoon.

Mr. and Mrs. J. K. Dettwiler and daughter Malanda visited at the home of Mr. and Mrs. Fleming last Wednesday evening.

M[illegible] Edith and Beatrice [illegible] visited Berdid Aop last Saturday afternoon.

A [illegible] was held in the Kingman [illegible] Friday evening for Miss D. [illegible]. A good time was had [illegible] games. A [illegible] by her mother Mr. M[illegible] [illegible] which they danced.

Miss May Welch and Miss Julia Johnson accompanied Miss [illegible] Thompson back to La Glace, Alberta, where she is employed in a store.

Mr. J. K. Dettwiler is busy remodelling the new hardware store, which Mr. Erickson will occupy in a few days.

Rev. Hugh Campbell held service at the Baptist church last Sunday afternoon.

Final Results Tofield School 1937

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

DAILY NUTRITION

Our new knowledge of vitamins in relation to general nutrition is highly important. Every intelligent citizen knows something about vitamins. This knowledge has been slowly growing since the time of the Crusades at least. Sir Robert McGarrison, C.I.E., M.D., one of the greatest authorities on vitamins and general nutrition, said some years ago that "the newer knowledge of nutrition is the greatest advance in medical science since the days of Lister. When physicians, medical officers of health, and the lay public learn to apply the principles which this new knowledge has to impart—then it will do for medicine what asepsis has done for surgery."

What are the principles of this new knowledge and how are we to apply these principles?

The newer knowledge of nutrition centres around vitamins, their sources, and their power in nutrition. We have learned to beware of deficiency diseases which are caused by a deficiency of vitamins in our food, but we have not yet learned to protect our health by eating every day and at every meal protective foods which protect our health and keep us well.

In other words, we have not yet got all the facts into our minds. Protective foods are not expensive foods. They are the good old foods that we have always known. But do we eat them?

The causes of dental decay bring some of these facts home to us. The food of the mother before the child is born is most important. What she needs is milk—one quart of milk a day—butter and other dairy products, some raw food, plenty of green vegetables, wheat germ, some fresh fruit, an egg, meat or sea-fish once a day and some bread and whole grain cereals. Cod liver oil is a great safeguard and is a necessity for both the mother and her baby. In this protective diet we have the minerals needed to build bones which are calcium and phosphorus; we have the vitamins needed for the structure and health of the teeth, and for the gums and surrounding tissues. Teeth are built before birth. Teeth decay because the prospective mother's food was poor.

Such a protective diet is what everybody needs for health. Adults may do with a pint of milk a day after they get their growth but they need the same general diet. Water is of outstanding importance to the body; it forms two-thirds of the structure of the body. Six glasses a day are needed. Water should be taken an hour away from a meal. Oxygen, that is, air,—fresh air—is essential. Of all the various supplies our bodies need, air and water are the chief.

TESTED RECIPES

A milk drink is a food as well as a thirst quencher. On hot summer days when appetites lag and a keen desire for something cool and refreshing persists milk drinks are most satisfying. They not only allay thirst but offer another way of assuring an adequate amount of milk in the daily diet.

Milk Shake—

2 to 3 tablespoons syrup

1 cup milk

Combine syrup with milk. Beat thoroughly. Serve well chilled. The addition of about a tablespoon of ice cream to the milk shake makes a richer drink.

Commercially prepared syrups are now on the market in quantities suited for home use. If preferred, syrups such as the following may be made at home.

Chocolate Syrup—

½ cup sugar, 2 cups water, ½ cup cocoa, pinch of salt

Mix sugar and cocoa with sufficient water to form a paste. Add remaining water and cook 5 minutes. Cool and keep in a covered jar.

Orange Syrup—

1 cup orange juice, 1 cup sugar

1 tablespoon lemon juice.

Boil juice and sugar together 5 minutes. Cool.

Fruit Syrup—

Combine juice from canned cherries, pineapple, strawberries or raspberries with sufficient sugar or honey to make syrup of desired sweetness. Cook until mixture is of a medium thick consistency. Cool. If using fresh berries, crush and boil 5 minutes in water to cover. Strain and add sugar. Cook to a syrup.

Vanilla Syrup

1 cup sugar, ½ cup water, 1 to 1 tablespoons vanilla

Cook sugar and water together to make a medium thick syrup. Remove from heat and add vanilla.

Milk Julep—

Combine 1 cup milk with 2 to 3 tablespoons of any of the syrups suggested for milk shakes. Break a whole egg into milk and beat thoroughly. If available charged water may be added to the julep just before serving.

WORLD OF WHEAT

By H. G. Strange

Gold is once again a matter of grave importance to statesmen.

When the prices of all commodities fell precipitously in 1929, many Governments, against the advice of the best economists, revalued gold, suspended gold payments, and printed large quantities of paper money in order to make commodity prices rise.

The desired effect was achieved, but economists warned the Governments that in consequence the production of gold would become greatly expanded and that commodity prices and the cost of living would certainly rise to high levels.

Governments are now fearful that these forecasts are coming true, and so they are talking reducing the production of gold, and of making it worth less money so as to reduce in turn the prices of all products and so of the cost of living.

If this is done, however, many people, wheat producers in particular, will certainly be seriously harmed.

The wiser plan, it would seem, would be for Governments not to tamper with gold again but to redistribute it to the nations that urgently need it and particularly to remove the present harsh restrictions against trade so that an abundance of goods and products may be made available to all the people. Then all the gold will be needed to support the increased World trade.

FOLLOWING FACTORS HAVE TENDED TO RAISE PRICES

Rust affecting further U.S. winter wheat area and present in spring wheat area. Wheat believed beyond recuperation in large area of Western Canada. Fear of too much moisture in U.S. winter wheat for European blending purposes. Germany purchases considerable quantity of Argentine corn. South African prune crop is a failure.

FOLLOWING FACTORS HAVE TENDED TO LOWER PRICES

U.S. wheat offered in Europe at attractive prices. Broomhall reiterates Russia likely to export wheat and barley this summer. U. S. winter wheat harvest again progressing. Light rains received in the Argentine. Most European crop conditions improve.

GERMAN CAMPS TOURED BY KING

BERLIN—Premier King Monday saw Germany at work. It was a swift transition from Sunday among the Hitler youth camps, a transition from sport and play to the glorification of toil.

The Canadian premier first saw Herr Hierl, head of the German labor camps. Then under guidance of Col. Muller Brandenburg, who wore a labor service uniform, he visited the camps where young men of all classes, stripped to the waist, were doing their compulsory six months' labor before going into the army.

The moon covers up the sun almost exactly during a total eclipse, though the sun is 400 times larger and 400 times more distant.

EDMONTON EXHIBITION JULY 12 to 17th

Recognized as Western Canada's finest Livestock and Agricultural Show, the Edmonton Exhibition has also established an enviable reputation for the high class character and variety in the entertainment features presented to Fair visitors, and, the 1937 Edmonton Exhibition scheduled for the week of July 12th to 17th promises to be no exception.

All show space in the Manufacturers' Building was sold out on June 15th—an all-time record, and an unusually large number of Show Entries in every department of the Exhibition is indicated. The citizens of Edmonton, merchants and the management of the Exhibition are co-operating in their preparations to entertain a record number of visitors in Edmonton during Fair Week.

Farm Machinery Display Largest in Many Years

Leading manufacturers of farm machinery and equipment, both in Canada and the United States have reserved show space.

Turning to the entertainment program arranged for the Edmonton Fair, for the evening show in front of the grandstand the management have secured the most magnificent attractions ever offered in Western Canada—featuring Ernie Young's super-musical extravaganza the "CAVALCADE OF HITS." The Royal American Shows will again entertain Edmonton Fair visitors with North America's finest midway attractions. There will be six days of running horse races . . . grand parade of prize-winning livestock . . Old Timers' Reunion . . . basket ball and horseshoe pitching tournaments. A mammoth downtown street parade is also on the cards for Tuesday, July 13th and a gorgeous Fireworks display for Friday evening, July 16.

Railways and bus lines are offering reduced rates—single-fare-return good for entire week of the Edmonton Exhibition.

The Exhibition management is again offering the popular advance sale of admission tickets at the reduced price of five for $1.00 and these tickets are now on sale throughout Northern Alberta by authorized agents, or you may send your dollar direct to the Edmonton Exhibition offices and your tickets will be mailed out to you. You save $1.50 by buying your tickets early. For information about accommodation write the Edmonton Exhibition and and plan now to holiday and shop in Edmonton FAIR WEEK, July 12th to 17th.

CHILDREN WARNED AGAINST PICKING UP BLASTING CAPS

Danger to children picking up and playing with carelessly discarded blasting caps, sometimes called dynamite caps, is prevalent at this time of year. Parents should warn their children that if they should find any lying about, to leave them alone and in so doing avoid serious if not fatal accidents.

These little pellets of concentrated power are not likely to be found, of course, in city streets and playgrounds, although there are cases where they have been found in metropolitan areas.

But alongside country roads, in fields recently cleared of obstructions and in the vicinity of any kind of blasting operation, there is always a chance that children may find these copper capsules which have maimed many uninformed youngsters, and have killed others.

The blasting cap is necessary to explode dynamite. And in these days dynamite is used not only in mines and quarries, but by farmers everywhere. It is used to plant young trees as well as blast out stumps, to make new streams and widen old ones. Much of it is used in highway [illegible]

Therefore, the lurking peril of the blasting cap, an instrument painstakingly made safe for those who know its needful purpose and power, but deadly to the unknowing child or grown-up who picks it up and plays with it. For in spite of constant warnings, heedless users of these caps do occasionally secrete them in ill-considered places or scatter them carelessly around.

These small aluminium or copper cylinders, bright and shiny, filled with a powerful explosive, are about one-quarter of an inch in diameter, from one to two inches long, and resemble an elongated .22-calibre cartridge, except that some have wires attached to them.

One cap can tear a hole through a plate of steel one-sixteenth of an inch thick. A few together can burst their way through a two inch plank.

If tossed into a fire, a cap instantly becomes like shrapnel, whose flying fragments are blinding bits for the eyes of all nearby. If lightly pounded with a hammer or even pried and picked at, they are likely to explode. Then loss of sight or limb, if not of life, is inevitable.

WAGES IN ENGLAND LESS THAN IN U.S.; MORE HOURS

NEW YORK—In the majority of British industries average weekly earnings are from one-half to two-thirds as large as weekly earnings in the same industries in the United States, while the number of hours worked per week in the British industries is from 20 to 30 per cent greater than in this country, according to a study of workers' earnings and hours in Great Britain by the National Industrial Conference Board.

Comparisons between workers' earnings and hours in Great Britain and the United States have only recently been made possible, the Conference Board's study points out through the publication by the British Ministry of Labor of a comprehensive statement of earnings and hours in manufacturing industries in the week ended October 12, 1935. The Conference Board's study compares the data for 30 of the leading industries included in this statement with corresponding data for the same industries in the United States provided by the Bureau of Labor Statistics figures for October, 1935.

Earnings Less

In 18 of the 30 industries covered by the study, average weekly earnings in Great Britain ranged between one half and two-thirds of those in the United States. In four industries—sugar making and refining, tobacco, cigar and cigarette manufacturing, newspaper and periodical printing, and iron and steel smelting and rolling—earnings in Great Britain were from two-thirds to three-fourths of the United States figure.

In only two industries, cement manufacturing and iron and steel tube making, did average weekly earnings in Great Britain exceed three-fourths of the earnings in the same industries in the United States. On the other hand, there were six industries—carpet and rug manufacturing, laundries, drugs and fine chemicals, sugar confectionery, cardboard boxes, and tin box and canister making—in which the British weekly earnings fell below one-half of those in the United States.

The discrepancy between hourly wages in Great Britain and the United States, according to the study, is considerably greater than that between weekly earnings in the two countries. In none of the industries studied hourly wakes in Great Britain equal as much as two-thirds of those in the United States.

Longer Hours

In eight industries, including silk, cement manufacturing, tobacco manufacturing, paper and board making, newspaper and and periodical printing, iron and steel tube making and production of stoves, grates and other light castings, British hourly earnings were over one-half, but less than two-thirds, of the United States figure, the proportion ranging from 50.1 per cent to 59.9 per cent. In the remaining industries hourly earnings in Great Britain were less than one half of those in the United States.

The divergence between relative weekly and relative hourly earnings in the two countries is explained, study points out, by the longer hours prevalent in Great Britain. The maximum number of hours in the United States recorded for any of the industries covered in the study was 43.4 a week, while the minimum among the British industries was 44.2 hours a week. In 22 cases the British hours were 20 per cent or more longer than in the United States and in 15 of these cases the excess was 25 per cent or more. In two of these industries hours worked per week were 50 per cent or more longer than in the United States.

BRITAIN WILL HELP FRANCE IF ATTACKED

PARIS—Great Britain is resolved to give France military aid in the event of an aggression, Brig.-General Edward Louis Spears, Conservative member of parliament for Carlisle and head of a parliamentary mission to Paris, stated in an interview here last night.

Reiterating declarations of British statesmen that France and Britain have common frontiers Spears said British foreign policy was pledged to guarantee French frontiers against unprovoked invasion.

"Nothing can change our officially defined policy," he said. "Whoever attacks your frontiers attacks ours."

General Spears, who retired from the army in 1920 after serving as head of the British military mission to Paris from 1917 to 1920, warned, however, if French fears inspired them to contract engagements with central European countries, Great Britain could not be expected to follow.

Ants have domesticated plant lice, and have learned to grow mushrooms and grain.

CROP REPORT SHOWS GRAIN BADLY IN NEED OF MOISTURE

GENERAL—In the prairie provinces hot weather has caused rapid growth of grain crops in regions where moisture reserves are adequate, but there are large areas in which rain is urgently needed. The lack of adequate rainfall to date has resulted in deterioration of crops in central and west central Saskatchewan and over a large part of Alberta. Crops in Southern Saskatchewan are poor, some insect damage is reported. In other parts of Canada both east and west heavy rains have been general and growth has been rapid, although crops are still somewhat backward. In Quebec prospects on the whole are favorable. In Ontario grain and roots are doing well and cutting of a heavy hay crop has begun. In the Maritime Provinces rain has so delayed operations that in a few localities seeding is not yet completed, but growing crops are progressing satisfactorily. In British Columbia grain and root crops are in promising condition, but heavy rains have so seriously damaged early strawberries that much of the crop is suitable for jam only.

ALBERTA—Crops generally are deteriorating from lack of moisture. Wheat is heading out short and pastures are poor in all sections except the southern, where pastures are good and crops continue promising, following fairly general heavy rains. The outlook is bright for irrigated crops, and beet thinning is completed.

SASKATCHEWAN— Crop conditions show wide variation. In the east, central and northern districts, where rain has fallen, prospects continue good. In other sections crops have deteriorated rapidly due to hot, dry weather except in a limited area in the southeast where recent rains have been beneficial. Generous rains are required immediately. Pastures are dry.

EXTEND TELEPHONE SERVICE IN NORTH

PEACE RIVER—Telephone connection with Edmonton as a possible development of the service in the north is forming part of a survey being made by W. F. Kencaley, service supervisor of the Alberta Government Telephones. There has long been a demand for such connection, and necessity for it will now be investigated.

Improvement of long-distance service between various sections of the north country is also to be surveyed. This may include addition of a line to Berwyn and Fairview, installation of a "phantom line" to Grande Prairie, and a repeater at Spirit River. The complete development, if found necessary, will involve, it is estimated, an expenditure of close to $100,000.

A 24-hour service in Peace River is now assured with signing of an agreement by 95 per cent of the telephone users, and W. Russ, district superintendent, has announced that continuous service will be inaugurated July 1.

Stanley Young, who recently resigned as agent here after 16 years service, has withdrawn his resignation and will continue in charge of the office under the reorganization.

DON'T MISS THE

EDMONTON EXHIBITION

July 12 to 17

Official Opening by HON. J. G. GARDINER
Federal Minister of Agriculture

Visit Edmonton Fair Week

ENTRY SOUGHT FOR CANADIAN EXPORT GOODS

LONDON—Dean Shaw, head of the New Markets Branch of the Canadian Department of Agriculture, and several high officials of the department, today began an inquiry into ways and means of increasing exports of Canadian farm produce into the British market.

The investigation is unconcerned with the British end of the marketing, but is rather concerning itself with reforms needed in Canada to make Canadian produce more acceptable here.

Dean Shaw and his associates will study the British market with a view to discovering mistakes now made by Canadian producers and exporters, and they will then do their utmost to educate producers to ship their produce in ways acceptable to this market. It is realized here that great improvements are possible in this direction and the work of Dean Shaw and his staff will be facilitated to the greatest possible extent by Canadian officials permanently in London.

A campaign sponsored by Canada House to enlarge the market for Canadian exports has been under way for nearly a year and has been meeting with unprecedented success, and the work of Dean Shaw and his staff will work in with this campaign to great advantage. Members of the Shaw party have spent considerable time at the Canada House discussing plans for their investigation and obtaining advice as to the best way of proceeding, and their work will in no way overlap that of the permanent officials here.

HEAT RECORDS FALL AS GLASS HITS 99 ABOVE

BANG! went another all-time record for Edmonton as temperature bounded to 99 in the shade at 2.30 p. m. Tuesday. In the sun, thermometers quivered before the solar onslaught as the liquid stream of mercury touched 154 degrees and threatened to blow the cap off the tube.

Previous heat record for the city was 98 in the shade on July 10, 1934. Previous high marks for June were 94 in 1896 and 1910, and 92 in 1936. Present forecast is "hot". That's all.

Monday turned out to be a fairly warmish day, the highest mark on the thermometer being 90 above, registered at 4 p.m., while some measure of relief was obtained from the 60 above mark that temperature being the lowest overnight, registered at 5 a.m.

Temperatures in the near north are keeping well up on the scale, the highest reading in the region at 8.30 a.m. Tuesday, being 72 above, registered at Athabasca, while the coolest spots in the district at that time were Fort St. John and Grande Prairie, each with 58 above. No rain was reported from any of the near north towns.

One of the world's longest suspension bridges crosses the Delaware river in Philadelphia; it has a span of 1750 feet.

THE TOFIELD MERCURY
W. Werton, Publisher

A CITY OF CHURCHES—

IT IS Toronto, we believe, that is known as a city of churches. It is a matter of pride for residents of the Queen City to tell you how many churches there are and the percentage as related to churches and population. But we doubt whether the record of Toronto, excellent as it is, as regards number of churches in proportion to population, exceeds that of Tofield. We have no figures regarding Toronto and only guess-work as regards Tofield, but certainly we are progressing as regards the building of churches.

It is not with the authority of an old-timer that we speak of by-gone days, but our first recollection of Tofield churches concerns three—the Anglican, as it now stands; the Presbyterian church, a low, rather incomplete structure and the Methodist church, if anything, even lower still and more incomplete. The ministers in charge were respectively: Rev. Mason, Rev. Stewart and Rev. Wiggins. With the coming of Union the Methodist building "went out of business" and with the coming of Rev. Firth new church ideas were born and bore fruit, the former Presbyterian building being moved to its present site and greatly improved. With the building of St. Francis' Catholic church under the direction of Rev. Quirk, Tofield again had three churches, a number which sufficed for quite a few years. About three years ago a Mennonite body took over a house on the eastern side of town and held services there. This body has now partially completed a splendid church near the site of the house. It is 30x50ft. with full basement and will be known as the Schoenseer church. This means in English, church by nice lake, and with Beaver Lake showing in the distance the name is very appropriate. This building brings the number of churches in Tofield to four. We understand that in the very near future members and adherents of the Greek Catholic church residing in and around Tofield are planning to build a new church, which when it is completed will bring the total number of churches in Tofield to five. In addition to churches erected in town, we have of course, the Salem Mennonite church south of town and the Lutheran church east of town. So, perhaps, population considered, Tofield and district can equal the record of the famous Ontario city.

It is a sign of healthy growth and permanence to see so many well-finished church buildings. People only build churches when they are genuinely interested in the district in which they are located.

TAXATION—FRIEND AND FOE—

"THE ROMAN EMPIRE was destroyed not by the barbarians but by taxation," said Mr. James W. Gerard, President Roosevelt's representative at the Coronation, speaking at a dinner given him by the Pilgrims in London. He was alluding the tremendous burden of taxation which in the United States, in Great Britain, and in many other countries is one of the most formidable barriers to be overcome.

Public expenditure today, as in the Roman Empire, falls under two headings—productive and unproductive. It would be unfair to the Roman system not to remember that Roman rulers, especially in the first and second centuries, spent constructively as well as wastefully; and it was not the constructive expenditure which ruined them. The great military roads which they built were useful for traders as well as troops. Money spent on irrigation and the like tended to enrich rather than impoverish the people.

The waste was mainly due to the heavy cost of despotism, and the heavy cost of the armies. The masses were bribed with "bread and circuses"—in modern parlance, doles, paid in kind. Potential foreign enemies were bought off with subsidies. The official classes received more than their due from the proceeds of taxation. But military expenditure was the most crushing of the burdens under which the Roman Empire tottered and finally collapsed. At the last there was no money with which to pay the legionaires.

The increase of public expenditure and taxation in modern countries is in part inevitable and desirable. The community will receive services for a part of the money it has paid in taxes, and will reap the benefit in employment and comfort. Such taxation, if wisely imposed for sound objects, is not destructive.

But the danger which Mr. Gerard had in thought lies in the disturbing increase in wholly unproductive expenditure. The interest on old war debt is a crushing burden in Britain and a considerable burden in America. This debt, it is true, Germany completely wiped out by inflation, and France and Italy wiped out some of it, but not without hardship for their peoples. And all those countries are now facing the enormous costs of swollen armaments. In Britain and the United States also the proportion of non-productive expenditure is everywhere rapidly growing.

It is a vicious circle. The poorer each country is, the more it is jealous of its neighbors, and the more disposed to arm against them; and the more it arms, the poorer it becomes. If this process were allowed to go on unchecked each country in time would cease to have the means to pay both for armaments and social services. Neglect of the latter would invite revolution. There is no way out of the vicious circle but by agreement to disarm—disarmament implying both the reduction both of weapons and trade barriers.—Christian Science Monitor.

Grain Commission Probes Wheat Trade of India . . . .

Ancient Methods Used

GREAT CONTRAST IN METHODS IN INDIA COMPARED WITH EFFICIENT SERVICE IN CANADA

Canada is not the only country which has a Royal Commission investigating the wheat trade. A Royal Commission on Agriculture has just completed a survey of conditions in India and has made its preliminary report. India sows the third largest wheat acreage of any country in the world. In 1935-36 34,490,000 acres were sown to wheat in that country compared with 24,115,000 acres in Canada.

The report of the Commission gives complete information dealing with the handling and marketing of wheat in India. Despite the fact that the wheat acreage of that country is almost fifty per cent greater than that of Canada, its methods of handling and marketing grain are most primitive compared with the efficient and economical methods in use in this country.

Believing that our readers will be interested in a review of the report we present a summary prepared by Mr Paul Sykes, Canadian Trade Commissioner in India. As one reads this one cannot help but feel that the Canadian grain trade is to be congratulated on the progress which it has made in furnishing the farmers of the west with an economical and efficient grain handling and marketing system.

"A Royal Commission on Agriculture in India recommended some years ago that systematic surveys of the marketing of agricultural products should be carried out. The Indian Government then appointed a Marketing Adviser to do this work. This authority has now issued the first of a series of reports—"The Marketing of Wheat in India"—the observation and recommendations in which are summarized below. Subsequent reports of a similar nature will deal with the marketing of various other agricultural products in this country.

INDIA'S POSITION AS A PRODUCER OF WHEAT

India is one of the principal wheat-growing countries in the world, acreage sown to this crop being exceeded only in the United States and the U.S.S.R. The acreage in comparison with population is nevertheless a small one, being less than one to every ten persons as against one for every four persons in the United Kingdom and two or more per person in Canada and Australia. The average acreage sown to wheat is some 34,400,000 and the production about 9,500,000 tons. The bulk of the Indian wheat crop is consumed within the country, although there is a natural tendency for exports to appreciate when world prices are high. Import trade is of very limited extent, Australia being the chief supplier of occasional requirements.

This crop is grown principally in the Punjab, the United Provinces, and the Central Provinces, the acreage in these areas being over 80 per cent of that recorded for the whole country.

CONSUMPTION

It is estimated that the per capita wheat consumption in Northern India is as high as 250 pounds per annum. In the eastern and southern parts of the country, where rice is the staple cereal, this figure is occasionally as low as four pounds. Wheat is milled into various types of flour, depending not only on local demand but also on the types available from different districts. The principal derivative from the milling process, however, is a whole meal called 'ata' produced to a limited extent by roller mills but almost exclusively by small power and hand mills. Wheat starch is required in large amounts by domestic textile mills, but this branch of production is declining and four-fifths of current requirements are now imported from abroad.

HARVESTING

India's wheat crop is harvested and prepared for market by extremely primitive methods. Sickles take the place of modern harvesting machinery. Threshing is done by the feet of bullocks on a mud threshing floor, while winnowing amounts to little more than allowing the wind to blow away husks and other impurities.

The use of mechanical harvesting devices is extremely limited. Hand labor is cheap, of course, and this factor offers a serious obstacle to the sale of such machinery. There is, further, the point that interior markets are not equipped to trade in a clean and homogeneous article, while, for export or consumption in roller mills, it is customary for all grains to be winnowed and otherwise treated by the exporter or miller according to his particular requirements.

LOCAL MARKETING

Preliminary steps in the marketing of the Indian wheat crop are graphically described as follows.

"Having labored for months to produce Rs. 100 worth of wheat, the grower takes it to the market, where he meets with the 'kachcha arhatiya' and his tout, the 'dalal'; the 'rola', who dresses his wheat; the weighman; the 'charhaya', who fills the scale pan; the 'ota', who holds open the mouth of the bag. These and the 'munim' (the 'arhatiya's' clerk), the 'chaukidar', the sweeper, the waterman, the 'arhatiya's cook, and a horde of beggars of every description all regard themselves as entitled to a share of his produce."

The producer obviously is subjected to innumerable, irregular, and, at times, exorbitant charges by the first middleman through whose hands the wheat must pass on its way to the ultimate consumer. And not only are the charges as a rule excessive but the machinery is generally inadequate and lacking in organization. The report recommends the abolition of many existing practices and a simplification of the machinery of interior markets throughout the country, to be initiated and later controlled by local or other government authorities.

WHOLESALE DISTRIBUTION

In such a large and undeveloped country the wholesale distribution of wheat involves a variety of intermediaries, including commission agents and brokers, both permanent and itinerant, wholesale merchants, producers' co-operatives, and exporters. The wholesale merchants are by far the most important group engaged in this process, particularly since the decline in the export trade in wheat form India and the withdrawl of several large international grain firms from active participation in the trade in interior districts. The whole organization is an extremely haphazard one, and there is no standardization of commissions or other charges, except possibly in a few localities, this being exemplified by a comparison as between various wheat-growing districts and local wheat markets which shows the farmer's return as varying from less than 60 per cent to almost 85 per cent of the eventual retail price of the wheat.

Banks play a comparatively unimportant part in the financing of the Indian wheat crop, their functions being assumed to a large extent by traders and merchants.

GRADING

The only grading practiced in the wheat trade in India at the present time is a nebulous distinction by the trade as between white and red wheats and hard soft types. The principal varieties are, of course, known by name and in various markets command premiums or sell at discounts as compared with others, but there is no universal standard of types, quality, or purity.

STORAGE

The Indian wheat harvest is stored in a most primitive way. The principal methods adopted are of storing grain in or near the houses of the peasants, in vacant space in dealers' houses, in pits dug in the ground and lined in various ways and in more modern bins at collecting points and the larger ports. Owing to various peculiarities inherent in the trade and which must be expected in Indian conditions. An experimental elevator built at Lyallpur some years ago was operated for a short period but has now been shut for a considerable time.

Losses incurred through inadequate storage facilities throughout the principal wheat-growing districts are thought to be very large. It is essential for the welfare of the industry that improved methods should be adopted not only to prevent needless loss, but also to permit of more accurate estimates of stocks than is possible under existing conditions.

HANDLING AND TRANSPORTATION

When the Indian farmer takes his wheat to the market, it is customary for him to transport it in bulk in a bullock cart. At country collecting points the wheat is almost invariably packed in gunny bags of several standard capacities, and this packing continues to be employed both for the domestic and for export trade.

Inland transportation is by bullock carts and pack animals up to distances of 40 miles or so, after which motor truck or rail transportation is employed. Comparatively little use is made of water transport facilities. The use of motor trucks is limited by the length and direction of roads available, but this means of moving the crop is gaining favor at the expense of the railways where rates form a serious charge against the trade, railway freights amounting to as much as 18½ per cent of the landed value of wheat at several principal markets.

PRICE SITUATION

The price situation is an unusual one. Prices of wheat in various interior markets and in the different ports are quoted on entirely different bases. The unit of weight may vary greatly and in some districts the commodity is priced at so much weight to the rupee. It is obvious that a much greater degree of standardization than is apparent at present would be of benefit to the trade and to the producers.

MILLING MACHINERY

The bulk of India's wheat crop is ground in primitive mills powered by water or animals. The wheat is ground between stones into 'ata', a whole wheat flour of several [illegible]. In some districts it is customary to make other types of flour through sifting and grading, but this is rather uncommon. The use of electricity and internal combustion engines for motive power in small stone mills is increasing rapidly, and the low cost of operating such small plants is enabling them to supplant the household industry. Undoubtedly the extending use of electric power will foster further increases in the number of these units. There are, as well, some eighty roller mills throughout the country, located principally at Calcutta, Bombay and Karachi. They are, for the most part, of modern construction and produce a variety of flours for sale in adjoining districts but owing both to overhead charges and the competition of smaller mills in a market where there is little demand for variety or quality, these plants have difficulty in maintaining operations at profitable levels.

RECOMMENDATIONS IN THE REPORT

The report which has been above closes with a series of conclusions and recommendations. Principal among the latter are the suggestions that weights and measures should be standardized, that there should be governmental supervision of market charges, and that market news should be more widely disseminated than at present. It is also pointed out that the trade itself might well see to the provision of adequate storage facilities and to the establishment of more precise standards of quality and contract terms than are now employed while the attention of farmers and others is drawn to the desirability of taking full advantage of research work of agricultural departments in the breeding of new varieties, and that various types should be grown only in suitable areas. The report closes on an optimistic note with an expression of the belief that the new degree of co-operation and understanding among farmers, merchants, and millers which has recently been evident augurs well for the future of India's wheat trade."

Earns High Post

[illegible] and popular Canadian Pacific Railway official [illegible] June 1 [illegible] as passenger traffic manager of the company with headquarters in Montreal [illegible] after 14 years [illegible]. Announcement [illegible] retirement and [illegible] was made by Geo. [illegible] Stephen, traffic [illegible] company.

PLACE NEW SIGNS ON ALBERTA ROADS

Welcomed by tourists, new signs are to be placed on the Edmonton-Calgary main highway, and the section of the Trans-Canada highway between Calgary and Banff.

The provincial government will supply and erect the signs, according to an assurance which Hon. W. A. Fallow, Minister of Public Works, has given to officials of the Alberta Motor Association.

The A.M.A. on its part is to select the suitable locations for these directional signs. Calgary branch will be responsible for the section north to Red Deer and to Banff with the Edmonton branch looking after the section from the capital south to Red Deer.

Owing to the increasing traffic on the Banff road it is also proposed that suitable "stop" signs should be placed on roads leading into the Banff road at points where there is lack of clear visibility.

Steady increase in tourist traffic expected as roads are hard surfaced makes it all the more essential to have the main roads properly marked in the opinion of traffic officials.

Australia has decided that making gas [illegible] is too expensive and has [illegible] its plans for a plant.

BUILDING BRINGS FORTH REAL CO-OPERATIVE EFFORT

(Continued from front page)

marking view of the lake and countryside and itself adds attraction to the landscape. The church will be called "[illegible] Church" which means in English "church by nice lake". In Mr Rempel's home district in Europe he attended a similar church by a lake with the above name and as Beaver lake can be plainly seen in the distance, the name for the new building is very appropriate.

The minister of the church is Mr Dave Hildebrecht, and the Board of Trustees, Messrs. Peter Dyck, Corney Fuast and Henry Bekker. In addition to these there is a committee of five to superintend the building operations, financing, etc. The first members of this particular Mennonite body came to Tofield from the Old Country about ten years ago and comprised about ten families. Later families of the same denomination came from the dried areas of the south and today the church membership stands at 38. In 1934 the body acquired a house in the eastern part of town and have held regular services there since. The new building [illegible] the old house. While the new building has not been officially dedicated, services have already been held for the past three weeks in the basement.

The group is to be congratulated on their energy and enterprise as in a very short time they will have an excellent home for worship and social activities of all kinds.

LINDBROOK

The recent shower certainly helped the crops here, but with the coming of another hot dry spell, more is needed, the crops are backward, as is also the hay, and as for the water supply, just ask the fellows who in the normal times just have enough.

Congratulations to Mr. and Mrs. Robert Smith on the birth of twins, a boy and a girl, all the children and their mother are doing fine.

The monthly meeting of the L.C. [illegible] was held at the home of Mrs. H. Stime on Monday, June 28th, so as not to conflict with the annual school picnic on Wednesday, June 30.

A picnic was held at Mr. Tough's Landing, its other name being "Bonnie Beach" at Hastings lake last Saturday. It was in aid of the R.C. church there, and later in the evening a dance was held in the Hastings Lake school. Both picnic and dance was well attended and everyone enjoyed themselves.

We are glad to hear that the injury sustained by Mr Wilfred Sutton whilst drilling on Mrs. Doc Stime's farm here, is not so serious as was at first thought, and that he is coming along ok. Don Sutton deserves a pat on the back for getting him up and out of it so quickly. Too bad you aren't in the boxing game, Wilfred, with a nut that can take a stone fall of 60 or 70 feet could take any of the Brown Bomber's clouts and it pays quite a bit more than well drilling.

Mr and Mrs A. Bradley of Edmonton and Mr and Mrs Stinson and daughter Jean, also of Edmonton, visited friends here over the week end.

We are sorry to hear that Mr Henry Logan is in hospital with an attack of quinsy and hope soon to hear that he is out of hospital and ok again.

A whist drive was given by Mrs W. C. Lancaster last week at her home here in aid of Holy Trinity church (Anglican) Tofield. It was well attended and a dainty lunch followed the game. Everyone present enjoyed it immensely and we hope the financial end of it was as satisfactory as the party.

HOLY TRINITY, TOFIELD

Holy Communion — — —11:00 a.m.
S. Cooking Lake — — —3:00 p.m.
Evensong and song service 7:30 p.m.

Solos and anthems by choir and favorite hymns.

Rev. A. Wallis.

Mrs. Stevenson recently returned from the U.S. where she has been visiting relatives since early winter.

Mr and Mrs W. Swift of Camrose are visiting at the Swift home here.

DON'T FORGET THE WEEKLY WEDNESDAY HALF HOLIDAY.

Mr and Mrs. Harold Hicks and family of Edmonton, former residents here, were holiday visitors here on July 1st

Mr and Mrs Allan Lewis and family of Rumbey, spent July 1st, at Tofield, visiting Mrs Lewis' parents Mr and Mrs Hosler

LOCAL & PERSONAL

Mr. and Mrs. Albert Roberge of Edmonton, formerly of Tofield, were visitors here over the week end. Mr. Roberge was pleased to report that both he and Mrs. Roberge had "stayed with the liberal party" and were solidly behind the new leader. They called upon quite a number of old-time friends while here, all of whom were pleased to see them.

You know many of us in the spring thought Mr Beirnes, sr., was rushing the season a little by planting his garden early. Now he has the laugh on us as he had new potatoes of good size out of his garden on June 29th. This is quite early and if it does not constitute a record for this district, it comes very close to doing so.

The Tofield baseball team will play exhibition games in the evening at Camrose on July 5-6-7. The games are in connection with Camrose's big three day exhibition.

Mr and Mrs. Frank Scott were Edmonton visitors Thursday and Friday of last week.

Dr and Mrs Law left for a holiday trip east on Tuesday. At least [illegible] holiday. While in the east Dr Law will do post graduate work at Chicago, New York and Toronto. Dr. Gordon will take over Dr. Law's practice while he is away. Mrs. Law, Dr Law's mother, of Innisfail, will accompany them.

Mr and Mrs Clutterham left on Monday for Chicago where they will spend their annual vacation. They travelled east by train and we understand will take delivery of a car from the factory returning home in it.

Among Edmonton visitors this week are included Mrs Cap Lee, Mrs. Edwards, Mr and Mrs Stinson and Miss Muriel Malcolm.

Mr and Mrs Munroe of Edmonton are occupying the Clutterham home while they are away. Blake Clutterham and Mr Munroe are officiating at the post office while Mr. and Mrs Clutterham are away.

With the closing of school some of the teaching staff left for their homes. Miss Stewart and Miss Wingrove to Edmonton and Miss Forester to Calgary.

Miss Margaret Whyte returned to her duties at the Royal Alexandra hospital, Edmonton, on Saturday last, after a holiday spent at home

Miss Edythe Barden is at home recuperating from a recent operation

Mrs. Frank Dunn left this week on a month's vacation, to visit relatives in Spokane, Tacoma and Vancouver.

Mr. and Mrs. Everitt returned from a holiday spent at the coast

Mr. and Mrs. A. Young and son John, are holidaying at a point in North Dakota

Miss Beryl Edwards visited friends and relatives in Tofield on Sunday

Dave, of the Club Cafe is back home again, after spending some time in an Edmonton hospital

To have a nice sunny July 1st for the sports and a nice rain at night to help along the growing crops is about the last word in service from the weather man. The rain that fell on Thursday night here, while not a great deal was doubly welcome, in fact, more of the same kind would be appreciated

Neighbors Bid Farewell To The Sherlocks

A large number of friends gathered at the Lakeshore School on Sunday afternoon, July 4th, to say goodbye and wish Mr. and Mrs. Sherlock health, rest and happiness on their B.C. farm.

Mr. and Mrs. Sherlock are old-timers and pioneers in our district. It is 30 years since they took up residence in Tofield and district. The Rev. D. K. Allan presided on the occasion. He sought to convey the feelings of the many friends who regretted very sincerely the departure of Mr. and Mrs. Sherlock. They have contributed so much to the life of the community. Both had the best interests of the community at heart and did all they could to help every cause looking toward betterment.

The handiwork and craftsmanship of Mr. Sherlock are abiding memorials in the pulpit used at church services and also in the register and hymn board.

He also did many favors for the school. Mrs. Sherlock will ever be remembered for her kindly and loving disposition. She has been a real friend to the women-folk of Lakeshore.

As a small token of respect and esteem in which both are held Mr. Allan presented to Mr. Sherlock a purse of money—the gift of his friends in Lakeshore and Tofield.

The Ladies' Aid presented Mrs. Sherlock with the book "In the Steps of the Master" (Morton). Mrs. Booth on behalf of the Ladies' Aid made the presentation. The ladies served ice-cream and cake after which all joined in singing "Blest be the tie that binds."

PAVED ROAD FROM BORDER TO BANFF

Next year Alberta will have a hard surfaced highway from the international boundary in Waterton Lakes park to Banff national park, according to recent prediction by Hon. W. A. Fallow, Minister of Public Works for this province.

This year's program includes 150 miles of "blotter" surfacing, which takes in 70 miles from Waterton park to Macleod and 22 miles from Calgary to Okotoks.

There is also 52 miles on the Edmonton-Calgary main highway, made up of 30 miles from Calgary to Crossfield and 22 miles from Edmonton to Millet.

On the Waterton to Macleod project the province will be aided by a dominion grant of $75,000 under the park-to-park development scheme inaugurated by the dominion last year.

"We welcome the minister's assurance that there will be a hard-surfaced road to Banff next year, when the links have been filled in," said an official of the Alberta Motor Association.

"Let it be widely known that this program of improved road surfacing is being substantially extended and there will be a big swing in the tourist movement to this province."

EVERYTHING FOR THE BUILDING

AMISK CREEK

Mrs. H. Hillerud entertained the Ladies' Aid on June 22nd. Several of the members were absent but a number of visitors were present.

Ruby Berg from Edmonton spent Sunday of last week at her parents home here. Mr. Berg motored to the city with her Monday morning. Mrs. J. Garthee and Mrs. P. O. Flaaten went with them and visited with their sister-in-law, Mrs. N. Sand, who is sick in the Royal Alexandra Hospital.

Several from here attended the sports held in Tofield on July 1st.

Mrs. I. C. Olson attended the W. M.F. Convention held in Camrose Thursday of last week.

Miss Hennie Annebo left Saturday for Edmonton where she will attend the Summer School. Her sister, Magda went with her to the city, returning Sunday.

The young people held a program in the church Sunday evening, a fairly good crowd being present. In the absence of the president and vice-president, Arnold Berg acted as president for the occasion.

Mr and Mrs I. C. Olson and Gladys visited at C. Erickson's home last Sunday.

Mrs. R. O. Berg and Mrs. U. Garthee were visitors at the E. Pearson home on Thursday of last week.

Mrs. P. O. Flaaten called on Mrs. L. Rolfstad in Bardo on July 1st

Mr. and Mrs. A. Anderson and children, Mr. and Mrs. G. Sangstrom and son and a lady friend were guests at the E. A. Moen home last Sunday.

Mrs. U. Garthee visited at the A. Patterson home Sunday evening.

Mr. and Mrs. Koern from Priceville, Sask., were visitors at the Berg and Flaaten homes on Monday.

Mrs. E. A. Moen, Mrs. I. C. Olson and Mrs. Erickson are attending the U.F.W.A. convention in Vegreville to-day, Tuesday.

LAKESHORE

Mr. and Mrs. Theodore Wnack and family of Claresholm are visiting at the Henry Tiedeman home. Henry Tiedeman jr., who has been visiting in Claresholm for the past six weeks returned with them.

L. H. Graham made a trip to Mannville last week.

Miss Ethel Graham is attending the summer school session at the University of Alberta.

Bill Lumsden is spending a few days at the Calgary stampede

Mr. and Mrs. L. H. Graham were visitors to Edmonton on Saturday

Mr. and Mrs. R. H. Phillips and family spent Sunday at Elk Island Park.

CLARK BROS. BUY SPLENDID BULL FROM GALLINGER FARM

Messrs. Clark Bros. of Bremner visited the Claude Gallinger Shorthorn herd at Tofield this week and purchased a grand young bull DANNYS BALMUCHY —225661—.

The dam of this young bull "Balmuchy Buttercup" was bred by the late Wm. MacGillivray of Ross Shire Scotland, and imported in Dam. She was sired by Balmuchy Landlord (241802), imported to Milky Way Farms, Tennesee, U.S.A., and was Grand Champion at the Kansas City Royal in 1932.

The Grand dam was by Naemoor Jasper one of the greatest breeding bulls in Scotland.

The sire of this young bull, Danny Boy, imported, was a grandson of Naemoor Jasper and this gives a combination of breeding that should give results and going into a herd with the good young females that the Clark Bros have it will be interesting to watch the class of calves they will produce.

Mrs. William Clark, wife of one of the Clark Brothers, is well known in the Tofield district, being a resident here for many years, formerly Mrs Stuart Hall.

Mr. and Mrs. Chevreaux and little daughter of Killam, spent the week end at the Forman home.

Mr. and Mrs. Allan Lewis visited Tofield on July 1st. Their two young sons, Clair and Gerald are visiting with Mr. and Mrs. Hosler.

LOCAL & PERSONAL

Dr. Richardson has returned from Seattle where he was taking a post graduate course during June. He will continue to pay his regular Thursday professional visits to Tofield

Thos. G. Dark, eyesight specialist and licensed optometrist, of Edmonton will make a professional visit to the Royal Alexandra Hotel, Tofield, Friday, July 23rd, from 11 to 1 o'clock

Mr and Mrs Gordon Jobb of Daysland are visiting at the Jobb home here

Mrs Burnett returned home on Sunday after a months holiday in Montreal, visiting her daughter, Rita, and other relatives.

Miss Lois Thompson visited in Edmonton on Sunday

Mr and Mrs Geo. Brace and son Jimmy, are holidaying at Summerside, Prince Edward Island

Miss Edna Campbell of the nursing staff of the University hospital, visited home folk at Tofield for a few days

Mrs Malcolm and Muriel are, in company with Mrs Ellis and Joan of Edmonton, spending a two week holiday at Banff

Messrs. Stanley Glover, D. G. McCarthy and Reg. McCarthy were on a fishing trip to Lac la Non. Reg is staying a week

Mrs McCauley is holidaying at Banff for a week. She will visit with her son Bill, who is a regular member of the Banff Springs Hotel orchestra

Mr and Mrs R. Whyte of Wetaskiwin were visiting home folk over the week end, Mrs. Whyte staying for a visit

Mr. and Mrs. E. Hicks, Mr. and Mrs. H. Hicks and Edward visited relatives at Cadogan for a few days

Donald Hicks is visiting at the McCarthy home for a few days.

Mr. Imler, Fern and Jim are visiting at Okatoks for a couple of weeks

Mr. Jack Innes and Arnold Swift are camping at Cooking Lake

Mr. John Chapman who has been ill for some time underwent a serious operation at an Edmonton hospital on Friday last. We are pleased to report that the operation was successfully performed and that last reports were that the patient was doing as well as can be expected

Mr. Thomas and Mr. McIntyre are attending summer school at the University of Alberta

Mrs. J. W. Robinson and Miss Isobel Robinson visited Edmonton over the week end, Miss Robinson staying to attend the summer school at the University of Alberta

Lee Burnett left on Friday last to resume work on the C.N.R. near Wainwright

Arthur Beirnes left Wednesday morning for Trail, B.C.

"Bill" Swift who was visiting at the Swift home here left for Edmonton where he will teach at the Summer school at the University. Mrs Swift will holiday at Rosetown, Sask.

HOLY TRINITY, TOFIELD

There will be no services in Holy Trinity or at Lindbrook next Sunday July 11th

Services for Sunday, July 18th are as follows.

Tofield, Holy Communion 11:00 a.m.
Cooking Lake - — 2:30 p.m.
Tofield, Evensong - 7:30 p.m.

The Ven. A. E. Burgett, Bishop of the Diocese will preach at these services

Rev. A. Wallis

Magistrate (to Irish witness) "You say the accused threatened you?"

Witness—"Yes, begorra! He said 'I'll whitewash the yard with your blood.' "

Thursday Afternoon July 15th

Ketchamoot School Close With Children's Picnic

Practically all the residents of the community turned out for the school picnic on Wednesday, June 30. Dinner was served cafeteria style at noon, after which the afternoon was spent in baseball, softball, races, etc. Ice cream and cake was served during the afternoon. A most enjoyable time was had by all thanks to the teacher, Miss Nellie Lindsay and the school board, Miss Hazel Sears, Messrs [illegible] Sutton, Roy Lee and John Brown.

Races

Girls, 5 and under—1st, Noreen Carlisle, 2nd Doreen Lee
Boys, 5 and under 1st, Kenneth Barnes; 2nd, Douglas Barnes
Girls, 7 and under—1st, Irma [illegible], 2nd, Erna Boese
Boys, 7 and under—1st, Johnnie McGinitie, 2nd Edward Boese and Ronald Coombes
Girls 10 and under 1st, Gladys Coombes; 2nd, Ella Brown
Boys, 10 and under—1st, Gerhard Boese, 2nd, Douglas Barrie
Girls, 13 and under 1st, [illegible] and Mary Boese
Boys, 13 and under—1st, [illegible]; 2nd, Jimmie McGowan
[illegible] and girls, 16 and under 1st [illegible] Boese; 2nd, Gordon Ray
Young Ladies (open)—1st, Mary Boese, 2nd, Dorothy Ovelson
Young Men (open)—1st, Frank [illegible]; 2nd, Charley [illegible]
Young married women—1st, Mrs [illegible] and Mrs Albert Sutton, 2nd Mrs [illegible] Sutton.
Young married men—1st, Roy Lee, 2nd [illegible] Albert Sutton
[illegible] cracker race—1st Albert [illegible] 2nd, Joe Brown
[illegible] Running Broad Jump (10)—1st [illegible] McGinitie, 2nd Gerhard Boese

People's League Desire to be Unifying Influence

The Executive of the People's League of Alberta is gratified by the success of the League's efforts in the few months of its existence in formalizing and making articulate the strong sentiment existing throughout Alberta against [illegible] divisions, and in favor of [illegible] action by all parties and [illegible] favor sane and moderate [illegible].

At a [illegible] of the League held [illegible] early in March [illegible] League was made clear. It [illegible] wish to enter politics as a [illegible] political party. Rather [illegible] there are too many [illegible] several of them [illegible] in the same direction [illegible] kept apart by petty [illegible] inconse[illegible] League issued a statement [illegible] setting forth [illegible] terms.

The People's League of Alberta believes that [illegible] Party cleavage [illegible] by persons holding [illegible] the same views [illegible] Provincial [illegible] and is a destructive force, detrimental to the best interests of the Province. It is therefore abundantly clear that some unifying force [illegible] to bring about sane, sound and progressive government. With a view to attaining this objective the People's League of Alberta [illegible] partisan organization [illegible] unifying force. [illegible] when the [illegible] League was sufficiently [illegible] views [illegible] the League addressed [illegible] the secretaries of the Liberal, U.F.A. and Conservative Provincial [illegible] reiterating [illegible] each of these [illegible] question of [illegible] next Provincial [illegible] the possibility of [illegible] convention [illegible] each constituency to select the best man available such man to [illegible] before the people with the backing of each of the three organizations.

The result of this communication has been very gratifying to the League. While not committing themselves to any definite form of united action, each of the three parties has to some extent affirmed the principle. The Conservative Provincial Executive has named a committee to discuss the matter with [illegible] representing the other parties; the newly elected Liberal [illegible] Dr. [illegible] Gray has in very [illegible] given his views as to the [illegible] progressive [illegible] government [illegible] Liberal [illegible] and Mr. Robert Gardiner, President of the U.F.A. has written the League expressing [illegible] sympathy with the aims and objects of the League while pointing out that a [illegible] must rest [illegible] the [illegible] association [illegible].

[illegible] last [illegible] has to a great extent prevented Alberta from enjoying the kind of government she deserves, was soon [illegible] to an end. With its [illegible] there is very little doubt that sane, business-like administration may prevail.

However, none of the parties are yet committed to any definite [illegible]

SALAD DRESSINGS

The art of preparing salad dressing is the key to success in making tasteful salads. A few tested recipes for dressings are given below.

Boiled Dressing No. 1

2 tablespoons flour
2 tablespoons sugar
One-half cup vinegar
1 level tablespoon mustard
1 teaspoon salt. Dash of pepper.
2 tablespoons butter
1 cup cream

Mix the flour, sugar, mustard and salt well and add the vinegar and butter. Cook the mixture in a double boiler until it thickens, stirring constantly to keep it smooth. Cool, and then add 1 cup of cream. [illegible] whipped cream just before using the salad.

Boiled Dressing No. 2

1 tablespoon mustard
1 tablespoon flour
2 tablespoons sugar
2 tablespoons butter
Two-thirds cup milk.
Two-thirds cup vinegar.
3 egg yolks
1 teaspoon salt
Speck of cayenne pepper.

Heat milk in double boiled. Mix dry ingredients and pour hot milk over. Return to double boiler and stir constantly for five minutes. Add egg yolks, stir until thick. Add vinegar slowly; add butter, stir until dissolved. If heated vinegar is used, it may be added more quickly.

Cream Salad Dressing

One-half cup heavy sweet cream
3 teaspoons sugar.
1 teaspoon mustard.
Vinegar or lemon juice.

Beat cream until stiff, add mustard, sugar and vinegar, or lemon juice to [illegible]. Beat again and the dressing is ready for use.

Fruit Salad Dressing

[illegible]
[illegible]
One-half teaspoon salt.
1 tablespoon sugar.
One-half cup whipped cream.

Beat eggs until light. Add salt and lemon juice and sugar. Stir over boiling water until thick. Fold in cream before serving.

Honey Salad Dressing

3 tablespoons salad oil.
1 tablespoon fruit juice
2 tablespoons honey

DON'T FORGET THE SUMMER STORE WEDNESDAY HALF-HOLIDAY

F. J. C. COX IS VETERAN COMMERCIAL TRAVELLER

Early Sit-Down Strike

HALIFAX, N. S.—One of the most colorful of the personalities attending the all-Canada convention of the Commercial Travellers Association held in the Nova Scotian Hotel of the Canadian National Railways here, recently, and Dean of all the gathering, was F. J. C. Cox, secretary of the Northwest Commercial Travellers Association, of Winnipeg, for the past 38 years.

Born in Yorkshire, England, 77 years ago, he came to Canada when a young man of 21 years, and proceeded direct to Winnipeg.

In recounting his experiences in the Canadian west in the early days, Mr. Cox remembers a thrilling incident of which he was an eye-witness, when a band of some six or seven hundred Cheyenne Indians headed by Chief Piapot staged a sit-down strike at Swift Current. They demanded bullets, rifles and powder from the government before they would move. The Indians were all decked out in war paint and full war regalia and the handful of whites were feeling a bit worried over the situation. They collected all the firearms they could in the shape of shotguns and rifles in case they should be called upon to defend themselves from attack. At least a message for help was sent to Regina and in response three lone mounties with their horses arrived in a box car. The three mounties went right into the middle of the band, arrested the ringleader and got the Indians on the move to the reservation.

Mr. Cox, in the course of his career, has crossed Canada from fifty to sixty times, his last trip to the east being five years ago. He is still hale and hearty and his recipe for longevity is moderation in everything. Although he is 77 years of age, he takes an active part in the affairs of the convention, attending all the meetings and participating in the various social functions arranged for the entertainment of the delegates.

MAN MADE RUBBER IS CHEMISTRY'S LATEST

Rubber from coal, limestone, salt and water? Sounds incredible, yet it is true. The chemist has produced it and it has already demonstrated its superiority for certain industrial uses over natural rubber. A writer in the current issue of C.I.L. Oval describes how the new rubber, Neoprene, unlike natural rubber, resists the deteriorating effects of sunlight, heat, oil, acids and gases. Cable manufacturers are using it to insulate electric wires and cables because it will resist flame and thereby lessen fire hazards.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PASTEURISED MILK

Some ten years ago one of the largest cities of Canada had a devastating epidemic of typhoid fever. In the course of a few months there were 5000 cases of the fever and more than 500 deaths. The outbreak created local consternation; it was of great international interest. Officials of health departments from all parts of the continent visited the city intent to learn the cause of the disaster. Committees were appointed to study the causes of the outbreak; there was thorough investigation made of the whole subject. Most of the cases of typhoid were on the route of a certain dairy. It was discovered that the dairy's pasteurization plant was defective. The outbreak and its results were rightly attributed to the lack of care in the company's plant. The matter of pasteurization is not always understood by the public. It is simple. It means that the milk is heated (not boiled) to a temperature of about 145 degrees F. and maintained at this temperature for 30 minutes. The milk is then rapidly cooled to 40 or 50 degrees and kept at this low temperature until used. Pasteurization properly carried out kills the germs of a host of diseases which may be carried by milk, including typhoid fever, scarlet fever, diphtheria, undulant fever, tuberculosis and cholera. In addition, septic sore throat and the summer complaint of babies are frequently prevented by the use of milk which has been boiled or pasteurized because the effect of boiling and pasteurizing of milk is much the same.

In the smoking compartment of a fast train speeding westward from the city in question a group of men were engaged in argument. The dominant figure on the argument was a very voluble Irishman, who like Irishmen at their best, was an admirer of British institutions. In every case he had the best of the debate.

Someone in the group had the temerity to suggest that the epidemic of typhoid, referred to, might not have occurred at all if the city's milk had been properly pasteurized. This aroused once more the fighting instincts of the Irishman. "Why," he exclaimed. "I wouldn't have pasteurized milk in my house. Look at me!" he cried. "I'm one of eleven an' nine of us are livin' an' I'm not a bad specimen." He wasn't. He was a fine upstanding figure of a man. He went on.

"D'ye know what our mother fed us on?" he enquired. "I'll tell ye. She put a little milk in a porringer on the stove and brought it to a boil. Then she broke a little bread in it. That's what she fed us." An elderly man in the group smoked his pipe. He had so far taken no part in the discussion. He remarked to the Irishman. "You should thank God for such a mother, for she fed you on milk that was the practical equivalent of the pasteurized article." For once the Irishman was beaten, but he was a good sport.

"Sure," he said, "I didn't know what I was talkin' about. I'll never have another word to say against pasteurized milk as long as I live."

Pasteurization or boiling of milk are guarantees against milk-borne disease, but the pasteurization plant must not fail to deliver a proper product. If it so fails, there may be disaster.

JAMAICA AND CANADA BUYING MORE [illegible] EACH OTHER

The island of Jamaica, in the British West Indies, imported more manufactured goods last year from Canada than any year since the Trade Agreement with the West Indies became effective. These goods consisted largely of wearing apparel and women's leather shoes. Canada accounted for 16.3 per cent of the total value of Jamaica's imports last year, Great Britain ranking first with 29.1 per cent. and the United States second, 17 per cent., total value being approximately twenty-five million dollars.

Canada in return is Jamaica's second best customer, taking 20.7 per cent. of the total value of exports, principally raw sugar, bananas, coffee, cocoa, rum, coconuts. Great Britain is Jamaica's best customer, taking 53 per cent. of the total value of exports. British Empire countries took a total of 85.7 per cent. The United States accounted for 9.2 per cent.

Since the inauguration of the direct steamship service by the Canadian National Steamships between Canada and the British West Indies, an increasing number of Canadians are visiting Jamaica the year round, taking advantage of the summer and winter cruises operated by the 'Lady' liners of the company from Montreal in summer and Halifax, via Boston, in winter.

A COMMUNITY CENTRE

IF A PERSON was sufficiently clever, he or she would most likely be able to discover a basic law that governs all forms of life and matter on this planet. It is unlikely that such a discovery will be made within the present generation, but certainly remarkable strides are constantly being made along lines that make for a better knowledge and understanding of nature and human nature. And the quest of learned men in this respect do not always take them to large things, as a matter of fact one of the most intensive searches of scientists concerns the atom, an exceedingly small portion of matter, which up to a year or so ago was considered indivisible. Recently the atom has been "split" by the use of very high voltage electricity, and incidentally many of the theories concerning it have been revised or discarded. Several years ago many scientists believed that if the forces contained within the atom could be liberated and controlled, very spectacular results would follow. However, this is a very deep subject and the only lesson we wish to draw from it is that in the great scheme of nature, size does not necessarily mean importance or degree of usefulness.

Of late years, partly due to the advancement in transportation facilities and partly due to the alluring invitations of city tradesmen, quite a number of country residents have partially at least, changed their habits of buying, trading more and more in the city and less in the country town in which in many respects they are closely allied. Perhaps on the face of it, it appears good business—actually it is not. The only exception we make is where articles cannot be purchased locally or where merchants do not deal fairly in the matter of price and quality with their customers. There are many things in nature that proves the fallacy of relying upon things of mammoth proportion. Wheat and rice, with minute kernels contain the vital elements necessary to sustain life to a very large proportion of the world's human population. Contrast these energy creating foods with the water melon, large and impressive certainly—but few people would care to have a main diet of water melon, excellent as it is for a dessert.

In addition to the city not being the benefit to rural residents as it sometimes appears to be, the country town has definite advantages. These advantages are so real that it may surprise many rural dwellers that to no small extent they are being utilized within the cities themselves. Here in the country due to various forms of publicity, a city is associated with two or three large places of business and one or two main thoroughfares. It may surprise rural dwellers to learn that there is a growing tendency for city dwellers to break away from what might be termed mass buying and trade more in the particular locality of the city in which they live. It might be a case of "familiarity breeding contempt," but we believe the reason goes deeper than that. In every large city there are little blocks of small stores, mostly located far from the "main stem" and through their various lines catering to the few thousand people residing around them. They have simply borrowed or taken the principle of the rural small town. They have gone even further. They have their own community halls, community churches, and strange as it may sound, their own community "country" newspaper. These papers patterned after the country sheets in contrast to the large city dailies, circulate within a limited area and carry news and advertisements pertaining to the particular district in which they are published. There are several of such papers in cities of Canada and the United States. So the country town has many advantages which a large city with its cosmopolitan population has not—or at least only obtain by splitting up into component parts. It is to the advantage of rural dwellers and those dwelling in country towns to take notice and realize this, because by doing so, much good can be done, which would otherwise be left undone. What needs to be properly understood is that while country residents are endeavoring to obtain the advantages of the city, city residents are capitalizing on the advantages of the country town.

It was a source of much gratification to residents of Tofield to have so many visitors here on July 1st, Dominion Day. We believed up to the last, that the splendid day we had here on May 12th would decrease the attendance. For once we were delighted to be mistaken. There were not fewer people here on July 1st than in former years, but more, and with fine weather and on the whole, good planning, a splendid day was held. A country town is essentially a trading place and community centre with equal emphasis placed upon both, and Tofield cordially invites rural dwellers in surrounding districts to use the Town of Tofield for both purposes to the full limit of their capacity.

GOLD - and the Farmers' Welfare

SEARLE GRAIN CO., LTD.

An extremely grave problem, at this moment, is agitating the minds of the governments of the world.

No matter what may be the nature of the solution that might be found, and even though no solution should be attempted, certain it is that the welfare of farmers, and particularly the welfare of Western Canadian wheat producers, will be profoundly affected for the better or for the worse.

The problem is the one concerning the price of gold.

It will be remembered that after the war many combatant countries, finding themselves overburdened with debts, both international and internal decided to adopt the age-long device of devaluing their currencies in terms of gold, so that they could print more paper money, and then in turn be able to pay their debts at a substantial discount.

Then suddenly, in 1933, the United States—the world's greatest creditor nation—astonished the world by adopting not only the device of devaluing her currency, but in addition by setting a definite price for gold of $35.00 an ounce (instead of 20.67 that had been the previous price), and further by announcing herself ready to buy, at $35.00 an ounce from all and sundry, any and all gold offered.

At the time this action was taken, many economists warned the United States of the consequences that ultimately would inevitably ensue, which would be that production of gold the world over would be increased, which in turn would bring about a sharp rise in prices, and that the inflation of the American dollar by 67 per cent. would bring about a still further rise in prices; one price rise pyramiding on top of the other.

These forecasted consequences are now in process of taking place.

GOLD PRODUCTION

World gold production, for instance, has increased from an annual total of 24.3 million fine ounces in 1932 to 35.2 million ounces in 1936, an increase of just over four per cent. per annum; but this is not all, for the high price of $35.00 an ounce has tempted and induced large numbers of the wealthy people in China and in India to dishoard some of their vast stores of gold, which in turn has added to the amount of gold made available for monetary purposes. Actually, then, the annual increase has been somewhat greater than four per cent. per annum.

It has always been considered, in the past, that world trade and commerce increases normally at about the rate of three per cent. per annum, and that if gold—the basis and yardstick of prices—increases annually at about the same rate, i.e., three per cent., the world prices of commodities remain reasonably staple. It has found, however, that whenever the increase of gold production dropped below three per cent annually, that there was a tendency for commodity prices to decline, and that conversely when the increase of gold production was greater than three per cent., that the prices of commodities tended to rise.

It will be observed, therefore, that the increased annual production of gold of over four per cent. since 1932 in itself has been a definite factor tending to force the prices of all commodities upwards.

In addition to this, and quite separate from it, has been the inflation of the American dollar by 67 per cent—including the inflation of other world currencies—which in itself alone is tending to make world prices rise at least by 67 per cent. There exists at this moment, for monetary purposes, a total of about 670 million fine ounces of gold, the United States holding approximately one-half, or some 320 million ounces. France and Great Britain, between them, holding about one-half of the remainder. It is evident, therefore, that a number of other countries must be very short of the precious metal. (In American currency the U.S. holdings are valued at something over eleven billion dollars.)

PRICES ARE RISING.

The actions of revaluing gold and of inflating the currency, taken by the United States in 1933, were for the specific and most commendable purpose, it will be remembered, of encouraging prices to rise from the then very low prevailing levels. Now prices are rising to such an extent that the United States and other governments are apparently becoming alarmed, so that there is a good deal of discussing taking place as to whether, in order to avoid a much further rise in prices, gold should not now be devalued from $35.00 an ounce to some lower price.

The problem is extremely complex and difficult, for if no attempt is made to stop prices from rising, then of course untold numbers of people will suffer, for the cost of living will rise very high (strictly in proportion, in fact, to the rise of prices) and all those persons who have stated incomes, such as from interest on bonds, life insurance, pensions and so forth, and which incomes cannot be increased, will find themselves in grave difficulties.

On the other hand if the governments attempt to halt [illegible] rise in prices by devaluing gold, or by deflating their currencies, then there seems to be no doubt but that the gold mining industry of the world would receive a serious setback, and many mines would shut down, that vast numbers of workers would become unemployed, that the values of gold stocks and shares would drop precipitously, and that the prices of all commodities would [illegible], all of which, combined with the lack of confidence that would grip the world like a veritable hysteria, would halt the present industrial expansion, and inevitably would bring about again all the evils of the great depression which started in 1929, and from which we are but now emerging.

WHAT CAN BE DONE?

Is there, then, no choice between the risk of the feared inordinately higher prices, with a resulting much higher cost of living; and the risk of bringing on another depression? Yes, there certainly would appear to be ways of avoiding both of these extremes if governments had the courage and the wisdom to attempt the solutions. These would be simply endeavor to "set up" the trade, commerce and industry of the world to more than three per cent per annum, or at least up to the same annual expansion as the production of gold, namely, around four per cent. This would not only tend to stop any undesirable rise in prices, but in addition would tend to stabilize prices, as a group, at reasonable levels.

There would seem to be no reason why such an expansion in trade could not be brought about, but the first step that would have to be taken would be to lower considerably existing tariffs and restrictions against international trade, and for the nations to encourage imports of goods, commodities and products from others, so that their own exports might be accelerated. Then in addition, particularly would it be necessary for countries like the United States, England and France to disgorge, from their vaults in the ground, part of the vast stores of gold which they now hold, and which are now performing little or no useful economic service and to make some portions of these stores of gold available to those countries which badly need them to support their own paper currencies.

An objection to this course sometimes is that there is no assurance that if gold is loaned, that other countries would ever pay it back. This risk it seems, would have to be taken. It can be said, however, that there are very few instances on record where countries have refused to honor their debts and contracts during times of peace, and when trade and commerce was going forward to the extent that unemployment was not excessive, and when the creditor countries did not refuse to accept goods, commodities and services in payment of the debts.

(It is highly probable incidentally, that the redistribution of gold and the enlargement of international trade and commerce, would in addition be an excellent assurance of peace.)

FURTHER REMEDIES

Another thing that should be put into effect in order to restore confidence, would be for governments to agree to redeem their paper currencies and their bonds in gold on demand. A still further beneficial action would be the resumption of gold coinage as part of the world's monetary systems.

One suggestion has been advocated, which for the sake of Western Canadian wheat growers, it is sincerely hoped will certainly not be put into effect. This suggestion is that Russia, the second largest gold producer of the world, should be persuaded to decrease her production of gold or at all events to keep her supplies at home. Should this be done it is quite certain that Russia, instead of purchasing the raw materials and other products she urgently requires from other countries with gold, as she is [illegible]

P. G. JOHNSON IN CHARGE OF TRANS-CANADA AIR LINES

MONTREAL, Que.—S. J. Hungerford, President of Trans-Canada Air Lines, announced today the appointment of Philip G. Johnson as vice-president in charge of operations of the new airways system. An air executive with international reputation, [illegible] has organized during the past [illegible] years several of the principal air transport services in the United States including the United Airlines. Mr. Johnson was asked to give the Canadian airways project the benefit of his experience in undertaking the creation of the complete [illegible] for operation.

[illegible] special meeting was presided [illegible] by S. J. Hungerford, chairman and president of the Canadian National Railways, who is also president of the new air corporation. The other directors are: James Y. Murdoch, of Toronto; Hon. Wilfred Gagnon, Montreal; H. J. Symington, Montreal; three provisional directors nominated by the Dominion Government under C. P. Edwards, chief of [illegible], department of transport;

J. A. Wilson, controller of civil aviation, department of transport; and [illegible] Herring, chief superintendent of air and land mail services, Post Office department.

An official statement of the directors said: [illegible] the Act to incorporate the [illegible] was given Royal assent on April 10th last, the Board of Directors of Trans-Canada Air Lines, in [illegible] with the Hon. C. D. Howe, [illegible] of transport has been [illegible] for the new [illegible] planes of the latest [illegible] for carrying mail and [illegible] passengers [illegible] constructed and three [illegible] be delivered during the [illegible] summer. The training of [illegible] instrument and [illegible] flying is being provided [illegible] will proceed through the next few months. Before scheduled [illegible] are begun, communication [illegible] ground stations have to be established and manned by operators trained [illegible] dispatchers. Route lighting [illegible] lighting air [illegible] hangar accommodation weather [illegible] have also to be provided. All of this work is now being [illegible] completion. [illegible]

[illegible] organization, the Trans-Canada Air Lines feel that they have secured an executive whose experience with modern air transportation of this character will ensure to the new project the most prompt and satisfactory development in its difficult initial stages.

"For the past twenty years Mr. Johnson has been associated with the developments in the aeronautical field. Entering Boeing Airplane Company at Seattle during the period of the war, he served as superintendent of production of that company, becoming later vice-president and general manager and then president of the Boeing Company and of the Boeing Air Transportation Corporation which later became the United Aircraft and Transport Corporation with its various operating subsidiaries. He served as president of Pacific Air Transport, Varney Air Lines Inc. and National Air Transport.

"Mr. Johnson will begin his work in Canada next month by making an examination of all airways facilities, air [illegible] landing fields, radio range system, lighting, etc. over the whole [illegible] Montreal to Vancouver and [illegible] to Edmonton [illegible] airport and field [illegible] department of Transport [illegible] plane and he will be accompanied by Squadron Leader J. H. [illegible] the [illegible] of the route and other technical officers of the department of transport also by D. R. MacLaren of the Trans-Canada Air Lines. According to present plans, Mr. Johnson will conduct his examination of the system from west to east starting at Vancouver in the last week of July. His headquarters office will be at Montreal.

WORLD OF WHEAT

By H. G. L. Strange, Director, "Crop Testing Plan".

What is Western Canada's most valuable natural resource?

Some say the top six inches of soil, some the sunshine or the hot days and cool nights, others the coal, copper, lead and zinc, mines and the oil wells—still others plump for the wealth of the forests and of the fish in lakes and streams.

For my part I suggest that the twelve inches of rain which on the average falls during the autumn growing season months over Western Canada, forms our greatest natural resource. How valuable it is can only be fully appreciated when it fails to occur, and so when we suffer from drought, consequently in turn from poor crops, or, worse still, from complete crop failure.

Unfortunately, only 50 per cent of this most precious rainfall, scanty as it is, is available to the wheat plant; 25 per cent is lost by evaporation—this probably is unavoidable—but 25 per cent also is lost by weeds which, it has been calculated, decrease the yield by 35 per cent.

Obviously, then, it seems that one of the best ways to increase crop yields, which would actually be the equivalent of increasing the rainfall, is to eliminate the weeds.

FOLLOWING FACTORS HAVE TENDED TO RAISE PRICE

Further rust reports in U.S. winter and spring wheat areas, considerable damage in U.S. midwest. Precipitation needed in U.S. and Canadian spring wheat areas with serious situation developing on Canadian Prairies. Argentina corn estimate reduced. European political situation very unsettled. Expect very small U.S. wheat carry-over. Australian orange crop below average. European prune crop smaller.

FOLLOWING FACTORS HAVE TENDED TO LOWER PRICE

Poor European demand. Russian winter and spring wheat prospects satisfactory. Favorable seed weather in southern hemisphere. Heavy yields in U.S. southern winter wheat territory. Prospects for wheat harvest in northern hemisphere, excluding Russia, slightly larger than 1936.

GYPSY CARAVAN HAS MODERN COUNTERPART

More than twenty firms in Canada have turned their attention to the manufacture of automobile trailers and the production of these houses on wheels on the North American continent for the year 1937 is expected to reach a total of 300,000, says a June writer in the C.I.L. Oval. The cost of a trailer may run anywhere from $500 to $5,000 or more, according to the requirements of the buyer as to interior fittings. The most modest trailer, however, supplies all the comforts of home on a miniature scale. Beds at front and rear are of pullman type that disappear when not in use or form a seat by day, the dining alcove table may be dropped and there is usually room for an oilstove, refrigerator, radio and electric light installations. The exterior coverings of nearly all trailers are either weather resistant Duco automobile finish or rubber coated fabric in one or more colour tones.

Wm Taylor, Graham Allan and Sid Warton left on Wednesday for southern B.C. points, travelling a la carte Model T.

BOILING WHEAT MARKETS

Western Canada's drouth disaster and threats of black rust in the United States were the causes for spectacular rises in prices on the grain exchanges. Canada's wheat surplus is down to very moderate figures and it is now a certainty that her crop this year will be exceptionally small. The carryover from past years have been disposed of and now the dominion is in the midst of a "bull" market with empty bins.

Prices at Chicago and Winnipeg are substantially above world levels and importers have been holding off hoping for a fall. It now looks as though they will have to pay the price asked as supplies are becoming scarce. Australia's surplus is down to 24 million bushels, Argentina's 22 million, Danube Basin 5 million and other countries 6 million. Canada has still 40 million bushels available for export. It will be next December before Argentina and Australia have a crop so their surplus must be carefully stretched out.

This leaves a scanty supply available to meet the demand of the world.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that—

One Bay Gelding, aged, white spot in forehead, and

One Bay Filly, coming two years old, white spot in forehead,

was impounded in the pound kept by Mrs. R. V. Bethel, located on the S.E. 36-51-19-w4M, on Saturday the 12th day of June A.D., 1937, and that the said animal was sold on the 29th day of June 1937, to Guy O. Walter and John Wood of Tofield, Alta., and that said animals may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animals.

For information apply to the undersigned.

J. O. A. LETOURNEAU,
Sec.-Treas. of the Municipality of
Cornhill, No. 487.
Post Office, Tofield, Alberta.

Tofield was pretty much deserted Wednesday afternoon, quite a number attending one of the numerous summer attractions at different points. Ketchamoot drew quite a number and there were also doings at Elk Island, Camrose and Viking. The Ketchamoot picnic was we learn very well attended and afforded pleasure to many people, both visitors and residents. A more detailed report will appear later.

The Tofield baseball nine took part in the tournament connected with the Camrose fair. They were drawn against the fast stepping Merna team and lost their game by the score of 8—4.

VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plan" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots.

See the nearest Searle (Home) agent about the plot in your district.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up". Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

LINDBROOK

The less said about the weather the better.

The annual school picnic which was to have been held at Mr. N. Ellis's Hasting Lake was held at the school on account of wet weather and went off O.K. We hear we have some very promising athletic material here, any way the whole thing was a success for all the kids and their parents.

Our teacher, Miss Y. Phipps is at present attending summer school at the University of Alberta.

The social Credit Group held a meeting at the Lindbrook school this week.

The L.C.C. gave a dance last Wednesday in M.R. Hamersly's barn. It was a tremendous success, people from all parts being present. It was estimated that upwards of 200 were present. The orchestra was from Edmonton and supplied very good dance music. The catering was seen to by the lady members of the L.C.C. There was ice cream on hand, and taking it all round, it was a very enjoyable affair and all voted it O.K.

A nasty accident happened at the creek bridge on the road one-half mile north of Lindbrook on Wednesday evening. Mr. Herbert Jr. was driving down to the dance, mistook the bridge railing for a hay rack and swerved to avoid the same landing in the ditch; his sister Miss Jeannette unfortunately broke her leg and had to be taken to the Edmonton for treatment, we hope to hear that she is literately "on the mend".

KETCHAMOOT

There will be no preaching services for the next two Sundays, Rev. Allan being away on his holiday.

Mrs. J. Younie, Miss Mabel and Miss Isobel Dawe, Mr. and Mrs. D. H. Mitchell all of Edmonton were Sunday guests of Mrs. Henderson, also the W. A. Mitchell family, Angus Mitchell and Bill Beckshott.

Miss Mabel Lawson spent a few days in the city the first of last week being present at a wedding of a friend on Wednesday.

Miss Viola and Howard Lee of Edmonton spent a few days visiting relatives in our district. They also attended the Ketchamoot picnic on Wednesday.

Mr. and Mrs. Thomas and family of Tofield were Sunday guests of Mr. and Mrs. A. F. Shultz.

Mr. and Mrs. Chester Coombes, Miss Esther and Gladys, Harold and Ronald, returned home Monday after spending a few days visiting Mrs. Coombes' mother and other relatives at Sideview, near St. Paul.

Mr. and Mrs. S. Nomeland and Torvel, were Sunday dinner guests of Dr. and Mrs. Simpson in Tofield.

Miss Hazel Sears is spending her holiday with her friend, Mrs. Margaret Myers of McKenzie district.

Messrs. Roy and Neal Whillans rode their bicycles to Edmonton Monday to take in the fair and spend a few days with their grandmother, Mrs. Sheppard.

Mr. and Mrs. A. R. Thompson, Miss Betty and son Harland of Leduc, attended the Ketchamoot picnic.

Mr. and Mrs. W. A. Mitchell and family were dinner guests at the Lorne Lee home.

Mrs. Mildred Denny, formerly Miss Mildred Sherlock), and daughter, are spending a few days with her friend Mrs. W. A. Mitchell.

Please take notice the meeting of the Ladies' Aid will be held next Wednesday, July 21, at the home of Mrs. Henderson. A cordial invitation is extended to all.

Mr. and Mrs. Frank Shupe of Lindbrook attended the Ketchamoot picnic.

Mrs. Grata, Mrs. H. McGinitie and two children and Mr. Maurice McGinitie returned home Tuesday after a three weeks trip down the western states. When on their way home, they had a car accident near Banff. None of them were hurt, but Mr. McGinitie and Henry had to remain to settle the trouble and bring the car home, the others coming home on the bus. While away they had the pleasure to visit the Nolan, Parker Lewis, Paul McMullen and Black families.

Another Ketchamoot picnic or sports day has come and gone and to take it all around, the most successful. Ideal weather, large crowd, ball games and races went off without a hitch. The writer was unable to get out and get the results of the games and races, being too busy helping feed the crowd or rather taking in the money. Ball games were between Tofield, Bardo, Ketchamoot. Bardo won the first prize. Softball, Ingram and Ketchamoot school teams, Ingram won; then Kingman and Tofield, Kingman winning. Races too numerous to mention.

We wish to take this opportunity to thank all who helped make the picnic a success, especially the ladies who donated toward the dinner and the men who put up the booths. Proceeds were taken at the table $81.74; Expenses $21.20, profit $60.54. Taken in at the stand, $66.28; expenses $38.78; profit $27.50. Total profit $88.04.

LOCAL & PERSONAL

Miss W.A. Preston of Radway is visiting Mrs. Wallen for a few days.

Born: To Mr. and Mrs. J.W Howe, at Kingston, Jamaica, on June 24, a baby daughter, Joan Isobel. Mrs Howe will be remembered as the former Miss Bell, who taught Grades five and six in the Tofield School for one year during the years 1930—31.

Edith Robinson visited with her sister, Isobel, in Edmonton last Wednesday.

The Annual Holy Trinity Garden Party will be held at the J.W. Robinson home on July 29th. Fuller particulars next week.

The senior C.G.I.T. girls are enjoying their annual camp outing, which this year is being held at Viking.

Miss Mary Burnett spent Thursday at Edmonton.

Mr. H. J. Martin will leave on Saturday to attend a Mennonite conference at Sunnyslope, Alta. Mr. John Peters will also attend the convention.

Mr. Edward Sloan and Miss Nellie Dale were united in marriage on July 12th by Rev. D. K. Allan. The ceremony took place in the United Church Manse.

There will be no service on Sunday in the United Church until August 1st. Rev and Mrs. Allan are on a short holiday.

Mr. John Reimpel and David Heidebrecht left on Friday last for Rosemary where they will attend a Mennonite convention held at that point.

Mr. and Mrs. McHaffey are visiting at the home of Mr. and Mrs. Murray McHaffey at Okotoks.

Frank Dunn spent the week end on a fishing trip at Lac a Non. Reg. McCarthy returned home with him.

Frances Campbell is spending two weeks with friends at Edmonton.

Mr. and Mrs. Moen recently returned from a holiday which included visits at Wetaskiwin, Calgary and Banff.

Mr. McCarthey motored to Lac la Non this week and returned with Reg who had been enjoying a fishing trip of a weeks duration.

The McGregor Construction Company are working on the long distance telephone lines east of Tofield. They have a camp near the telephone office, Tofield.

Mr. J.Wiltson and Aaron and Mr. W. Gallinger returned from a fishing trip near Ashmount.

As in past years quite a number a number from Tofield attended the Edmonton exhibition, the largest number appearing to go on Friday.

Mr. Preston left this week for a holiday trip to the Pacific coast.

The Ven. A. E. Burgett, Bishop of the Diocese will preach at Anglican services on Sunday. Service will be held at Tofield at 11:00 a.m. at which Holy Communion will be observed and at Cooking Lake at 2:30 p.m. There will be no evening service at Tofield.

TOFIELD U.F.W.A. ATTEND VEGREVILLE CONFERENCE

On Tuesday July 6th ten members of the Tofield U.F.W.A. motored to Vegreville to attend the summer Conference of the Vegreville Federal Constituency held in the United Church.

The morning session was devoted to business and to viewing the display of handicraft exhibits brought by the various locals, East Vegreville, Partridge Hills, Lamont, Ranfurly and Tofield. First prize went to East Vegreville with 92 points; Tofield came very close, receiving 2nd prize with 91 points and Partridge Hills came third.

The afternoon was filled with excellent musical numbers, both vocal and instrumental and several very interesting papers and talks were given by the different members. Mrs Ross, Provincial vice-president gave an address. It was evident that an enjoyable time was had by all.

FOR SALE.—Low wheel wide tire wagon and rack; 3½ inch wagon with triple box; set work harness; mower and rake.—J. W. Morton, Tofield.

NOTE:—The above report for the week is up to 9 o'clock Wednesday night. From this time on up to Thursday afternoon an additional 1.93 inches of rain fell.

A Real Soaker Revives Lagging Hopes

With reports of rain all around us, on Tuesday, and with cloud laden skies, residents of this district were apprehensive as to whether the rain was going to pass us by, but while it held off till nine o'clock Wednesday, from that time until well into the forenoon of Thursday a "glorious" rain fell. Alltogether a little over two inches fell and certainly we have never known rain to be more welcome.

At Edmonton where the exhibition was in progress, Tuesday, Wednesday and Thursday saw almost six inches of rain fall, which though hard on the exhibition management, was a life saver to many a field of growing grain.

In our regular rain report we list the rain to Wednesday night of each week. Up to nine o'clock Wednesday night only a fraction of an inch had fallen, but from that time to Thursday afternoon, nearly two inches fell.

Wood's Style Wear Working Clothes

Wood's Style Wear Overalls of full 8 oz. dark blue denim. Triple stitched and rip resistant. Bar tacked, heavy duck pockets. They are water treated against shrinkage. Full size and of guaranteed workmanship. PAIR $1.95

STYLE WEAR PANTS—
8 oz. dark blue denim. Rivetted at points of strain. Bar tacked at three points in crotch to prevent ripping. Extra room around hips. PAIR $1.60

STYLE WEAR SHIRTS—
Made in full sizes of good materials. Button style EACH .... $1.00 and $1.25
Zipper style. EACH $1.35
Style Wear black denim pants with zipper pockets. PAIR $1.85

E. W. ROGERS

Personnel of Railway Resent Attacks On National System . . .

S. W. Fairweather Gives Much Information

KINGSTON, July 3.—The recurring attacks upon the Canadian National System, with the accompanying flood of half-truths, distorted statements and so on, have bred a feeling of resentment in the personnel of the railway. The desire of the employees is simply that the public shall have a fair and true picture of the situation." This was one of the declarations made today by S. W. Fairweather, Director of the Bureau of Economics, Canadian National Railways, in an address delivered to representatives of Service Clubs here.

It was hard to escape the conviction, the speaker said, that there was a campaign to break down the confidence of the people of Canada in the Canadian National Railways. It was interesting to note that most of the critics produced the same plan to meet the alleged desperate condition, namely, that the Canadian National as a publicly owned and controlled railway cease to exist.

The property which it was hoped to submerge was the largest railway organization on the North American continent. It afforded the shortest rail route between Eastern and Western Canada with lower gradients than any other rail line in the United States or the Dominion. In the Prairie Provinces it served the the most productive part of the country. It crossed the Rocky Mountains at the lowest elevation of any transcontinental line, its mountain gradients being as favorable as those on the prairies. It has a double-track main line running like a back-bone through Ontario, Quebec and the United States as far west as Chicago and afforded the only all-Canadian between the Maritime Provinces and the rest of the Dominion. It served directly ninety per cent of the people of Canada and, to one quarter of them, was the only railway available. It linked the Dominion with many of Canada's best markets in the United States. Sixty per cent of the coal produced in Canada is depended upon the Canadian National for rail transport, developments of base and precious metal mining in recent years has been largely along its lines. It was the greatest factor in serving the forest industries in Canada, originating more newsprint and pulp tonnage than any other railway on the continent. It was difficult, the speaker said, to find any justification for the view expressed by some of the critics that this was a "dead horse" property.

"In the sheets of a National en[illegible] [illegible] part of the story," [illegible] Mr. Fairweather. The rest [illegible] found in the development of trade and industry brought about by [illegible] construction and operation of the [illegible]. The people of this country [illegible] 000,000 of dollars invested [illegible] to water transport, [illegible] canals and harbours, most of [illegible] non-revenue producing. No [illegible], however, would say [illegible] on to improve [illegible] was unsound. By reason [illegible] improved waterways the [illegible] of natural resources of [illegible] country has been facilitated, adding to the national wealth. Just so it is with the Canadian National Railways, for railways have been a much more potent factor in the development of Canada than waterways could ever hope to be.

"We also hear a great deal of Canada being over-railroaded. It seems to me that this is an example of those half-truths which becloud the Canadian railway issue. It pleases my comprehension how a country can go through a development stage with a low population per mile of railway. The railway must go in advance of the population but, if the railway taps a country which has natural resources, whether it be agricultural, lumbering or mining, population will come and the development of wealth will take place which will more than justify the railway.

"The latest available figures show that the railway freight traffic per capita in Canada and the United States is from 4 to 5 times as great as in such countries as Great Britain, France, Germany, Australia and the Argentine; so that, although we have a low population per mile of railway each person, so far as railway traffic is concerned, counts as four. This is simply another way of saying that the capital wealth production is high, and that in that wealth production railways play a very important part. The history of the development of capital wealth in Canada parallels the growth of railways, but at a much greater rate. For every dollar of railway capital, Canada has increased her capital wealth twelve dollars.

I am old enough to remember the time when the construction of the National Transcontinental in Northern Quebec and Ontario and of the Canadian Northern Railway in the Prairie Provinces was looked upon as colossal folly. Today we know that the future wealth of Canada will be drawn in no small measure from the territory served by those lines. Consider too, that in the highly industrialized section of the country, which will draw its stimulus from the development of the hinterland, the Canadian National Railways is pre-eminent in serving every industrial centre, and you get a picture of the potentialities of the system which is far different from that painted by our detractors.

"But pioneering development is expensive. It is a safe generalization that no railway system can be built and operated for development purposes and in the earlier years pay interest on the cost of construction under a set of rates which are dictated by the necessity of encouraging development. A curious situation arises that, while the nation gets rich as a result of the development, the railway shows deficits, unless subsidized. We, in Canada, have pursued both policies. We have paid huge subsidies in cash and land for development purposes, and quite wisely so. I can see no difference between the two, but it is a curious quirk, in the minds of our critics, that subsidies to privately owned enterprises are examples of wise and statesmanlike policy, but a deficit incurred by a nationally-owned enterprise, for the same purpose, is a veritable threat to our national existance."

It was easy, the speaker continued, for the general public to over-estimate the importance of economies to be secured by the elimination of existing railway lines. We should, however, avoid uneconomic duplication of railway facilities in the future.

"You will all recall that when the National Transcontinental was built it struck a course through the northern wilderness. The territory did not look very promising and private railway interests shunned it, a policy which was pursued until actual industrial development became important. The interests which developed the Noranda Mine could not induce private railway interests to build into their prospect and turned to the Canadian National Railways. The National Railways had faith in the mineral resources of that country and built a branch line to serve Noranda. It now appears that this territory is highly attractive and private railway interests have sought to invade the field. That sort of competition should be restrained. It is an economic crime."

Instances were given by the speaker where statistics that afforded no basis of comparison had been used in an effort to prove that the Canadian National was inefficiently operated. The fact was, he said, that the operating performance of the Canadian National Railways was a record of progress.

"If you take the year 1923 as 100, the operating efficiency of the property has increased steadily, over during the period of the depression, and it now stands at 117. This means that, given an equal volume of traffic to be moved, it would cost in material and labor one-seventh less today than it would have in 1923.

"The Canadian National is frequently attacked because its operating ratio is relatively high and this is assumed to be evidence of inefficient operation. It is no such thing. With a relatively small volume of business per mile, the operating ratio will be high and, as the amount of business done per mile increases, the operating ratio should drop very rapidly at first and thereafter at a slower rate. One of the most striking tests of the efficiency of the Canadian National has been the manner in which the operating ratio has reacted to increasing business per mile of line.

"Consider, too, the condition of the properties when they were acquired by the Dominion Government, how they were run down and how some of what are now our main lines were derisively referred to as 'turkey trails'. Having these things in mind, the wonder is that the operating ratio has been kept as low as it has been. Remember the properties now comprised in the Canadian National dha an operating deficit of $35,000,000 in the year 1920. This was changed to such an extent that the properties had an operating surplus of $56,000,000 for the year 1928—an improvement of $91,000,000.

"Do you realise that this property, which is so subject to attack by hostile critics, stood fifth among all railsystems of North American continent in the year 1928 in net available for interest and dividends? You can't travel in company like that and be grossly inefficient.

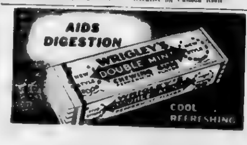
"After paying operating expenses the property, from 1923 to date, has earned, applicable to interest and and insurance reserve, a total of $343,000,000. With the onslaught of of the depression, it was a desperately hard problem to avoid an operating ratio of 100 or more due to a reduction in volume of traffic per mile, which was cut in two. With increasing traffic, our operating ratio is again declining and our net revenue from railway operations is increasing, so that the efficiency evidenced in past performance is shown to be no more flash in the pan.

"If you examine all the countries of the world and list them in order of their unit cost of transportation, you will find stands in an extraordinarily favourable position. No other country with a transportation problem at at all comparable, hauls an average ton of freight one mile for less charge than two cents— the charge in Canada is roughly one cent.

It has always struck me as a curious situation that we in Canada should have achieved this position and to be still held as suffering from a terribly disastrous railway problem. It may be true that we elect to pay our railway bills partly directly and in the form of subsidies and deficits but, when you review the whole situation in the perspective of the national wealth production and find, even in depression times, that the amount by which we fall to pay our railway bill by direct charges amounts to one cent per dollar of our annual national wealth production, it is hard to view it as something which is crushing our national existence.

"As long as depressed trade and distributed international conditions exist, the property cannot be expected to earn in full the direct charges which are assessed against it. The management, under such conditions, is doing its very best to keep [illegible] [illegible] the property. Keep in mind the essential public services which are [illegible] great potential earning power of the property.

"To be a defeatist on the Canadian National Railways as a great publicly- owned enterprise," concluded Mr Fairweather, "One needs to be a defeatist on Canada itself."



Canada's Early Printers

(A condensation from Family Herald & Weekly Star)

The first printing establishment to be opened in North America was that of Stephen Daye, in Cambridge, Mass. Daye was engaged in England to come to America with the Rev. Jesse Glover, a non-conformist clergyman. He was provided with a press and all equipment necessary for publishing books to help Mr. Glover in his missionary enterprise. On the trip across the Atlantic the clergyman died, but Daye settled in Cambridge, and in 1639 opened his printing shop. He was not a master of his craft, and before many years had passed we find him working in the employ of his successor, Samuel Green.

The Bay Psalm Book, printed in 1640 by Stephen Daye, is acknowledged to be the first book published in North America.

The introduction of printing, in its different branches, into Canada, is a continuation of the story of its progress in United States, for it was not only a decendant of Samuel Green, Stephen Daye's successor, who came to Halifaxsoon after its establishment, intent on setting up the first printing press in what is now the Dominion of Canada; but Margaret Draper, the owner of the Boston Newsletter, brought her press to the capital of Nova Scotia when the American Revolution broke out.

Bartholomew Green died soon after his arrival in Halifax in 1751, but in January, 1752, John Brussel, one of his old associtea in Boston, opened the first printing shop in Canada, and the same month, published the first newspaper.

In Boston, the heroic Margaret Draper continued to publish her paper until the day of the city's evacuation by the British. Then she took her press to Halifax, and after a few months went to England, where she died. A young man, John Howe, had come to Nova Scotia with her from Boston. He was her successor, and while he left many lasting monuments in the printing monuments in the printing line, his greatest gift to Nova Scotia was a son who became the Hon. Joseph Howe, printer, statesman, and journalist.

In the province of Quebec the first printers where William Brown and Thomas Gilmore, who came to the ancient capital in 1764. On the 21 of June 1764, Quebec's first newspaper, the Gazette de Quebec, appeared, and lived for 110 years.

Fleury Mesplet was the first printer in Montreal. He came in 1776, by order of the American "Continental Congress", for the purpose of publishing literature designed to induce the French-Canadians, in what was termed the fourteenth colony, to join in their lot with the other thirteen.

In Ontario, the first printer was a French-Canadian named Louis Roy, whom Lieut. Governor Simcoe engaged in Quebec. It is believed that he arrived in Newark, now Niagara, about the close of the year 1792. Though there has been some discussion as to what was really his first output, the "Upper Canada Gazette or American Oracle," dated April 18th 1793, is given pride of place by Mr. Fauteaux. Roy also published a speech of John Graves Simcoe, and the acts of legislature, in the same year.

The first novel produced in Canada was published in Kingston in 1824. It was "St. Ursula's Convent," by Julia Beckwith.

James Evans, a Methodist Missionary, was the first to implant printing in Western Canada. His little spelling book for the Crees, the first press during that year, the library of Victoria College, Toronto, is imprinted: "Norway House, 1841."

In 1859 William Buckingham and William Coldwell, two Ontario journalists, arrived at Fort Garry to launch Manitoba's first newspaper. It was called "The Nor' Wester," and its earliest number is dated December 28th, 1859.

In British Columbia, printing began in 1856. It is believed that Monseigneur Demers, the Catholic Bishop of Vancouver Island, set up the first press during that year. Two years later, on June 25th, 1858 the Victoria Gazette, the first newspaper in the province appeared.

In Saskatchewan the Saskatchewan Herald was established at Battleford by Patrick Gammie Laurie, in 1878., and in two years later the typographic art was introduced into Alberta, when Frank Oliver began his "Bulletin" at Edmonton.

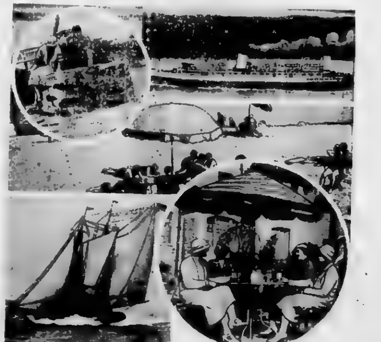
Holiday Down by the Sea



The Maritimes, where Canada begins, offer a combination of holiday attractions that have [illegible]ree sun-girt provinces very popular among Canadians and Americans alike.

The rare mixture of historic sites, scenic beauty, and opportunities for all types of out-door sports gives New Brunswick and Nova Scotia an unusual attraction for visitors.

The Algonquin Hotel, at St. Andrews-by-the-Sea, holds its place as New Brunswick's leading resort by virtue of its splendid position on the bay of Fundy its two fine golf courses, and its facilities for fishing, boating, and other sports. Open from June 26 to September 7 the Algonquin is particularly popular among Americans because of the nearness of President Roosevelt's summer home at Campobello.

Across the Bay of Fundy—a delightful trip by the steamer Princess Helene—from Saint John to Digby, lies Nova Scotia. Visitors are always interested in that section where the poignant story of Evangeline was enacted. Canadian Pacific Railway hotels at leading holiday points in Nova Scotia include: The Pines, at Digby, open from June 25 to September 11; Lakeside Inn, near Yarmouth, open from June 28 to September 7; and Cornwallis Inn, at Kentville, in the heart of the Land of Evangeline, open all year. Chief amusements at these resorts are golf, tennis, motoring, sea fishing, boating, and bathing. The pictures above show Evangeline Well at Grand Pre, the "Princess Helene" which joins Nova Scotia and New Brunswick; Katy's Cove at St. Andrews-by-the-Sea, N.B.; a typical Nova Scotia fishing schooner; and a social gathering at Lakeside Inn, Yarmouth, N.S.

First Train Ride

By Mary Kirkie in the Christian Science Monitor.

DAYS OF WAITING had passed; days that had run into years without us children being aware of it, because at six and seven and eight a day may seem as long as a year, and a year be gone while we wait for a day to arrive. But at long last our wheat had turned out well, the mysterious arrangements that elders make had been completed, our trunks were packed and we were actually going "back East" to visit our grand parents and uncles and aunts and the cousins of whom we had no recollection whatever.

Trains nowadays seem to have lost the faculty of leaving at un-heard of hours, and so have robbed travel of much of its delicious strangeness. This train, which was to take two small girls for their first taste of railroad adventure, passed through our nearest town at three o'clock in the morning, a segment of time that we had previously known only by hearsay. But we were now to be awakened in a cavernous hotel room, dressed and led over blocks of echoing plank side-walks to the station. We shivered with fearful delight and the night air of early autumn as we waited on the platform for the far off hoot in the west that would tell us the train was coming.

The railroad itself had for us a significance that in this day of varied transportation is almost wholly lost to the world. Its coming had made practical the settling of our lands, and had done away with the slow and cumbersome method of freighting by wagon over the prairies. Those twin ribbons of steel, with the telegraph poles that strode beside them over the lonely miles, were our lines of communication with the outer world. Still we lived much too far from the rails for convenience, since our only vehicle was a lumber wagon; and the phrase that we probably heard oftenest as children was, "When the new railroad is built." It might pass right by our place, our parents said jokingly; and I still dream occasionally of a train, the engine having a huge cow catcher and flaring smokestack, thundering down the road past my childhood home.

But we were not thinking of that as we waited on the platform. We could no more imagine what that train ride would be like than a hatching chicken can picture what waits for it outside the shell. The train would never come, we thought; but actually it was probably not more than ten minutes before we heard the whistle and shortly afterward saw the headlight sweeping down the track toward us. We huddled against the depot wall as the monster roared by with its bell clanging and steam hissing from under it, and stopped up the track by the water tower.

The conductor set the extra step in place and waved us curtly inside. This service might seem a bit primitive to the young of today, but it was sufficient, even lavish, for us. We could have climbed up to the high step without having a box set down for us! And inside the car, what a wonderland of varnished wood and red plush cushions! The lights were fortunately dimmed, so that we were spared too great a bedazzlement or too much shyness in the presence of the wonderful beings who had been riding all night and who lifted uneasily resting heads to glance morosely at us.

We pressed our faces against the nearest windows to stare out at the darkness intensified by a single light burning in the station. Near by, the brakeman swung his lantern, and someone we could not see sang out in a startling bass voice, "All a-bo-oard!" though there was not a soul on the platform to obey his command. The town, we thought, should have roused to answer his call; but no one appeared and almost at once the train started, with a lurch and a protesting creaking.

We sat breathless, our hands in our laps, while the conductor, his face set in the severe lines of majesty above his gleaming brass buttons, punched the tickets our father held out. No one, really, could be half so important as the railway conductor on a branch line looked thirty years ago; so we had good reason for waiting until he was well past before we ventured timidly, to touch the splendor of red plush, and even then we hoped that he had noticed that our hands were clean.

Initial Honors

The popular practice of writing one's distinctions (no matter how minor) in initials after one's name recalls the following story:

An American tourist in Scotland was about to sign the visitors' book when he noticed that all the guests' names were followed by letters indicative of their distinctions.

On being questioned about his deficiency by his fellow-guests, he replied:—"Oh, I'll make that all right." And he added to the book after his name—B. B. B. B. B. B.

This only went to stimulate the curiosity of the guests, who ventured to ask what it meant.

"Oh, that's easy," he replied, "that means "The Best Blinking Bugler in the Brooklyn Brass Band."
—Edinburgh Dispatch.

Grazing Methods—How Cows Browse

"Learn grazing management by watching the nose of a cow. Too many animal husbandmen are inclined to consider the performance at the other end." In these and other epigramatic expressions the importance of close grazing was emphasized by Professor D.B. Johnstone-Wallace, Agronimist, Cornell University, Ithica, N.Y., who spoke on the subject of "The Improvement and Management of Pastures in the Northeastern States" at the annual conference of the Federal, Provincial Pasture Committee, held at the Central Experimental Farm, Ottawa, in June.

Professor Johnstone-Wallace considered that the proper type of pasture is one consisting of a dense covering of grass and clover, resembling a good lawn ready to cut with the lawn mower, and should not exceed four inches in height at any time. When the grasses become tall and fibrous they are unpalatable, less nutritious, and the animals waste much valuable time in grazing. A cow's time is worth something, and part of it should be devoted to rest and rumination.

Early grazing should be carried to the point of punishing the grass severely, since in only this way can the clover be given the necessary encouragement. Once the clover is well established it will pass on to the grasses some of the nitrogen which it gathers from the atmosphere, and both can live together in mutal harmonious cooperation. But the grass should never be permitted to get too far ahead of the clover, as the latter can't stand shade, and close mowing of tall herbage is recommened. Apart from its lack of nutriment, tall, fibrous grass is in the way and prevents the animals from grazing the undergrowth properly. Farmers who can not bear to see their pastures grazed to the bone in early spring and who hesitate to mow down the tall grasses going to seed, might reflect on the adage about sparing the rod and spoiling the child!

Preventing Soil Erosion

Regarding fertilizers for pastures, the primary need for phosphate was indicated clearly, being illustrated by the speaker with photographs of turves and plants from areas variously treated. One of the most interesting pictures shown depicted soil profiles of two plots at Cockle Park, Northumberland, England. In a space of twenty years one had received periodically liberal applications of a high-phosphate fertilizer, the other being unfertilized. The top soil of the untreated plot was only an inch deep, overlying a tight, impervious subsoil, while the deep root herbage of the fertilized plot had formed a rich topsoil to a depth of 42 inches. This brought up the subject of soil erosion on sloping land, concerning which much is heard today. A dense turf and soil of open texture afford the best protection against erosion, holding and absorbing the rainfall that runs off the sparsely covered, hard, shallow soil and carries with it earth that can ill be spared.

Influence of Soil Heat

Professor Johnstone-Wallace contended that the superior pastures of England, are due temperature rather than to precipitation and produced records to prove that the average annual rainfall in an English county noted for for its dairy industry, is considerably less than that of a county in New York State. The summer temperature in England, however, is very much lower,- and pasture is depressed by excessive soil heat. This could be controlled in some measure by an adequate covering of wild whiteclover, and at Cornell summer soil temperatures have been lowered as much as 3 degrees by this protecting plant.

Care of the Young Colt

The care of the young colt or foal should begin before birth by making sure that the dam is healthy, well-fed and exercised. Reasonable work up to shortly before foaling is not harmful. Assistance at foaling time is seldom necessary but the wise owner will have an occasional look at the mare as foaling time approaches just in case assistance should be necessary. If the weather is mild foaling may take place in a small pasture where the dam will be unmolested but in cool weather a clean, roomy box stall is desirable. One of the important considerations at foaling time is to make sure that the nostrils of the colt are clear and breathing is not hampered. As soon as the colt is born and the dam shows a normal interest, they may be left for an hour to allow the colt to get up and nurse without assistance, as much energy is often wasted in trying to get the colt to nurse at once. If the colt is not up in an hour, it may be assisted and if weak, two or three tablespoonfuls of white sugar in a teacup full of warm water, or a small allowance of its mother's milk may be found helpful.

The first milk is quite a laxative by nature and is required to clear the bowels the first time. If the colt for any reason does not get the first milk, a rectal injection of warm soapy water is preferable to a laxative drench but an ounce of castor oil can be given if considered desirable. If this treatment or the taking of the first milk should cause scouring, it should not be viewed with alarm as it is usually self-corrective. It may be followed by doses of milk of magnesia as needed.

Scouring is sometimes caused by an unusual amount of exercise or by the dam giving too much milk. If it appears that the colt is getting too much milk the dam should be milked out several times each day and her feed reduced. If scouring continues the colt may be given a little roasted or brown flour or strong coffee.

The navel may be disinfected by painting with tincture of iodine soon after birth. Navel-ill or joint-ill has been almost unknown at the Dominion Experimental Station, at Scott, following the feeding of potassium iodide durrng the gestion period. One-half teaspoon once a week for the last six months of pregnancy is a safe dose.

If an orphan foal is on hand, a mare with a colt approximately the same age may be indored to nurse two colts. The younger the colts the greater the chance for success. This doubling should not be attempted unless the mare is a good milker and is not to be worked. If difficulty is experienced in getting the mare to accept the colt it stometimes helps by moistening the bodies of both colts with milk from the mare.

If the colt must be hand fed the following mixture will be found useful, after the bowels have been cleared, as mentioned above. Mix One tablespoon of white sugar with with three or four tablespoonfuls of lime water and add enough fresh cow's milk to make one pint. This should be given warm and in small quantities about every hour till the colt is a few days old, using about one gallon per day. The colt soon will learn to drink from the pail and the feedings may be less frequent and larger. After a couple of months a gradual change may be made to pure cow's milk.

Weaning age may be from four to six months but the colts should be eating freely of two parts oats to one part bran before they are weaned. A small pen in the pasture allowing the colts to enter to eat grain but excluding the mares, induces greater development of colts.

Liberal feeding, comfortable quarters, and reasonable exercise during the first winter, pays well in stimulating growth.

BANK OF MONTREAL CROP REPORT

General

Intense heat has prevailed in the prairie provinces during past week and this, combined with inadequate moisture, has further reduced the crop prospects. In Southern, Central and West Central Saskatchewan as well as in Eastern and Northern Alberta, serious losses have occurred. In Manitoba, on the other hand, crop conditions at the present are generally favorable. In Quebec ideal weather condition have been experienced and all crops are showing rapid growth, with prospects generally favorable. In Ontario frequent rains have stimulated the growth of vegetation and crops generally are above the average except in Northern Ontario, where the rainfall has been insufficient. In the Maritime Provinces crops continue to be adversely affected by dull and rainy weather, although there has been some improvement in weather conditions. In British Columbia there has been continued warm weather with favorable moisture conditions, and the general outlook is satisfactory for all crops other than cherries and strawberries.

Prairie Provinces — Alberta

The drought has continued except in isolated areas and it is now evident that crop yields, generally, will be much below the average. In Northern districts light to heavy [illegible] wheat and coarse grains, but further rain is urgently needed. Crops in the South Central and Southeastern sections are largely beyond recovery. Prospects in the Southwest remain favorable, with early wheat well advanced, and beets and pastures in good condition.

Saskatchewan

Crops have steadily deteriorated due to the excessively hot weather. Some fairly promising stands remain in the Northeast but elsewhere prospects vary from fair to to a total loss. In Southern districts hay crops are poor and pastures have burned. Heavy rains are required immediately as the feed situation is serious.

PUBLIC SALE OF LANDS UNDER THE TAX RECOVERY ACT, 1929

MUNICIPAL DISTRICT OF CORNHILL, No. 487

Notice is hereby given, that under the provisions of The Tax Recovery Act, 1929, the following lands will be offered for sale, by public auction, on Monday, the 9th day of August, 1937, at 2 o'clock in the afternoon, at the office of the Municipality, Tofield, Alberta.

THE WORLD OF WHEAT

By H. G. L. Strange, Director, "Crop Testing Plan".

The drought consumes us. There on high
The hills are parched, the streams are dry.
The drought consumes us. Still I strive
And will not leave while I survive.
—Chinese poem about 800 B.C. from the Chi King Collection of Confucious.—

Devastating drought, as we can perceive from this ancient Chinese classic, is no new thing.

Steadfast striving against the difficulties of drought, it seems, is not new, for it has been the common rule in all ages with those who till the furrowed face of the land.

For six, in some places eight, long dreary dry years, the farmer of southern Saskatchewan have demonstrated to the world their determination to strive. Each spring, with gradually diminishing resources, these courageous people in keeping with the ancient spirit as as shown in the Chinese classical poem, have seeded and cultivated the land with faith and hope.

Unfortunately to survive in farming requires more than faith and hope. Material resources which cost money are vital necessities too.

In the dry area many now have come to an end of their material resources. Let us hope that these splendid farmers; the most courageous citizens; may be saved not only for Western Canada but for Saskatchewan itself, by being reestablished somehow among fellow farmers in known good rainfall areas of the Province.

The following factors have tended to raise price

Worst drought in history of Western Canada may produce lowest yield per acre on record; rust damaging U.S.A. winter wheat crop; Rust spores appearing in U.S.A. and Canadian spring wheat crop; Evidence money inflation beginning to have effect in raising commodity prices in general; Fear of war in Occidental and Oriental countries.

The following factors have tended to lower price:

European countries using substitutes for wheat in bread; World demands for wheat decline as prices advance; Larger wheat acreage expected in Argentina; U.S. private wheat estimates well maintained; Winter wheat and rye harvest begins in Europe; Exportable wheat surplus expected in Roumania; Algerian harvest under way; Fig crop larger in Greece.

- IT RAINED -

We were all getting pretty scared it would not rain, weren't we. But it rained alright and now we are all happy. Buying meat is something like this—you have doubts whether it will be as good as you want it—but if you buy it at Bellamy's, satisfaction, like the rain, is sure to come.

Walter Bellamy

VISIT THE PLOTS

At every point where a Searle (Home) elevator is situated, nearby will be found a "Crop Testing Plan" demonstration plot. The newest and best varieties of wheat, oats and barley have been sown, so that farmers and others may observe which varieties are best suited to each district.

All farmers and business men are cordially invited to visit the plots.

See the nearest Searle (Home) agent about the plot in your district.

New Church To Be Dedicated Sunday

On Sunday, July 25th, the new Mennonite church, recently erected at Tofield will be officially dedicated by an inspiring service, commencing at 10:00 a.m. to which all are cordially invited.

Among the speakers for the occasion are Mr. David Heidebrecht, Mr. J. Nickel, Mr. Peter Regehr, Mr. David Boese, Pastor N. Roth of Salem Mennonite Church, and Rev. D. K. Allan of Tofield United Church.

The service will be conducted in the German language, but a number of the addresses will be given in the English language.

At mid-day lunch will be served.

In the afternoon a silver wedding anniversary will be held, Mr. and Mrs. David Heidebrecht having been married 25 years. It is expected that quite a large number of people will be present and the officials of the new church cordially invite all to attend.

AMISK CREEK

Several families attended the Edmonton Exhibition last week. Mr. A. Erisson spent several days at the fair.

Mrs. Moline entertained the Ladies Aid last Tuesday. Many visitors were present and a delicious lunch was served.

Monday an ice cream social was held at the home of Mrs. C. Erikson. It was well attended. Outdoor games were played and the lunch and ice cream were enjoyed by all.

Several in the district attended the Cantata at Bardo on Sunday.

Mr. Annebo, Agnes and Magda Annebo and Mr. Berg motored to Camrose for the funeral of Mr. Wills.

The funeral of Mrs. Kjelby at Ryley was attended by several here.

Miss Agnes Annebo is at home during her two weeks vacation.

Mr. Hilmer Moen returned Friday from Claysmore where he has been employed at the elevator.

Mrs. R. Blackburn and son Robert, visited at the home of Mrs. K. Olson.

Mr. E. Vickved and Mr. G. Vockved of Grande Prairie with their families visited at the Berg and Annebo homes last week.

Mrs. Moline and Olaf spent several days at a camp meeting at Lacombe.

Miss Margaret Moline left for Edmonton Monday to attend the summer school course in Music conducted by Viggo Kihl.

Grace, small daughter of Mr. and Mrs. Palmer Anderson is visiting her aunt Mrs. I. C. Olson.

The Annebo family visited at the Berild home Sunday evening.

LINDBROOK

Well! we've had some rain, and it was never more welcome, so evidently old "Jupe Pluvo" hasn't forgotten us yet.

Mr. and Mrs. F. Evans, Mrs. Jas. Bracegirdle and daughters, Star, Pansy and Carol and Master Bruce Best of Athabasca (nephew of Mrs. Evans and Mr. Bracegirdle) left last Monday July 12th for Govan, Sask., where they will visit relatives. They motored all the way and arrived there O.K. according to advices re[illegible].

Mr. Ray Odlorne left last Friday with a carload of horses, cattle and machinery, etc., for his new home at Prince George, B.C. Mrs. Odlorne and the family will be staying for the present with relatives in the Tofield district until Mr. Odlorne has things fixed up at Prince George for them. The best of luck, Ray, from all your old friends and neighbors.

The annual picnic of the L.C.C. was held last Sunday at the Lakeview resort at Cooking Lake. A large crowd turned out, the weather was fine, if anything, too hot. The lunch was a gorgeous repast, and afterwards, baseball, softball, games and aquatic sports were indulged in. Everyone present voted it an A.1. time and say "Thank You, ladies, it was swell."

Mr. A. Scott had the misfortune to lose a choice heifer on the railroad here last Sunday morning, it got in the way of the express and came off worst.

Quite a few Lindbrook folks took in the exhibition at Edmonton and all report it O.K.

Mrs. H. Brown left last week on a holiday to the coast to visit friends and relatives.

L.C.C. NEWS

The barn dance given by the L.C.C. at the home of Reub Hammersly was a great success. Three hundred people danced to the music of the Haddon & Hall orchestra which was very enjoyable and although the night was extra warm the musicians were kept supplying the wants of the merry makers.

Young and old were present and it is believed all had a most enjoyable time.

Ice cream was sold and refreshments served at mid-night. The members cleared over $24.00 all expenses paid.

The L.C.C. wish to thank all who helped to make this dance the success it was.

The Club also held their annual picnic this month at Lakeview on Sunday. All the members and their families were present, also many others in the Lindbrook District.

From eleven o'clock until after one, cars were arriving in the picnic grounds. Ladies spread their tablecloths (which numbered quite a few) over the ground and the eats, numerous assortments of everything eatable were spread on it. Then the families gathered around and the hunger which accompanies all picnic-ers was soon satisfied.

Races for every age, including the married and single then took place causing much amusement. This over, members took to the water and then the majority of the crowd watched the ball game between Dodds and Tofield. Tofield winning.

Supper next on the programme was relished much the same as dinner and after a peanut scramble everyone departed for home, tired but happy; many wishing for another such a day.

LOCAL & PERSONAL

Francis Campbell is camping at Mere Lake with Mr. and Mrs. Manning of Edmonton.

Mr and Mrs. Swift, Arnold and John left on Monday night via C.N.R. for a holiday at Montreal and other eastern points.

Wes Taylor and Graham Allen returned home on Sunday after a motor trip into B.C. as far as Kimberly. Sid Worton who accompanied them stopped off at Wetaskiwin where he will work for a week or two.

Mrs. Campbell visited friends in Edmonton last week.

Mr. Hutson of the Searle Grain Elevator is on his holidays.

Mrs. Lovel is spending a week's holiday at the Pacific coast.

Blake Clutterham, Reg. McCarthy, and Jim Munro are enjoying a holiday at Jasper.

Mrs. Firth, Gwenn and Patsy are holidaying at Ma Me-O-Beach, Pigeon Lake

Mr. and Mrs. Johnston Ferguson are visiting at Pacific Coast points.

Miss Edythe Barden visited Edmonton this week.

Mr. O. P. Thomas who is attending summer school in Edmonton was home for the week end.

WELL KNOWN DISTRICT COUPLE WED

On Wednesday, July 14th at Salem Mennonite Church, near Tofield, Miss Velma Yoder, only daughter of Mr. and Mrs. Henry Yoder and Mr. David Lehman, son of the late Mr. and Mrs. John Lehman were united in holy matrimony. The ceremony was performed at 5 o'clock, by Pastor N. E. Roth in the presence of a large number of relatives and friends. Prior to the ceremony a service was held conducted by Pastor Roth.

The bride was accompanied by two bridesmaids, Miss Vera Wideman and Miss Grace Roth. The bridegroom was supported by Lloyd Yoder, brother of the bride and Nelvin Lehman, brother of the bridegroom.

After the ceremony a wedding supper was held at the home of the bride's parents at which 200 guests were present. The happy couple will reside in the Tofield district the bridegroom being an experienced farmer.

The best wishes of the district is extended to them for a long and happy wedded life.

GAS EXPLOSION AT CLUB CAFE SUNDAY MORNING

On Sunday morning last shortly after eleven o'clock a gas explosion occurred at the Club Cafe which severely burned Jack Hardy and just about wrecked the kitchen.

A young lad, Ming, started to go to the cellar for the potatoes for dinner and finding the door hard to lift up, enlisted the aid of Jack, who was standing nearby. An unmistakeable odor of gas was noticed when the door was opened, but Ming went down to get the potatoes while Jack stood on the steps. The explosion occurred at this moment and Jack received the full force of it. Ming being on a lower level was unhurt and ran to the west end of the cellar. Told to come out quickly he returned up to the kitchen and to the outside without any loss of time. The explosion made a general wreck of the kitchen smashing crockery, stripping plaster off the wall, etc.

The gas was shut off at the meter and at the lane, and people were milling around inspecting the damage when fire was seen to be creeping up the east kitchen wall. A call to the central telephone office was immediately made and the fire alarm sounded. Within five minutes the brigade and equipment was at the door, but in the meantime the wall had been cut away and water poured down which extinguished the fire. This ended the excitement and main street returned to its usual Sunday tranquillity.

SEWING WANTED—Anyone desiring sewing done, please get in touch with me.—Mrs. Jack Letourneau.

LOST, WANTED, FOUND, FOR SALE ADVTS. 50c. ONE WEEK, 75c TWO WEEKS, $1.00 FOUR WEEKS.

Holiday Trippers Return Home

It is nice to go away on a holiday trip but it evidently is nice also to return home—anyway they all do it.

This week several vacationists have returned from trips taken to distant parts. Mr. and Mrs. Clutterham arrived home the beginning of the week from a vacation trip which took them as far east and south as New York. Stops and sight seeing trips were made at other cities both in Eastern Canada and the United States. A particularly interesting stay was made at Meriden, Mass., where Mr. Clutterham grew up and spent his school days. It is thirty years since he left there and the opportunity to revisit the scenes of his youth and to renew old friendships was very pleasing. During a portion of the trip Max Rogers accompanied them, Max now taking a university course in the United States.

Mr. and Mrs. T. Shultz and son and Mr. and Mrs. Noland returned this week from a motor trip to the Pacific coast. Most of the time was spent in Oregon, a visit being made with Mr. and Mrs. Radabaugh, former residents of this district. Mr. Shultz report that parts of Oregon are enjoying a high degree of prosperity particularly where lumber mills are situated, the market for lumber now being very active there.

They also visited former Tofield[illegible] Vancouver, Mr. and Mrs. T[illegible] and report them [illegible] well.

Mrs. Malcolm and M[illegible] returned [illegible] week from a stay at Banff of [illegible] weeks duration.

M[illegible] McCauley also returned from Banff after a pleasant holiday spent there.

Rev. and Mrs. Wallis returned from Pidgeon Lake where they had been sharing a cottage with Mr. and Mrs. Geo. Coatta. The Coattas are continuing their stay there.

Mr. and Mrs. Art Young returned Wednesday from a motor trip to the Dakotas, visiting relatives there.

REVIVAL MEETINGS

A series of revival meetings [illegible] held at the Mennonite Church two miles west of Dodds from July 15th to [illegible] Evangelist T. [illegible] [illegible]ary on furlough from Argentina, South America [illegible] and will give a fifteen [illegible] talk on Missions [illegible] each evening [illegible] which will immediately precede the sermon. The public [illegible] to these meetings.

In a black plain toe style. Very pliable and the best $3.00 shoe I have seen. Per pr. $3.00
Black plain toe shoe with Panco Sole, pair $2.75

GREB SHOES—

Of high grade soft Elk tan leather, with Goodyear Welt Soles. This is the only pliable sole. Very wide fitting. Pair . $4.75

GREB SHOES—

Of solid Retan leather with standard screw Oak tan soles of best quality. Outside counters. Will wear. Per pr. . . $3.75

E. W. ROGERS

Loathesome House Fly . . . Breeder of Disease . . . .

Authorities Urge Aggressive Extermination

The common house fly is not only a nuisance but a serious health menace, especially in warm months, from mid summer to autumn, when it reaches its greatest abundance. It is a menace to health because it breeds in garbage, manure and human faeces, and may pass directly from filth and other infected matter to foodstuffs. Particles of decomposing organic matter, bacteria and other living organisms adhere to its hairy body and legs and sticky feet and mouthparts, or may be conveyed to food in its excreta and saliva. The house fly, known to scientists as Musca domestica, is world wide in distribution and [illegible] for the part it plays in the dissemination of dangerous diseases such as infantile diarrhoea, [illegible], typhoid, cholera and [illegible]. In Canada, the house fly is probably the most important insect species concerned in disease transmission. On this account it is very important that measures be taken to control it and prevent it from having access to human foods.

The most effective method of controlling house flies consists of eliminating or reducing their breeding places by promptly treating or disposing of manure and garbage. Fresh horse manure is probably chiefly responsible for the majority of flies in rural sections. In the cities, garbage is an important factor in fly production. To be fully effective control measures should be organized on a community basis, as one neglected manure heap or garbage dump may affect the whole neighborhood. Collections of manure should be removed from city stables and disposed of at least twice weekly. In rural sections, where practicable, the manure should be removed daily and spread thinly on the fields where the drying effect of the sun and wind will prevent breeding. An alternative method consists of taking advantage of the heat produced by fermentation when manure is tightly packed in piles. The manure pile should be constructed on hard ground or concrete. The sides of the pile should be clean cut and almost vertical but sloping slightly towards the centre. As fresh manure is added to the pile it should be tightly packed by means of a shovel. The heat produced by fermentation destroys all fly eggs, larvae and pupae, except those close to the surface of the top layer. The application with a watering can or sprayer of a solution of borax consisting of 1 lb. of borax in six gallons of water will destroy any fly stages in the top layer. Six gallons of the solution is sufficient to treat 30 square feet of surface area.

Steps should also be taken to prevent the accumulation of manure from other domestic livestock such as pigs, cattle and poultry, as flies will breed in these substances, although to a lesser extent.

All organic refuse such as household garbage should be wrapped in paper and stored in fly proof garbage cans until finally disposed of by burning. The accumulation of garbage in municipal dumps during the warm months of the year is undesirable as such dumps produce large enormous numbers of flies as well as other vermin, and may constitute a serious public nuisance. The only satisfactory way of disposing of garbage during the fly season is by incineration.

Measures should be taken to exclude flies from dwellings. The screening of doors and windows is very useful in this regard. Flies that find their way into the home should be promptly destroyed. Fly swatters, sticky fly paper, poisoned fly pads, poisoned bait made by mixing one teaspoonful of formalin in a cupful of sweetened milk or water, and exposing it in saucers, are included among the various means of doing this. Fly sprays containing pyrethrum extract in mineral oil are a valuable and widely used killing agent. Further information on house flies, prepared by the Entomological Branch, may be secured by writing to the Publicity and Extension Branch, of the Department of Agriculture, Ottawa.

"Labor is the most difficult hurdle you've got, greater than monetary or other problems, you'd better recognize labor."—Sir Josiah Stamp.

TAKING CARE OF TOURISTS

"If tourists are given a warm welcome and are treated courteously and fairly their number will increase annually" said the general manager of a Canadian bank recently. It is more or less up to the individual Canadians to supply the warm welcome and the courteous treatment. Since the visitors come by motor car the automobile dealer or service station man often finds he has the privilege of extending the Canadian brand of hospitality. General Motors dealers, estimating that of the 4 million cars likely to visit Canada this year one of every three will be General Motors model, have a plan of service for the touring motorist which take in account the General Motors policy of providing an owner with uninterrupted transportation. The owners of all cars produced by General Motors, whether Canadian or U.S. manufacture, are entitled to warranty repairs and adjustments throughout Canada or the United States. The Canadian dealer's shop is one place where the visiting General Motors car owner need not consider himself a stranger.

THE WAY OF LOST POWER

Frequent cause of an automobile losing its maximum of power was revealed recently by Hector Rabezzana, prominent engineer, who has just completed a new study of ignition phenomena. "After a few hundred miles of alternately slow and fast driving, deposits from combustion gases begin to form a coating on the lower end of the spark plug insulator," Rabezzana said. This coating is responsible for the loss of maximum engine power, and for higher gasoline consumption. It can be remedied by having spark plugs cleaned at intervals of 3,000 to 4,000 miles."

You can get people to give three cheers for a thing that you can't get them to give anything else for.—Montreal Herald.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE SUMMER SCOURGE OF INFANCY

As surely as the warm summer and the early months of autumn roll around the health of Canadian babies will be menaced by a condition commonly called summer diarrhoea. Happily this complaint is not as prevalent as it was in the recent past, but it still is a very serious disease among infants in the first year of life. Eight years ago several hundred babies in the Province of Ontario alone died in one year of this apparently simple trouble. All evidence of loose stools in an infant who may appear quite well should be regarded as a warning and their continuance over twelve hours demands immediate medical attention. This may appear unduly alarming to those who have not seen the swiftly tragic results of neglect of diarrhoea but it cannot be too strongly stated that summer diarrhoea is a serious disease, more deadly than pneumonia.

How can we avoid and prevent this dreadful condition? Nurse your baby and he is practically safe. Breast fed babies are affected but rarely and all the serious cases occur in artificially fed infants. If your baby requires to be bottle fed the careful sterilization of all utensils required in the preparation of the feeding will go a long way to avoid contamination of the food supply. The milk which should be originally pasteurized must be boiled from three to five minutes and kept cold in the refrigerator until it is required. It is becoming established that infantile summer diarrhoea or cholera infantum or "intestinal flu" are all the same condition and are infectious diseases.

The germs causing the trouble may be spread by flies or by the contact of soiled hands with the food. Therefore screening and all other measures to eliminate houseflies and scrupulous personal cleanliness are excellent measures to avoid the spread of infection. If any older member of the family has even the slightest diarrhoea he should avoid all contact with the baby because what may seem a minor trouble in the adult may assume dangerous proportions in the infant. If, in spite of these simple and common sense precautions, your baby should develop diarrhoea, omit all food except large quantities of boiled water until your doctor gives you further instructions. Regard the beginnings of this trouble as worthy of your serious attention, don't wait until the child becomes drowsy and sunken-eyed but act early and save the babies.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

USED CAR BONFIRE

Applause greeted the "civic duty" movement of the Indianapolis Chevrolet Dealers Association which culminated recently in the public burning of more than 100 junkers at the Fair Grounds in Indianapolis, with 25,000 spectators in attendance.

The "burning of the witches" at Indianapolis was planned; advertised and carried out with the aid of the State Department of Public Safety, county and city safety organizations, and the police and fire departments. It was not a publicity stunt, for the Chevrolet dealers worked and remained in the background. It was not a sporadic safety stunt for it will be held monthly during the summer months. All automobile dealers in the Indianapolis section were invited to take part in the affair, and indications are that many will participate in the next bonfire of junkers.

Newspaper men in Indianapolis estimated that the value of the cars burned would total $75,000. The old automobiles were able to run under their own power to the Fair Grounds but they were of a type that the dealers judged a menace to other motorists, to traffic and to pedestrians. After the fire the metal was sold for junk.

"The test of our progress is not whether we add more to the abundance of those who have much; it is whether we provide enough for those who have too little."—Franklin D. Roosevelt.

85 HORSEPOWER . . .
112¼-INCH WHEELBASE!

Owners Report 25 and More Miles Per Gallon

CHEVROLET is big in size—it's a full 112¼-inch wheelbase car. It's big in power—with that smooth, lively Valve-in-Head engine packing full 85 horsepower under the hood! Yet it costs you less for gas, less for oil and less for upkeep than any other car in its class!

"Better than 20 miles to the gallon of gas in heavy traffic," report taxi drivers. "Up to 30 miles per gallon," say travelling salesmen who ride the highways day in and day out.

Anyone who says you have to pay big-car prices to enjoy fine-car performance—fine-car roominess—fine-car pride—certainly hasn't sat behind the wheel of *The Only Complete Low-Priced Car!* Enjoy that experience for yourself, today. Once you drive a Chevrolet, you'll never be satisfied with less than Chevrolet value for your money!

UNISTEEL TURRET TOP BODIES BY FISHER . . . Combining All-Steel safety with silence. Wider and roomier. Safety glass.

PERFECTED HYDRAULIC BRAKES . . . Recognized everywhere as safest and smoothest.

VALVE-IN-HEAD High-Compression Engine . . . The heart of Chevrolet dependability—economy—and brilliant performance.

FISHER NO-DRAFT VENTILATION . . . Ends drafts and windshield "fogging". Enables you to "scoop in" fresh air on hot days.

IMPROVED GLIDING KNEE-ACTION RIDE . . . On all Master De Luxe Models.

PRICED FROM $745
Master 2-passenger Business Coupe
delivered at factory, Oshawa. Government taxes, license and freight additional. Prices subject to change without notice. Monthly payments to suit your purse on the General Motors Instalment Plan.

CHAUTAUQUA—REMEMBER?—

(By Mary Zirkle in the Christian Science Monitor)

Editor's Note.—The very first job that was done by us with this plant at Tofield, was committee ribbons for the first chautauqua held here. For a few years chautauqua here had its lights and shadows, but eventually faded from the picture. Consequently the following article will no doubt be read with interest.

IT WAS the summer that "Main Street" ruthlessly undercut the self-confidence of the Middle West. The Male Quartet from the University of Chicago inquired anxiously—the "Junior Girl" heard all the troubles of the "Talent"—if I thought Sinclair Lewis was right, and Chautauqua really was not an uplifting institution.

I hadn't considered it. This was my first season with the Chautauqua, and it was enough for me to step off the train and know that the fluttering pennants strung across those now famous "Main" streets were in our honor; to enter the tent, fragrant with the resinous odor of new pine benches, and to have the right to go backstage with the talent; the real actors and lecturers.

As a Junior Girl, my function was to organize playground activities in the forenoons among the children of the town, and to sit with them down front at performances and direct their enthusiasm into proper channels of applause. Ours was a five day circuit, so that each Junior Girl stayed with one tent for that length of time, and then moved to another tent in another town, while the Talent, five sets in all, remained one day with each tent. Our towns were really villages, of from 500 to 2000 population, scattered over the upper Mississippi Valley.

I had not imagined the Male Quartet concerned about anything more than their routines, their white suits, and how their salaries could be saved to cover their expenses at the university next term. But, seeing that they expected to educate the audiences with "The Bells of St. Mary's" and the story of Yohnny Yohnson, I gave some attention to the matter.

We had a lecturer, a Dickensian character, elderly and benignant. In his lecture he told of his rise from an Iowa farm boyhood to his present eminence. One might wonder whether, had the substantial farm audiences known his financial circumstances they would have been much impressed by his success. But look a bit further and you will see that it was genuine. He was born to a certain pomposity and facility in giving advice, and none was more elevated by his periods than himself. He had found his niche in life, and no rich farm lands could have tempted him from it.

Strive and Succeed was his theme. Banal? Perhaps; but still a magic formula that has never been supplanted. Remembering the farm people I have known best. I am convinced that these audiences were in no wise misled, but accepted with humorous tolerance what he had to offer, and made the most of it. Harvest had come and gone, the corn was laid by, and now in the drowsy summer afternoons neighbors met and visited and relaxed in the dim Chautauqua tent, and were not inclined to be too critical of their entertainment.

On our billing was listed the "Eight Foot Golden Harp." There was a harpist, too; a smallish Italian gentleman whose performance on the instrument was really secondary to his guarding of it. He would as soon have entrusted a baby to the baggageman, and I carry to this day a mental picture of him tugging like an overburdened ant at the unwieldy case, getting it up and down car steps, and sitting devotedly with it in drafty vestibules. The gold paint had flaked in spots from the harp frame, and the mid-summer air was always either too dry or too moist, so that Signor was forever mending strings; but I never heard him complain, and his love for the instrument shone so brightly on his face that it must have been a dull audience that did not catch at least a glimmer of inspiration from him.

I pass by the Musical Saw and the Swiss Yodelers. We had them, and the youngsters applauded wholeheartedly. Chautauqua was working with children, building future audiences. It had not the gift of prophecy. . . . The next winter, at State University, my landlady's son was tinkering all his spare time with coils of wire and nameless gadgets. One day he adjusted earphones on me, brought two points into contact, and I heard faint but unmistakable, music which he said was being played in Kansas City, miles away.

I was listening all unaware to something that with the work already begun by the automobile and motion picture, would do away with the simpler forms of entertainment for rural folk and would send Chautauqua to join the stock companies that stormed the boards of village opera houses in [illegible] not long gone by. In the rush for the radio st[illegible] I am sure the Yodellers and the player of the musical saw found a place, but I wonder what h[illegible] of the elderly lecturer and the Signor and his Golden Harp.

WORLD OF WHEAT

By R. G. L. Strange, Director, "Crop Testing Plan".

One picture is worth 10,000 words. This is a Chinese proverb, thousands of years old, and, as with all Chinese aphorisms, contains the very essence of truth itself.

The "Crop Testing Plan" took a cue some years ago from this ancient Chinese proverb, and, by growing samples which represent farmers actual fields of wheat, make "living pictures" of thousands of individual fields in order to demonstrate to the eye their trueness-to-variety, or whether they contain undesirable, unprofitable mixtures.

These "field pictures" or demonstrations, may be seen during the next few weeks growing at over 100 points in Western Canada, and field days are held during which the material is demonstrated and explained by expert Cerealists and Plant Breeders.

The plots show in addition the new rust-resistant wheat varieties with, too, some new crops gathered from the four corners of the earth, of interest to the Canadian farmers.

It would be worth the time of all who are interested in the advancement of agriculture to attend one of these field days, the object of it all to improve wheat quality, and so help sell the farmers' wheat on Worlds' markets at better prices, hence finally to increase the income of the Western farmer.

The following factors have tended to raise price.

Rust damage spreading to U.S.A. winter and spring wheat crops and in Manitoba; Wheat crops of Manchuria, Japan and China estimated 120 millions less than last year; Droughty conditions prevail in southern hemisphere; China and Japan clash; China buying U.S.A. gold; European deciduous fruit prospects are favorable.

The following factors have tended to lower price.

U.S.A. Department of Agriculture estimates U.S. wheat crop 882 million; India offers wheat freely; Record crop expected in Greece; French crop larger than last year; Balkan States harvest larger crop than expected; Heavy rains in Western Canada.

SUCKERING SWEET CORN

(Experimental Farms Note)

At the Dominion Experimental Station, Beaverlodge, Alta., the removal of the basal sprouts or suckers from the Banting and Pickaninny varieties of sweet corn has during nine years trial increased the total weight per acre by a widely varying degree ranging from 2 up to 100 per cent. Maturity, however, has been advanced little if at all. Results with Golden Bantam were negative because it failed to mature hence in the case of this variety the suckering test was discontinued.

The labour involved in suckering is slight. When the corn is about eight to 12 inches high the plants are thinned to ten inches apart in the rows and at the same time all sucker growth developing at the base is broken off by a twist of the hand. Care should be taken that the remaining stalks are not loosened or twisted. A second suckering, but rarely a third, has been found necessary.

In the majority of seasons the practice seems quite profitable. It is, however, better to grow a limited area and remove the suckers to obtain a satisfactory crop.

TESTED RECIPES

SUMMER SALADS

Golden Glow Salad

1 package lemon jelly powder
1 1-2 cups boiling water
2 tablespoons vinegar
1 cup grated raw carrot
½ teaspoon salt
1 cup cucumber, diced and drained
¼ teaspoon minced onion

Dissolve jelly in boiling water. Add vinegar and salt. Chill. When slightly thickened, add vegetables. Turn into moulds. Chill until firm. Unmold on crisp lettuce. (Serves 6.)

Tomato and Egg Mould Salad—

6 eggs
½ teaspoon salt
¼ teaspoon pepper
2-3 cup mayonnaise
3 large tomatoes
Lettuce

Hard cook the eggs, cool slightly and while still warm shell them and force them through a potato ricer or sieve. Add salt and pepper and pack the riced eggs firmly into 2 glasses. When ready to serve salad, remove eggs from glasses by running a knife round the edge. It will then be possible to cut the eggs in slices. Peel tomatoes, cut in thick slices, lay a slice of egg on top, place on lettuce leaves, pour over all a tablespoonful of salad dressing and serve. (Serves 6.)

Quick Cabbage Salad—

1 [illegible] of cabbage finely shredded
1-2 cup of green pepper minced
1-4 cup of sweet pickles diced
1 tablespoon sugar
2 tablespoons of prepared mustard
1-2 teaspoon of salt
[illegible] tablespoons of vinegar
1-4 cup of cream (sour or sweet)
[illegible] pepper

Mix the cabbage with green pepper and pickles. Combine the sugar, salt vinegar, cream, mustard, and pepper and pour over the cabbage. Blend well and serve at once. (Serves 6.)

Carrot Salad—

2 cups chopped carrots
1-4 cup finely chopped nuts
1 cup celery
1-2 teaspoon salt

Mix thoroughly. Serve dressing separately. (Serves 6)

Beet Jelly Salad—

1 cup finely chopped beets
1-4 cup finely chopped celery
1 cup finely chopped apples
1 cup prepared lemon jelly
Small amount of onion

MARCONI, INVENTOR OF WIRELESS DIES IN ROME

Rome, July 20—The Marquis Guglielmo Marconi, who invented wireless telegraphy when he was only 21 years old, died suddenly at 3.45 a.m. on Tuesday (7:45 p.m. Monday M.S.T.) at the ancient palace in down town Rome where he lived and worked.

As the early Roman dawn came across the Alban hills, the 63-year-old conqueror of the ether died quietly of heart paralysis. His widow, the Countess Cristina Bezzi-Scala, was at his bedside. She had been called back from the seaside resort of Viareggio when he began to feel ill yesterday afternoon.

Their daughter, Elttra Elena, whose god-mother is Queen Elena of Italy, remained at the resort and will not return to Rome until time for the state funeral. Today is her eighth birthday.

Premier Mussolini, whose ardent supporter Marconi had been, was notified of the death immediately. He dispatched a telegram of condolence and later went to Marconi's home in the Via Condotti and paid his respects beside the body.

The premier approached the bed, which was lighted at the four corners by tall candles. He paused, then bent and kissed the dead man on the forehead.

The first intimation that Marconi was not feeling well came yesterday afternoon when he was forced to cancel an appointment with Mussolini.

Pope Pius, with whom the inventor had had a long audience Saturday concerning the new radio station he was building for the Vatican, was notified by telephone at his summer residence at Castle Gondolfo. He sent a special blessing to the inventor.

Marconi had been closely associated with the pontiff. The first radio station at the Vatican was installed by him and when it was inaugurated in [illegible] it was Marconi who introduced Pope Pius, the first pope ever to speak over the radio.

MOTHER AGED 28 GOES TO SCHOOL

New York, July 20.—Mrs. Margie Seglione, 28, works hard at her lessons. She is trying to catch up with her daughter, eight, who is three years ahead of her in school. Born in the mountains of South Carolina, Mrs. Seglione didn't go to school as a child because the nearest one was three miles away over rough country.

The family moved to Brooklyn and daughter Maybelle began to grow. The little girl's increasing skill at reading and writing aroused her mother's pride and Mrs. Seglione enrolled in adult classes.

Now after three month's regular attendance she has made up much leeway on her daughter, but admits that Maybelle is still the "smarter." Maybelle can read mother's lessons but Mrs. Seglione is at sea in her daughter's primer.

MAN OF GLASS IS WONDER AT PARIS EXHIBITION

Paris, July 17.—"L'Homme de Verre"—the Man of Glass. Of all the weird and surprising things in a world of surprises, the Man of Glass at the Paris Exposition outdoes everything. A goldfish has the privacy of a Thibet hermit in comparison.

This marvel is almost hidden away in an unobtrusive lane in the exposition. The outer room is filled with charts, photographs, figures and exhibits of the human body, and is instructive in itself. Then a door is opened and the little crowd surges into a small circular room with a dome. In the centre of the room on a high stage is the figure of a man, in glass.

Hearts, arteries and veins, brain and all the organs are there, in the glass. The figure is life size and as you look at the outstretched arms and upturned face queer shivers come and go in your spine.

Suddenly the lights go out, and then—the heart of the Man of Glass is illuminated—inside; then the arteries light up, then the veins. Through a loudspeaker a lecturer is explaining (in French) the circulation of the blood. The lights go out and the brain lights up. Every organ of the body in turn is illuminated, and the lecturer goes on with his description.

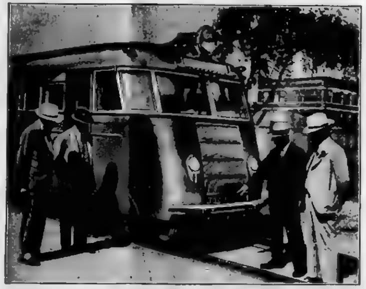
By the time he was through it was a complete answer to the adjuration "Man—Know Thyself." The construction of that Man of Glass was genius. None of the lamps could be seen; but the organs shone clear in the dark. And the price of admission was the lowest in the exhibition—one franc.

NORTHERNERS ITCH TO DUNK IN ROYAL TUB

Fort Smith, July 20.—Residents of this river port on the Slave river are wondering how it would be to take a dunk in a regal bath-tub. Bath tubs are a rarity in the north, but when the H.B.C. transportation men were informed that they would have as passengers to Aklavik Lord Tweedsmuir, governor general of Canada and his party, several alterations were made on the sternwheeler Distributor, flagship of the H.B.C. fleet, and among them was the fitting up of truly regal bath-rooms.

Now Fort Smith is wondering how it would feel to try the vice-regal tubs, smell the vice-regal soap and feel the rub of the vice-regal towels, although they admit that before they could do this with impunity they would first have to set up the vice-regal mosquito bars, as this year's brand of mosquitoes are as big as flying foxes.

Railway Officials Inspect Canada's First Road-Rail Car



THE first tests to be made in Canada of a new type of automotive vehicle which links highway and railway will be commenced within the next two weeks on branch lines in the three regions of the Canadian National System. The first of these "Auto-Railers" which will be tried out on branch lines in Ontario and Quebec, is now ready for service. It was inspected recently by S. J. Hungerford, Chairman and President of the Canadian National and a number of headquarters officials.

Photograph shows John Roberts, Chief of Motive Power and Car Equipment, pointing out to President Hungerford the flanged wheels which are let down or drawn up to change from road to rail operation. This operation is controlled from the driver's seat and requires only one minute's time. In the group (left to right) are N. B. Walton, Chief of Transportation, Mr. Hungerford, Mr. Roberts, and R. L. Fairbairn, Manager, Passenger Service Bureau.

In addition to the three passenger road-railers one freight carrier for use on either road or rail will be tried out.

In announcing the purchase of this equipment Mr. Hungerford emphasized that the move was of an experimental nature and was intended to permit of tests being made on various sections of the system as to the adaptability of these cars for use in Canada. It is believed they will cut down operating costs very considerably on light traffic branch lines and at the same time give better service to the public dependent upon such lines.

WAKE UP YOUR LIVER BILE—

And You'll Jump Out of Bed in the Morning Rarin' to go

The liver should pour out two pounds of liquid bile into your bowels daily. If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You get constipated. Harmful poisons go into the body, and you feel sour, sunk and the world looks punk.

A mere bowel movement doesn't always get at the cause. You need something that works on the liver as well. It takes those good, old Carter's Little Liver Pills to get these two pounds of bile flowing freely and make you feel "up and up." Harmless and gentle, they make the bile flow freely. They do the work of calomel but have no calomel or mercury in them. Ask for Carter's Little Liver Pills by name! Stubbornly refuse anything else. 25c.

DON'T FORGET the WEDNESDAY HALF HOLIDAY DURING JULY AND AUGUST

YOU Share in Canada's Greatest Co-Operative Business

LIFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

New Church Dedicated on Sunday

Dedication services were held Sunday of the newly built Schoenseer Mennonite church at Tofield. Bishop Nickel of Peace River conducted the ceremony. Other speakers were Bishop N. Roth of Salem Mennonite church, Tofield; David Heidebrecht, and Peter Regher, members of the congregation here.

This church was built as a community enterprise by a sect of Mennonites resident on farms in Tofield district, all work being done by the members gratis. The members of the church are people of German extraction who were dispossessed of their lands in Russia following the Soviet revolution, and are mostly from southern Russia, although some came from sections of Siberia.

The first of these settlers came to this district about 12 years ago, locating on the G. A. Trent ranch on the shores of Beaver Lake. Almost every year has seen new families come in, renting or purchasing mostly improved farms.

Hard-working and industrious, they have strong religious tendencies, and the new church which will seat about 200 people, is a visible evidence of these qualities.

GREY OWL WOULD EMPLOY INDIANS SAVE WILD LIFE

WASKESIU, Sask. July 27.— An earnest plea for stricter wild life and forest conservation measures and suggestions that men of his own race be engaged in this work, were made by Grey Owl, internationally-famed Indian naturalist, author and lecturer, in an interview here in Prince Albert National park, 45 miles northwest of Prince Albert.

With his wife, Grey Owl will leave here soon for eastern Canada to finish his motion picture, "The Trail," which gives a panoramic view of the Canadian northland. Later, he will lecture in Canada, United States and England.

The naturalist who first attracted notice by training beavers is still fighting for the cause of those harried creatures of the waterways and his two pet beavers, Jelly-Roll and Rawhide are aiding him.

"Let the beaver thrive and they will conserve the water" said Grey Owl. "Allow them to be destroyed through excessive trapping and poorly enforced regulations and conditions of our lakes and streams will grow steadily worse." He referred to present alarming low levels of some northern lakes.

"Beaver should be allowed to increase ten-fold a hundred-fold and then trapped selectively in proper seasons under properly devised and strictly enforced game laws if we are to retain the waterways of our northlands."

Such work should be entirely divorced from political consideration, he said, and the Indians should be put to work nurturing the north and carefully protecting its inhabitants.

"Why not let them help the great cause by putting them to work at the job they love?" he asked.

In almost all cases forest fires were due to the crass carelessness of men, he said, and the Indians with their great knowledge of the north, could help in the great preservation cause.

"I appeal for human understanding and sympathy and tolerance," he concluded. "Let us be more Canadian-minded. In a properly administered north, we have the greatest asset any country ever had."

KETCHAMOOT

Mrs. Henderson entertained the Ladies' Aid at her home Friday afternoon of last week. A large number of members and visitors were present.

Miss Maude Wideman returned home Friday of last week after a ten days outing with the C.G.I.T. girls at Viking.

Miss Margaret Roberts of Poe is the guest of her friend Mrs. A. F. Schultz.

Miss Carrie Whillans, R.N. of Victoria, B.C. spent a two week's holiday visiting her sister, Mrs. Geo. Cookson and brother, Mr. Chas. Whillans and family.

The Social hour club held their annual picnic at Lakeview Cooking Lake on Sunday and the majority of the other residents of the neighborhood also spent Sunday there.

Messrs. William Stairs, William Davison, Allen Harrison, Jimmie Ingram, Lyle Coombes, Stanley and Charley Sears attended the Grain club picnic at Vermilion Saturday.

Little Miss Olive Jack left on Sunday with her grandmother, Mrs. Jack, for Clyde after a three week's holiday spent at the Schultz home.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, August 4th at the home of Mrs. A. J. Williams. A cordial invitation is extended to all.

KINGMAN

Rev. Milo Stutzman, Mr. Ezra Stauffer, Mrs. A. Wideman and Miss Malinda Dettwiler are attending the Mennonite Conference at Guernsey, Saskatchewan.

Mr. and Mrs. Donald visited at the Fenwick home last Sunday afternoon.

Mr. Thor Horte and family were at Pigeon Lake for an outing all of last week.

Miss Margaret Asp has returned home to Wetaskiwin after visiting at the Alec Asp home for two weeks.

Mrs. Betsey Severson and sons, Edward and Leonard have gone home to Perryvale after visiting her sister Miss L. Thompson for two weeks.

Miss Esther Wideman is assisting Mrs. Norman Wideman with the housework. The baby has been quite ill but is better again.

Mrs. Frank Hardin and daughters Martha and Hazel are vacationing at Boyle.

Mr. Alec Asp, Herbert and Andrew Johnson drove to Edmonton last Friday.

Mr. and Mrs. Oliver Thompson and Mr. and Mrs. Norman Wideman were Edmonton visitors last Saturday.

Rev. Hoverstein and Mrs. Hoverstein visited at the W. Christensen home last Sunday afternoon.

Mr. Holmsten called on his friends at Kingman over the week end.

Mr. and Mrs. Amos Hostettler and son Arnold visited at Mr. Dettwiler's last Wednesday.

Mr. Ole Bartness was in town last Thursday visiting Albin Anderson.

Mr. McKellar of Edmonton is taking Mr. Hutson's place at the Searle elevator while he is on his vacation.

LOCAL & PERSONAL

Dr. and Mrs. C. W. Knaggs, Miss Mildred Knaggs and Mr. Charles Knaggs of Detroit, Michigan, are visiting at the Secord home. Mrs. Knaggs is a sister of Mrs. Secord.

Mrs. M. L. Anderson of Howick and two daughters, Olive and Mrs. Irwin Orr of Montreal are visiting at the Johnston Ferguson home here. Mrs. Anderson is Mrs. Ferguson's sister and with her daughters accompanied Mr. and Mrs. Ferguson on their recent trip to the coast.

Rev. and Mrs. D. K. Allan returned from their holiday on Wednesday afternoon.

The United Church Service will be held at Ketchamoot, Lakeshore, Tofield, as usual on Sunday, Aug. 1st.

Mr. and Mrs. O. Letourneau and son Harry and Mrs. Jack Letourneau visited Calgary from Sunday to Wednesday. Harry was returning to his work in the stock yards there after spending a holiday at home.

Mr. and Mrs. H. Hicks and family of Edmonton visited at the E. Hicks home here on Sunday, Henry and Edward remaining throughout the week as guests at the McCarth home.

Blake Clutterham and Reg McCarthy returned from their holiday trip to Jasper.

Mr. and Mrs. Armstrong of California, U.S.A. are visiting at the F. Griswold home. Mrs. Armstrong is a daughter of Mr. and Mrs. Griswold.

Miss Isabel Robinson who is attending summer school at Edmonton was home for the week end.

Mrs. Firth, Gwenn and Pat returned home after a holiday spent at Pigeon Lake.

Mr. and Mrs. N. Scott are away on a holiday.

Graham Allan returned from a trip to Edmonton, Westlock, Leduc, etc.

Mr and Mrs. F. McHeffey returned from a stay at Okotoks where they visited with Mr. and Mrs. Murray McHeffey.

We slipped a cog last week when we omitted to mention the excellent showing made by the Tofield (Lakeshore) basketball team at Edmonton during fair week. They won their first two games, creating a surprise by defeating, we believe, Lloydminster in their second game. Playing their third game within a short time Tofield went down to defeat to the fast stepping Mundare crew. Without very much in the way of encouragement, the Tofield (Lakeshore) team have played the game for several years and have shown steady improvement and it is a source of pleasure to see them doing so well when playing in a provincial tournament.

Born:—To Mr. and Mrs. J. W. Gray on July 26th, a son.

To be visited by a group of charming nurses from the Royal Alexandra Hospital, Edmonton, was the pleasant experience of Mah Sam and Mah Joe of the Club Cafe. You see, Mah Sam and Mah Joe are old friends of the nurses, they having been cooks at the Royal Alexandra Hospital for quite a number of years. Mah Sam was there for 25 years and Mah Joe for 14 years. They left there to go into business at Tofield.

A picnic was held at the Maciborski farm on Sunday last, sponsored by the Greek Catholic Church. Games were played and a social time spent.

Due to the rain in the morning it was decided to have a public chicken supper at the Institute instead of a garden party.

Mrs. Stimson and children and Miss Olwen Reever and brother Ewart are at Lakeview camping for a week.

FIND $3,000,000 CACHE OF GOLD

PANAMA, July 21.—Investigating committee headed by the governor of Chiriqui province Wednesday confirmed discovery of a $3,000,000 treasure in gold ingots hidden for centuries in tunnels along the Piedra Candela river.

Gaston Johannes Van Stock, a French prospector, reported the discovery. Van Stock ceded half the value of his find to the central government as Panama laws require. It was believed the find was part of the gold from "La Estrella" mine which was worked by the early Spanish conquistadors until they were wiped out by attacking Indians.

SEWING WANTED—Anyone desiring sewing done, please get in touch with me.—Mrs. Jack Letourneau.

Relief Will Not Be Given to Outsiders

Any families moving by relief assistance into Alberta must return to Saskatchewan as assistance will not be available in Alberta until such time as the government of Saskatchewan makes arrangements with Alberta, that will be satisfactory to both provinces, according to an announcement made on Thursday by Premier William Aberhart.

As there have already been a considerable number of families arrive from Saskatchewan, many of whom are destitute, I feel it necessary to give some publicity through the press bringing this decision to the attention of those concerned," said the Premier.

Continuing, in commenting on the situation, the Premier declared that many requests are being received by the department of agriculture, the department of municipal affairs and the bureau of relief, requesting the province to give permission for Saskatchewan residents to move to Alberta under the various relief projects. The majority of these people have been receiving relief in Saskatchewan as well as fodder, seed grain and other agricultural assistance.

"Already we have notified the Premier of Saskatchewan objecting to his government moving to Alberta people who were receiving relief but advised him that we were quite prepared to enter into negotiations with a view to making some satisfactory agreement."

L.C.C. NEWS

The meeting of the L.C.C. for the month of July was held at the home of Mrs. Frank Kortzman. Thirteen members were present, also two guests, not forgetting to mention the youngsters which numbered eleven, including two sets of twins.

First Aid Hints were given in answer to the roll call and some very brilliant ideas were passed around. The meeting was a discussion of the barn dance and the wiener roast, yet to come, which will be held at the home of Mrs. W. Glenn on Wednesday night, August 11. The next meeting will be held at the home of Mrs. Joe Brown. Every member will bring a guest to this meeting. Roll call to be answered with Canning Hints.

E. W. ROGERS

The Wonder of the Beaver Builders

BY V. NORTHCOTE-MARSH IN FOREST AND OUTDOORS

THE beaver stands alone in the animal world as a builder, and sets an example to his brothers and to man as a co-operator; for his life is spent in planning for the welfare of the community in which he lives, and last but not least man can learn even yet something of that never fully conquered art—sociability.

The beaver's dam [illegible] found in alder and [illegible] swamps, where it is [illegible] thing for them to [illegible] eight dams from [illegible] in order [illegible] deep enough to [illegible] requirements. There [illegible] this wonderful [illegible] for they [illegible] the dams their greatest [illegible]fulness, [illegible] of their canal system they display an ingenuity [illegible] the least masterful.

There has [illegible] the [illegible] these dams are constructed [illegible] planned, who [illegible] works independently or if [illegible] operate when [illegible] operations and how they [illegible] generally [illegible] work [illegible] and under [illegible] and one [illegible] the architect and genius of the engineer.

As [illegible] dam the water [illegible] exactly [illegible] with a curve [illegible] whereas the former [illegible] used [illegible] knowledge gained [illegible] animal life. [illegible] concrete form [illegible] long before [illegible] existence, the [illegible] beavers had been [illegible] countless ages. The beaver dam is stronger than a mud dam, [illegible] capable of resisting greater rushes of water owing to [illegible] shores of a stream or pool, because the water is sufficiently deep for [illegible] thickness. The entrances [illegible] (there are [illegible]) are under water. The size of the house depends to a degree upon the number of beavers inhabiting it.

Many beavers travel during the summer months, following streams, but when fall comes the various families meet and remain together till the following spring.

Towards the beginning of September the [illegible] and young [illegible] repairing the dams and [illegible] food and cutting and felling trees.

The [illegible] work [illegible] is cutting and felling trees, and the work is undertaken by the animals usually in pairs, who as a rule work in turns, alternately keeping a lookout for enemies. When the tree at last begins to give, the beaver will stop operations to make certain [illegible] direction it will fall in order that he can be sure of a safe get-away when it starts to go. The gnawing is then combined till the tree starts to fall, then the beaver [illegible] into the water where he remains a [illegible] time fearing the noise has reached the ears of his enemies.

If the tree does not fall in the required direction and on land as is often the case, it becomes necessary that it be cut into sections in order to move it; but should it fall directly into the water it is removed in lengths to the den as a rule.

Food consists of saplings and small trees, which are felled, cut into sections, removed and sunk at the entrance of their house. How this sinking of wood is accomplished seems to be a mystery. Still during the winter months piece by piece is brought into the house, the bark eaten and then the peeled pole once more taken outside.

The canal construction which the beaver undertakes is yet another wonderful piece of engineering. Skill and the amount of work entailed almost unbelievable. They excavate these canals from one stream to another to a depth anywhere from [illegible] to [illegible] feet, and varying in width from [illegible] to four feet, their length may be anywhere from fifty to over two hundred feet and every particle of earth removed, sometimes used for repair work in plastering, dam or house, between chin and forepaws.

The beaver lodges or huts as they are called, are anywhere from three to six feet in thickness somewhat broader at the base, having the general appearance of a large bee hive. They are constructed of poles, stones, sticks and twigs, cemented together with mud in the same way the dams are made. Inside these dwellings are [illegible] cells, plastered likewise and worn smooth by continued tramping of feet, and lined with dry grass round the outside. It is in one of these known as the nursery that the young beavers are born and use as a play ground.

Yet another skilled engineer is the muskrat. His dwelling is dome-shaped and rises two to five feet above the level of the water, constructed of dry grass and weeds, plastered and put together by mud and clay. [illegible] a large cell with several smaller ones surrounding which are used as storerooms for the winter's supply of food, tender roots, bark and the like. The entrance is [illegible] the water. The muskrats found [illegible] small rivers or streams do not [illegible] houses, but live in the banks, with their entrances under water, [illegible]

WHEN BEAVER WAS BANKER

BY WM. MACMILLAN IN FOREST AND OUTDOORS

THE increasing scarcity of beavers, coupled with the amazing improvements effected in their curing and shearing, brings the little brown pelts into public notice again.

In the raw, beavers don't look so muchy much. They're horribly messy in the raw to begin with, and are a positive sight in their long fur coats. The magic wand of the dresser-chemist changes all that, fortunately, and transforms them into things of beauty and appeal.

[illegible] 1626, the Indians plucked [illegible] beaver skins by what might be [illegible] "personal friction." The inner [illegible] of the pelts was scraped and rubbed with the marrow of certain animals. They were then sewn together, five to eight of them into robes [illegible] worn next to the body. Fifteen months of assiduous wear thoroughly and effectively caused the disappearance of the objectional long hairs—[illegible] what was nothing more or [illegible] plucked beaver.

It's a far cry from this rather [illegible] method to the highly efficient processes in vogue at the present time. Today, not only are the [illegible] plucked but the leather shaved and the fur sheared close, altering the appearance of the finished [illegible] with [illegible] beaver pelts have gone up several notches in the [illegible] of fur-minded women the world over.

[illegible] really nothing new about [illegible] beavers themselves, of course; [illegible] are as old as the hills, disappearing and reappearing in the marts [illegible] with the constantly revolving cycles of fashion.

[illegible] feather-weight treatments [illegible] and abetted by this clever [illegible], has given the fur an impetus though that will probably keep it in the public eye for some time to come.

This fuss about the brown pelts started way back in 1536, when the [illegible] presented Jacques Cartier with the new world's first item of [illegible], a small portion of beaver skins.

What the First Citizen of St. Malo brought back to France with him was really nothing more than a sample. The real ambassador of export and commerce was the indomitable Champlain, who despatched a whole shipload of beaver skins to France in the year 1603.

The collection of beaver skins started in real earnest then. And in 1742 which is quite a long time later, the English forwarded some hundred and thirty thousand beaver skins from York Factory.

The little brown pelts seem to exert a strange and inexplicable influence on the men and women of the day, to weave some mystic spell about them, because the French people virtually went beaver-mad after that, bidding furiously against each other for the privilege of buying them.

Then came the eventful days of 1675, when the price of beaver was fixed by law and the man buying them was obliged by agreement, to pay a stipulated price for all skins and sell them at an equally rigid figure.

Later, when the skins were bought by weight, some amusing, though fraudulent, practices prevailed. It wasn't much of a trick, for instance, to keep a skin in a damp cellar so that it would acquire weight or even drag the fur through sand for the same purpose.

Every conceivable thing seemed to affect the prices of the skins—crownings, abdications, revolutions, wars and rumours of wars, treaties and expirations. Sometimes too, there were too many skins on the home market. And sometimes too few.

There were times for instance, when the French traders despaired of retaining their hold on the Indians, complaining bitterly of the better ships owned by their English rivals and the superiority of their trade goods.

In order to get in as much trading as possible criminals were granted amnesty and allowed to trade with the savages. And even soldiers of the different forts, at one time, were encouraged to barter.

The nemesis of supply and demand hung over the commerce with the same pall as it does now. When France had imported more of the pelts than she could comfortably handle great quantities were re-exported to Russia.

In those days a man's beaver hat was really made of beaver fur, and [illegible] trade absorbed a lot of skins. It was an acknowledged fact for instance, that La Rochelle made the best of these head pieces. Indeed, so staunch and glossy were they after they were, having been worn by the dandies of the day, they were filled with gum, so as to cover their defects and sold to Spain. But that, if you please, wasn't the end of them by any means. Back they came again, to be reblocked into smaller shapes, this time, and sent to Lisbon. Later, believe it or not, they were collected once more and exported to the Gold Coast.

In those mad years of 1918 and 1919, when prices were skyrocketing, the choicest beaver skins, known to the trade as blankets, reached a new all time high of sixty dollars apiece. Later, of course, they plumbed the depths. And while they aren't worth even half of sixty dollars at present, everything points to a fresh run on beaver.

WORLD OF WHEAT

By H. G. L. Strange, Director, "Crop Testing Plan".

"The desert shall rejoice, and blossom as the rose." Isaiah 35-1

Comforting at these times are these words from the Book of Isaiah, and they are reassuring too.

Some are telling us that a large part of the West is now a desert, and will never grow good crops again. These good people, I believe, are mistaken, for the history of our Prairies, it seems, reveals clearly that years of drought are, in the end, succeeded by years of good rainfall, and that on the average, over a long term, sufficient rain falls to produce profitable wheat crops, at least on 20 million of the 24 million acres now in wheat on the Prairies.

It is true, of course, that periods of drought arrive. To tide over these we must conserve our resources in the wet years.

There are, however, 4 million acres on our Southern Prairies where insufficient rain falls, on the average, to produce wheat profitably. This [illegible] however, even in the driest years would grow grass that in turn could produce cattle and sheep profitably.

Presently then, and provided that the land is put to proper use, we may be certain, as we are assured by the Book of Isaiah, that once again "The desert will rejoice and blossom as the rose."

The following factors have tended to raise price:

Small Argentine and Danubian shipments; Rust, high temperatures and grasshoppers prevalent in U.S. Northwest; Seeding is late in Argentina; European political situation still very unsettled. Pessimistic grain reports from Germany with large deficiency mentioned. Considerable rust infection in Manitoba.

Following factors have tended to lower price: Broomhall calculates Northern Hemisphere wheat crop ex-Russia and China will be 272 million bushels greater than last year—[illegible] in Australia, Russia, Argentine and Western Canada—Russia offers barley for sale—World demand for export very disappointing, chiefly on account of deficiency of foreign exchange— Italy's almond production large.

Notwithstanding safety devices and cautionary signals, people continue to take chances and disregard safety, a practice that is deplored by every careful driver.

WARN DRIVERS OF DANGERS AT LEVEL CROSSINGS

Warning to motorists of dangerous practices at level crossings where so many serious accidents occur each month, is given in a report issued by the Board of Railway Commissioners for Canada.

Making an appeal to press and public to educate motorists to be careful at crossings, the board's report says in part: "If accidents are to be avoided, the sane motorist must educate the culpably negligent motorists."

Since last fall, no less than 312 instances of dangerous practices and accidents at level crossings were reported by the C.P.R. and the C.N.R.

Of this total, 117 were instances of cars being driven across the tracks in front of engines or trains, regardless of stop signal or bells ringing. In 2[illegible] cases, the motor car was driven into the side of the railway engine, train or track motor.

"Every paper should make a strong appeal to the motoring public to use every precaution before crossing railway tracks," says an official of the Alberta Motor Association. "In Alberta, as in other provinces, there are many of these accidents and the number is on the increase.

85 HORSEPOWER . . .
112¼-INCH WHEELBASE!

Owners Report 25 and More Miles Per Gallon

CHEVROLET is *big* in size—it's a full 112¼-inch wheelbase car. It's *big* in power with that smooth, lively Valve-in-Head engine packing full 85 horsepower under the hood! Yet it costs you less for gas, less for oil and less for upkeep than any other car in its class!

"Better than 20 miles to the gallon of gas in heavy traffic," report taxi drivers. "Up to 30 miles per gallon," say travelling salesmen who ride the highways day in and day out.

Anyone who says you have to pay big-car prices to enjoy fine-car performance —fine-car roominess— fine-car *pride*—certainly hasn't sat behind the wheel of *The Only Complete Low-Priced Car!* Enjoy that experience for yourself, today. Once you drive a Chevrolet, you'll never be satisfied with less than Chevrolet value for your money!

UNISTEEL TURRET TOP BODIES BY FISHER . . . Combining All-Steel safety with silence. Wider and roomier. Safety glass.

PERFECTED HYDRAULIC BRAKES . . . Recognized everywhere as safest and smoothest.

VALVE-IN-HEAD High-Compression Engine . . .

The heart of Chevrolet dependability—economy—and brilliant performance.

FISHER NO-DRAFT VENTILATION . . . Ends drafts and windshield "fogging". Enables you to "scoop in" fresh air on hot days.

IMPROVED [illegible] . . . On all Master De Luxe Models

EXPERTS—

TWO YEARS ago a government was elected in the province of Alberta to introduce a new economic order. Despite the vigorous protests of one section of the people that the proposals so confidently made, if put into effect, would not work, there were enough voters who believed the proposals would work, to elect a government.

From that time on the population of the province have been treated to a number of delightful surprises, among which are included, the engaging of Mr. Magor, sales tax, script, covenants, and road schemes. Dissention within the ranks of the members of the government added interest to the two year period, but this could hardly be classed as a surprise—like the increase in taxation, it was inevitable. Failing to make a real start in bringing about the establishment of a new economic order itself, the government sought the aid of an expert. Mr. Hargreaves could not make the gears mesh properly and left the province somewhat in a huff. Under pressure from within and without, and apparently determined to bring about their new economic order, the government then appointed a special board, which, after the chairman had visited England, decided to place its trust in experts, and, we have at the present time, Mr. Powell and Mr. Byrne with us. Now, there seems to be no question as to these gentlemen being experts. Certainly from the course they have taken they can be accredited with Napoleonic genius. Who but those inspired by genius would have hit upon the plan of making the enemy supply the commissariat? Anyway the letter and supplementary notes from the government to the bankers have taught us something. We have heard a great deal about money and credit flowing out of a fountain pen, which statement in a detached way is quite true, but it evidently makes a vast difference who owns the fountain pen. Many individuals own one, the government could buy them by the thousand, but apparently to make this new economic order a reality, it must be a bank fountain pen. A peculiar difficulty with a humorous twist presents itself here, because as a class, bankers do not favor fountain pens, being very suspicious of anything that might possibly run dry.

Perhaps, having reached this stage, the idea of a new economic order for Alberta will vanish—we hope not—certainly we do not expect much change in the policy of the banks, they made no rash promises and therefore cannot be held responsible for anything, except perhaps "a sound banking policy," the interpretation of which statement they choose to make.

But a new economic order does not necessarily mean a condition of affairs where life is a continual bed of roses and where money and credit can be had for the taking, like air. Yet strangely enough, we consider the dividend idea the only pearl in the suggested new order. The **paying** of a dividend, we believe is a good idea, and is relatively simple, the difficult part is for a government first to collect it. If a satisfactory and equitable form of taxation can be worked out, the paying of a dividend would automatically wipe out a lot of our present provincial and municipal economic troubles.

But apart from such far fetched schemes as state dividends there are many things in this province waiting to be done, no one of which perhaps could be classed as spectacular, but all of which in the aggregate would tend to bring about a new order. We have in mind just now some form of health insurance whereby individuals and families were not financially crippled when misfortune in the shape of sickness came upon them. If we were going to engage experts to work in this province we would not go to London for them, but would choose from among the cleverest of our own people and say to them, "you know conditions here, can a sensible scheme of provincial health insurance be devised? If so, go ahead and make your report." Certainly a rational health insurance scheme is needed.

And then there is the idea of some form of crop insurance, or in other words, what is known in the United States as the ever normal granary. Here is a problem for experts to tackle. As long as all the hazards the agriculturalist has to take follow in their turn, and as long as price fluctuations occur (and there is no sign that either will cease) just so long will there be a series of "good times" and "bad times" in an agricultural community. Here is a problem for experts to tackle with a view to evening out the high periods of prosperity and low periods of depression. Again the experts required should be taken from our own people who have knowledge of our problems and understand our temperament.

"In Other Words"

The foll swoing was the verdict by an Iowa jury in a suit against a railroad company:

"If the train had run as it should have run; if the bell had rung as it should have rung; if the whistle had blowed as it should have blew, both of which it did neither, the cow would not have been injured when she was killed."

RANGE FOR PULLETS

(Experimental Farms Note)

Results that may be obtained with poultry by following the very best methtods of feeding and management will be lessened to a great extent unless sanitary conditions on the farm are given careful attention. Poultry raisers to be successful must follow some system of sanitation. The greatest losses among poultry are caused by intestinal parasites and as the most serious damage from the worm menace occurs in young birds, special percautioms should be taken to protect the young. The importance of keeping the pullets on ground free from infection and away from [illegible] of the older birds, which are often carriers of parasites, cannot be over emphasized.

Both experimental work and actual practice show the value of yard rotation in the rearing and maintaining of stock free from intestinal parasites. At the Dominion Experimental Station, Lacombe, Alberta, the ground used for rearing the pullets is divided into two sections of about equal size. While the stock ranges on one section the remaining ground is reconditioned, cultivated and sown to a succulent green crop for the following year. By running a two-year crop rotation the land is free of poultry at least every other year. The feed hoppers and watering equipment are moved to new positions at frequent intervals during the summer. This practice induces the pullets to spread over the entire field instead of congregating on one spot and killing out the grass. Care is taken never to scatter droppings from fowl where the pullets will be running, as this might expose them to infection with harmful bacteria or infestation with parasites.

The cockerels are separated from the pullets as soon as they can be distinguished, regardless of whether or not they are troublesome. The cockerels to be retained for the selection of breeders are put in separate runs, spring-seeded to a mixture of two bushels of oats and one of fall rye, in range roosting coops with a caragana hedge for shade, and grown to maturity. The birds kept for broilers are put in more or less confined quarters and fed a finishing ration. The pullets have access to an alfalfa field which provides succulent [illegible] all summer. The liberal supply of green feed provided by the [illegible] alfalfa plants provides the [illegible] with the required succulence [illegible] ration and tends to keep them in better physical condition. Free range on clean soil and plenty of green feed and shade are essential for good growth.

Pullets suffer greatly from heat and must be provided with shade of some kind if best results are to be secured. If no green shade is available shelter can be built from boards supported on uprights, and sloped so to give the greatest amount of shade during the day. For late in the season a field of corn or sunflowers gives suitable shade.

CLAIMS CAR TAXES DON'T KEEP ROADS

CALGARY, July 21.—Alberta tax on cars and gasoline does not pay for the maintenance of roads in the province, and therefore people who do not operate cars would be forced to pay, through their taxes, part of the cost of any hard-surfaced road program, J. C. Landeryou, S.C. member of parliament for Calgary East, said in an address Tuesday night to a Social Credit meeting here.

He declared "criticism" of the Alberta government road policy is unfair and is the babbling of politicians to confuse the issue." He said an impression had grown that the Alberta road policy is wrong and responsible for accidents.

He blamed the federal government for bringing thousands of settlers into the province seeing them settle far from established means of communication and then expecting the provincial government to build roads to them.

Referring to the forthcoming commission on federal-provincial finance arrangements, Mr. Landeryou said "If we get a fair and unbiased report from the royal commission great advantages to western Canada should follow."

Public accounts for the year ending March 31, 1936, show revenue from fuel oil tax and motor vehicles was $3,646,884. In the same fiscal year there was expended on maintenance of main highways, district and local roads, bridges and ferries $758,784.

Budget as passed last month provided for estimated revenue from gasoline tax and motor licenses of $3,891,700 with expenditures for highway maintenance in the fiscal year 1937-38 of $1,375,166.

Why of Course Not!

Mr. Bragger: "Oh, yes indeed, my wife and I do sometimes disagree."

Mrs. Bragger: "Why, Henry, we don't either!"

VEGREVILLE YOUTH FAILS JOIN NAVY

BOSTON, July 27.—Steve Czech of Vegreville, Alta., will be back to Canada Tuesday as deported without accomplishing his ambition to join the British navy. The 16-year-old youth who reached Halifax more than six weeks ago stowed away aboard the United States freighter Liberty and was discovered at sea. When the Liberty put in at London he insisted he was a Canadian citizen and asked British authorities to allow him to come ashore to join the navy. This they wouldn't permit as he had no proof of his citizenship.

The freighter moved on to Hull, Leith, Hamburg, and Bremen and the stowaway saw the "world" from aboard ship, until the Liberty docked here Sunday. He was handed over to the immigration authorities who tried his case Monday and ordered him deported. He will go back to Halifax aboard the freighter City of Flint.

VEGREVILLE, July 27.— Steve Czech, reporter deported from Boston, left his Vegreville home March 1 to join the Canadian navy. He wrote from Ottawa that he had been accepted and was being sent to Halifax but later wrote that he had failed to pass the medical examination. He was a high school student here and is the son of W. Czech.

$1-A-DAY WORKER OXFORD GRADUATE

BLYTHE, Cal., July 27.—A $1-a-day county welfare worker was revealed [illegible] death Monday as Neal A[illegible] [illegible] former prominent architect and graduate of Oxford university.

Using the name Samuel Adams [illegible] the 87-year-old Austin had chopped cotton and done other field work for $1 a day. He claimed he had no relatives.

E. G. Odom who said he was Austin's nephew a Southern Railway official came to arrange for burial. He said his uncle had disappeared for no reason more than [illegible] years ago.

NOTED ECONOMIST PRAIRIE ADVISER

Dr. Jacob Viner, noted economist on the staff of the University of Chicago, and Dr. Alvin Hansen, head of the department of economics at the University of Minnesota, have been retained by the governments of the three prairie provinces to act as consultants in the preparation of briefs for submission to the royal commission on taxation according to announcement Tuesday by Hon. Solon Low, provincial treasurer.

Mr. Low said that both consultants may be on the ground this summer and visit Edmonton in carrying on their work.

CITY URGED TO USE ALBERTA TAR SAND

Greater use of Alberta tar sands asphalt for sidewalks, street paving and cement patching in Edmonton, is urged by Thomas Draper, president of McMurray Asphaltum and Oil, Limited, in a letter to city council, will be discussed by a special civic committee.

Council Monday named Ald. McCreath, Ald. East and Ald. Clevely to meet Mr. Draper and city commissioners and deal with the proposal.

Several demonstration sidewalks laid at the exhibition grounds last year were reported to be standing up well. He said Alberta asphalt sands were best suited to climatic conditions here.

COLLIE DOG SWAM 7 MILES

PROVIDENCE, R.I. July 27. — A collie dog who could find his way home on the water as well as he could on land, swam seven and a half miles in Narragansett bay Sunday night and landed Monday at the Washington Park Yatch club 15 hours after he had been lost overboard from his master's boat.

The collie sailed Sunday afternoon [illegible] George [illegible] his master, and a party of friends. They went to Prudence island in the middle of the bay and were returning when the collie, a pet of the family for five years, was missed.

PLAN REORGANIZE "MUNICIPAL" BOARD

Reorganization of the Special Areas board for this province is planned, according to announcement Monday by Hon. Lucien Maynard, minister of municipal affairs.

The board is composed of O. S. Longman, field crops commissioner, A. Soutter, deputy minister of municipal affairs and W. Hewlett, chief collector of the provincial seed grain branch.

Mr. Maynard said the plan was to adopt a new set-up for this board so that the results would be more satisfactory.

There are five special areas in the province which are under the jurisdiction of the board, these including Berry Creek and Tiley East areas established some years ago.

All of the special areas are located in what is known as the drouth sections of the province. Through being administered by the provincial board, there has been a consolidation of municipalities in these areas.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

FUMIGATION

Not so many years ago, it was generally believed that whatever it was that caused the communicable disease was blown around in the air. For this reason, when such diseases occurred, a great deal of attention was given to the air of the rooms which were occupied by persons suffering from communicable diseases. Rooms were treated by burning sulphur by evaporating or spraying formaldehyde or other disinfectants. The idea behind such procedure was the need to sterilize the air.

We now know that malaria and yellow fever are not air-borne diseases. They are caused by the bite of certain types of mosquitoes which have previously fed on persons suffering from these diseases.

We also know that the germs causing the common communicable diseases die very quickly outside the human body. Their chance of temporary survival is fairly good if they are deposited in milk or other foods where they can remain moist. We do not include tuberculosis or smallpox in this statement for reasons, the discussion of which is not permitted by the space at our disposal.

[illegible] know that in the case of practically all the diseases, excluding [illegible] spread by water, milk and food, the communicable diseases are spread from person to person directly and not through inanimate objects. The germs of disease are carried by the droplets expelled by coughing, sneezing, spitting and loud talking. The spread of infection is accounted for by the taking in of these droplets by a second person.

Communicable diseases cannot be controlled by fumigation, by the sterilization of the air and of inanimate things. If a communicable disease occurs in a school room, the proper method of control is to attempt to find the individual responsible for the spread of the germs. The cause must be found and removed. The cause is always a person, not some school desk or blackboard. It is a waste of time and money to fumigate the room. It is money and time well spent to have the children examined in order to find the source of the infection.

During the course of a communicable disease, all body discharges should be carefully collected and disinfected, because these fresh discharges contain the germs in large numbers and so are dangerous. The patient is isolated to prevent others from coming in contact with his body discharges and secretions. If such care is taken, there is no danger. It is care during the course of the disease by such concurrent disinfection that is important. When the patient recovers and the secretions of his body are free of germs, there is no danger either to him or his surroundings, and there is certainly no value in fumigation.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

FINDS NOTE ANTEDATING CIVIL WAR

LOUGHEED, July 27.—Mr. F. P. Ash recently discovered among his possessions a very old letter, written by a relative in the States to his grandmother in Honiton, Devon, Eng., and, dated March 30, 1854. It carries in the upper left-hand corner of the envelope two black United States stamps with the head of Washington thereon at twelve cents each. It bore the mailing post mark of Delaware. In the same writing case Mr. Ash also discovered some porcupine quill pens, commonly used at that time and which still write quite well.

HALF MILLION BRITISH WORKERS GAIN MORE PAY

LONDON, July 27.—Half a million workers in Great Britain's engineering trades, hard-pressed with armament contracts today won an increase in wages, holidays with pay and increased overtime allowances.

The concessions from the employers were contained in what was believed to be one of the most important trade union agreements ever negotiated in Great Britain. The contract carries an assurance of uninterrupted fulfillment of the defence program free from labor troubles.

YATCHING CLASSIC STARTS SATURDAY

NEWPORT, R.I., July 27.— Endeavour II, Great Britain's blue-hulled Challenger for the long-lost America's cup will go out to the starting line for the first race off the Newport coast Saturday something of a dark horse.

When the fleets already gathering for the opening race of the four-out-of-seven series and the 16th renewal of the classic international yatching side, little was known of Endeavour II's capabilities.

Probably T. O. M. Sopwith, British aeroplane manufacturer and sportsman who financed the challenger, knows more about his new vessel than anybody. He has appeared satisfied but has disclosed little word.

"Why should I show my hand?" Sopwith invariably told reporters. "We have a job to do and we are doing it in our own way."

"We are quite satisfied with what we have done. We know Ranger is a good boat but we think we have a good boat too. Our men are fit. We have a good crew. I think it will be very good racing."

Against this, Harold S. Vanderbilt's Ranger, defending the cup the United States won in 1851, decisively defeated the last cup winner, Rainbow and Yankee and Enterprise in elimination trials. Ranger ranks as the fastest boat ever built in her class in the country.

Endeavour II, however, is generally regarded as considerably faster than her predecessor and sparring mate, Endeavour I, which lost in 1934 to Rainbow skippered by Vanderbilt.

WINNIPEG GIRL 19, RIDES, WALKS TO VANCOUVER

VANCOUVER, July 27. — A 19-year-old Winnipeg girl sat in a Y. W. C.A. hostel here today and told of her two-week journey from the prairie city by foot, freight train and automobile.

Olive Peters is looking for her father who left Winnipeg two years ago after the death of his wife. The tall, 67-year-old carpenter gave no hint of his destination, but he was on the Pacific coast in 1933 and Olive believes he had returned here.

"I just made up my mind I was going to find dad," Olive said today "and I just started out. At the start I took the wrong road and had to go back five miles. Then I got a lift and between walking and riding I reached Regina."

The same method of transportation, with an occasional span covered by freight carried her across the prairies which in some places were "like a desert all dry and burned up" to the British Columbia mountain town of Golden and on to Vancouver.

Her first call here was at the police station where "they could not have been nicer to me" she said. "They said they'd help me to find him if he were here."

After her father left Winnipeg Olive worked in the summers at a country club and in the winter did housework. While she is here looking for her father Y.W.C.A. officials will try to find her a temporary job.

Secretary-treasurer.

BROTHERS REUNITED IN EDMONTON AFTER LAPSE OF 35 YEARS

Reunion in Edmonton is the meeting between John Bitcon, member of the South African bowling team, and his brother Andrew Bitcon of Bawlf, Alta. For until the two met Wednesday on an Edmonton bound train just out of Wetaskiwin, they had not seen each other for 35 years.

Members of a large family that scattered to the four corners of the earth, the brothers didn't know each other when they came face to face yesterday. John, the elder, watched his brother Andrew enter the compartment where he had been sleeping and thought it was an attendant coming to serve tea.

"But it was natural that he wouldn't know me," said Andrew in an interview with a Bulletin reporter in his room in the Macdonald hotel Thursday morning "I was about the size of that one when John left to go to South Africa."—and he indicated the youngest of his family of eight, a blond and curly haired little lad who was playing Tarzan on the bedposts.

"We haven't seen each other since —but we almost did, once. John returned home for a visit in June 1911, but I left to come to Canada in May of that year so I just missed him by a week or so."

"When I heard he was coming here I wrote and told him I would board the train at Bawlf, but through an understanding made with other relatives he wasn't expecting to see me until reaching Vancouver. He was sleeping when I got on the train so I waited until I thought he had had enough before waking him up," said Andrew.

Incidently John must have been aroused fairly early because Andrew who is a farmer at Bawlf, believes in getting up at five o'clock

"Are there any other brothers or sisters in Canada," John was asked, and his blue Irish eyes, for he hails from Donaghadee, near Belfast, Ireland, twinkled as he replied

"Well, there will be seven of us, all brothers, meeting in Vancouver for a grand re-union on August 20th"

For More Than Thirty Years

For more than thirty years this farmer's company has been giving satisfaction to western farmers in handling their grain. During that time it has also been of great assistance in improving conditions under which farmers do business.

Legislature Moves Towards New Order

STATE CREDIT HOUSES TO BE ALLOWED TO FUNCTION AS PROVINCIAL FINANCIAL LINKS

Alberta legislature on Wednesday, in special session and in the presence of crowded galleries, dealt with some of the most momentous and far-reaching legislation that has ever been presented to the people of this province. Coupled with the introduction of the legislation was an announcement by Hon. Solon Low, provincial treasurer that Alberta's two per cent sales tax would be abolished or remitted on September 1 next.

Presence of the two emissaries of Major Clifford Hugh Douglas of London, namely G. F. Powell and L. D. Byrne had lent additional color to the session. Specially appointed by Major Douglas to come here and study and investigate the possibilities of Social Credit, the two technicians had been in constant touch with the Social Credit Board. Under their direction there had been prepared a letter to the banks, a confidential letter to members of the legislature and a series of explanatory notes on the letter to the banks, specially prepared for consumption by the members.

With the session called immediately on top of tremendous activity, interest was at a high peak.

The session opened on Tuesday, following a caucus all day Monday of Social Credit members.

On Tuesday, Hon. E. Solon Low, provincial treasurer introduced far-reaching pieces of legislation.

One bill was an amendment to the Treasury Department Act, which in effect, enables the government to deposit money in institutions other than chartered banks and thus, the government would be able to allow state credit houses to function as banks, if and when they are established.

Another bill was an amendment to the consolidated Social Credit Act passed at the last general session of the house. This bill provides for establishment of a temporary commission to administer Social Credit in the province until the permanent commission is established. It also provides for the Board to expend any monies appropriated for its use in any way it sees fit.

With decks thus cleared for action, the house went into session on Wednesday awaiting the main piece of legislation for which the session had been called.

Social Credit members caucused in the morning and after an hour out for lunch, met again at 1 p.m. and remained closeted until 2:30 p.m.

Much discussion took place in the legislative chamber before Hon. Solon Low introduced his bill to monetize the credit of the province and to license the banks and bank employees

EVERYTHING FOR THE BUILDING

AMISK CREEK

The hailstorm that went over here last Friday did all the harvesting and threshing for the farmers in a very short time, leaving practically nothing for the farmers. The gardens also were pretty well destroyed and the only hope now is that we may get some potatoes and some feed for the cattle.

A good number from here spent July 24th at Cooking Lake. All report a splendid time.

Mr. and Mrs. A. Patterson and Mr. and Mrs. C. Patterson left last Thursday for a motor trip to Harrisburg Lee-Park and other points. They expect to return Sunday evening.

Hilmar Moen left last Monday for Phillips where he will attend an elevator.

Mr. and Mrs. R. O. Berg and Lilly motored to the city on Tuesday of last week. While there they visited Mrs. N. Sand who is very ill at the Royal Alexandra Hospital. Lilly remained in Edmonton to visit for a week with her sister Ruby, and with Ellen Sand.

Mr. E. A. Moen and Hilmar and Charley Kallal motored to the city last Friday, returning the same evening.

Mr. and Mrs. C. Erickson and Mr. A. Erickson and Miss Magda Annabo were guests at the wedding reception held by Mr and Mrs. Sorenson near Poe, in honor of the newlyweds, Mr. and Mrs. L. Grossland. Mrs. L. Grossland is a sister of Mrs. C. Erickson.

Mr. and Mrs. Moen and family visited with the G. Sangstrom and E. Flatrie homes last Sunday.

The I. C. Olson family motored to Elk Island Park last Sunday

The farmers around here have been fixing the telephone line recently.

Mrs. P. O. Flaaten visited her sister-in-law at the Royal Alexandra hospital the first part of last week.

Thora Haugen underwent an operation for appendicitis recently. The last we heard she was getting along nicely. We hope for a speedy recovery.

LINDBROOK

A week or so ago the saying was "can't it ever rain?" now its "can't it ever quit," so what will you have? Anyway it gives us all a chance to get those odd jobs done, that probably never would get done if it wasn't for the rain.

The dance given by Mr. Gilbert Braaten in his new barn last week was very well attended despite the torrential rain of that evening. Everyone fortunate or brave enough to defy the weather to get there certainly deemed it worth the struggle; but as Gilbert says, seeing this one was so pleasing and that many didn't get there, he proposes to give another in the near future, thataboy, lets hope its fine.

Mr. and Mrs. A. Scott paid a visit to Mr. and Mrs. Gillies of Ardrossan last week.

Mr. John Woonacroft is building a house on his quarter near the elevator and hopes soon to be in residence there, having sold his other farm recently.

Mr. and Mrs. Evans, and Mrs. Bracegirdle and Miss. Star, Pansy, and Carol Bracegirdle and Master Bruce Best of Athabasca, returned home Saturday morning after a holiday spent with relatives at Govan, Sask. They motored there and back and they also have a few remarks re the Alberta highways.

LOCAL & PERSONAL

Mr. A. Kendall of Edmonton spent Monday with his Mother, Mrs. H. Kendall here.

Miss Ruth Paradis and Messrs Jim Duncan and Ray Payne of Edmonton were the guests of Anne Swift for the week end.

Mrs. Wilmore of Edson is spending some time visiting with her mother, Mrs. Kendall.

The town secretary is away on vacation and will return on or about August 16th. Mrs. Chapman and Mrs. Emery are accompanying him on a motor trip to the mountains.

Miss Jean Innis returned from Wetaskiwin after spending some time visiting with her friend Enid McLaughlin.

Miss L. Ross returned on Friday after a two month's motor trip to the U S A and Nova Scotia. She reports having had a wonderful trip

Mr. and Mrs. Bert Lovell and family and Miss Pat Burnett left on Saturday for a motor trip to Jasper

The Ladies Aid of the United Church wish to thank all those who made their garden party at the home of Mr. and Mrs. J. W. Cookson such a success.

Miss L. Thompson spent the week end visiting her parents at Leduc.

Mrs. Edith Thompson and daughters left for Donalda after visiting relatives and friends in Tofield. Mrs. Bertha Seale, Miriam and Jessie Munroe motored down with her.

Mr. and Mrs. Geo. Coatta and Doris left last week for a trip to Niagara Falls.

Mr. and Mrs. Armstrong of Livingstone, Calif. left on Monday after visiting with Mr. and Mrs. Griswold

Mr. W. O. Glover spent the week end in Edmonton

Miss Machtmes visited Tofield this week and returning from her holidays spent at Dawson Creek, B.C. She motored to her home at Strome on Sunday with her brother Mr. A. Machtmes.

Mr. and Mrs. Keith McIntosh spent a few days in Tofield visiting at the Murray home.

Miss Jean Napier of Edmonton is visiting at the M.C. Hammond home.

MENNONITE PLANS FOR COLONY FAIL

PEACE RIVER, Aug. 3—Unable to make arrangements for a Mennonite colony on land in the Fort Vermilion district, Jacob Wahl and family, the first-comers of a proposed influx of 300 families, have come back upstream from that district with six tons of settlers' effects and will go to some outside point in search of a new location.

A large band of Mennonites had planned to settle on and in the Fort Vermilion area that they hoped the government would grant them, and in return they proposed to make roads, build schools and develop other services without further government assistance. Negotiations with the government are understood however, to have been unsuccessful and efforts to secure land grants having failed, the plans to establish a colony are at an end.

GARDEN PARTY

On Wednesday evening of this week the United Church Ladies' Aid held their annual garden party at the home of Mr. and Mrs. J. W. Cookson. The ladies had prepared a splendid supper served at individual tables and a large number of town and country folk partook of the generous fare offered.

After supper the youngsters played games and those not so young played horse-shoes. Messrs Billman, McCauley, Burke and Haukedahl have the game down almost to a science—anyway they had plenty of fun and provided some for the spectators also. The event was quite a success socially and judging by the number present, we imagine financially

Destructive Hailstorm Hits Part of District

On Friday afternoon last, a destructive hailstorm swept across a large tract of country damaging many fields, completely wiping out some and partially damaging others. Right at Tofield a very heavy rain fell for a considerable time but there was only an occasional hail stone.

The storm apparently came in from the south between Dodds and Kingman and angled up in a north easterly direction as far as Vegreville and on east to the border. A branch of the storm went east toward Viking. The Bardo and Amisk Creek districts were hit hard, many suffering complete loss and others heavy losses. While the following list is not intended to be complete, it gives some idea of the severity of the damage done. Among those whose crops were badly damaged were:

Reubin Roth; Roy Roth; C. Rude; W. Stauffer, R. O. Berg, P. Flaaten, E. Erickson; W. Kallal; Tony Kallal; Hans Hills, Emil Rude; A. Annabo; E. Pearson; I. Lille; Jake Yoder; J[illegible] Yoder; L. Kauffman, Jake King; Simon Stalter; Ben Anderson; B[illegible] Berreclough., Joe Burkholder; N[illegible] King; Joe Voegtl[illegible], Mr. V[illegible] L[illegible]th, Dave Yoder, Henry Yoder; J[illegible] Brenneman, Dan Brenneman; Ti[illegible] Brenneman, Harvey Bre[illegible]; J B Stauffer, J [illegible] Stauffer; Ben Lauber; Dan Swartzendruber; John Zook; Alvin Leber[illegible]; Matt N[illegible], Mr. Johnson, A. Patterson, Ra[illegible] Olson; Ingman Olson; Einar M[illegible]

GARDEN PARTY CHANGED TO CHURCH SUPPER

Wednesday morning last the [illegible] of the Anglican Garden Party at the J. A. Robinson home heavy rain fell and a last minute decision was made to hold a supper in the Institute rooms. The ladies had [illegible] considerable edibles the keeping [illegible] of which would not permit postponing the entire event. Quite a number attended the supper and needless to say enjoyed it immensely

NOTEWORTH NOTES FROM THE VERMILION SCHOOL OF AGRICULTURE

The month of July has been a particularly busy one at the Vermilion School of Agriculture. Field days, short Courses and [illegible]. Meetings have brought over 1200 visitors and [illegible] Agricultural [illegible] Association, Short Course for School Fair winners, Short Course for Farm Men and Farm Women, Social Credit Picnic, Field Day for Junior Grain Clubs, District Convention of the Women's Institute and the Agricultural Society's Camp for Boys and Girls.

At the annual re-union of the V.S.A. Alumni there were present representatives of graduating classes of almost every year since 1916 and of nearly every district in central and northern Alberta. There have been some 900 graduates from the School since 1913 when it opened under the principalship of E. A. Howes, now Dean of Agriculture at the University of Alberta. Many of the graduates are now prosperous farmers in various districts of Alberta where their practices command respect throughout the community, while others have attained prominent positions in research and other activities related to [illegible] Agriculture.

Dr. W. H. Alexander, Dean of the Faculty of Arts and Science at the University of Alberta was principal speaker at the reunion banquet. In the course of his address Dr. Alexander commended the happy relation that exists between the School of Agriculture and the University and highly praised the work of the Faculty of Agriculture for the important part they take in the work and life of the University.

Chas. F. Kallal and Jos. T. Kallal, Tofield, were among those present at the Re-union.

[illegible] boys and girls who [illegible] highest [illegible] in local School Fairs [illegible] a one week Short Course at the School. Seventy boys and girls registered from various parts of central and northern Alberta, twelve of them coming from the Peace River country. Two weeks' activities included a study of various phases of agriculture and household economics with a good deal of time devoted to recreation and sports. Winners of the $75 scholarships were James Court, Daysland and Edith Miller, Fultonvale, while those given honourable mention were Donald Selrey, Dapp and Kenneth Haptist, Tofield, Mabel Cr[illegible], [illegible] and Rhoda Scott, Grand Prairie.

On their way home after the School Fair Short Course a group of about [illegible] had a stop-over in Edmonton and took the opportunity to see the sights. In the course of their travels [illegible] visited the Parliament Buildings, the Edmonton City Dairy and Borden Park. It was a happy reward for these boys and girls who got a great [illegible] of their many experiences and [illegible] most enthusiastic in [illegible] their appreciation of the [illegible].

Farm Women's Week again proved to be a popular occasion for rural [illegible] to take a brief holiday and enjoy the companionship of neighbour women from far and near while living in the dormitory. Registrations were received from districts as far west as Barrhead and east to Lloydminster. The programme arranged for them included practical hints in sewing, cooking, household administration and floriculture as well as a variety of recreational activities.

In response to a number of requests received last year, the School Staff arranged for a Farmers' Week to run concurrently with Farm Women's Week. A considerable number of farmers registered and took a keen interest in subjects discussed. Lectures and demonstrations in cereal crops, forage crops, soils, animal production and practical blacksmithing were included in the programme. It is expected that this course will become quite popular with farmers in the next few years as they become familiar with its nature.

Some 300 people attended a Field Day held at the School on July 24th for Junior Grain Club members. Mr. H. W. Scott, District Agriculturist at Camrose, brought a number of the Clubs which he is supervising in the Camrose district to meet with Junior clubs from the Vermilion district. Principal item on the programme was a visit to the grain and grass plots and a study of the different varieties of wheat. Several members of the Camrose Board of Trade helped supply transportation for the Juniors and took the opportunity to inspect facilities of the School for training young men and women.

WORLD OF WHEAT

By M. G. L. Strange, Director, "Crop Testing Plan".

Sir Charles Saunders is dead. His memory, and the fruits of his labor however, will live for uncountable years.

Aided by the efforts of his brother Percy, and of his father Dr. William Saunders, Sir Charles, in 1907 originated the famous Marquis wheat. Marquis came at an opportune time when the western wheat area was expanding to the north, so that that sterling variety, Red Fife was becoming frosted in the late summer. Marquis, a week earlier than Red Fife, and of the same high quality has, it is computed added not far short of one hundred million dollars to the pockets of Canadian and American farmers.

Marquis is equally noted as a parent for breeding purposes. The famous variety Reward, the rust-resistant Thatcher, and other valuable sorts, being direct offsprings from it.

Sir Charles was one of those true agricultural scientists, of which Canada is fortunate in having many in her service who indenture their lives to the improvement of agriculture, to the increasing of the farmer's welfare and to making available to the people of the world a plentitude of food. Millions of people, the world over, who have never heard his name are better off because Charles Saunders lived and laboured.

Following factors have tended to raise price: Argentine conditions dry seeding delayed—Expect Italy will make substantial wheat imports—Prairie Provinces wheat crop estimated at 100 million—Europe buys considerable quantity U.S. wheat—Increasing complaints of dryness in Australia, recent rains inadequate—Germany making large corn imports—Government to control all wheat and rye crops—Roumanian corn crop [illegible] best since 1929. Corn exports forbidden.

Following factors have tended to lower price: Export sizable U.S. wheat export surplus—Harvest commences in U.S. northwest—Brazil legislates to increase wheat production—Conditions generally favourable for growth of U.S. corn crop—Japanese rice stocks above last year—Mexican west coast vegetable exports increase.

CANADIAN RECORD IN GOLD EXPECTED

WINNIPEG, Aug 2.—Gold production in Canada for 1937 heads toward an all-time record and from present indications is likely to reach $145,000,000 Hon. T. A. Crerar, federal minister of mines and resources declared here Sunday.

New mines in eastern Canada and increased output from those mines which started producing in the past 18 months are expected to put the 1937 gold yield considerably above the $131,000,000 last year he said.

Most recent finds of promise were those in the Great Slave lake area in the North West Territories, north of Alberta, Mr. Crerar stated.

Samples from surface exploration and limited drilling in the Great Slave lake fields have graded well and the discovery was likely to establish the area as one of the substantial producing districts in Canada, he added.

FIRST SURVEY FLIGHT ACROSS CANADA IS REPORTED SUCCESSFUL

MONTREAL, Que. August 2—Having completed his initial survey flight of 2,350 miles from Vancouver to Montreal, examining landing fields and other facilities, Philip G. Johnson, vice-president in charge of operations, conferred here with the President and Board of Directors of Trans-Canada Air Lines.

At the close of the meeting, it was stated that discussion took place relative to the existing airway facilities which have been provided by he Department of Transport and by the various civic authorities, and that plans were studied for the additional facilities which will be necessary before scheduled air transport can be begun. General plans were also discussed for the initiation of a training programme for pilots, co-pilots and ground personnel, to be embarked upon as soon as the necessary arrangements can be made. As a commencement, this training of personnel, every effort will be made to co-operate with the authorities who are working towards the completion of the necessary aids to air navigation along the air.

Interviewed regarding the survey flight from Vancouver to Montreal, Mr. Johnston stated that throughout the entire trip he received co-operation from provincial, civic and other officials and from citizens in general. On the flight stops were made at Princetown; Oliver; Grand Forks and Cranbrook in British Columbia where airway aids under construction and contemplated were inspected or discussed. Similar stops were made at Edmonton, Calgary; Lethbridge; and Medicine Hat in Alberta; Regina; Saskatoon; Winnipeg; Manitoba; Wagaming, Gilles; Emsdale, Toronto and Ottawa in Ontario; and Montreal. He expressed deep gratification for the co-operation and assistance rendered him during the initial inspection of the air route by Squadron-Leader J. H. Tudhope and A. D. MacLean of the Department of Transport. Mr. Johnson plans to continue his survey flights to other sections of Canada, including the Maritime Provinces.

"The extent of the proposed Trans-Canada service is so great," said Mr. Johnson, "that careful planning and preparation in all details must be made befor actual service can be begun. A policy of making haste slowly will be followed. I found an expectation existing occasionally that a start in commercial flights would be made almost immediately. Such is not the case, as it will be necessary to first complete the training programme of personnel as well as to acquire and prepare the necessary flying equipment, radio installations and other ground facilities as are required by the Act creating Trans Canada Air Lines.

"Of paramount necessity is a system of weather forecasting designed for the peculiar needs of scheduled air transportation," concluded Mr. Johnson. "This service must be made available before regular scheduled air service can be commenced."

STOLE THOUSANDS TO RELIEVE POOR

LONDON—Charles Barwick, 32-year-old burglar, ex-convict, and philanthropist, was mourned by hundreds of children and missed by their mothers recently in Hackney, E. Burglary and housebreaking were his work; helping others was his hobby.

He was a thorn in the side of Scotland Yard—and a source of happiness to the poor of his district. Police were always after him—he died from an appendicitis operation.

As soon as anyone in Hackney was in need of help, Barwick came to the rescue. An appeal for a dying child was enough to send him off on one of his thieving escapades.

He would make a haul—usually a big one—and his first care would be to see that the child had every comfort. His acts of charity were unostentatious. He would hear of an appeal steal away and return to see that the sufferers were provided with every need.

At his funeral every class of the underworld—east end and west end —was represented. They all felt they had lost a friend.

The police who directed the funeral traffic knew that a charitable foe was passing.

He stole thousands —gave away a small fortune. So they mourn him—Hackney's "Robin Hood."

DREAM OF DEATH COMES TRUE

EDINBURGH Aug. 2—Because her seven-year-old son told her he had dreamed his brother had been drowned Mrs. James Warrington rushed to Granton where the brother was camping. She was met by a women who told her police "have just taken two boys' bodies from the water." One was nine-year-old Robert Warrington, her son.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MEASLES

Measles is a child-killer. This disease which so many regard as of no seriousness and which is thought of as a necessary evil accompanied by certain inconveniences is, as a matter of fact, a serious menace to child life, and because of the number of children it kills, it ranks high amongst those diseases that take life in early childhood.

In one year there occurred in Canada 803 deaths from Measles, of which 261 were children under one year of age. Most deaths from measles occur under five years of age. The disease attacks especially those under three years. The older the child the better chance he has of recovery.

Measles is a communicable disease. It is passed from the sick to the well. It is very easily spread and practically all who are exposed, contract the disease unless they have been protected by a previous attack.

It is a mistaken idea that every child must have measles. It is criminal to expose children to measles, because to do so is to risk their lives.

Measles is serious not only because it kills, but because it seems to prepare the ground for other diseases. It is the pneumonia following measles which makes it so dangerous. Tuberculosis may become active after measles. Concerning the control of measles, it must be remembered that measles is most contagious during the days before the rash appears. For this reason it is advised that every child with a cold in the head be kept away from other children, not only to prevent the spread of colds, but because the cold may be the first stage, the most contagious stage of measles.

Part of the protection of child life is the protection of the child from measles.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto will be answered personally by letter.

NEED OF BRAKE TEST CAMPAIGNS

Utilizing of part of the revenue from drivers' licenses in this province for carrying on brake testing campaigns has been suggested by officials of the Alberta Motor Association.

The Provincial Government will in all probability take in about $128,000 in revenue from drivers during the present fiscal year.

If a substantial portion of this revenue were made available for safety campaigns, especially in educating the public as to the vital necessity of having car brakes in efficient working order, it is believed that a forward step would be taken in reducing the number of road accidents in this province.

Some Alberta centres have already given attention to brake testing campaigns. With more financial aid, it is believed that the work could be extended and put upon a more permanent basis.

Work of the highway patrols appointed recently by the A.M.A. has disclosed that in addition to having inefficient lights, both front and rear, many cars are operated with brakes far below the standard required. In other parts of the country, surveys have disclosed the high proportion of defective brakes on cars.

Advertisers - - -

of Fire Extinguishers

APPEAL TO FEAR!!!

but the advertisers in the Tofield Mercury appeal to YOUR COMMON SENSE.

They ask you to consider the convenience of being able to get what you want when you want it.
They remind you of the friendly, personal service they offer.

They bring to your attention the saving in time, patience and mileage effected in trading in Tofield.
They give specific instances of good values at FAIR prices.

The amount of business given local merchants and professional folk in Tofield determines the type of service rendered.

This paper commends the people in Tofield who have the trade at home habit. It shows good common sense. Thereby is a strong community spirit fostered. The pity is that all do not trade exclusively at home.

Some Tofield merchants are themselves to blame, perhaps, for a good part of the trading done by Tofield people away from home—because they do not advertise the fact that they carry as good goods at as attractive prices as their competitors in neighboring cities and towns.

AN UNWELCOME VISITOR—

THERE IS probably nothing quite so disheartening as having a standing crop of grain smashed down by a destructive hailstorm. Only absolute ruin by fire can compare with it. Yet such are the vicissitudes of the personal fortunes of men and the vagaries of nature that each growing season sees some area in the province smashed and ruined beyond seasonal recovery.

Only a few minutes before hail strikes, the fields appear so full of promise and immediately the hailstorm has passed on, the scene changes to one of complete desolation. Those who are compelled to gaze upon their own fields, battered and blackened, need to call upon all the courage of which they are capable. The shock, sudden and severe, tests to the limit strong nerves and stout hearts.

Fortunately hail, like lightning, does not strike the same place twice. At least, though the foregoing statement may not be absolutely true, hail has the habit of jumping around from place to place as the seasons roll around. It is a risk the grain grower is compelled to run and one can never tell where the next destructive storm will hit.

Unfortunately the storm that streaked across the province on Friday last tore through a territory adjacent to Tofield, creating havoc and ruin in its passing. It did not damage a particularly large area of this district but that fact is no consolation or help to those whose crops it did wipe out. Coming from the south it tore across a strip of country in a north easterly direction on to and past Vegreville. At different points, branches of the storm started off in another direction doing damage also. Apparently, if it were possible for a person to be above the storm and watch its course, or even high enough to observe its effect upon the earth, a pattern similar to a tree structure would probably present itself—a main structure with irregular branches darting off here and there.

Last Friday's storm was not the most destructive the province has experienced, but it was more than enough and it is to be hoped that there are no more to come like it.

THE ACID TEST—

AS WE write, the Alberta legislature is in session apparently for the sole purpose of passing legislation that will bring about a new economic order in this province. Viewed in the light of past experience the outlook does not appear any too promising, but it is only fair play and common sense to let the government run its race before submitting praise or condemnation. If and when the present bills now before the House are passed, giving wide powers to the specially appointed Board and the Board acts on its authority, it should soon be obvious to all whether "it can be done" or "it can't be done."

We have been "ribbed" a little regarding our statement last week that the dividend idea was the only pearl in the new economic order's pot. This belief was arrived at, not from any new economic teachings, but from the colossal relief expenditures of the past few years. However, we have little hope that such a thing will come for some long time. If it did, it would mean that the strong, (from any cause) would shoulder the burdens of the weak (from any cause). As economic society is at present constituted, the strong, generally speaking, exploit the weak. Perhaps this is an immutable law.

GOLD, CHANGES, VALUES—

AN ARTICLE in a current issue of the London Economist discussing today's complexities surrounding gold and alluding to the possible reduction of the price of this metal says:

> Any attempt to wean the public from this belief might succeed in teaching the public that gold no longer possessed a stable value, either in terms of money or commodities, and unless the present widespread belief in the value of gold is replaced by something equally assured, the undermining of this faith would inevitably lead to uncertainty.

This statement recognizes that a system (in this instance a monetary one) is no better or worse than men think it is. The use of words "belief" and "faith" make this great and undeniable fact patent. For the main prop under the present monetary systems is a belief or faith in their efficacy. Gold also derives its worth from the "widespread belief (or faith) in the value of gold." Take away such beliefs or faith, as the Economist implies, and these systems must collapse.

This deduction leads naturally to another: that it is not so important for monetary or other systems to be altered or replaced as for the thoughts of men directing them to change and become rid of the faulty, erroneous reasoning that has resulted in confusion and stagnation in world channels of exchange. This would, of course, include a change from the doubt, suspicion and uncertainty so rife today to the greater confidence being clamored for in the whole world.

But to last any time this must be based on that integrity of purpose which alone can result in sufficient mutual trust among nations to bring order into the international tangle. This would constitute the beginning of that change which the world daily knows is becoming more necessary, namely, more reliance on spiritual values and less on material ones.—Christian Science Monitor.

SUGGESTS MERGING PRAIRIE PROVINCES

MONTREAL Aug. 3—Abolition of the senate and division of Canada into five sections instead of the present nine provinces was suggested Sunday by Paul Gouin, Action Liberale Nationale leader as a step toward a more supple confederation and one more in conformity with the geographic, economic and ethnical characteristics of the country.

Speaking at a meeting described as "non-political" at nearby L'Assomption, the one-time ally of Premier Duplessis said he was categorically opposed to any revision of the British North America Act which would mean more centralization of powers with the federal government.

The act he asserted should be revised to divide Canada into five sections, "each different from the others from the geographic, economic viewpoints and from the point of view of the mentality of their inhabitants."

The A.L.N. leader said his plan called for condensation of the three prairie provinces into one, also bringing together maritime provinces.

"We can then reduce," he added, "the number of legislators sent to Ottawa, abolish the senate and certain ministries which duplicate the work of the provincial officers and we can, moreover, give those five new provinces wider legislative powers which will permit them to face their new obligations."

The A.L.N. leader said no "immediate, apparent advantages" in separatism for Quebec province.

LIVESTOCK SURVEY IN DROUTH AREAS

Survey is being made of livestock in drouth areas in southern Alberta with a view to finding out the kind and number which can be marketed state Hon. D. B. Mullen, minister of agriculture Monday.

"At present, there is a fairly good market for cattle of the better grades. I am endeavoring to find an outlet for those of poorer quality which it will not pay to winter," said the minister.

Arrangements have been made under which buyers in eastern and western Canada may purchase feeder cattle in the drouth area and have them shipped at one-half the regular freight charges, he said.

Other policies are under negotiation with the railways and the federal government and are awaiting final settlement. These policies include shipment of having outfits to [illegible] and return, shipment of cattle from the drouth area and shipment of feed into that region. It is expected that all of these policies will be on a free or reduced freight basis said Mr. Mullen.

Speaking of the feed and pasture situation which greatly improved during the past three weeks, the minister said there was still a substantial inquiry for shipment of coarse feed and grain for wintering stock. Officials of the department have been in the field locating supplies.

"Reports indicate there are substantial quantities of hay throughout the northern part of the province which, if cut in time and cured properly, will be available for distribution during the winter," said Mr. Mullen.

NORTH M.P.'S 2 SONS DROWN

FALHER, Aug. 3—Wading into a hole while their father was fishing a short distance upstream, Rene "Peachy" eight and Donald seven, only children of Rene A. Pelletier Social Credit M.P. for Peace River, were drowned Monday evening in the Smoky river three miles from Watino. Watino is about 55 miles southwest of Peace River town.

The 28-year-old member of parliament, youngest in Canada, had warned the boys of the only danger spot in the vicinity a deep hole about 10 yards wide. He picked out a place for the youngsters to bathe went about 100 yards upstream to fish.

Shortly after, according to the grief-stricken father's own story, he looked up and saw no trace of the children. Hurrying down to the danger spot he saw the body of Donald, the youngest, and diving into the hole he dragged the lad from the bottom onto the bank. He then rushed back into the water in a frenzied effort for "Peachy" but after fruitless diving hurried back to try to revive Donald.

When the boy showed no signs of life the father rushed to a nearby farm for help.

The body of the oldest boy was recovered by W. Wortman, station agent at Watino within a few minutes. Friends and relatives of the lads employed artificial respiration methods for three hours.

Funeral services and interment took place at Falher Wednesday morning.

A station agent before his election to parliament in 1935, Pelletier was married in 1928. With his wife and children he was visiting his wife's home while his new house was being built in Falher.

ASK M.L.A.'s SIGN ANOTHER "PLEDGE"

Fresh pledge to guarantee support for the government was placed before Social Credit members at their caucus in Edmonton Tuesday it is learned.

This pledge is a revision of the "pledge of unity" which members signed at the June session upon being urged to do so by G. F. Powell, representative of Major C. H. Douglas.

The new pledge, according to members, asks for full support in upholding the Social Credit principles enunciated by Major Douglas and also pledging support of the provincial government in carrying out its policies.

A number of the members signed the pledge at the morning session. When some asked for copies to be taken away and studied, they were refused it is claimed on the ground that the forms were not to be taken from the caucus room.

The pledge signed at the June session by 49 of the Social Credit members was that they would not use provocative language or obstruct the government in the period preceding introduction of Social Credit legislation. Six other S.C. members issued a statement saying they would assist in introduction of Social Credit but wished to be free of any pledge.

One other member, James Hansen, Taber Independent and former Social Credit-er refused to sign either pledge or letter.

PEOPLE ASKING $25 DIVIDEND HOOKE STATES

History of Social Credit in Alberta from its very inception to the present day has proven that for the first time in the history of the British empire, democracy has asserted itself and people have been taught to demand results—a dividend of $25 a month and a lower cost to live, Alfred J. Hooke, S.C. Red Deer declared in moving adoption of the Speech from the Throne at the opening of the special session of the legislature on Tuesday.

"The members have kept one thing paramount in their minds and that is the desire to see this demand made a reality," said Mr. Hooke.

"The supremacy of the party has not been a question for consideration and through every crisis the party has encountered, the will of the people has been kept in mind. The signing of the pledge by the majority and of a special letter by the remaining few is proof positive that every single member is desirous of seeing that the will of the people shall prevail and that Social Credit be given a fair trial."

In continuing, Mr. Hooke declared that the legislative assembly exists to implement the will of the people. The people of this province "have demanded in no uncertain terms that they get a dividend of $25 a month and a lower cost to live. These are the results they have instructed us to obtain and this is their will."

He said that the people, through their M.L.A.'s had been expressing their democratic right to press for results.

"The best judge of what the people want is the people themselves," he said. "But the method of how their wants are to be obtained should not be for them to decide. That is the matter for technicians. It can be proven that in the question of a technical problem the masses are wrong and the minority is right."

STRAWBERRY CROP IS MONEY-MAKER

ROCKY MOUNTAN HOUSE, Aug 3.—Strawberries have become a good paying crop for a dozen or more farmers here. D. Bakka, eight miles north, has sold 2000 pounds this summer off a patch 24 feet wide by 125 feet long. He expects the crop to continue for another month.

Other farmers have done equally well. The berries have been selling at from 10 to 15 cents a pound. None have been shipped out, as there is a steady demand in the home market.

CAVE COLLAPSES YOUTH LOSES LIFE

SASKATOON, Aug. 3— William Ritchie, 18 Saskatoon lad was killed Monday when a cave in which he was digging, collapsed near Eagle Creek. Young Ritchie with a brother and sister and two other Saskatoon boys, were on a camping holiday.

THIS ACCIDENT DIDN'T HAPPEN

People enter police headquarters every day to report accidents. Saturday night C. A. Robinson of 10633 101 st. arrived here with an opposite purpose. He wanted to say he had not been in an accident.

He told Constable Arthur Hamer he had to swerve to avoid hitting a group of merry men who made derisive remarks when he honked his car horn at them in a downtown lane. A few minutes later he said he was pausing for a stop sign when two of the celebrants pounded up behind him, insisted loudly that he had run into them and something would have to be done about it.

"I told them they were drunk, and they yelled back, 'Drunk or sober we'll see about it!'" Mr. Robinson reported. So I just wanted you to know there was no accident.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

LEGISLATURE MOVES TOWARDS NEW ORDER

(Continued from front page)

acknowledged to be one of the key pieces of legislation of the Social Credit plan.

The Minister and Premier William Aberhart spoke briefly on the bill.

In the galleries were distinguished members of the bar and of the business interests of the [illegible].

All occupants of [illegible] saw one of the most [illegible] sweeping pieces of legislation in Alberta's history brought [illegible] when Hon. Mr. Low [illegible] tion of the [illegible] bank employees.

The bill [illegible] that every bank [illegible] license fee of $100 [illegible] shall pay an [illegible] $5 with penalties [illegible] to $10,000 if [illegible] ences.

Another bill [illegible] importance [illegible] was the bill [illegible] re Act [illegible] W. Hugill, [illegible] provides [illegible] lid Alberta legislature [illegible] menced [illegible] from the government.

Another Act [illegible] similar to [illegible] the bank [illegible] bankers [illegible] licensed [illegible] for carrying on bank [illegible] without such licenses.

With the [illegible] of this legislation, the "back of the session was broken."

The [illegible] after discussion [illegible] Thursday [illegible] the general opinion is that the session will be [illegible] Friday.

[illegible] the house and throughout the country new legislation [illegible] Papers throughout [illegible] extras while flashes [illegible] stories on the legislation poured out of the press gallery to all parts of the continent.

Truly, it was one of the most historic days in the annals of the legislature.

NAME INSPECTORS ON LOWER SCHOOLS

Appointments of three elementary school inspectors were announced Wednesday by Premier Aberhart, who is minister of education.

The new appointees are R. V. McCullough, B.A., J. H. Aikenhead, B.Sc., M.A. and J. W. Gillis B.A.

Mr. McCullough is a graduate of Leland Stanford university and the Calgary normal school. After experience in Alberta rural schools he was principal of the high and public schools in Ponoka, Tofield and Wetaskiwin.

In 1930 Mr. McCullough was appointed to the staff of the Crescent Heights high school. Later he was transferred to the staff of the Western Canada high school, Calgary where he has remained up to the present.

Mr. Aikenhead holds the degree of B.Sc. from the University of Manitoba and an M.A. degree from the University of Chicago.

He was principal of the Lacombe high and public schools and recently acted as principal of two and three-roomed schools in Calgary offering instruction to Grade IX courses. In his final year in Manitoba university Mr. Aikenhead acted as demonstrator in zoology.

J. W. Gillis obtained his secondary school training in De La Salle college, Toronto. He graduated with honors from the Camrose normal school and was for two years principal of the Millet high and public schools. He holds a degree in arts from the University of Alberta and has completed the requirements, with the exception of his thesis for an M.A. degree in education. Since 1931 he has been vice-principal of the Camrose high school, teaching science and mathematics.

HERBERT G. McCRAE

Herbert (Herb) G. McCrae, founder and publisher of the Hanna Herald for twenty-five years, died in the Hanna hospital on Tuesday, July 27. He was 45 years old. He built up over the past quarter-century a newspaper second to none in the weekly field. A victim of Diabetes for more than 18 years he carried on with courage and fortitude. From the time he settled in Hanna he gave unselfishly and even eagerly of his time and talents to promoting such enterprises as he deemed worth-while in the community. To the newspaper profession he brought a crusading spirit and as secretary of the Alberta Weekly Newspapers Association, waged a never-ceasing campaign for higher standards. He was born in Ontario at Peterboro. His wife is the former Louise M. Stanley. There are three children, a daughter and two sons. His funeral was conducted by the Hanna Masonic Lodge.

REVOCATION OF SALES TAX MOVE SURPRISES HOUSE

Announcement in the legislature on Wednesday by Hon. Solon E. Low, provincial treasurer that the Alberta two per cent sales tax would be abolished as from September 1 came as a complete surprise and with lightning-like suddenness, specially as it means giving up a revenue which, in the current fiscal year had been estimated at $1,600,000.

Only recently announcement was made that commencing on September 1 a new system of collection of the sales tax would go into effect. This system based on the Ohio system of receipt for checking had been thoroughly studied by sales tax officials.

New regulations had been drawn up under the Sales Tax Act and arrangements had been made to tighten up on administration so that the tax would yield greater revenue and thus avoid the lessening of exemptions.

Up until now the tax has been yielding on an average of $80,000 a month.

HOMING PIGEON MAKES NEW RECORD

THE PAS, Man., Aug. 2—Warm tribute for the Canadian National Railways Express Department in a letter received here recently, when E. S. Peterson, race secretary for the Highland Park Homing Pigeon Club of San Antonio, Texas, thanked the department for their part in the success of a long distance flight which established a new record for homing pigeons. The letter reads, in part, as follows:

"We do certainly give thanks to the Canadian National Railways Express Department for all they have done to make this race a success. Many thanks to the party who were able to handle the pigeons without breaking their feathers—very good work."

The birds were shipped from San Antonio and in Canada they travelled over Canadian National lines. They were taken to Churchill their point of release, but owing to weather conditions, it was decided to delay the home flight. A week elapsed before the weather man smiled. However, during the interval, the pigeons were given the run of one of the sheds and in this way were able to strut out the kinks for the 2,039-mile air journey home.

No provision was made to keep the birds at Churchill as it was expected that the doors of their baskets would be thrown open immediately upon their arrival. Despite this, though, the birds were fed regular racing fare by the expressman stationed at Canada's inland ocean port, evidence of the "service" motto which is the proud boast of every Canadian National employee.

When the birds were released, they headed straight for their home lofts in the Lone Star State. According to word received here, one of the fifteen purebred homing pigeons competing in the race, had already arrived, completing the international hop in 43 days, 16 hours and 30 seconds and setting a new world's record.

The letter points out that "....due to the bird flying from Churchill, her name will be changed to 'Lady Churchill'".

For readers interested in homing pigeons, it may be interesting to note that the winning bird was a Blue Check hen. Her register number is AU 35 HP 808.

145 MILES DONE BY GRASSHOPPER

COLORADO SPRINGS, Aug. 2.—Tinted with yellow dye by Entomologist Harold Willis, who wanted to find out how far a grasshopper would travel, one little 'hopper straightway hiked 145 miles to the entomologist's father, Ralph Willis.

Highly prized by Entomologist Willis, this 'hopper holds the flight distance record in the tine-identification experiment in Colorado's grasshopper area.

NEW OIL FIELD AT VERMILION SAYS OPERATOR

New oil field "undoubtedly has been discovered for Alberta" in the Vermilion area as the result of tests made there in recent months, it was declared Wednesday by John L. Graham, one of the pioneer operators in Turner Valley and veteran of Texas and Oklahoma fields.

In Edmonton on his way east to confer with financial interests financing the new development Mr. Graham said that the 16,000 acres tract held under lease by Battle View Oils, Pacalta and South End companies in a solid block is all on a structure higher than that of the Wainwright field, indicating profit-yielding folds.

Core taken from the contact of the Benton and Lower Cretaceous structure between 1870 and 1893 feet was coarse shore sand saturated in oil, he reported.

One well now drilled to that level he said, is to be cased and cemented as soon as he returns from the east in two weeks, to resume charge of operations as field manager, said Mr. Graham.

"This first well should come in any time after Aug. 20" he said. "We cannot tell what the flow will be, but I am sure it will go 200 barrels anyway. It might go to 1000 barrels or even better, but we don't know.

"I do know that the drill shows strata very rich in oil and on a level 58 feet above the Wainwright level. The geology gives an indication that the leases where we are working now in the Vermilion-Battle View field are on a rich fold.

"The shore sand we are getting proves that we are in the oil bed which was formed from an ancient ocean. It means that we are in rich land in a structure where we will get oil and gas in folds without the hindrance of water.

"I am sure it is going to be a great new oil field."

Mrs. Lovell returned on Thursday of last week from Victoria where she had been visiting.

SLIGHT DROP IN JOBLESS TOTAL

Registered unemployed in this province as at Saturday last totalled 9234 as against 9425 for the previous week according to figures released on Thursday by officials of the Alberta Employment Service.

Calgary continued to hold first place as the unemployment centre with a total of 3720 males and 35 females registered.

Lethbridge registered 415 males and 35 females; Medicine Hat 311 males and 56 females and Drumheller 220 males and 10 females.

During the week there were placements found for 894 males and 63 females, with agricultural pursuits absorbing most.

DON'T FORGET THE SUMMER STORE WEDNESDAY HALF-HOLIDAY. STORES CLOSE AT ONE O'CLOCK DURING JUNE, JULY AND AUGUST ONLY.

Early Fall Needs

Advance contracts enable us to offer new Merchandise without advancing 1936 prices.

WHEN YOUR CAR NEEDS A "DOCTOR" GET THE BEST

We save you time and money by our scientific method of determining the exact operating condition of your car. The Ford Laboratory Test Set promptly and surely reveals car ailments. It is approved by the Ford Motor Company for checking everything affecting motor performance. Come in and watch the operator read the dials. He will prescribe proper treatment, which our highly trained staff is equipped to perform and very quickly your car is again in the "pink" of condition.

Wedding Of Local Interest

A wedding of local and district interest occurred on Monday, August 9th at the United Church Manse, when Mrs. E. V. Gray of Tofield was united in marriage to Mr. Silas E. Stephens of Ponoka. Rev. D. K. Allan performed the ceremony.

Mrs. Gray is a well known member of this community having lived here for many years, while the bridegroom is a retired farmer from the Ponoka district.

Mr. and Mrs. Stephens left after the ceremony for Gull Lake and points south and upon their return will take up their home in the Tofield district. The many friends of the bride in this district extend congratulations and best wishes to the newly married couple.

C.C.F. MEETING

Since the last C.C.F. meeting this contributor has been too occupied to write about it, so this is a little late.

The purpose of the meeting was to hear the report of the delegates attending the Annual Convention of C.C.F. Clubs at Calgary. As the other delegates were not at the meeting Mr. A. P. Moan reported the convention for all of them. He gave us an outline of the business done and a review of the various speeches as well as bringing back the inspiration of the convention. He said that the reporting of the business was easy for every delegate was sent a copy of the proceedings. The club is indebted to Mr. Moan for the quality of the report.

After the report of the delegate the "order of the day" or should I say night, was whether the U.F.A. should go out of politics or not. Those favoring "not going out" were led by the vice president and supported by her sister members and the other side was led by the president who two years ago was a member of two political organizations and backed by the "sterner" members of the club. A great deal of fun issued as the ladies gave the men advice as to the proper methods of making the U.F.A. more successful to which the men were "silent?" as usual. Both sides won.

What Will You Have?

Fry, Roast or Boil—Beef, Pork or Lamb. We are ready to serve you with best quality meat carefully chosen for tenderness and flavor.

It would be appreciated if your order for your Sunday requirements came in early Saturday.

KETCHAMOOT

The congregation and Sunday School picnic of the Ketchamoot branch of the United Church will be held on Wednesday, August 11, at Lakeview, Cooking Lake.

Mrs. A. J. Williams entertained the Ladies' Aid at her home Wednesday afternoon of last week. While not a large crowd was present a pleasant afternoon was spent.

Mrs. Sam Stirrit underwent an operation in an Edmonton hospital one day last week. Her many friends wish her a speedy recovery.

Mrs. Grahn of Kingman visited her daughter Ruby, at the C. A. Ingram home Friday of last week.

Miss Dellia Gormby of Edmonton visited several days last week with her aunt, Mrs. Henderson and her cousin, Mrs. W. A. Mitchell.

Mr. Jack Younie of Edmonton was also a visitor at the W. A. Mitchell home a few days last week.

Miss Viola and Howard Lee of Edmonton spent Friday and Saturday visiting friends and relatives at Ketchamoot.

Mr. and Mrs. G. W. Sears, Miss Hazel and Charley Sears, also Miss Lois Thompson and Graham Allan of Tofield attended the Veteran's picnic at Borden park in Edmonton Sunday.

Mr. and Mrs. Keith McIntosh and family, Mr. Murray and sons were guests of Mr. and Mrs. W. A. Mitchell Sunday of last week. Mrs. McIntosh and Mr. Murray are cousins of Mr. Mitchell.

Mrs. Johnson of Clyde visited her sister Mrs. Fred Williams last week.

Mrs. Sheppard of Edmonton and Mrs. Webster of Springwater, Sask. came on Monday evening for a visit with their daughter and cousin, Mrs. Whillans and family.

Miss June Walkinshaw of Edmonton came Monday evening for a visit with her friend Miss Maude Wildman.

Graham Allan returned to Tofield on Wednesday from Leduc en route to Jasper where he will be employed at Jasper Lodge.

LOCAL & PERSONAL

Blake Clutterham returned to Edmonton on Sunday and has resumed his position with Andrew Brothers.

Isabel Robinson returned from Summer School where she has been taking an advanced course in Physical Training.

Mr. Alexander Brack of Winnipeg, brother of Mrs. J. Whyte is staying at the Whyte home. Mr. Brack is a veteran of the South African war and also the World war. He is visiting here while on his way to the coast.

Miss Muriel Malcolm is holidaying at Sylvan Lake for a few days.

Mr. and Mrs. Gordon Provost of Edmonton visited at the Allan home on Sunday.

Miss Helen Smith of Edmonton is visiting at the Malcolm home.

Mr. and Mrs. "Dad" Harris of Sedgewick visited friends in Tofield on Sunday.

Mr. and Mrs. H. Green returned from their holidays spent at Pigeon Lake and Viking.

Mr. and Mrs. F. E. Balcano and family visited friends in Tofield on Saturday.

Miss L. Ross spent Sunday in Edmonton.

Mr. and Mrs. Bert Lovel and family and Miss Pat Burnett returned from Jasper on Saturday last.

Miss Lois Thompson is spending her holidays with her parents at Leduc.

Mr. and Mrs. Jack Glover, Mr. and Mrs. J. Lowe visited Mr. W. O. Glover on Sunday.

Miss Aileen Allan returned home on Sunday after spending some time working in Westlock.

Miss Betty McCarthy, who is nursing at the Royal Alexander hospital in Edmonton is spending her holidays at her home here.

Miss Margaret Whyte spent Sunday and Monday at her home here.

Mr. and Mrs. McCauley, Mrs. E. W. Rogers and Mrs. A. Innes motored to Banff this week.

Mrs. Stinson and family have returned after an enjoyable stay at the lake.

Mattie Moos, Harry Bowick and Bob Evans spent the week end on a fishing trip. They were quite successful in catching a good number of fish.

Mrs. Sinclair and daughter, Mrs. Kennedy and Mrs. A. Wallis left on Monday enroute to the Pacific coast by motor. They expect to be gone about six weeks.

Rev. D. K. Allan journeyed to Calgary to visit his daughter Margaret, who underwent an operation in a Calgary hospital.

Mr. W. Rogers and daughter Ruth of Grannum, spent a few days in Tofield visiting relatives.

KINGMAN

Mr. Andrew Johnson is working at the school house getting it ready for the new term.

Mr. and Mrs. J. K. Dettwiler and daughter Malinda, spent last Sunday at the home of Mr. and Mrs. Will Wideman.

Mr. and Mrs. Norman Wideman visited at the Oliver Thompson home on Sunday evening.

Misses Viola and Eileen Lindberg visited Miss Nora Molvik last Sunday afternoon.

Mrs. Grahn and son Raymond were Bardo visitors on Friday last.

Miss Myrtle Grahn is home again after spending the past month with her grandparents at Hay Lakes.

Mr. J. K. Dettwiler is building a granary for Mr. E. Erickson.

Harvest time is here and the farmers are busy cutting their grain.

Quite a number of people from here attended the funeral of the late Mrs. B. Olson on Sunday afternoon.

FOR SALE—Chevrolet Motor; Governor and pulley; 7 inch Grain Grinder; Mare 1200 lbs.; Boat Engine; Pump Head; Wood Splitter. Apply to Maurice McGinitie, Tofield.

Shower For Prospective Bride

Mrs. R. B. Wilson and daughters entertained at their home on Friday in honor of Miss Mary Moan, whose marriage is to take place in the near future. Many lovely gifts were received. Contests and games were played after which a delicious lunch was served by the hostesses. Those present were Miss Mary Moan, Mrs. Wilson; Misses Faye, Lola and Cleo Wilson; Misses Leda and Beatrice Baptist; Mrs. Morton, Mrs. Snell, Mrs. Spilsted; Mrs. H. McGinitie, [illegible] L. Carlisle; Mrs. E. Carlisle, Ed and Miss Mary Kadal, Mrs. Ingram and Miss Kathleen Ingram, [illegible] Edythe Barden; Miss [illegible]son; Mrs. J. and Mrs. M[illegible]eau; Mrs. Thomas, Mrs. [illegible] Mrs. Clark, Miss Blanche [illegible], Misses Catherine and Ala[illegible], Mrs. J. Yakabuski, Mrs. [illegible], Mrs. Patterson, Mrs. Eg[illegible], [illegible] W. Foreman; Miss Edith [illegible], Miss Hillerud.

HOG PRICES NOW HIGHEST IN YEARS

Farmers are receiving higher prices on the Edmonton market for prime hogs than at any time in seven years, a comparison of livestock figures showed Wednesday.

For the week ending Aug. 5, basic price for hogs on the Edmonton market was $9.60 per 100 lbs. Prices for the corresponding periods in previous years were 1936, $6.75; 1935, $6.75; 1934 $7.15; 1933 $5.15; 1932 $3.90.

Price last week was 245 per cent greater than for the corresponding period in 1932.

Volume of sales is only slightly less than in 1936 according to the dominion livestock branch.

Increased foreign exports and slackened production are responsible for the steady climb in prices, officials said.

WEDDING IS OFF, FIND BRIDE'S BODY

LONDON, Aug. 11—Body of Elena Jak[illegible]skaite, 26-year-old native of Lithuania who disappeared from the liner [illegible]cania Saturday, was discovered at [illegible] off the South Devon coast. The liner sailed from Montreal July 30.

Authorities stated they understood the [illegible] was deported from Canada after plans for marriage to a Canadian, arranged through a correspondence courtship broke down.

E. W. ROGERS

Trans-Canada Air Service

CANADIAN NATIONAL CHOSEN FOR PROMINENT ROLE IN OPERATING NEW FACILITIES FOR MAIL, PASSENGERS AND EXPRESS

By Walter S. Thompson

WHAT IS destined to be Canada's largest air service is steadily taking form under the auspices of the Department of Transport and of the Canadian National Railways. Trans-Canada Air Lines is the official title of the enterprise. Its headquarters are at Montreal and it is under the management of a board of directors, three of whom are named by the government, while four are nominated by the Canadian National Railway Company. At present the Canadian National System is the sole stockholder with 50,000 shares representing all of the authorized capital of $5,000,000. The Canadian National may sell or dispose of, to persons engaged or interested in aviation, a minority share interest, if, at some future date, such action is deemed advisable, but it must, under the terms of the act creating the Trans-Canada Air Lines, retain a majority stock control. No shares can be held by any person other than a British subject resident in Canada, or a corporation incorporated under the laws of Canada

The directors of Trans-Canada Air Lines at present are: S. J. Hungerford, Chairman and President, C.N.R., Montreal; James Y. Murdoch, Director, C.N.R., Toronto; Hon. Wilfred Gagnon, Director, C.N.R., Montreal; H. J. Symington, Director, C.N.R., Montreal; G. P. Edwards, Chief of Air Services, Department of Transport; J. A. Wilson, Controller of Civil Aviation, Department of Transport; G. Herring, Chief Superintendent of Air and Land Mail Services, Post Office Department.

Mr. Hungerford is President of Trans-Canada Air Lines and Phillip G. Johnson Vice-President in charge of operations. The services of Mr. Johnson were secured in order that the New Air Lines would have at their command the experience of an executive thoroughly familiar with large scale transcontinental commercial flying operations of the most modern character. A short record of his career in aeronautical work is as follows: Engineering and Production Departments, Boeing Airplane Company; Vice-President and General Manager, Boeing Airplane Company; President, Boeing Airplane Company; President, Boeing Air Transport Inc.; President, Varney Airlines, Inc.; President, Pacific Air Transport; President, National Air Transport; President, United Air Lines, Inc.; and President, United Aircraft and Transport Corporation which was the parent company of the other enterprises.

The Trans-Canada Air Lines will operate regular services of aircraft transporting mails, passengers and express on routes specified by the Government. Its franchise on those routes will be of an exclusive character. The tariffs must be on a similar basis with other competitive services in North America. For an initial period until January 1940 a subsidy equal to the deficit, if any, resulting from operations will be paid out of moneys appropriated by Parliament. Subsequently, the company's [illegible] will be based on the cost of the service as determined by the operations of the previous year.

The emergency landing fields, lights, radio beams and weather reporting necessary for the operations of Trans-Canada Air Lines are now being organized and will be maintained by the Department of Transport, the Trans-Canada Air Lines establishing the modern aviation equipment, two way radio telephone service and other facilities.

Hon. C. D. Howe, Minister of Transport in presenting to the House of Commons the measure to incorporate the Trans-Canada Air Lines said:

"Canada is perhaps one of the few countries in the world without a national scheduled air service. The air services from our centres of population to areas not otherwise served by transportation take second place to none, but we are woefully behind other countries in air services between centres of population. During the calendar year 1936 over 1,000,000 people travelled in scheduled air flights in the United States.

Many Canadian citizens travelling from one point to another in Canada, find they have to use the air lines in the United States, and they have been very insistent in demanding the establishment of a direct Canadian service.

"Air mail stamps are sold in Canada and much of our mail is routed across the border, transported by the air services of the United States, and then brought back across the border at the point nearest to destination. The volume of this air mail is sufficient to warrant the establishment of a direct service in Canada. I believe such a service would prove of immense value for national purposes. Canada is a country of vast distance and sparse population and the time needed to travel between the west and the east is considerable under present circumstances. If that time could be cut in three or four by a new air service, the people living at the extremes would be able to travel more frequently to the centres of government, business and industry, and the inter-relations of the country would thereby be facilitated. The need for a service of this kind has been recognized for some considerable time.

"The set-up of the Trans-Canada Air Lines is such that the company will be protected against loss, but its profits will be very strictly limited. In other words it is organized to perform a certain national service and it is expected that the service will be performed at or near cost.

"As the honorable members know, this government is obliged to share in the proposed service now being organized between England, Ireland and Canada to cross the north Atlantic. In that connection we have undertaken to be prepared to fly mails across Canada connecting with their flight across the Atlantic. For that reason it is urgent to form this company and get the organization under way and obtain the necessary equipment to undertake the service.

"It is estimated that the capital required to purchase the equipment necessary to perform the service in Canada is about $1,750,000. In addition about $1,250,000 is required as part of Canada's capital for the transatlantic service. The balance of $2,000,000 is provided to be called upon as required for the expansion of the services as national needs may indicate. The cost of operation of the service—the coast to coast service—is estimated at about $1,000,000 a year."

Since the act to incorporate the enterprise was given Royal Assent on April 10th last the Board of Directors of Trans-Canada Air Lines, in consultation with the Minister of Transport has been engaged in formulating plans for the new services. Seven planes of the latest type, suitable for carrying mail, express and passengers, have been ordered. They are Lockheed-Electras. Three of these planes, costing approximately $75,000 each and accommodating ten passengers will have a cruising speed of 180 miles per hour. They will be delivered this summer. In December it is expected that delivery will be made of four 14-passenger planes, these larger planes to cost approximately $110,000 each and to have a cruising speed of 200 miles per hour. All seven of these planes are twin-engined each engine having sufficient power so that in case of the failure of one engine the plane could fly over the Rockies. With one engine the plane could also take off from landing fields.

The training of Canadian pilots to handle these planes is proceeding and will continue for some months to come. They will be given concentrated practice in instrument flying and will be made thoroughly proficient in what is known as flying on the radio beam. This modern development in flying has not been used in Canada except in the service between Montreal and New York but it is essential for a trans-Canada service of the kind planned. To a layman the best description of flying on the beam is that the pilot receives through his headpiece, or through a loudspeaker, radio signals sent out from the radio range station near the airport towards which he is heading. The pilot is flying say, at 10,000 feet and the signals are coming through clearly in the prescribed manner, thus indicating to him that he is on the direct course towards the airport to which he is heading. Should his plane go south or north off the route, the character of the signal changes, indicating to him that he must turn right or left to get back on his course. At intervals of fifteen minutes to half an hour the pilot also receives the latest weather reports covering the whole area through which he is flying. As he approaches the landing field he is given detailed information regarding the cloud ceiling, wind velocity, etc. at that particular field from the station at the field. When the plane passes over the radio range station adjacent to the airport, the beam signals cease and the pilot knows he is approaching the field and by coming down on a graduated angle lands his plane.

The selection of pilots is being made from the group now holding Canadian public transport licenses. Each plane will carry a pilot and co-pilot. The pilot group will probably be consolidated at Winnipeg and the practice period covering some months will be carried out on the Pacific Coast.

Philip G. Johnson, Vice-President in charge of operations, just made his first inspection trip west to east, of the route including landing fields, etc. He will draw up the whole plan of operations, including the erection of certain necessary facilities at divisional centres and other points, for submission to the Board of Directors. Throughout the Summer and Fall work will be in progress on communication radio ground stations, hangars etc. by the Trans-Canada Air Lines. The Department of Transport is rushing to completion route lighting, emergency field lighting, airport lighting, weather reporting facilities, radio range stations etc. Some four years ago the work of constructing proper landing fields was commenced and up to the present about $7,000,000 have been expended on that work which is now well advanced towards completion. There are emergency landing fields at intervals of forty to sixty miles from Vancouver to Halifax. In addition, municipal airports at the principal cities on the airway are being modernized, grants having been made to civic authorities for this purpose by the Government.

The routes to be flown by the Trans-Canada Air Lines will be: Halifax-Moncton-Montreal-Winnipeg, Regina-Lethbridge-Vancouver (with connections to and from Toronto,) Lethbridge-Calgary-Edmonton and Vancouver to Seattle with the probability of the addition in the future of other mail passenger services such as Toronto-Hamilton-Windsor. It seems likely that the first divisions to be placed in operation will be the Prairie and Pacific Divisions, Winnipeg-Regina-Lethbridge, Calgary -Edmonton and Lethbridge to Vancouver. The approximate mileage of these division is 1500 miles. No date can yet be set however, for the opening of regular service on any route as the survey and preparatory work will be carried out with the greatest of care. The route through the Rocky Mountains has been tested very thoroughly and it is the belief of the Department of Transport experts that Canada has one of the best of the four transcontinental routes now being used in North America. This Canadian route traverses the Rockies through Crows Nest Pass.

Bearing in mind that this is written in the very early stages of the development of Trans-Canada Air Lines, the following outline of possible schedules may be examined in order to obtain an idea of the approximate times between centres by the planes of the corporation:

	Approx. hours
Montreal-Vancouver	17
Montreal-Winnipeg	9
Toronto-Vancouver	16½
Toronto-Winnipeg	8½
Winnipeg-Regina	2½
Montreal-Edmonton	15
Winnipeg -Edmonton	7
Halifax-Montreal	4

The staff of the railway consider it a mark of confidence in the Canadian National organization that the Minister of Transport with the endorsation of Parliament, should have placed the operations of the Trans-Canada Air Lines in charge of the Canadian National together with administrative flying officers of the public service. Arrangements have been made whereby the full resources of the railway organization will be used to make known the day to day developments in this airway service and to make available to those who plan to use its express and passenger facilities all [illegible] information through the railway's traffic and other representatives. The Minister of Transport drew the attention of the House of Commons to the fact that the committee which considered the development of civil aviation within the United Kingdom recommended that, for the development of airline service across England, railway co-operation should be sought. The Minister proceeded to give instances in which the facilities of the railway would be of great value to the airline—ticket offices, facilities for the solicitation of express and passenger business and many other points where services would be more or less parallel. "In any event," said Hon. C. D. Howe "after the consideration of these matters the government has decided that its agency for transportation the Canadian National Railways should be the means of organizing this company just as it was used as the means for operating such shipping as the government owned and the means of operating other government transportation facilities.

In discussing the Trans-Canada Air Lines it is difficult to place too great emphasis upon the marked improvement that will accrue to the Dominion's mail services as the result of this air line development. No feature of the plan is more important. In all arrangements including the starting time of the planes from important terminals the policy will be carried out that the mails must go through in the shortest possible elapsed time, preferably after the close of the business day, in order to expedite the commerce of the country. The Minister of Transport has pointed out that the pilot must fly by night as well as by day, in fog and storm as well as in clear weather. For that reason a radio beam must be provided between landing points which will keep the pilot on his course whether or not he has any visible contact with the ground. Parliament was informed when the Trans-Canada Air Lines bill was being considered that a careful analysis of air mail revenue had been made by post Office Department. It was anticipated that, with this regular revenue, the Trans-Canada air operation would, by the third year pay for itself through the carriage of mail alone.

The inauguration of air line service across the Atlantic has an important relationship to the Trans-Canada Air Lines services. After regular services have been established and operated for a period, a joint operating company will be formed which will be responsible for carrying on the services. The joint operating company will be incorporated on the instance of three companies, one nominated by the government of the United Kingdom, one by the government of the Irish Free State and one by the Canadian government. The company nominated by the Canadian government is the Trans-Canada Air Lines. The capital of the Joint Company will be subscribed and held as to 51 per cent by the United Kingdom company (Imperial Airways), 24½ per cent by the Canadian company (Trans-Canada Air Lines) and 24½ per cent by the Irish Free State company. The Pan American Airways will be granted landing facilities by the government of Canada, the Irish Free State the United Kingdom and Newfoundland and will participate in the services on the basis of reciprocity with the Joint Company. The United States government will in turn, grant landing facilities in that country to the Joint company composed of British, Irish and Canadian interests. It is understood that westbound the planes will, after crossing the north Atlantic, and at Newfoundland, proceed to Montreal (an alternative stop is at Shediac, N.B.) and proceed to New York. Eastbound the order of stops will of course be reversed.

It is hoped that the survey flights will establish the entire feasibility of a regular service for mail and passengers twelve months of the year across the north Atlantic.

On the arrival of the Empire flying boat Caledonia at Montreal on July 8th when she completed her trans-Atlantic survey flight her commander Capt. A. S. Wilcockson, First Officer A. H. Bowes and radio officers Valette and Noble were greeted by Hon. C. D. Howe, Minister of Transport, by the President and directors of Trans-Canada Air Lines by a representative of the British High Commissioner and a host of Montreal citizens. Commander Wilcockson and his officers were later the dinner guests of Mr. Hungerford. Remaining in Montreal over night the Caledonia was flown to Port Washington, near New York and returned on July 12th. Before taking off on the return flight to Britain on July 13th, Commander Wilcockson expressed admiration for the landing facilities which had been provided. He regretted, however, that his return flight must begin before he had an opportunity of meeting the Trans-Canada survey fliers, then at Kapuskasing, completing their survey of the final link in the air route between London and Vancouver, B.C.

Welcoming the fliers on their arrival at Montreal Mr. Hungerford said:

"Captain Wilcockson: You have forged a new link in Empire transport, one which will develop in the years ahead a closer commercial contact between Britain, Ireland, Canada and the United States. Trans-Canada Air Lines welcome the opportunity which is to be afforded to them of being associated with Imperial Airways and the Irish Free State in the operation of trans-Atlantic air service. You will be glad to know that excellent progress is being made in preparation for the establishment of a regular Trans-Canada Air Lines service spanning the Dominion from coast to coast, linking up with the trans-Atantic service."

BANK OF MONTREAL CROP REPORT

General—Crops in the Prairie Provinces are ripening rapidly and harvesting which has commenced, will be general in about ten days. Rains, varying from scattered showers to heavy downpours have been beneficial in Manitoba and Alberta and at a few points in Saskatchewan. In Saskatchewan crop conditions remain unsatisfactory over most of the Province with conditions in Alberta varying from good to a virtual failure and with those in Manitoba on the whole favourable. Improvement has been shown in the feed situation and the condition of pastures in the Prairies generally. In Quebec warm, showery weather which has been ideal for growing crops has continued during the week, and the outlook remains satisfactory. Favourable growing conditions also continue in Ontario where harvesting of fall wheat is about completed and the cutting of early oats and barley is well advanced. In the Maritime Provinces warm, dry weather has continued, aiding the growth of most crops, but rain is now needed in many parts. Damage to grain crops in Nova Scotia is feared from army worms which have appeared in large numbers in some sections. In British Columbia warm weather continues, with beneficial rains in the interior, and grain crops are maturing satisfactorily. Haying conditions are good with excellent crops. Details follow:

Alberta— Rains, except in the Peace River district have been beneficial to crops and pastures. Sunshine is now required. A heavy growth of weeds is reported in the east central area and considerable hail damage has occurred in north-east and west central areas. Crops in other districts are good, except those in the southeast where they are a virtual failure. Saskatchewan—Reports indicate that little grain will be threshed in the greater portion of the southern and central regions. Elsewhere yields will be light. Late sown coarse grains show some improvement in the extreme northwest. Grasshoppers are causing considerable damage. Manitoba Crop prospects on the whole are favourable. While severe rust infection has increased and the yield will thereby be lessened, it is expected that the crop will not be seriously affected as most of the wheat has filled the well. Slight damage from grasshoppers and army worms is reported. Coarse grains generally are satisfactory.

WORLD OF WHEAT

• • • • • • • • •

By H. G. L. Strange, Director, "Crop Testing Plan".

For the first time in four years the world will produce this year, in spite of Canada's poor crop, as much wheat as it will consume—about 5,600 million bushels.

From 1928 however, the world consumed each year less than it produced, and so the world surplus which usually is 600 million bushels, grew each year until, by 1934, it amounted to 1140 bushels.

Since 1934 each year, however, the world has consumed actually more wheat than it has produced, and so the difference was taken out of the surplus until today the 1140 million bushels of carry-over has been reduced, not only to 600 million, which is the normal but down to 450 million. This year however, the world's crop will be some 200 million bushels more than it was last year or just about sufficient to meet the world's needs.

The lesson to be learned here, it seems, is to regard wheat always as an international commodity, grown and consumed in large quantities in almost every country in the world, and to remember that deficiencies in any one year in any one country can easily be made up by equivalent surpluses grown in another country, all having its ultimate effect upon price.

Following factors have tended to raise price:—Germany prohibits use of bread grains as feed—Polish and German rye crops expected to be ten percent under last year—Reports that Canada buying U.S. wheat—U.S. private wheat estimates reduced from 871 million to 841 million bushels—Roosevelt announces surplus crop control essential.

Following factors have tended to lower price—European demand remains poor—U.S. offering wheat—Expect greatest Japanese wheat crop in history—China fixes maximum futures prices for wheat and flour—Manchurian soybean crop above last year—Apple production increasing in Japan—Mediterranean fig prospects favorable.

THOSE TERRIBLE OLD LINE PARTIES—

THE ANNOUNCEMENT has been made that Mr. McFarland has been approached to become leader of a new political group or party composed of all people who are not in sympathy with the present provincial government. All well and good—this is a free country and any number of individuals have the privilege of forming a political group any time they feel so inclined. Quite frequently one hears it said that on no account must the people go back to the old-line parties. Apparently in the minds of many people there is something sinister, something pernicious in the old line parties. Perhaps there is, or rather was, because as far as Alberta is concerned, the old line parties in parliament have dwindled to a mere handful of men. There is no doubt that many of the political practices of former politicians were open to question, as a matter of fact we doubt whether conditions in this respect have changed much in recent years. Party allegiance apparently still demands sacrifice and gives reward. But to lay the blame completely on old line parties is too sweeping a condemnation and to expect a complete change of heart among new political groups is to hope for too much. If we stop to think for a moment it must be realized that old line parties were composed of men and women, chosen from all over the dominion or province as the case may be, from all walks of life and with varying degrees of ability as regards statesmenship. They received their nomination through a system of elimination and in the aggregate were simply a chosen body of Canadian citizens. It is not possible to have a Canadian parliament of anything else.

Providing a political unit is large enough and wealthy enough, we believe the two party system under a democratic set-up, is the best system of political government yet devised. That is not to say it is perfect. Perfect government will only be a reality when the people reach perfection and that apparently is a long way off. The two party system allows for the give and take of human political emotions. Excess enthusiasm is braked by an opposition whose DUTY it is to discover flaws in impending legislation. This duty of flaw finding is very often as important as originating the legislation itself, as by this means costly errors are avoided and a higher grade of legislation result. There is no harm in bringing into being a new political party providing most other parties in existence are included within its ranks, because any political party must of necessity be a grouping, perhaps re-grouping of bona-fide citizens. It does not make so very much difference what the name of the party is, because the two party method is a SYSTEM of government devised so that all people should have an opportunity of expressing their will in parliament. The province of Alberta, like all the other provinces of the Dominion adopted the names Liberal and Conservative for their political parties. The names could easily have been something else, we believe it would have been better had they been so. The influence of Dominion politics have played too great a part in Alberta's affairs for Alberta's good, as a province essentially an exporter of agricultural products could not look with favor upon a party carrying a high tariff label, whether the label meant anything or not.

Looking back it would appear that the two party system has not done so much for Alberta, only to build up a colossal provincial debt. There are of course, compensations for this in the way of public services, but certainly too much stress was placed upon borrowing, without due regard for future consequences. But the system of government was not so much at fault as the mood of the times. **One thing every citizen should fully realize is that sound government is rarely ever popular government.**

In the early days of the province's history when people were flocking in, farms being developed, public services demanded, low taxation exalted, any parliamentarian who exhibited the "go slow" sign was considered to be almost disloyal, certainly he was anything but popular. Now as we view our provincial debt and wonder what we are going to do about it, we realize that those "go slow" men, if there were any, had the right idea.

Those terrible old line parties were no more terrible than new line parties will become under the same kind of pressure unless the hearts of men change, which is unlikely. The government of a body politic is a necessary task. How well or badly it is done depends upon a number of things, not the least among which is the proper understanding of that task, not only by the legislators, but by the body politic. If citizens feel that an organized government is something from which sustenance can be obtained, there will be little change in the chaotic conditions prevailing. If citizens feel that organized government is something to which a contribution must be made—there is hope.

Strange Doings

The deep sea diver was hard at work on the ocean bottom.

Suddenly an urgent voice over his telephone, which connected him with the boat above.

"Come up quickly," the voice said, " the captain tells me the boat is sinking."—Montreal Herald.

LONG RANGE WEATHER FORECASTING

It would be of decided advantage to Western Canadian farmers if fairly accurate long range weather forecasting was inaugurated in this country. Due to the large size of Western Canada and the fickleness of the climate this may be a extremely difficult undertaking, but meteorological scientists in other parts of the world have made astonishing progress in forecasting weather for a considerable distance ahead.

In Germany, notably, long range weather forecasting has reached a practical state particularly with reference to agriculture. Forecasts of the weather for ten days in advance are being made in that country from June 18th to August 28th with really a remarkable degree of accuracy. In fact the accuracy of the ten day forecasts has now reached 80 to 90 per cent, which slightly exceeds that of daily forecasts. In addition to ten day forecasts intensive work has been carried on with respect to monthly, seasonal and annual forecasts. It is indicated that these have led so far to satisfactory results and considerable expectations appear to be justified for such forecasts. As far as the monthly forecasts are concerned 80 per cent are indicated to have proved reliable with respect to temperature and 75 per cent with respect to precipitation. The seasonal forecasts (roughly for three months) that have been made and about which something is known, also reveal considerable possibilities. Gordon P. Boals, United States agricultural attache at Berlin, says that meteorological research has been proceeding step by step in a logical way in Germany and without doubt is advanced further than is generally known. This is particularly true as regards the development of what might be termed "practical" long range weather forecasts, especially where it pertains to experience in technique.

The most successful method of calculating the weather in advance, the Germans have discovered, is based on a statistical calculation of weather relationships. Given similar combinations in the distribution of air pressure and temperature, resultant weather will be practically the same according to this system. So the history of the weather is subject to continual scrutiny and the results compiled statistically, filed and indexed. Thus it is possible to obtain a sequel of weather charts that not only are very similar in the outward picture of the weather chart but also show the greatest similarity in the internal construction of the weather situation. This is not a lucid explanation but roughly and briefly covers the method that has been used with remarkable success in calculating the German weather for ten days in advance.

There are two other methods in use in Germany, the first consisting of solar observations with regard to fluctuations and activity because the sun is the weather's main source of energy. The second method of trying to penetrate into the reasons for fluctuating weather conditions consists of a very general search for regular periodical weather developments. Countless investigations have been made in this field and the Geophysical Institute in Leipzig has adopted as its chief task this type of research work of periodical weather conditions. It is possible that such periodical weather conditions exist and that in some parts of the world they may be used for weather forecasting.

The ten day weather forecasts are broadcast throughout Germany every Wednesday, there being a three day lapping. They are also published in German papers so that the information is available to all. 500 observations made in West Germany during 1936 in connection with the forecasts showed 361 entirely correct, 85 substantially correct, 22 partly correct, 19 mainly correct and 13 entirely wrong. The ten day forecast is particularly suitable for German farmers for it is important to know the weather in advance for such jobs as harvesting and haying.

As mentioned in the earlier part of this article if some system of weather forecasting could be devised to inform the farmers of Western Canada of what they might expect ten days in advance it would unquestionably prove of decided advantage to them. —Wheat Pool Bulletin.

ONLY SIX YEARS OLD BUT HAS SWELL TIME ACROSS CANADA ON C.N.

WINNIPEG, Man. August 9.—George may not be the youngest passenger who has come from a home in the Old Land to a new home in Canada, unaccompanied, but he certainly can boast of being the owner of the longest name.

He passed through Winnipeg recently over Canadian National Lines, enroute to Vancouver where he will live with his uncle Harry Pappas, 4066 Quilchena Cres.

His name is George Pappaconstantinou. He is six years old and small for his age.

But he was the most important passenger on the Continental Limited. He comes from Greece and can't speak a word of English. He is such a bright smiling and happy little chap that attention is showered on him from all angles. When spoken to he picks up his mouth-organ and plays his answer and the merry twinkle in his eyes expresses complete delight in his long trip.

He has no idea where Vancouver is or when the journey will end. All he seems to be concerned about is the fact that he is having a swell time on the big train.

FAULTY FARMING IN MIDDLE-WEST REAPING HARVEST

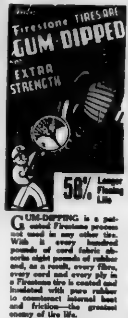
Canada, unwittingly perhaps but undeniably, has been prodigal of her western heritage, and there has been much waste of its substance through recklessness. There was a time, not so long ago, when thousands of adventurers from the eastern provinces, the United States and Europe responded to the call to come and put the plough to the rich virgin soil of the prairie. There was nothing to it, no need for previous farming experience; all one had to do was to tickle the soil and make it laugh golden grain. And so butchers and bakers and candlestick makers had a fling at it. Omar, the tentmaker, knew as much about farming as any of them, when he referred to "those who harvested the golden grain and those who flung it to the wind like rain." Some are now reaping the whirlwind literally, especially those who settled in the "short grass" country extending from southwestern Manitoba, through southern Saskatchewan to Southeastern Alberta. It was easy, too easy, to turn the first furrow in this fertile sod which never should have been broken, a realization which came too late. While moisture supply lasted good crops were grown, until recurrent years of drought taught that moisture is the limiting factor and had to be conserved. Thus grew the general system of allowing a third of the land to lie fallow every year during which it is cultivated only for the retention of moisture and suppression of weeds. There was the other vicious system, adopted by the improvident and greedy, of extending the acreage so that a whole section of 640 acres might produce a crop of wheat equal to that once grown on a half. And so these soil-mining pioneers proceeded unrestrained in their work of destruction, until the exposed top soil was carried away on the wings of the wind, darkening the skies over Winnipeg, while on the wheat exchange there wheat was marked up another cent a bushel. Conversely, a shower of rain in Alberta would send the price down, to the dismay of the speculator in the world's staple food.

Suffering Saskatchewan

In the premier wheat-producing province of Saskatchewan the situation is desperate says B. Leslie Emslie. In the south are farmers, so called, who are content if they harvest one good crop in five but have not had one in six years. There are children of four who have never seen rain, the only precipitation during their young lives having been in the form of snow. Many of these children are afflicted with silicosis from the dust which penetrates even the houses, despite the storm-windows which are permanent fixtures. One may be asked to admire the fortitude and optimism of these unfortunate people; but it isn't farming, and the sooner these lands are evacuated and induced to grow grass again, if that is now possible, the better it will be for the general welfare of the country.

Manitoba is the one bright spot where crops are generally good, thanks to fairly generous rains and to the greater development of mixed farming which includes the growing of sweet clover hay. Alberta, too is good in spots, though the Edmonton district has not fared so well as usual.

A trip from Saskatoon to Rosthern in the last week of June, afforded an opportunity to see and feel the effects of heat and drought. On either side of the highway stretched fields which, with the hopefulness of spring had been seeded to grain, now scorched and wilted by the merciless sun and drying winds. Some wheat had headed out at four inches in height, but most of it lacked the vigour for that effort at reproduction and offered a scant meal to the grasshoppers of which a plague had been predicted. Certain districts reported, by the way, that the grasshoppers are not a menace, there being no crops for them to destroy! and others that the hoppers were developing cannibalistic tendencies! The way, strewn with corpses of gophers bent on suicide beneath the juggernaut cars, led to the Dominion Experimental Station of Rosthern, where the condition of crops, though subnormal, gave evidence of greater cultural care. Of special interest here was a series of wheat, barley and oat plots on which the remarkable influence of the new organic mercury dust in controlling root rots was demonstrated, the experiments being described by Dr. P. M. Simmonds of the University of Saskatchewan.



GUM-DIPPING is a patented Firestone process not used in any other tire. With it every hundred pounds of cord fabric absorbs eight pounds of rubber and, as a result, every fibre, every cord and every ply in a Firestone tire is coated and insulated with pure rubber to counteract internal heat and friction—the greatest enemy of tire life.

Due to this extra process, Firestone Gum-Dipped Cords have 58% longer flexing life. Yet you do not pay one cent more for this extra value! See the nearest Firestone Dealer today!

NEW ZEALAND EXERCISES RIGID CONTROL OVER HONEY EXPORTS

New Zealand with a population of only a million and a half it is claimed consumes as much honey each year as Great Britain. The government exercises a high degree of control over both honey production and exports 96 per cent of the latter going to Great Britain according to the Agricultural Department of the Canadian National Railways. Owing to unfavourable weather conditions during the past year and to protect export markets there is a possibility of New Zealand importing honey for domestic requirements.

Twenty Years Ago

Twenty years ago two farmers' grain companies serving Alberta Farmers were amalgamated to form United Grain Growers Limited

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

Deliver Your Grain to
UNITED GRAIN GROWERS Ltd.
Elevators at: Chipman, Demay, Kingman.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

EXTEND PLANS FOR HIGHWAY SAFETY

While Alberta has passed legislation designed to ensure greater safety on the highways, other provinces are taking similar steps.

At the spring session of the Alberta house, amendments to the Motor Vehicles act called for dimming of headlights when cars meet on the highway, brake inspections by police and new rules of the road for pedestrians.

In Ontario a bill has gone through which has aroused a great deal of controversy. Raising the speed limit to 50 miles per hour, the new legislation stresses care in operation of the car rather than the rate of motion. It provides heavy penalties for infringement of the new law but naturally lays great responsibility upon police officers and magistrates.

In Quebec a new bill provides for drivers of animal-drawn vehicles to carry lights and reflectors on their cars at night. For years the farmer population of the province strong at the polls, have resisted compulsory lights on vehicles.

In Alberta this was a contentious subject for several years but finally the house passed legislation requiring lights on such farm vehicles.

Next subject expected to be given attention is drivers' licenses, some quarters suggesting that there should be a further tightening up of the requirements for those seeking licenses. The subject is likely to be discussed by the Alberta Motor Association when it holds its annual meeting.

INTEREST PAID TO BORROWERS

WASHINGTON, Aug. 6—"Negative interest"—A pays B for letting A hold B money—is the latest monetary plan to be unrolled before the Senate Agriculture Committee, which is sitting through daily explanations of schemes and devices to perpetuate prosperity.

This particular scheme comes from James H. R. Cromwell, husband of the former Doris Duke, heiress of the Duke millions and stepson of E. T. Stotesbury, Mr. Cromwell is author of "In Defense of Capitalism" a copy of which he sent to Joseph Stalin recently after difficulties in Soviet Russia.

Under the "negative interest" plan, the Federal Reserve Board lends money and pays 6 per cent for the privilege of lending it. The beauties of Mr. Cromwell's plan dawned on Senators but slowly. When he elaborated a three-point program of which the third point was "inducement loans to farmers and industrialists," Senator Lynn F. Frazier (R) of North Dakota asked rather scornfully how Mr. Cromwell expected farmers to pay any interest on such [illegible]

But the globe-trotting author was ready for him: "Oh, no, Senator" he replied eagerly "I wouldn't advocate that sort of loan at all. I would advocate, say, 10-year loans with a 6 per cent negative interest."

The Senate Agriculture Committee has heard of many monetary schemes and devices in the last six years, [illegible] has encountered many ingenious methods of giving money away, but was stumped by "negative interest."

The lender pays the interest and after a 10-year plan at 6 per cent the borrower would pay [illegible] only 40 per cent of what he borrowed. Members of the committee seemed very much intrigued.

The second point of Mr. Cromwell's program was also interesting to the Senators. "Suppose it was necessary to inject money into the consumption side of the cycle" he said. "Then the Federal Reserve as bank of issue, would print a billion dollars of currency and turn it over to the Treasury to be used by Congress as Congress might see fit. For example Congress might reduce taxes in that amount."

His first point was for complete control of reserve requirements for members banks by the Federal Reserve Board. But the latter points: involving distribution of money to Congress to spend as it saw fit and loans to farmers who would be paid for borrowing, were the ones that concentrated interest.

OLD-TIME CAPITALISM DEPENDED BY CROMWELL AFTER TOUR OF SOVIET

NEW YORK, Aug. 6—Compulsory collective bargaining, deposit insurance, high taxation, currency devaluation and "lots of other 'cockeyed' theories" once formed the intellectual portfolio of James H. R. Cromwell husband of Doris Duke, but a tour through Soviet Russia and some "good hard thinking" have sent Mr. Cromwell back to old-fashioned capitalism he told the New York Rotary Club yesterday.

"In my opinion the only threat to American capitalism represented by Russia is that our people know so little about the Soviet" he declared. "Give our most desperate malcontent a few months in the Soviet Union and I'll wager he would be everlastingly grateful to get back home even with the WPA."

While entertaining the belief at one time that capitalism needed a lot of overhauling, Mr. Cromwell emphasized that he was convinced now that the less capitalism is interfered with politically, the better it will work.

American business men themselves, he added would have to save their system from regimentation by getting in step with the policies of intelligent regulation illustrated in Sweden.

"I hold that regimentation is a proven failure," he continued. "I hold as the Swedish experience shows what capitalism can do if given a fair chance and finally, I hold that whether we progress and follow the trail blazed by Sweden or whether we retrogress and follow in the wake of Italy and Germany, is entirely up to our business leaders."

BROADWAY LITTERED WITH DEAD PIGEONS SEEK ELDERLY WOMAN

NEW YORK, Aug. 11—Upper West Side New York was littered with the bodies of dead pigeons yesterday after a woman was seen feeding them the contents of a five pound bag.

For several hours the birds toppled down on the streets and rooftops of the west 70's between Central Park and Riverside drive. Agents of the American Society for the Prevention of Cruelty to Animals, summoned by angry crowds estimated that more than 200 had been killed by rat poison.

Police began a search for a tall, elderly woman in brown who was reported by two bootblacks to have been feeding the pigeons at Verdi square, Broadway and 73rd street. Their attention was drawn to her when she rebuked them sharply for moving about and frightening the birds away from the seed which she had strewn over the square.

The bootblacks, Lindy Kelly, 14 and Robert Dunbar 15 said she was "old and had a wrinkled face." She had a small brown dog on a leash and "looked mad about something" they said.

Shortly after she moved up Broadway still tossing the seed about, the pigeons at Verdi square began gorging themselves with water at nearby pools. Then observers said, they seemed to swell up and burst, some of them in mid-air. The statute of Giuseppe Verdi was splotched with their blood as they plumped to earth.

TESTS REVEAL GRAIN QUALITY HAS IMPROVED

Crop testing in the Edmonton district has revealed improvement in the quality of wheat and other farm products, according to officials of the provincial department of agriculture.

The crop improvement work in western Canada is sponsored by seven leading line elevator companies associated with the crop testing plan.

Under the system followed, samples of farmers' wheat are taken from the wagon lots drawn to the elevators. These samples are grown in plots where on maturity they are analysed as to purity. Later, the farmer is given an opportunity to exchange seed in order to improve the quality of his grain.

Tests have been carried out at Gibbons; Clyde; Stony Plain; Minburn; Donalda; Hairy Hill and Wetaskiwin.

New Shoes For School Opening

Introducing a new line of growing girls' and children's shoes of high quality materials and construction at unexpectedly low prices on basis of present leather prices.

Municipal District to Appoint Tax Collector

The sixth regular meeting of the Cornhill Municipal District Council was held at the Municipal Office on Saturday, August 14th.

Councillors present included: Reeve Glenn; Councillors Bonnes, Holmberg, McSporan, Morden and Walker.

The minutes of the previous regular meeting and minutes of special meeting were read and adopted.

The monthly statement was placed before council.

The secretary was instructed to write Mrs Hannah Knevold pointing out that she is a resident of Town of Camrose and if in need of medical attention, request should be made to Town of Camrose.

Moved by Councillor Holmberg that circular from Provincial Department of Child Welfare, dated June 15th, 1937, re Mothers' Allowance, be tabled until next meeting, as council consider it a little early to carry out Fall inspection. Carried.

Moved by Councillor Bonnes, lots 23 24, Block 4, Kingman be sold to Miss Olga E. Johnson, Kingman, subject to title being obtained by the district. Lot 10, block 2, Kingman was also authorized to be sold to Mr. Andrew Johnson, subject to title being obtained by the district.

Moved by Councillor McSporan, secretary be instructed to write the Provincial Department of Lands and Mines, protesting most vigorously re said department requesting that Mun. take proper steps to place all ground fires on bird sanctuaries in and around Miquelon Lake under control at the expense of this district. If correspondence does not prove successful delegation consisting of reeve and secretary be requested to interview proper authorities with a view to arriving at a satisfactory basis. Carried. Secretary was instructed to forward a copy of the letter to Mr. H. E. Williams, Tofield, Alta.

Moved by Councillor Walker that Mr. Henry Tiedeman, Tofield be recommended to Old Age Pension Board, Edmonton, for full pension. Carried.

KETCHAMOOT

Miss Mabel Lawson left on Saturday for Vancouver for a visit with her sister, Mrs. Harold Smith and family.

Mrs. Ralph Barnes entertained the Social Hour Club at her home Thursday afternoon of last week.

Miss Ruby Grahn returned to her home in Kingman Monday after spending the summer months at the C. A. Ingram home.

Mr. and Mrs. Jesse McMullen and family who reside at Ryley are spending the summer holiday on their farm in the Ketchamoot district. Congratulations, Harold, on taking first prize playing on the accordion at the amateur hour at Ryley Friday night.

Master David Gormley of Edmonton spent a few days last week with Billie Mitchell.

Miss Eileen Stirritt visited Monday with her mother at the Royal Alec hospital in Edmonton.

Messrs Forest Daley and Cameron delivered a truck load of lumber to Mr. Gibson on Saturday from Edmonton.

Mrs. Donald McCowan and Mrs. Earl Wilson left on Saturday for a holiday at Victoria. Mrs. McCowan will visit cousins at Sooke near Victoria and Mrs. Wilson will visit her sister Mrs. J. Johnson of Nanaimo.

Harvesting started last week but owing to so much rain it has been going very slowly but we are in hopes from now on there will be no interference.

Mrs. Sutton sr. received word one day last week from relatives at Portland, Ore. stating that her great nephew and Percy Sutton's nephew Clifford Beeler, son of Mr. and Mrs. Emery Beeler and Tommie Black, son of Mr. and Mrs. D. P. Black had both been killed in an automobile accident. Both families being old residents of Ketchamoot, we thought it would be of interest to read Tommie's obituary sent from Victoria, we did not receive Clifford Beeler's. It was a very sad accident as there were four killed. We send our sincere sympathy to all the bereaved ones.

Obituary

On August 4, 1937 at Camas, Washington as a result of an accident Thomas Fraser Black, aged 21 years and born at Camrose, Alberta. The deceased was the beloved husband of Gladys Marguerita Black of London, England and at present in this city; his beloved son of Douglas F. Black of Victoria and Grace M. Black; also beloved brother of Dorothy La Mear of Portland, Ore. and Mary Stewart F. Black of Portland and beloved uncle of Douglas La Mear.

The remains are reposing at Hayward's B.C. Funeral Chapel, where funeral services will be held on Friday, August 13, 1937, at 2 p.m. Interment in Royal Oak Burial Park.

FOR SALE—Chevrolet Motor; Governor and pulley; 7 inch Grain Grinder; Mare 1200 lbs.; Boat Engine; Pump Head; Wood Splitter. Apply to Maurice McGinitie, Tofield.

Likens Social Credit to Modern Advertising

Mr. Editor,
Dear sir:—

Being a social creditor I wish to take exception to your editorial of last week.

Under the heading, "The Acid Test" you state "the strong would shoulder the burdens of the weak," which I take it infers that under social credit we will take from some to give to others. This is not correct. It has been explained to us many times that social credit, put into practice, will not take anything from anyone, excepting power from the financiers.

If the dividends are paid they will be earned, by adequately financing industry, without any eight per cent rake off, plus no unemployed. This must be brought about by the cooperation of the public in [illegible] and operating this new order.

Some time ago, in one of your editorials, you argued that "Advertising paid for itself." If you use the same line of thought, with far less imagination, you will see that "Social Credit will pay for itself."

Why not be a booster?

Yours truly
Harold Weatherill

E. W. ROGERS

FERTILIZED PASTURES RESIST THE DROUGHT

"Fertilized pastures are still good, with unfertilized ones becoming poor", states a July crop report issued by the Quebec Provincial Bureau of Statistics. The statement contains food for thought, as the matter concerns food for the grazing animal and the means of increased profit for the farmer. For years the Department of Agriculture in Quebec has been urging the important advantages of fertilizing pastures, and its representatives in every county have [illegible]ed and supervised demonstrations of the practice. The [illegible] published reports of many [illegible] striking proofs of its economy, and many a farmer who formerly had been used to allow three acres of grazing land per cow finds that one acre of fertilized herbage suffices.

Pastures treated with a fertilizer high in phosphates are more abundant, more palatable, more nutritious, being richer in protein and minerals. Besides they are ready for grazing earlier in spring and can be grazed later in the fall. Deeper stronger rooting of the grasses is promoted by the high phosphate fertilizer; consequently they are more resistant to drought and [illegible] not fade away in summer. This explains the statement in the government reports and points the moral.

The fall fertilizing of pasture is now recommended and the effects of an application of an 0-16-6, applied at the rate of from 400 to 600 pounds per acre in late August or September or even as late as October, will be manifest in early spring.

Seed Treatment Is In-Expensive

"All growers and distributors of seed have a very direct responsibility in the matter of seed-borne diseases" affirmed Dr. J. H. Craigie of the Dominion Rust Research Laboratory Winnipeg, addressing members of the Canadian Seed Growers' Association, at Saskatoon. Referring to seed treatment as a protection against smuts and root rots, Dr. Craigie said that never in the history of agriculture have remedial measures been so effective simple and inexpensive. He explained that when seed is treated with organic mercury dust not only are externally borne organisms destroyed but the fungicide on the seed affords considerable protection to the germinating seed and young seedlings against soil-inhabiting parasitic organisms such as those which cause damping-off and seedling blights.

Dr. Craigie commended the growing practice by seed-houses of treating much of their seed before distributing it and believed the practice would soon be general. Something might be done, he thought, to instil in the grower a consciousness that to grow a diseased crop is an unneighbourly act, just as it is to allow one's farm to become over-run with weeds. In some districts central treating plants might be established; or where a portable seed-treating outfit might be used. H. J. Kemp of the Swift Current Experimental Station appeared on the programme of the convention and delivered a most interesting address on the principles of the new automatic machine which [illegible] featured for the purpose of treating seed grain with organic mercury dust.

A DESERT OASIS

At R[illegible]thern, Sask., the farm of Dr. Seager Wheeler, a former world's wheat king stands out as an oasis in the surrounding drought-stricken plains. Bordered by windbreaks of poplar, the fields flaunt crops which would arouse the envy of the average farmer in any season. Similar evidence of prosperity was found on the adjoining farm of Dr. Wheeler's brother Percy. How is it done? The answer is significant and may indicate the remedy for many western woes. A little farm well tilled, for the Wheeler brothers know the principles of good husbandry and that a quartersection of land provided ample scope for their industry. Intelligent rotation of crops and cultivation, keeping in view the need for conserving the soil moisture are practised. Besides, both Wheeler brothers use fertilizers extensively and regard it a means to secure success. Percy Wheeler's quarter contains 150 acres of arable land of which he crops only half each year, allowing the other to lie fallow and accumulate moisture. While many a farmer of the district is striving vainly to make a living from 500 acres of grain, Percy Wheeler is banking money from his fifty acres. Real prosperity will return to the west only when it is realized that a quarter section is enough for any man, and when intelligently conceived scheme of government control is created for the protection of our heritage. Abandoned farms there are aplenty, and more will have to be in the southern sections where perpetual drought prevails. In other parts there may be occasional visitations of drought, hail, early frost, rust and grasshoppers, but farmers of the Wheeler type will never be on relief.

STATISTICAL STUDIES IN AN OTTAWA BUREAU

The Dominion Bureau of Statistics in Ottawa, presided over by Dr. R. H. Coates, comprises several branches, each dealing with some specific part of the survey. Officials of the bureau revel in figures, though they may not juggle with them. They can deliver on demand statistics of endless variety, all the way from crops to crime. Once in a decade they concern themselves seriously with the increase in the population of the Dominion and call it taking the census. At other times they are engaged in compiling figures on production, exports and imports and can reveal the activities and output of Canadian farms, fisheries, forests, factories and mines.

W. H. Losee, chief of the minerals, metallurgy and chemistry branch is responsible for the compilation of fertilizer statistics and has earned praise for the skillful manner in which he has handled what was once an awkward and chaotic situation. His statistics are accurate and he will check closely the new figures which record a fastly increased consumption of fertilizers this year. But there's no denying them or the farmers who have awakened to the need for fertilizers.

The following item got mixed up with agricultural statistics. A manufacturer of razor blades computes that in Great Britain a total of 50,000 miles of hair is shaved from 25 acres of faces daily, the assumption being that the average man, including those with long faces grows 48 square inches of bristles 25000 in number, and that these combine to yield 20 feet of hair each day. The accuracy of the calculation is not vouched for but the smooth-faced statistician can figure it out!

ICE CREAM HAS HIGH FOOD VALUE

Many people have the mistaken idea that when they eat ice cream they are consuming something which has actually little food value. That ice cream is often called a luxury proves that its nutritive value is generally underestimated but the fact remains that palatable flavour and refreshing quality of this valuable food have been responsible for its popularity.

It is now an easy matter to determine definitely the food value of commercially-made ice cream, for regulations under the Dairy Industry Act specify the composition of both ice cream and sherbet. According to the regulations, ice cream is the frozen product made from milk products with or without eggs, water, sugar, harmless flavouring, harmless colouring; it may contain not more than .5 per cent by weight of edible stabilizer such as gelatine; it must not contain less than 25 per cent by weight of food solids; not less than one and nine-tenths (1.9) pounds of food solids per gallon and not less than 12 per cent by weight of milk fat, except in cases when fruits, nuts etc. are added in which event the ice cream can have a minimum fat content of 11 per cent by weight.

These regulations should be of great interest to the consumer because it means that ice cream is now a standarized food with a definite food value. Calculating the calorie value of a pint of ice cream according to the minimum standard composition reveals that a pint brick of ice cream contains at least 625 calories, approximately 360 of which are provided by the fat, and 265 calories by the protein and sugar. Usually a pint brick is divided into five servings and so a medium serving of ice cream yields 125 calories or more which is a valuable contribution to the total daily food requirement. A double-dip cone, a real treat for most children, and not refused by many adults, yields about 140 calories.

Speaking of the total food value of ice cream does not tell the whole story of its "goodness". In the butterfat are found the same healthful vitamins in as useful a form as are provided in fresh cream or butter. The proteins too, are important, because being of animal origin they are best suited for conversion into body proteins. Ice Cream may be used with fresh fruits or sauces, or whatever way one likes, with the satisfaction of knowing that there is no better dessert, from both palatable and nutritive standpoints.

WETTEST RECORD MADE FOR YEARS

RED DEER, Aug. 17—All records for rainfall in Red Deer and district for many years past have been broken with a total of 21.82 inches of rain to date this year. Since July 13 there has been a total precipitation of 13.60 inches, the heaviest ever recorded in latter half of July and first half of August.

TESTED RECIPES

Tomato Cocktails

Now that tomatoes are plentiful, the following recipes taken from the circular "Tomato Juice and Tomato Cocktails" issued by the Dominion Department of Agriculture may prove interesting.

Tomato Cocktail No. 1

- 15 ripe tomatoes
- 1 cup chopped celery
- ½ cup chopped onions
- 2 tablespoons vinegar
- 3 sweet green peppers
- 1 sweet red pepper
- 2 tablespoons salt
- ¼ cup sugar

Mash and cut potatoes, but do not peel. Chop the peppers finely. Mix tomatoes, celery, onions, peppers, and salt together. Boil for one half hour. Strain through a coarse sieve. Add the vinegar and sugar. Boil three minutes. Seal in sterilized jars.

Tomato Cocktail (No. 2)

- 1 bushel of tomatoes
- 1 small head of celery
- ½ cup vinegar
- ½ teaspoon white pepper
- 1 cup chopped onions
- 4 teaspoons salt

Boil together for 20 minutes. Strain and boil 5 minutes. Bottle and seal.

Tomato Cocktail (No. 3)

- 1 No. 2 half can tomatoes
- ½ teaspoon minced parsley
- 3 cloves
- 1 teaspoon salt
- ⅛ teaspoon white pepper
- 1 teaspoon minced onion
- ⅛ teaspoon vinegar

Add the ingredients to the tomatoes, boil together five minutes, strain and chill. The circular on Tomato Juice and Tomato Cocktails may be obtained free on request from the Publicity and Extension Branch, Dominion Department of Agriculture, Ottawa.

TRANSPORTATION HISTORY WAS MADE IN WINNIPEG

Winnipeg, Man., August— A new phase in transportation history in Western Canada was revealed here this week when an official test run of the first "auto-railer" to arrive in the west was conducted by the Canadian National Railways.

Those participating in the test run were the Premier of Manitoba and several cabinet ministers; the chairman of the Manitoba Public Utility Commission; the mayors and officials of the cities of Winnipeg and St. Boniface; and representatives of the Winnipeg Board of Trade.

To demonstrate the flexibility of the new type of railway passenger unit, the car made various calls around the city to pick up its passengers and left by highway for Transcona. Just west of Transcona, the passengers alighted to watch the car leave the highway at a crossing and get on the railway line. The trip back to Winnipeg was made on the railway tracks. The entire trip, from its start two minutes to rail the car the crossing, and return to Winnipeg, took only a few minutes over one hour and all the passengers aboard expressed very keen enthusiasm over the new type of rail passenger unit, which will be placed in regular passenger service in Manitoba within a few days.

A freight unit of similar type is now being operated in Saskatchewan.

DOG SWALLOWED DIAMOND, X-RAY PICTURE REVEALED

Toronto, Aug. 16—Mrs. B. Webb's Chu-Chu was for a time last week the most expensive dog in Toronto. But that was before he went to a dog hospital for an X-ray and they found in his interior the diamond he swallowed.

Chu-Chu had been left home for the evening and when Mrs. Webb returned the gem was missing from her solitaire engagement ring. Chu-Chu was trundled off to hospital for examination and observation.

CHINESE RUN MOTOR BUSSES ON PEANUT OIL

Pekin, Aug. 16—An historic motor cavalcade which carried Chinese officials from Nankin to distant Yunnan province in addition to proving that China now has a network of modern highways also served to compare the performances of busses operating on petrol, vegetable oil and charcoal.

Burning only vegetable oil the whole 2500 miles a China-made bus successfully negotiated the hard trip. Officials consider this significant since it proved that a cheap, native-made vegetable oil can be substituted for costly imported American and European petrol.

The busses got as much as eight miles out of a gallon of vegetable oil which is 86 per cent cheaper than petrol in China.

Various kinds of vegetable oils were brought on the way. These were produced from peanuts, tea, poppy seed, cotton seed and cabbage seed.

Only two gallons of lubricating oil were used for the entire trip.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

THE NORMAL BABY

The number of requests for information prompts the writting of this article on the normal baby.

The following are the characteristics of the normal, healthy baby:-

A good appetite;

Absence of vomiting or regurgitation;

Bowels movements, one or two in twenty-four hours;

A steady gain in weight;

A constant growth in stature and intelligence;

Clear skin;

Bright, wide open eyes;

Alert, springy muscles

A contented expression;

Very litte crying;

Quiet, unbroken sleep, with eyes and mouth closed;

No evidence of pain or discomfort;

The development occurs in the following order for the average normal baby:-

The soft spot at the back of the head closes at about the end of the second month; the one on top of the head, between the 14th and 22nd months. The eyes, usually blue at birth, assume their permanent colour in the first three weeks. At six weeks, the baby begins to distinguish different objects and by six months definitely recognizes objects. Hearing and knowing the direction of sound develops about the second month. With the body supported, the head is held up at four months. The baby laughs aloud at from the third to the fifth month. He reaches for toys at from the fifth to the seventh month. He sits erect and creeps at from the seventh to the eight month. He attemps to stand at the ninth or tenth month, and can, with assistance, usually stand at the tenth or eleventh month. He begins to walk at the twelfth or thirteenth month and usually can walk alone by the fourteenth or fifteenth month. He can usually speak a few words at one year, and short sentences at the end of the second year.

RIDERLESS CAR GOES A-ROLLING

Lac La Biche, Aug. 17—Sitting in a car in the Catholic churchyard, while Rev. Father Godbault prepared to leave on a trip to the mission Miss Dorothy Brady, housekeeper for Rev. Father Meehan, accidentally stepped on the starter and the car being in gear started to move. Miss Brady jumped out but the car continued moving backing across the boulevard, tearing down trees, and rolling over several times before coming to a stop within a few feet of a 50-foot drop to the lake.

WAGES IN B.C. INCREASED IN INDUSTRIES

VANCOUVER, Aug. 17 —British Columbia newsprint mills, Powell River Company and Pacific Mills, Ltd. have signed new agreements with their employees providing for payment of an increase in the base wages for labor from 47 to 51 cents an hour.

Within the past two months practically the whole of the pulp and paper industry has been organized by representatives of the American Federation of Labor.

Increased wages in the sawmill and woodworking industries were ordered by the British Columbia industrial relations board, the base rate being raised from 35 to 40 cents an hour. Although it was announced that 15000 workers would be affected actually only about 1000 men will get higher pay as a result of the order because most of the mills are already paying the required minimum wage scale and paying considerably more in nearly all industries throughout the province.

LIKES HIS FOOD SO HE TRAVELS!

Montreal, Que. Aug. 16— He travels to eat! According to a letter received here by W. W. Swinton, general superintendent of the dining car services, a prominent business man and his wife, whose names are withheld, have taken such a liking to the meals served in Canadian National dining cars that they often travel 140 miles daily for the purpose of enjoying the food served in the diners. Thus the dining car also qualifies as a traffic solicitor.

A National Institution

Spread out over the vast area from the Atlantic ocean to the Pacific ocean there are about seven hundred weekly newspapers. Some are old, going back to Confederation, some are comparitively new born, having been rolled from their presses for only a few years. But all of them, no matter where published are intensely loyal to their seat of publication. To them, they are located in the best district, in the best province, among the best people in Canada. That is their creed, a creed to which they invariably render something more than mere lip service.

They solicit the support of the people of the district in which they are published, certainly, but in doing so they are asking the people to not only help the newspaper, but to help themselves. A country's greatness can be equally judged by the virility of its villages as by the importance of its metropolitan centres. A country weekly newspaper may be, and frequently is, a paper of Mr. and Mrs.', but the phrase Mr. and Mrs. represent the true structure of the nation.

The Tofield Mercury solicits your subscription and the subscription of your friends and neighbors. For nineteen years we have published for mutual benefit, and hope and expect to publish for some number of years more. Renew or subscribe NOW.

THE FLOWERED CUP—

(By Mary Zirkle in the Christian Science Monitor)

THERE HAD never been a furrow turned on our homestead until we filed on it, but on the quarter section adjoining ours to the east someone had attempted to make a home. A slight depression in the plain, grown over again with grass, showed that sod had been removed, and four walls crumbled and washed almost to the earth's surface indicated that the sod had been used to build a cabin.

Whoever had lived there had started to dig a well, leaving a hole probably ten feet across which had later been covered with boards, now rotted away. The sides of the well had crumbled and weeds and litter had helped to fill in the space, so we had not much idea how deep the digger had gone in his futile task. Water, indeed, lay below, cool and sweet; but it was at least 150 feet down and was to be reached only with drills.

No one in our neighborhood could remember who had built that house. It had been abandoned, those who had been there longest said, before their time. Buffalo hunters or cattlemen, we thought, might have put up a soddy for temporary occupation, although that would scarcely have accounted for the well.

We children regarded the spot with some awe. There is something about a deserted house, even if it is only a grass-grown dirt wall, that puts a constraint on one's feelings, like the shadow of a cloud across the sun. But one day, when we grew a little older, we investigated the place thoroughly, hoping to find some clue of those who had lived there.

There was nothing within the walls. The wood that had gone into the roof or floor or window sills had rotted completely away, or been removed. Rust had claimed everything within its province; not so much as a tin can remained. But quite by accident we did find something, sheltered near the roots of a clump of bunch grass that had grown each summer and dried each autumn until it was nothing less than a miniature stack of hay. That something was a fragment of a cup, as we could tell by its curve and a roughness where the handle had been broken off.

It was less discolored by time and weather than might have been expected, and there stood out still plainly upon its glazed surface a tiny spray of pink roses mingled with the blue of forget-me-nots. We had flowered dishes upon our own table, but nothing, we thought, quite so dainty and delicate as this.

Mother turned our find over in her hands and held it to the light. "Why, it's fine porcelain," she said, and showed us how the shadows of our fingers struck through it, as they did not on our table ware.

That disposed of the theory of buffalo hunters or cowboys. Men "baching" on the plains seldom drank from porcelain cups. There had been a lady in that house; a lady slim and young and charming, surely. Like scientists reconstructing prehistoric man from a shin bone, we visualized a dark-eyed, soft-voiced woman of quality from a spray of roses and forget-me-nots. And the man who had tried to dig a well for her close to the doorway had been gallant, if somewhat ill-advised.

They must have come to the prairie, our parents deduced from the evidence, on the wave of immigration that populated western Kansas in the eighties, only to recede before drought and hard times, leaving the land to be reclaimed by a later and better informed wave. Perhaps they had lost everything in the ice and snow of the winter '85-'86, when four-fifths of the range cattle in western Kansas and the Panhandle districts of Oklahoma and Texas were swept away in a few bitter weeks. Then the cattlemen who belonged to that country wrote off their losses and started over, even when that start meant riding line for some more fortunate outfit. But those who would do better elsewhere packed their goods in covered wagons and headed east again, in the pathetic rout the dry lands have seen repeated so many times. The history of the short-grass country was written in such stories.

Whatever the venture that brought our vanished neighbors may have been, it is long since over and the evidence has been plowed under. The disturbed earth is level with the plain again and the bit of flowered cup that had belonged, we thought, to a lady too delicate for our harsh winds and burning suns, is lost now beyond recovery.

RICE POLISHINGS FOR DIGESTION'S SAKE—

AN ADVERTISEMENT of a well-known drug firm, in the British Medical Journal, offers a proprietary brand of rice polishings concentrate which it is stated "assists digestion in adults," "promotes growth in backward children," etc.

The ordinary rice retailed has had its outer coat polished off, thus removing much, if not all, of its nutritive qualities. Having taken our fill of this, we are now, it seems, to replace the deficiencies by a dose of polishings concentrate.

Commerce removes the outer covering before selling the rice to us, and the chemist sells the covering back to us in capsules under a fancy name so that we may all be assured of our vitamin B. Of a truth, a strange world. —Anti-Vivisection Journal, London.

THE WORLD OF WHEAT

"Tamworths and Tam-worthless pigs! That's what your herd consists of, Mr Strange."

These were the frank words said to me a few years ago by a neighbor who looked with a expert eye at my hogs.

So, to be equally frank, I said to him: "Reward and Reward-less, that's what your fine field of wheat consists of!"

We were both astonished to hear these things, but we learned something from each other, nevertheless.

Those producing pigs should know the fine points of their animals. Equally so is it important for wheat producers to know how to distinguish the different varieties from one another, for many a man who thinks he is growing good Marquis wheat may, it is true, have little of this vareity in his fields, but as one humorist has said: "Sometimes hardly enough to hurt!"

How are the wheat varieties identified? Just as easily as pigs or chickens or cattle are distinguished, once you know how.

Future "World of Wheat" articles will show the characters of the various varieties. Those who are interested in such a study should harvest this fall, and preserve, a few wheat sheaves from their fields.

Following factors have tended to raise price:- Drought causing reduction in Argentine acreage; Dominion Bureau estimate Canadian spring wheat acreage condition only 25 percent— Unfavourable Australian crop advices; Rains delay Russian and Hungarian harvest; Italy purchases Hungarian wheat; Hail damage in Western Canada; European apple and pear prospects decline.

Following factors have tended to lower price:- Russian wheat offers received in England; Favorable Monsoon helps Indian crops; Australia offering wheat freely; Dominion Bureau's wheat acreage estimate for Prairie Provinces increased slighty; European harvest progressing favourably; U. S. Department of Agriculture's wheat and corn estimates increased; Harvesting under way in Prairie Provinces.

EDMONTON ACE HUNTS RUSSIANS

FAIRBANKS, Alaska, Aug. 17 — took off from Aklavik and landed at on the rim of the Arctic Tuesday for a search into the bleak wastes where six Russian transpolar fliers vanished last Friday.

Wind, rain and lowering clouds, which swept ominously across the top of the world Monday, balked Russian and United States airmen from launching a hunt, but Tuesday at 7:46 a.m. Pilot Bob Randall of Edmonton Aviators of three nations gathered Herschel island an hour later seeking the fliers. He then continued west to Point Barrow, Alaska, his terminus on the hunt.

Herbert Hollick-Kenyon, famed Canadian aviator will join the expedition report from Toronto said.

Among those grounded by the storm was Jimmy Mattern who in 1933 was saved from death in the wilds of Siberia by Sigismund Levaneffsky, pilot of the missing monoplane which was en route here on a 4000 mile flight from Moscow.

Mattern, who was on a world flight when he crashed in Siberia, spent Monday equipping his fast, long distance ship with de-icers. A refueling aeroplane to enable him to extend his search was en route here from his California headquarters.

At Markovo on the Dnadir river in Siberia, Soviet Pilot Zadkoff prepared to hop to Cape Wellen on the northern Siberian coast.

Soviet icebreaker Krassin was loaded with three seaplanes at Cape Schmidt and was ready to steam toward Alaska. Three more aeroplanes were being fitted at Moscow with extra fuel tanks.

Vague radio messages picked up on a wave length assigned to the missing transport aeroplane spurred searchers in the hope the ship had landed safely, possibly on an ice floe.

Last definite message from the aeroplane was early Friday after it had crossed the Pole and was heading toward Fairbanks. The fliers reported one of their four motors was going dead.

In Washington the Soviet embassy reported Monday night vague transmissions had been picked up 70 times since Friday on wave bands of the aeroplane.

"The possibility is not excluded," the embassy said, "that the plane's station is functioning but is damaged and therefore poorly heard."

First Edmonton pilot to join forces with crack American and Russian birdmen in an extensive search of Arctic wilderness for Pilot Levaneffsky and his party of five Russian airmen unreported since early Friday en route from the North Pole to Fairbanks, Alaska, Bob Randall was prepared to take off from Aklavik Tuesday, flying under instructions from the Russian embassy at Washington.

Pilot Randall in a Mackenzie Air Service aeroplane on floats will scan the Arctic coastline west of Aklavik to Herschel Island and on to Point Barrow, Alaska.

To assist him in conversing with natives along the Arctic coast who might have sighted the giant "thunderbird" Randall was believed to have enlisted the services of an Eskimo interpreter. The Eskimo will be carried as the only passenger in the gasoline-loaded craft.

REPLY TO PREMIER KING IS DESPATCHED AFTER LENGTHY MEETING

Asserting its right and intention to enforce bank licensing legislation passed at the special session of the legislature held recently, the Alberta government has rejected the dominion government's proposal to co-operate in a reference to the supreme court of Canada to test the validity of the enactments.

Decision of the Alberta government was made at a meeting of the cabinet that lasted over four hours Monday and dealt with a telegram from Premier King which asked if the province would facilitate a reference to the supreme court, suspending enforcement of the legislation in the interval.

Shortly after 7:00 p.m. Monday, the government's reply, signed by Premier Aberhart, was forwarded to Premier King at Ottawa.

Three acts mentioned in Premier King's telegram as covered in the proposed reference were, an act to provide for licensing of bankers and employees; an act barring the rights of the courts to unlicensed bankers, and an act to amend the Judicature act which provides that no action to test the validity of Alberta legislation may be started in courts without the permission of the provincial government.

TEXT OF ALBERTA'S REPLY TO FEDERAL GOVERNMENT

Text of Premier Aberhart's reply to Ottawa's request for co-operation in a court test of three provincial acts follows:

"Rt. Hon. William Lyon Mackenzie King.
"Prime Minister of Canada,
Ottawa, Ont.

"1. The Alberta government is convinced that its three acts are wholly within the legislative jurisdiction of the province. We all concur in your statement 'Credit is a public matter not of interest to bankers alone, but of direct concern to every citizen.'

"2. Our legislation is designed to (a) secure the results demanded continuously by the overwhelming majority of our people here. (b) Compel financial tyranny to reveal itself as such if it dares to oppose. Our legislation deprives no one of anything if they co-operate with Albertans and merely takes from those who won't co-operate the rights which they themselves seek to usurp or assist others to usurp.

"3. The suffering and hardship of our people compels prompt and determined action to achieve the results demanded by them. No sound reason could be offered to justify delay in implementing the clearly-expressed will of the people. This necessitates their control of the policy of all connected with Alberta's credit and retention by them of their undoubted full property and civil rights within provincial borders.

"4. We submit our legislation does not transgress the rights and privileges of other provinces to look after the welfare of their people nor does it interfere with the present business of banking.

"5. This government unanimously and wholeheartedly upholds confederation and would deeply regret the results if tension among a debt-ridden people were increased by faintest suspicion that federal government would side with plutocratic bankers alien to province against democratic Albertans earnestly seeking their economic freedom.

"6. Widespread innuendoes that dominion financial credit will be impaired if you do not take action constitute threats to the people of Canada who know that bankers alone possess the power to affect it.

"7. All members of cabinet convinced faulty financial system causes many difficulties in federal as well as provincial administration so most anxious that federal government leaves system's defence to those imposing it since the issue is universally recognized as financial tyranny versus democracy.

"8. We foresee and are completely ready to meet promptly and efficiently any retaliatory measures bankers may possibly endeavor to impose on our people.

"9. Nevertheless if the banks contend that they have the right to monetize the credit of Alberta at their sole discretion that their rights are supreme over the people's property and civil rights and if they wish to contest our legislation to assert publicly these claims and further if they will refrain from endeavoring to mask their opposition as heretofore by obstruction through obscure nominee appellants we will grant them fiat when formation of local directorates and the required licensing are completed.

"10. Now and at all times rest assured that it is the policy of our government to grant fiats to any individual or institution genuinely and openly seeking redress for any injustices.

11. We respectively submit that we are compelled by the mandate of our people to proceed with the enforcement of our legislation and with due deference we suggest that the responsibility of questioning its validity should be assumed by those desiring to render it abortive.

(Signed) "William Aberhart,
"Premier of Alberta."

MOWING LAWNS BEATS FARMING

Toronto, Aug 16 — A former Saskatchewan farmer mowed two lawns Saturday at Suburban Lorne park 12 miles west of here and said the $1.25 he received was a bigger net profit than he had earned in 10 years of ranching in Saskatchewan. He was working en route to a job waiting him at Bowmanville, 40 miles east of here and 1700 miles from his former home at Rosetown, Sask.

TRAVELLERS SWINGING BACK TO RAIL TRAVEL

St. John, N.B. August 16— The improvement in the economic outlook is being reflected in the increased passenger business and this increase can also be taken as an indication of the swing back towards rail transportation, stated F. L. C. Bond of Toronto, general manger of the Central Region of the Canadian National Railways, when leaving this city on his return to Toronto.

The present generation, Mr. Bond said, is not the same that "grew up with motors" and now that the motor car has lost its novelty, there is a noticable swing back towards the railway as a means of transportation and a greater appreciation of the advantages which the railways have to offer, including air-conditioning

APPEAL TO FEAR!!!

but the advertisers in the Tofield Mercury appeal to YOUR COMMON SENSE.

They ask you to consider the convenience of being able to get what you want when you want it. They remind you of the friendly, personal service they offer.

They bring to your attention the saving in time, patience and mileage effected in trading in Tofield. They give specific instances of good values at FAIR prices.

The amount of business given local merchants and professional folk in Tofield determines the type of service rendered.

This paper commends the people in Tofield who have the trade at home habit. It shows good common sense. Thereby is a strong community spirit fostered. The pity is that all do not trade exclusively at home.

Some Tofield merchants are themselves to blame, perhaps, for a good part of the trading done by Tofield people away from home—because they do not advertise the fact that they carry as good goods at as attractive prices as their competitors in neighboring cities and towns.

M.D. OF CORNHILL MEET

(Continued from front page)

Moved by Councillor McSporan, council is fully aware of Mr. Robt. J. Stirrett's farming operations, but previous recommendation for full pension is upheld

Moved by Councillor McSporan, Mr. Louis Dagneau, North Cooking Lake, be recommended for full pension.

Moved by Councillor Holmberg, Mr. C. F. Holmsten be recommended for full pension.

Moved by Councillor Mordon, council approve of sale of the S.E. 22-50-20 W4m, to George R. Yager, Tofield.

Moved by Councillor Holmberg, by-law No. 4-37 as per resolution effecting the sale of S ½ 4-50-20-W4m to Mr. O. C. Johnson, Hay Lakes, be given third and final reading.

A number of relief cases were considered and necessary resolutions passed.

Secretary was instructed to write to a number of rate-payers re ground fires on their property and requesting that due precaution be exercised in keeping said ground fires under control if not completely extinguished.

A number of accounts were ordered paid

Moved by Councillor Holmberg committee consisting of reeve and secretary be appointed to engage a tax collector, said committee to assist collector in his duties and direct him from time to time in his duties. If collector or collectors appointed prove unsatisfactory, committee to be empowered to discharge said collector or collectors. Remuneration to be left to discretion of committee.

Council then adjourned.

WOMEN'S ATHLETIC FEDERATION TRACK AND FIELD MEET AT RED DEER AUGUST 25

The annual provincial meet of the Women's Athletic Federation of Canada in track and field will be held at Red Deer on Wednesday August 25th, 1937, under the auspices of the Red Deer Sports Association the program of the day also including an official junior boys meet and a Highland dancing competition Entry forms and further information may be obtained by writing the Sports Association.

SOCIAL HOUR CLUB NOTES

The Social Hour Club elected new officers at their July meeting which was held at the home of Mrs. John Brown. The following were elected: Mrs. B. Ingram president; Miss Edith Davidson vice-president; Miss Ethel Brown secretary-treasurer; Reporters— Kathleen Ingram and Margaret Mitchell. The club held its annual picnic at Lakeview on July 25 with a large crowd attending and everyone reporting a good time. The August meeting was held at the home of Mrs. R. Barnes on Thursday, Aug. 12th. The September meeting will be held at the home of Miss Ethel Coombes.

ASK FEDERAL AID ON ALBERTA COAL

Drumheller Aug. 17— Fearing that crop failures in some western districts will reduce demand for Alberta coal the Drumheller board of trade has sent a resolution to Ottawa urging federal aid to keep the miners at work.

The resolution urges that all coal used in public buildings should be of Canadian origin that Canadian coal should be used for relief purposes in Ontario, and that the subvention policy and cost rate of $2 a ton now applying in Ontario be extended Code of prices on imported coal is also urged.

Rev. Elvin Snyder of Argentine, S. A., on furlough held services at Salem Mennonite Church, stopping over on his way to General Conference.

LINDBROOK

The continued wet weather is making haying a rather touchy business still in spite of it both haying and cutting of grain is going on between storms, one can hardly term them showers—especially after last Sunday's performance.

The weiner roast last Wednesday at the home of Mr. and Mrs. W. Glenn was well attended, the crowd gathered round the bonfire and toasted their weiners. Mrs. Glenn supplied the coffee and it was intended to have community singing round the campfire after but somehow that didn't work, either the men were too hoarse from shouting at their horses all day or Yes! We have no canaries! so hence no singing but there was a dance followed. It was held in the school house.

Some of our local boys viz Stan Smith, Jim Hooper, F. Rowland and Steele Murdoch who are working in the mine at Copper Mountain B.C. saw the recent accident when the hoist broke and dropped several levels injuring all its occupants, some badly. The boys were waiting on another level to go up when this hoist passed them full of yelling men. They saw it all and helped with the rescue work, some experience eh?

Last Friday the 13th, a farewell party was given at the home of Mrs. T. Genski by the members of the L.C.C. to Mrs. Elizabeth Glenn, widow of the late J. Glenn, who is shortly leaving for St. Marys, Ontario. A dainty lunch was served and afterwards a presentation was made by Mesdames Smith and Bracegirdle of a purse of money and a bouquet of flowers on behalf of the club. The best of luck, Mrs. Glenn, from all of us.

Mr. and Mrs. F. Evans are away on a visit to friends and relatives in Athabasca.

Mrs. E. Wilson and Mrs. McCowan and Mrs. K. W. Hooper are away at present visiting at the coast.

We forgot to report the "Movies" at the school last time, not being present we can't say much about them but judging from those lucky enough to be there it was fine, so we hope they will come again.

SAY INTEREST RATES IN WEST FAR TOO HIGH

London, Aug. 17— While British financial houses agree that interest rates in western Canadian loans are too high and that some adjustment is necessary they believe that such adjustment could be better carried out if some central body existed with whom negotiation could be carried on is the editorially expressed opinion of a number of leading newspapers in commenting on the personnel of Canada's new commission on finance and taxation.

Importance of the commission's findings to thousands of British investors holding Alberta and Saskatchewan securities is stressed and marked approval of the men named on the commission is expressed.

Lord Beaverbrook's "Daily Express" comments on its financial page at length and the chief financial writer of that newspaper forecasts a recommendation by the commission of more control over provincial borrowing powers by federal authority. It is pointed out in this report that Australia assumed responsibility for the borrowings of the various states external debts during the slump.

"A similar move by the Canadian government would be very welcome the City. It is realized that the rates of interest on loans to western provinces and municipalities is too high but it is felt that any adjustment could be best dealt with by a [illegible] authority."

Suggestions are also heard in financial circles that smaller provincial city loans in western [illegible] be amalgamated into new issues at lower rates and the outcome of the commission is being awaited with keen interest.

'THE TOFIELD MERCURY

Vol. XVIII., No. 28 Thursday, August 26th, 1937 $2.00 Per Year. To U.S.A. $2.50

School Opens September 1st--Changes In Staff

Two special meetings of the Tofield school board have been held within the past week, resulting in the decision to again teach grade 12. The fees for this grade will be somewhat lower than in the two previous years when this grade was taught, being $40.00 for a full course or $8.00 per unit where less than a full course is taken with a maximum fee of $40.00. Mr. McIntyre's resignation was received with regret at the first meeting. To fill the vacancy Mr. Malcolm W. McDonnell has been engaged. Mr. Lawrence R. McLeay, former teacher at Lindbrook has been engaged to teach grades 7 and 8. The full staff will consist of:

Miss C. Forster, grades one and two; Miss Ruth Wingrove, grades three and four; Miss M. Stewart, grades five and six; Mr. L. R. McLeay, grades seven and eight; Mr. M. W. McDonnel, high school teacher and ass't principal; Mr. O. P. Thomas, high school teacher and principal. School reopens on Wednesday, September 1st.

SOCIAL ACTIVITIES

During the past week a number of teas and social gatherings have been enjoyed. Amongst them are Betty McCarthy, who is spending her holidays at her home here entertained a number of friends to tea one day last week.

....

On Saturday afternoon last, Mrs. Stinson held a tea in honor of the Misses Annie Swift and Ella Taylor who are leaving shortly to train in the Royal Alexander hospital

....

Miss Gwen Firth entertained friends to tea on Monday afternoon.

....

On Tuesday evening a number of [illegible] gathered at the Allan home to bid farewell to Ella Taylor and Annie Swift. The girls were presented with photograph albums as a token of remembrance from their friends.

Alberta Poultry Industry's Grand Old Lady

By courtesy of the Canada Poultryman, it gives us much pleasure to reproduce picture and text material taken from that journal. Mrs. Cookson is too well known in this district for us to elaborate on her charming manner, sterling qualities and expert poultry management. It is however a pleasure to note that Dominion wide recognition has come to her. The following is taken from the Canada Poultryman:

Taken as she was feeding her chickens one evening in late June, we are proud to publish this picture of Mrs. J. W. Cookson of Tofield Alta. Coming to Canada forty-three years ago to join her husband who had established himself on a farm, for the past very many years Mrs. Cookson has been a successful breeder of white Leghorns and American Mammoth Bronze Turkeys. Her turkeys have become known right across the Dominion by competing at the principal shows and to this day her flock is among the best in the west.

In egg laying contests, Mrs. Cookson's White Leghorns have long been prominent, for one year her pen gave all the B. C. breeders a run for their money at Agassiz and another year they took first at Lethbridge.

Elderly in years but ever young in spirit, she is as keenly interested in poultry activities as ever. Her flock of over one hundred poults is a picture of health, as also are her Leghorns and a flock of R. I. Reds bought as chicks from Ken Arnould of Sardis, B. C.

It used to be the writer's privilege to make periodic calls on Mrs. Cookson but it is now exactly ten years since the last visit.

Mr. and Mrs. Cookson look the same now as then. Pioneers in western Canada's Poultry Industry, they have done well by their birds and the birds have done well by them. Beloved of all who know them, it is to be hoped they will continue actively with their poultry for many more years. —F. W. B.

Dr. McPherson M.L.A. Addressed Social Credit Meeting

Tofield Social Credit group, after a [illegible] holiday resumed activities wh[illegible] held its monthly meeting in the Insti[illegible]tute Rooms. President J. Fergus[illegible] the chair. Dr J. L. McPherson, M.L.A., was present as guest speaker [illegible]

Chairman in calling the meeting to order made a few remarks taking as his subject, how the Financier makes profits in times of depression as well as in times of prosperity, closing by quoting Rothchild who said "give me control of finance and I [illegible] not who makes the laws."

Dr McPherson then addressed [illegible] meeting, stating he was not at liberty to make known the moves of the government might have to make in order to fight politics, while Social Credit was not introduced as a political [illegible] there was no denying the fact that [illegible] had been dragged into politics by the enemies of credit reform, but assured listeners that our government was determined with the support of the people, to put Social Credit into operation in the near future. He also spoke very highly of the experts now in the employ of the government. At the close of the address the meeting was thrown open for questions and [illegible]

Thos. G. Dark, eyesight specialist and licensed optometrist will be at the Royal Alexandra hotel, Tofield, on Saturday morning, September 11, from 11 a.m. to 12.30 p.m.

THE GRISWOLDS LEAVING — BIRD AND CAP TO STAY

If you lived on Main Street, Tofield for 18 years each morning, except Sunday, some time before eight you would hear the hoof beats of horses, the tinkle of harness and the noise of a vehicle going by. It would be Fred Griswold on his way to the C. N.R. station. The weather made no difference, hot or cold, wet or dry, calm or windy, Fred clad according to the seasons in lined leather coat, rain slicker or just plain sweater would be going down the street at that time. Just how many trains Fred has seen come and go is probably beyond computation, but it is safe to say it is a large number. For many years Bess and Bird were the motive power employed, two nice sleek blacks, who knew the dray business from A to Z—at least they appeared to. Some two years ago Bess was pensioned off and Bird has a new work mate.

After being in the draying business for about 17 years and facing all kinds of weather conditions, Mr. F. Griswold with Mrs. Griswold is leaving for near Portland Oregon, where they will reside in the future.

The business and equipment has been purchased by Mr. D. McCarthy, who will carry on.

Mr. and Mrs. Griswold expect to be leaving about October 1st.

TRAIN HITS CAR; TWO MEN KILLED

Wetaskiwin, Aug. 24—Stalled on a level crossing near Navarre, five miles south of here, one Wetaskiwin man was killed instantly and his companion was injured fatally at 9.15 a.m. Tuesday when a coupe in which they were riding was crushed by the "Chinook," crack C.P.R. train which operates between Edmonton and Calgary.

Victims

Norman Sorenson, 21, killed instantly.

Otto Stein, 27, injured fatally.

The car was demolished, its wreckage carried 150 feet down the track from the point of impact

Stein died in hospital here 90 minutes after the crash.

E. W. ROGERS

Noted Agricultural Journalist Returns From World-Wide Trip

DOCTOR E. CORA HIND

When greater perils men environ
Then women show a front of iron;
And, gentle in their manner, they
Do bold things in a quiet way.
—Thomas Dunn English—BettyZane

The innumerable friends of Dr. E. Cora Hind, or Miss Hind as she affectionately has been known throughout the West for very many years, will tender her a most hearty welcome home from the long and arduous trip she recently undertook to make.

Miss Hind has returned from a world tour made by her in the interests of the Western Farmer and of Canadian agriculture. She visited 26 countries, travelled 35,000 miles by aeroplane and was away two years and three weeks. Those who are at all familiar with world travel these days, will realize that throughout her long journey Miss Hind must have suffered many discomforts, and in her thousands of miles of air travel certainly faced risks of peril.

This extensive journey which we suggest for a lady of Miss Hind's age may be said to be memorable, is but one of a long succession of difficult, usually uncomfortable and sometimes hazardous trips that Miss Hind has undertaken in the interests of Western Canadian farmers. Miss Hind was, for instance, the first woman to travel on a wheat cargo boat from Port Churchill through Hudson Bay to Liverpool in order to observe for herself at first hand something of the hazards of that particular grain route.

Throughout a long life, year after year, Dr. Hind has constantly made long journeys in all weathers and under all conditions throughout the farming districts of Western Canada, travelling thousands of miles each year in order to be able to tell the world the truth as she saw it, about Western crops, and about the problems of Western farmers, and in order, in addition to make farmers better acquainted with some of the latest findings of agricultural science, so that they might be assisted in making their farming operations more profitable.

Steadfastly through her long lifetime Miss Hind, "gentle in her manner has done bold things in a quiet way."

The Journey's Object

Dr. Hind's recent commission, representing the Winnipeg Free Press, was first to make the governments and people of many foreign countries acquainted with the value and quality of Canadian agricultural products and secondly to learn what the actual situation was with respect to the maintenance of the present volume of our export sales to those countries and of the possibility of increasing overseas markets.

Those who have had the privilege of reading from time to time in the Winnipeg Free Press Dr. Hind's most excellent articles about her observations and findings, will agree that she has made numberless foreign people and many governments, better acquainted with Canadian farm products and has brought back information that will be of the utmost value to our farmers, to merchants and to our governments.

Agricultural Writers

Dr. Hind represents a class of workers, the journalists, who render a most important service to farmers and to agriculture in general. They perform each and every day, in Canada, precisely that form of work which Dr. Hind has done so well abroad on this particular trip. Through the medium of the publications with which they are associated they make our farmers acquainted with the latest findings in agricultural science, and with new methods of practical work. In addition also they relay to merchants, to agricultural industries and to the world at large the facts about the details of the farmer's work and of his crops.

In the long chain of services required to produce field crop and livestock products, to handle, process and market them in the countries of the world, professional agricultural observers and writers such as is Dr. Hind make a contribution to farmers and to agriculture that is most essential and valuable but which, unfortunately, is not usually known nor appreciated as well as it should be.

Let us hope that Dr. Hind's spectacular two years trip, and the valuable observations and recommendations that she has brought back will be a means of increasing the appreciation which should be given to those good people—the journalists and writers—who serve agriculture so well.—Searle Grain Co. Ltd.

A six-foot man would have to leap 120 feet to equal the athletic ability of the frog which can easily jump 20 times its length.

HUNTING NEAR; DRIVE WITH CARE

Motorists from far and near are expected to be rushing to the choice spots in this province before long, when the game shooting season opens.

Under such conditions, officials of the Alberta Motor Association are urging the importance of safe driving, no matter how keen the motorist may be to get to some popular hunting spot ahead of others.

Too often have serious accidents been caused just because a driver did not take proper precautions and observe the primary essentials of safe motoring. Reckless driving by hunters cannot be condoned any more than by anyone else.

Official announcement was made lately that the season for ruffed grouse will be open from October 1 to 15 inclusive in the north and northwestern parts of the province. The bag limit is five for the day and 20 per season. There is an open season for Hungarian partridge, south of the North Saskatchewan river, from October 1 to November 30.

Shooting of ducks and geese will be permitted north of the Clearwater and Athabasca rivers from Sept. 1 to Oct. 30, inclusive. In the region south of these rivers the season will be from Sept. 15 to Nov. 13, inclusive. Bag limit for ducks is 12 per day and 100 for the season. For geese, the limit is five per day and 25 for the season.

Season for deer, moose and caribou is from Nov. 1 to Dec. 14 and for mountain sheep and mountain goat from Sept. 1 to Oct. 30, inclusive.

HELP PRESERVATION OF FARM FENCE POSTS

Results of experiments for the preservative treatment of fence posts at the Dominion Forest Nursery Station at Indian Head, Sask. indicate so far that merely painting the butts or dipping the butts in the preservative does not have much effect in prolonging the life of the post. Creosote is probably the most efficient preservative but to be effective the butts of the posts should remain immersed in the oil from 20 minutes to an hour, during which time the temperature of the creosote must be maintained at from 180 to 226 degrees F.

Round cedar posts of good quality will last for many years on average upland prairie soils, but their initial cost is rather high. When the Indian Head Nursery Station was first established in 1903, untreated round cedar posts were used for the boundary fence, and even now, after 33 years, probably 50 per cent of the original posts are still standing. The average life of such posts may be conservatively placed at 28 years. Split cedar posts, however will often rot out after ten to eleven years' service, but their life could undoubtedly be prolonged for another ten to fifteen years if they had first been treated with creosote before being set in the ground. In the park areas, aspen, poplar and willow are most commonly used for fencing but unfortunately these varieties have a short life as posts and it is necessary to replace them every few years. This also applies to other varieties that can be fairly easily grown on the farm, such as Russian poplar, cottonwood, maple, and cultivated willows.

Experiments were started on the Indian Head Nursery Station in 1917 by using Russian poplar posts grown in the nursery and treated with creosote. Thirty-five posts were used in this initial test. Twenty-two of the posts were given an open tank treatment with creosote at a cost of around 17 cents per post. Thirteen posts were untreated to be used as checks. The posts were all of small size, ranging from 1 1-2 to 2 1-2 inches in diameter at the top. In four years the untreated posts were all rotted off at the ground line. The treated posts which are still standing after 20 years remain in excellent condition, showing no signs of decay at the ground line. This demonstrates that the Russian poplar, when untreated, has practically no value as a fence post, states The Forest Nursery Station Report, but may be expected after a comparatively cheap treatment to stand up from twenty to twenty-five years.

In 1926 over 400 posts were set out, one-half treated with creosote; the other half with zinc chloride. The posts were of native aspen poplar and nine other varieties grown in the nursery. In 1928 about 400 more posts, mostly aspen poplar, tamarac and cedar were set out. Half were treated with a preservation known as creosol, the remainder were untreated. With the exception of the cedar posts, practically all the other untreated posts set out in 1926 and 1928 have already rotted off. It will be some years before final results on the life of the treated posts is available.

The humming bird has been clocked at speeds higher than 40 miles per hour.

THE WORLD OF WHEAT

More "purchasing power". That's what is needed!

On all sides we hear of this need today. discussion about it ranges all the way from dignified debate to acrimonious dispute.

It is quite apparent, however, that much of the argument is wasted energy, for those who are discussing and disputing have often different ideas as to just what they mean by "purchasing power".

For instance; farmers who may have a thousand dollars today sometimes consider they have the same "purchasing power" as a farmer who had a thousand dollars in 1913. What they have is the same "spending power" but the "purchasing power" is less, because a thousand dollars today will purchase about 74 percent of the goods the would purchase in 1913.

A German miller with a million Marks has the same "spending power" as he had in 1913, but his goods would at be more then about 75 percent as compared with 1913, and his "purchasing power" in Canadian wheat might be nothing at all, unless his marks can be exchanged for Canadian dollars, which is only possible if the German people can sell their own goods abroad.

So here the one expression, "purchasing power" has three entirely distinct meanings.

Following factors have tended to raise price:— Canadian wheat carry-over down to 37 million; Australian wheat crop privately estimated at 140 million; Moisture in the Southern Hemisphere still somewhat deficient; Increased hostilities between China and Japan; Germany buying Argentine corn; Italy purchasing American wheat— Money inflation apparently beginning to be felt in prices of commodities.

Following factors have tended to lower price:— Broomhall estimates world's import demands will be only 400 million—Russia offering wheat freely—Estimate Italian wheat crop 296 million vs 225 last year—Indian wheat estimates 236 million vs 262 last year—Danubian countries will have generous supplies for export—Heavy exports of citrus fruits from Palestine.

NATIONALLY OWNED RAILWAY PAYS WAY

Winnipeg, Man. August 16—South Africa has a nationally-owned railway system that not only pays its own way, including interest on investment but also covers with its own surplus the $250,000 operating deficit of the nationally-owned air line now carrying all first class penny postage without surcharge.

So stated T. H. Watermeyer, of Johannesburg general manager of the Union of South Africa's transportation system who left over Canadian National lines a few days ago for Jasper Park Lodge.

"We must have railways — they are demonstrably the cheapest form of transportation — and the only way to maintain them is to control highway bus and truck transportation", he declared.

A staunch advocate of air traffic, Mr. Watermeyer believes Canada's national airline, subsidized by air-mail contracts, should soon pay its carrying charges. Though distances in Canada are greater, he did not think the Trans-Canada Air Lines would have to operate under such serious difficulties as the South African airline.

CATCHY SLOGAN RULED OUT

Newark, N.J. Aug. 16—"Get lit at the lighthouse," is no kind of a sign to hang outside a saloon, State Alcoholic Beverage Control Commissioner D. Frederick Burnett ruled.

Ordering an Asbury Park woman to remove the sign Burnett wrote her:

"To be sure it is a smart, catchy phrase and does no harm if your customers disobey it. If however, I allowed you to get away with it then shortly we would be flooded with signs such as 'get soused at Sousa's' 'stewed at Stewarts' or 'Pie-eyed at the Pianola.'"

SOPWITH TO TRY AGAIN TO CAPTURE CUP

Fall River, Mass., Aug. 16.—T. O. M. Sopwith, intimated at a banquet tendered him by the British-American Society he might return for another try at the America's Cup.

Accepting a handsome large trophy of Endeavor II Sopwith said:

"We came over to do what we could to take the old cup back to England, even if it were only for a short spell. We have by no means reached the finality of our design."

Molten lava sometimes has a temperature of 3,000 degrees F.

MISSIONARY SAILINGS FOR ORIENT HALTED

Toronto, Aug. 17—The United Church of Canada today cancelled all sailings of missionaries for China and Japan. A conference of missionaries now here on furlough will be held later today, it was announced to decide upon plans for their own return.

Rev. A. E. Armstrong, secretary of the board of foreign missions, curtailed his vacation and returned to Toronto for conferences on the unsettled situation in the Far East. Dr. Armstrong said a party of missionaries now on route to China will be held in Japan or re-routed.

In the party are Rev. and Mrs. Earl Willmott, Rev. and Mrs. Lewis Walmsley, Miss Ruth Sharpe, Ida, Ont., and Miss Dorothy McKenzie, Kincardine. Mr. Walmsley is from Milford, Ont. while the parents of Mr. Walmsley live in Toronto.

Missionaries of the United Church known to be in the Shanghai zone, now the scene of land, sea and air battles between the Chinese and Japanese are Dr. and Mrs. Howard G. Barry and Misses Margaret Brown and Maude French.

Mr. and Mrs. George Slade of Vancouver are reported as stationed only a mile from the bombed area in Shanghai.

OPEN 37 YEARS CAFE IS CLOSED

NEW YORK, Aug. 11—William Ritcher, proprietor of Drake's restaurant in the Times Square district sat among 800 empty chairs Tuesday, looking at a sign on one of his menus.

"Drake's never closes" it read.

For 37 years, day and night, the sign was true. But not Tuesday. Drake's was closed by a walkout of its 165 employees. They sought higher wages and other concessions.

Ritcher said he would give up the restaurant in which he worked up from busboy to owner before he would sign a contract with a union or rehire the strikers.

SCORPIONS ARE EMPLOYED BY CHINA MEDICS

Kiwanians at their weekly luncheon in the Macdonald hotel yesterday were regaled to an intimate story of the origin and history of medicine in China by Col. Sewart Dunn of the faculty of chemistry at the University of Alberta who during his residence in various parts of the new strife-beset and ancient country, had a first hand opportunity of watching its operations.

After hearing of some of the concoctions with which Orientals dose themselves in their quest for health, it seemed particularly apropos that the lunch preceded the discourse rather than the reverse.

"The element of superstition does not exist in Oriental medicine to anywhere near the extent that the Occident popularly supposes," said Col. Dunn, "and today we find some of the foremost drug manufacturers of the west turning to prescriptions that have been dispensed in China for 4000 years."

While herbs play a very large part in the compounding of eastern curative elixirs, said Col. Dunn, worms, insects of every description, even to scorpions and things so remote from materia media as stag's horns also find their place, and, oddly enough, with surprisingly good results.

Orientals, the colonel made it very plain, seek the fount of vigor and youth in their therapy, not prompted so much by the idea of indulgence but so that they may have large followings and in the dim future when their souls have been projected beyond the bounds of eternity, they may have their worship and their adherence.

The lecture, intensely interesting in itself, had the added interest of a large number of lantern slides.

TAXLESS BLISS SPANS 4 YEARS FOR HOUSEHOLD

St. Paul Aug. 16—Luckiest household in St. Paul as far as rents goes at least is that of Mrs. G. E. Foster and son John.

During an investigation of tax delinquent lands and buildings, Len Sommer, city valuation expert called on the Foster home which was included in his list of properties to be investigated.

"Are you the owner?" Sommer asked Foster.

"No."

"Are you renting?"

"No."

"Are you related to the owner,"

"No."

"Has anyone been around to collect the rents?"

"No."

"How long have you lived here?"

"About four years."

Inquiry revealed the Fosters had moved in when friends told them the previous tenants who also had not paid rent moved out. Taxes have been delinquent since 1929.

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

BRIGHT'S DISEASE

Bright's disease takes its name from Richard Bright, an English physician who, in 1827, published his observations on diseases of the kidney.

The human body is provided with two [illegible]. Their function is the removal of waste material, the product of the working body brought to the kidneys in the blood. They are indispensable organs; the life of the body cannot continue if they cease to function.

The kidneys may be damaged by being called upon to remove an excessive amount of waste, when they simply break down under the overstrain. They may be damaged by poisons which are produced in the body by germs and which are carried to the kidneys in the blood stream.

It should be borne in mind that, during childhood, when scarlet fever, tonsillitis or any other infection occurs, whether severe or mild, germ poisons are produced. The proper care in such cases is necessary in order to protect the kidneys from harm.

The focal infection in tonsils, teeth, sinuses or other parts, which makes for a chronic poisoning of the body, frequently leads to nephritis. Faulty habits of life which strain the body, may break down the kidney function.

Nephritis exists in varying degrees from a very slight chronic condition to a severe acute stage.

It is often discovered by accident. The individual, not suffering in any way, considering himself perfectly well, comes up for life insurance examination and, much to his surprise, learns that he has kidney disease. Such a chance discovery is fortunate because it permits of the proper early treatment which is so necessary if the condition is to be prevented from becoming more serious. It is surely not wise to leave such vital things to chance. Is it not much more reasonable to have a health examination once a year in order to know if abnormal conditions do exist, and then to go under treatment promptly in the earliest stages of the disease.

The prevention of nephritis begins early in life. It begins with the prevention of the common communicable diseases and their proper treatment, if they occur. No focus of infection should be allowed to continue untreated. Proper diet, the avoidance of any excesses in food or drink, the use of sufficient water, will prevent abuse of the kidney. Throughout life, the periodic health examination to detect any deviation from normal, allows for early correction of the underlying conditions causing the trouble.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

UNITED STATES IN ENGLAND IS DEDICATED

Brookwood, England, Aug. 16.—The only United States war cemetery and memorial chapel in England were dedicated yesterday in the presence of Ambassador Robert W. Bingham and members of the British cabinet.

Alfred Duff Cooper, first lord of the admiralty, made a gesture of friendship to Germany, pleading for a "new co-operation" among nations.

"The shroud of glory the war dead wove is enough to cover both victors and vanquished," he said.

British rifle volleys echoed across the resting place of 560 American soldiers and sailors.

BREAD AT THREE LOAVES FOR DIME IN REGINA STRIKE

Regina, August 16.—With no truce in sight, Regina's "bread war" entered a new phase Saturday as prices sunk to lowest level in the city's history. Bread was being offered in some stores in the east end of the city Saturday at three loaves for a dime.

The lowest price recorded Friday when most stores were selling for five cents was the four-cent-a loaf rate offered by one store. The price was still in effect Saturday.

25c PER LETTER FOR OCEAN MAIL

Washington Aug. 24—Air mail to Europe, perhaps to be inaugurated this fall, probably will cost 25 cents a letter, U.S. postal officials said Tuesday.

British Imperial Airways and Pan American lines already are completing test flights over trans-atlantic routes they hope to inaugurate by November.

SHOULDERING BURDENS

WHATEVER the ultimate outcome of the present economic movement in Alberta may be, it is to be sincerely hoped that men and women who have seen this province emerge from the pioneer stage to its present state of development, do not become estranged. Having shared both prosperity and adversity, happiness and sorrow, booms and depressions, it would be disastrously foolish for people to allow themselves to drift into opposite camps with a no-man's-land of thought between them. There always has been and there always will be a difference of opinion on public questions, but this difference of opinion can exist in an atmosphere of tolerance and mutual understanding.

In writing comment on current events it is not particularly difficult to assemble words that sound nice and mean little. It is more difficult to assemble words that are the acme of clarity and impossible of being mis-interpreted. Last week we were pleased to publish a letter received from Mr. Harold Weatherill relative to an editorial published in a previous issue. We have known Mr. Weatherill for quite a long time, have seen him at work and what is more important at competitive play. We would say there is nothing wrong with his style or with his mental faculties—even so he misunderstood the words so carefully written.

During the past few years in common with almost every other person, we have read scores, perhaps hundreds, of articles dealing with the problems raised by the depression. Included in many of them there was one dominant note, namely, that a greater equilibrium of income, as between individuals was necessary, if any real progress towards solving the depression problems was to be made. This does not necessarily mean equalization of income, but it was recognized that there was too much difference between the intermittent low income of a large class of society and the assured higher income of another class. In the editorial referred to when mentioning the "weak" and the "strong" we were careful to place in parenthesis the words "from whatever cause." This was done because so many different things go towards making men either financially weak or financially strong, and while many of these things may be within the power of the individual to alter, many are not.

Some long time ago no less an authority than Babson wrote words to the effect,—it may, sometime in the future, be found advisable for a state to pay its citizens a dividend, but the dividend will have to be earned and come out of taxation. The foregoing is not a quotation being set down from memory. Now, in any form of state financial dividends paid to citizens and first collected by the state through taxation, it is quite obvious that those with the greatest incomes would be called on to pay the largest amounts. Thus one man might receive five dollars in dividends and pay ten dollars, while another might receive five dollars in dividends and pay no tax. This is precisely what we meant when we wrote "the strong would shoulder the burdens of the weak."

PASTORAL SCENERY —

IT is customary for residents of any particular district to boost their own district. Naturally, to them, their immediate surroundings have a charm unseen in other parts. But occasionally one runs across stretches of country that by sheer merit forces recognition. This week we paid a visit to Mr. and Mrs. McGinitie's place to again see their fine garden and orchard and coming out of the gate and turning north we were confronted with a particularly fine view. The McGinitie place is situated on a small rise after a steady incline a mile or so in extent. Looking across to the north one could see a broad panoramic view of green, golden and where there was summer-fallow, black fields. Some were in stook and some still uncut. It was really a fine view and it would be difficult to find a better agricultural view anywhere.

RICE POLISHINGS FOR DIGESTION'S SAKE

AN advertisement of a well-known drug firm in the British Medical Journal, offers a proprietary brand of rice polishings concentrate which is stated "assists digestion in adults," "promotes growth in backward children," etc.

The ordinary rice retailed has had its outer coat polished off, thus removing much, if not all, of its nutritive qualities. Having taken our fill of this, we are now, its seems, to replace the deficiencies by a dose of polishings concentrate.

Commerce removes the outer covering before selling the rice to us, and the chemist sells the covering back to us in capsules under a fancy name so that we may all be assured of our vitamin B. Of a truth, a strange world.—Anti-Vivisection Journal, London.

FOUNDER OF FIRM, JOHN GAINER DIES

John Gainer, 80, founder and president of the packing firm of Gainers Limited, western pioneer and resident of Edmonton for the past 46 years, died late Thursday at his home, 9702 104 st. He was known throughout the west as a lifelong worker in the interests of Alberta livestock and a prime mover in the long struggle to find its markets in other provinces and abroad.

Mr. Gainer had been in impaired health since he suffered a slight stroke about a year ago. Recently he fractured a leg bone in a fall and had been confined to bed during the past week.

His death brought numerous expressions of regret and tribute among business leaders in the city.

The veteran packer and one-time small town merchant was born July 10, 1857 in St. Mary's, Ont. and received his early schooling there. As a young man he moved to North Dakota, where he laid the foundations of his broad knowledge of business practice.

In North Dakota in 1882 he married Miss Amy Crawford, who died in Edmonton in 1919.

In 1884 they left the U.S. and made their home in Manitoba, living for a time at Pilot Mound and later at Emerson in the pioneer days of the prairie west. Mr. Gainer was the owner of a thriving small general store at Emerson while the famed Riel uprising was making history.

While still living in Manitoba the young merchant sensed the future that lay in development of western Canada's livestock industry and resolved to identify himself with it as a life work.

CROP RESTRICTION PLANS IN UNITED STATES

The United States is now well launched on a new agricultural policy which had its inception with the commencement of the depression and has for its objective a scale of domestic prices for agriculture which will balance with the returns obtained from other occupations. The aim is to protect the United States farmer from the vagaries of world prices which are liable to reach abysmal depths when the world supply is comparatively large.

Prior to the depression the general United States attitude towards agriculture was much the same as it is in Canada. Farmers were expected to go on producing blindly and the price for the main commodities was based on world demand. At the same time the majority of the things the farmers required to buy were made in the United States behind high tariff barriers and consequently at an artificially high price.

At the inception of the depression President Hoover inaugurated a plan calculated to control prices on the exchanges but this was found to be inadequate. Then came the Agricultural Adjustment Administration with bonuses being paid to farmers for decreased production, the money being raised by processing taxes. In January, 1936, the Supreme Court The soil Conservation Act was then passed by which about $500,000,000 annually is being distributed to farm owners on condition that they restrict crop production. This year the United States has large crops. In the case of wheat a substantial surplus has been created but the failure of the crop in Western Canada makes room for the U.S.A. in inertttttnee room for the U.S.A. in international trade. This is not likely to occur again and the government of that country is worried as a consequence. Farmers are being warned of the possibilities of low prices next year if a large winter wheat crop is seeded this fall. —Wheat Pool Bulletin.

THREE-MONTH BABE IS SAID ABDUCTED

Chicago, Aug. 24—A grief-stricken father and mother sent police on a widening search Monday night for their three-months-old daughter, who disappeared mysteriously from grocery.

The missing infant was Diane Lucas, blue-eyed daughter of Herman Lucas, a carpet layer, and his wife, Dorothy, 22.

When Mrs. Lucas finished her shopping and found her daughter gone she thought at first it was a joke, she sobbed to police Captain O'Connell.

But when hours passed without news of the child, both she and her husband, 31, collapsed in tears. Neither could offer an explanation of why the baby might have been carried off.

Captain O'Connell expressed the opinion the infant had been abducted.

Group suicides—in which mothers and children died together—cost 90 lives in Tokyo last year.

TRIAL ORDERED FOR OLDS MAN

Family Quarrel

OLDS, Aug. 24—Albert Farrar, 20, was committed for trial in the supreme court of Alberta Monday, following completion of a preliminary hearing of charges of murdering his father, 57 year-old Fred Farrar, during a quarrel in their farm home 15 miles east of here July 28.

The fall sessions are expected to open in Calgary, October 6th. In the meantime Farrar will be held in Lethbridge jail.

Details of the alleged bickering and quarrel which preceded the shooting were given Monday by Mrs. Fred Farrar under protection of the Canada Evidence act. Early in the forenoon of July 28, she said, Albert asked if she knew if Fred Farrar had some money of his. She said she suggested to Albert that he ask his father, and the son's insistent demands so wearied the father that Fred Farrar threatened to shoot Albert if he did not desist, she swore.

After finishing the late chores, she said, Albert told his father he would like to "have my money back."

"Fred told Albert not to accuse him of stealing the money or he would shoot him." Mrs. Farrar said. "I went into the bedroom and heard Albert say 'Be careful, it's loaded.' I heard a shot, looked around and saw my husband standing with his hand pressed against the left breast."

Mrs. Farrar said she had asked her husband how much money he had with him the morning of the shooting and he had shown her two $20 bills and a $10 bill. A few days before he had only $10, Mrs. Farrar said.

FARMERS BUY EQUIPMENT

For the first time since 1929 Southern Alberta farmers are buying field and harvest equipment to any appreciable extent.

Sales of binders, tractors, "swathers" and combines are all considerably up over last year. The areas that are harvesting a fair crop are finding themselves able to replace worn out machinery at last. Sales of binders is good, but there is not much demand for combines, particularly in the north as there are so many weeds in the grain that combines are not practical. There is small demand for threshing machines. Good used machinery finds ready sale and farmers are also buying a substantial number of "barging" outfits, which save both twine and stooking.

Officials of implement companies say prospects are much better than last year and they are hoping collections will be good.

ONE BATHING SUIT NOT ENOUGH FOR THREE

Hamilton, Aug. 16.—One bathing suit is insufficient for three persons, Magistrate McKay ruled Monday, fining Leonard Burning and Lawrence Gallagher $25 or 21 days in jail each on charges of indecent exposure.

This allegedly was the procedure: Burning donned the suit first, entered the water, and then removed the suit tossing it to Lawrence Gallagher. And so on, until brother Michael was in the water wearing the suit. Michael was out of the water again and about to reverse the process when a constable arrived.

Bank Of Montreal Crop Report

General—In the Prairie Provinces grain cutting is well advanced and threshing has begun in Manitoba, Saskatchewan and southern Alberta. In Manitoba and western Alberta wheat yields from fair to good, and in northeastern Saskatchewan some fair yields of wheat are being obtained. Early threshed wheat is of satisfactory grade. In Quebec province crop prospects in general continue to be satisfactory. In Ontario good average crops of the main staples are expected. In the Maritime Provinces grains potatoes and apples are all doing well. In British Columbia crops of hay and of peaches are heavy and prospects are satisfactory for grain and roots and for tree fruits generally. Details follow:

Prairie Provinces

Alberta—Harvesting is well under way but operations have been delayed by rains except in the south, where weather is favourable. Many good crops in the central areas have been damaged by severe hail. A heavy growth of weeds has been detrimental to crops in the east central area. Pastures and feed conditions are satisfactory. Irrigated grain and beet crops are in favourable condition.

Saskatchewan— Harvesting operations are progressing rapidly under favourable weather conditions. Some fair yields are being obtained in the northern portion of the east central district and in the northeastern section where crops show the greatest promise. Elsewhere crops vary from complete failure to small returns. Grasshoppers are numerous. Feed supplies are scarce.

Manitoba—A large percentage of the wheat is cut and threshing is becoming general. Crops are light in the extreme western region but in the other districts wheat yields will be fair to good. Coarse grains generally are satisfactory. Pastures are good and feed supplies adequate.

THE WHEAT MARKET

The trend of world wheat prices has followed an erratic course of late, being effected principally by heavy grain deliveries in the United States and by threats of drouth in Argentina and Australia.

It is now obvious that the northern hemisphere's wheat crop will be at least 275 million bushels larger than last year and this despite the small crop in Western Canada. This leaves the production of the southern hemisphere a matter of great importance in its general effect on prices.

Western Canada's small crop should have little bearish influence even at the period when the bulk of the deliveries go on the market. If there ever was a year when hedging should be readily absorbed it should be this one. The entire crop may not exceed 150 million bushels and not much more than 100 million bushels may be delivered.

The war in the Orient will hardly effect world wheat prices directly as comparatively little imported wheat is used for food in China and Japan. —Wheat Pool Bulletin.

A large maple tree grows as much as 2,000 square yards of leaf surface annually.

ENCOUNTERS WIFE THOUGHT DEAD

BEXHILL, Sussex, Aug 20 —Rev. V. O'Meara identified the body of a woman recovered from the sea as his wife.

The next day he heard a coroner's jury decide she had drowned herself while of unsound mind and two days later he met his wife walking along a street here.

Hearing the sequel, the coroner said: "It is a most extraordinary happening. I sympathize with the poor man, for it must have been a terrible shock to him to meet his wife in that way. In the meantime the other unknown woman has been buried at sea."

A married man never knows what he is missing until he counts the change in his pockets next morning.

Sunlight is 618,000 times as strong as moonlight, according to a European natural scientist.

AMISK CREEK

The Ladies' Aid meeting was held at the home of Mrs. P O Flaaten on August 19th. All the members and a good number of visitors were present. The next meeting will be held at the R. O. Berg home.

Mr. and Mrs. Berild entertained the Young People's Association on Wednesday evening. About 60 young people were present and all report a very enjoyable time.

Congratulations to Loretta Moen, who was confirmed with the class in Bardo on Sunday.

Rev Hoverstein conducted the services at the church on Sunday afternoon. Nearly the whole congregation and many friends attended. After the service they gathered at the E. A. Moen home where the ladies served lunch. During the afternoon Mr E. A. Moen presented Rev Hoverstein with a purse of money from the congregation and his many friends as a token of esteem and appreciation of 27 years in the church's service.

Sunday evening both young and old pleasantly surprised Pearl Patterson at her home. A very pleasant time was spent playing games and singing. Pearl who is leaving this week to train as a nurse at the Misericordia hospital, was presented with a small sum of money from her many friends, along with their good wishes.

Merl Hylerud has accepted a school at Grande Prairie, northeast of Sexsmith. She will be leaving soon.

Olaf Moline has been visiting with friends at Wildwood for a few days.

We regret to report that Dan Brenneman is very ill with rheumatic fever.

Mrs C. Erickson and baby son, Donald and Misses M. and H. Anhelo visited with the newly-weds, Mr and Mrs I. Grassland, north of Holden, last Wednesday.

Miss Gladys and Glenn Olsen motored to Edmonton last Monday morning.

Joseph Moen, who arrived from Saskatchewan recently is now assisting with the work at the E. A Moen home.

A Master Larsen from New Norway has been visiting at the Moline home for some time. He is returning this week.

A boy friend of Olaf Moline from Calgary has been visiting at the Moline home. He will leave soon to take up his duties as teaching.

KETCHAMOOT

Mr. and Mrs. A. F. Schultz were Sunday visitors of Mr. and Mrs. Roberts of Poe.

Harold Schultz and Charley Sea[illegible] played ball with the Holden team on Sunday. Afterwards they were the guests of the Ed. Kallal family.

Miss Mabel and Messrs Jack and Jim Younie of Edmonton spent Saturday and Sunday at their uncle's home, Mr W A. Mitchell and family.

Mr and Mrs. Sears and Stanley and Chester Coombes motored to Camrose Sunday afternoon.

Mr. and Mrs John Gallengar and son of Edmonton were guests of Mr Gallengar's aunt, Mrs. E. McMullen on Sunday. Other guests were Mr and Mrs. W. Ingram, Mr. and Mrs. Wendell Wiley and Miss Edith Davison.

Mr and Mrs. Roy Fleming motored to Edmonton Sunday. Mrs. Fleming's sister, Mrs. Sam Sterritt was able to return home with them after a three week's stay in an Edmonton hospital.

Mr and Mrs. Alfred Currie and mother, Mrs. Currie of Round Hill, visited at the Whillans home Sunday.

Mrs Albert Haukedal of Bardo had the misfortune to get her hand badly cut one day last week on a broken fruit jar. A number of stitches had to be put in to close the wound.

A meeting of the school board was held at the home of Mr and Mrs John Brown Tuesday evening.

Mr. Davison and Mr. Stairs visited at the Sears home Sunday evening.

Mrs. Kitchener and little granddaughter returned to their home in Edmonton Sunday after visiting a few days at the Whillans home.

Mr. and Mrs. F. D Ferguson and son Lloyd spent Sunday at the J. H Ingram home.

Mr and Mrs. Moen, Messrs. Frank Morden and W. Worton of Tofield visited at the Maurice McGinitie farm on Wednesday of this week.

KINGMAN

There is Sunday School at Baptist church every Sunday at 10.30 a.m. and church services at 11.30 a.m. Rev. Arthur Lynn is the preacher.

There will be confirmation at the Lutheran church on Sunday, August 29th at 3.00 o'clock in the afternoon. Those in the class are Miss Dorothy Bjergun, Miss Vivan Horte, Wyman Christenson, Alvin Christenson, all of Kingman.

There will be a novelty social held at the Kingman hall on August 28 at eight o'clock in the evening under the auspices of the C.C.F. club.

Miss Mabel Simonson is home again after being in Edmonton all summer.

Miss Muriel Asp is home after spending two weeks at New Norway.

Miss Adeline Simonson visited Miss Doris Rogness on Sunday afternoon.

Mr. J. K. Dettwiler built a bundle rack for Mr. Wilfred Simonson at Erickson's lumber yard on Tuesday.

Mr. Grahn has put in a gas station called the General Distributors.

Miss Ida Thompson was at Cold Lake a few days last week.

Miss Virgil Weaver, Mr. Elmer Miller, Mr. Noah Leinback and Mr. Aaron Dettwiler, all of New Paris, Indiana, visited the home of Mr. and Mrs. J. K. Dettwiler for a couple of days last week. They stopped here on their way to General Conference at Portland, Oregon.

The Miquelon young people held a concert at the Lutheran church last Sunday evening. It was well attended.

Mrs Roy Molvik and children Gordon, Nora and Jean came home from Edmonton last Sunday after visiting with relatives.

UNITED CHURCH NEWS

The annual picnic of the primary class of the United church Sunday School was held on Wednesday afternoon, August 25th on the grounds of Mr. and Mrs. J. Cookson.

It was a glorious day and the kiddies and their teachers had a wonderful time.

On Wednesday evening at the home of Mr. and Mrs. W. C. Swift, the teachers and workers in the Sunday School, Choir and Y.P of the United Church held a social gathering. The honored guests were Mr. and Mrs. McIntyre, who have been active workers in the departments. Games and music passed the evening away. After a dainty lunch Mr. Swift, superintendent of the Sunday School, on behalf of all the workers, presented Mr. and Mrs. McIntyre with the book, "The Travels of St. Paul," by Morton. Mr. and Mrs. McIntyre suitably replied.

The best wishes of the church go with them in their new sphere of labor.

Mr Ted Stephens, Student Mission Edmonton, will conduct the service at Ketchamoot, Lakeshore and Tofield on Sunday, August 29. There ought to be a good attendance to hear this young student.

The Rev. D. K. Allan will dispense the Sacrament at Dodds and Round Hill on Sunday, August 29th.

GOOD CROP YIELDS IN SOUTHERN ALBERTA

Lethbridge, Aug. 24—Terrific gale that whipped southwestern Alberta Monday did some damage to ripe grain fields by causing the grain to shell. In some areas from five to 10 per cent loss is reported.

Harvest is now general. Returns on the whole continue favourable with many 25-bushels wheat crops and some running up to 35 and even 40 bushels. The new wheat is practically all grading No. 1.

RAIN INFORMATION

We cannot give the daily precipitation report this week as usual, as a portion of the rain guage was taken away, presumably by children. A new part is on its way now. The week's increase over the total for 1937 given last week is 1.12 inches. This makes the 1937 season total up to Wednesday, August 25th, 9.88 inches.

3,000 STINGS FATAL TO BOY

Lander, Wyo., Aug. 24—His face and body swollen beyond recognition from the stings of thousands of angry honey bees, six-year-old Clifford Fabricus died Monday.

The boy was found screaming with pain, near his farm home at Hudson after his hysterical 10-year-old brother, Harry, had staggered into the house. A physician removed 2,000 stings from Clifford's body and hospital attendants removed "at least

EXPLAINS ORIGINS OF RAILWAY TERMS

Montreal, Que. August 23.— Explaining the origins of some terms freely used in railroading, the Canadian National Railways Magazine states: 'The word 'Caboose' has a marine origin, coming from the Dutch word 'Kabian-huys'; Cabin House. The word train comes far back from the Latin word 'Trahere'; To pull or draw. Locomotive was put together from two other Latin words: 'Locus' a place; and 'Motere' to move."

THE TOFIELD MERCURY

Vol. XVIII., No. 29 Thursday, September 2, 1937 $2.00 Per Year. To U.S.A. $2.50

Local and Personal

Mr. and Mrs. Geo. B. Brace and Jim returned on Thursday last from a motor trip to Prince Edward Island.

Mr. A. E. Allen spent a few days in Edmonton last week.

Betty Thompson visited with her sister Lois, over the week end.

Mr. Machtmess of the bank staff is back at work again looking happier than when on holidays.

Winnifred Werton is at Wetaskiwin for a couple of weeks.

Miss Myrtle Bethel left on Tuesday for Sedgewick where she will again teach school.

Mrs. G. Coutts and Doris returned from Niagara Falls. We understand Mr. G. Coutts is working there and that Mrs. Coutts will shortly join him and take up residence there.

Mrs. Martindale of Edmonton is visiting Mrs. Geo. Coutts.

Mr. and Mrs Paul Thomas and family returned from Innisfail where they visited Mr. and Mrs. W. Haynes.

Mrs. J. W. Cookson is visiting Mrs. McCauley in the Peace River district.

Miss Dorine Allen is taking a business course in Edmonton.

The Misses Annie Swift and Ella Taylor are now in training as nurses at the Royal Alexandra hospital, Edmonton.

A couple of transients helped themselves to gas and oil from the B. and A. warehouse last week. Mr. Hardy saw them early in the morning and being suspicious phoned police. They made their get away however before police could arrive. They were travelling by auto with, we understand, stolen license plates.

Premier Aberhart and other speakers will address a mass meeting at Ryley on Thursday, September 9th at 8:30.

SCHOOL FAIR MEETING

Meeting of teachers, trustees, and all others interested in the Tofield School fair will be held in the Tofield Town Hall on Wednesday evening, September 8th at 8:00 p.m. to make final arrangements for the fair to be held at Tofield on September 11.

EVERYTHING FOR THE BUILDING

KETCHAMOOT

School re-opened Wednesday, September 1st with Miss Nellie Lindsay of Innisfree as teacher. Seven new pupils enrolled, the trustees are puzzled to know where to seat them all.

Mrs. Margaret Grossman of Victoria B.C. visited two weeks with her sister, Mrs. Ed. Cookson and family.

Mr. and Mrs. C. Coombes and four children, Mrs. Campbell, daughter Evelyn and Lloyd were blue berry picking at Athabasca over the week-end, they reported blue-berries were very plentiful but were unfortunate to strike wet weather.

Mr. T. Stephens, student minister who has been holding services Round Hill through the summer months, conducted services at Ketchamoot Sunday. After the service he was a guest at the Appleby home.

Miss Maud Wildman returned to Edmonton Tuesday, to take up grade eleven at Eastwood high school. Miss Maude received word the first of the week that her aunt in England had passed away.

Miss Edith Davison was the guest of her frend Miss Ethel Coombes Sunday and Monday.

Miss Mary Ingram who spent the summer holidays with her aunt, Mrs. Owen at Innisfree, stopped off at Tofield and spent several days visiting relatives in the Ketchamoot district on her way to Edmonton where she will take a business course at McTavish College.

Several threshing machines started on Monday, threshing wheat will be in full swing the latter part of the week, much oats and barley are yet to be cut.

Mr. Fred Sutton suffered painful injuries n a runaway one day last week, several ribs were broken and his foot had to be put in a cast.

Albert Sears is the first one to install an electric fence, the outfit was bought from Mr. Bjergen of Kingman.

TOFIELD SCHOOL FAIR TO BE HELD SATURDAY, SEPT. 11

The annual school fair will be held at Tofield on Saturday, September 11th. Students and teachers are now preparing for the big event and it is safe to say a large number of entries will be made.

According to the Wheat Pool Bulletin, Mr. E. A. Moen of Tofield, was re-elected by acclamation as Wheat Pool delegate for District G-7.

GROCERIES

CEREALS—

Whole Wheat puff, Bushel Box	75c.
Sunny Boy, 6 lbs.	40c.
Gillespie Maid, 5 lbs.	30c.
Early Rose Wheat Granules, 6's	35c.
Early Rose Wheat Granules, 24's	$1.25
Rolled Wheat, Buckeye, 5's	35c.
Rolled Wheat, Redberry 4's	30c.
Roman Meal, per pkg.	35c.
Oat Meal, Fine, 5's	40c.
Huskies Breakfast Cereal, 2 for	25c.
Roseberry Pancake Flour, 5½	35c.
Yellow Corn Meal, 10's	50c.
Yellow Corn Meal, 5's	30c.
FRESH FRUIT SPECIALS	
Ripe Tomatoes, basket	25c.
Washington Italian Prunes, 16 lb. net wgt	$1.25
Transcendent Crabs, per box	$1.70
Wealthy Apples, 40 lb. box	$1.75
B.C. Cantaloupes, 36's each	10c.

JOBB and Co.

KINGMAN

Mr. Stanley Lindberg threshed for Mr. Melvik on Monday afternoon.

Arnold Rogness had an operation for tonsils and adenoids last week at Tofield and is getting along fine.

Miss Alvina has gone to Edmonton to attend school.

Mr John Ness and Albin Anderson are putting stucco on Mr. Roy Fleming's new house.

There were 17 people from Kingman took advantage of the cheap fare last Friday and spent the day at Edmonton.

Mr and Mrs. McIntosh left Friday for a two weeks holiday at the coast.

Mr Arthur Lynn spent last week end in Saskatchewan visiting his parents, n his absence a group of five young people from Wetaskiwin held church services at Baptist Church last Sunday.

Mr. and Mrs. Pete Erickson and children, Orval and Muriel spent last Sunday afternoon at the home of Mr Helga Roger.

Mrs Emma Roger and son Allan spent several days last week visting with Mrs. Joe Munson at Camrose.

The novelty social in honor of the new married couple Mr. and Mrs. Eddie Lindberg was well attended. There was a good program and there were very many nice presents including a set of dishes. Lunch was served to a large crowd and a good time was had by all.

Mr. J K. Dettwiler is building a granary for Mr. Sam Cinnamon this week.

School opened in Kingman September 1st. The high school teacher is Mr. Simon Simonson and Miss Irene Horte the lower grades and the same janitor, Mr. Andrew Johnson.

Mr. and Mrs. Bob Bowick and baby daughter called on Miss Idie Thompson Sunday evening.

L.C.C. NEWS

Members of the L.C.C. have had a very busy month. First a bon-fire and weiner-roast, then a farewell party in honor of one of our members, Mrs. Elizabeth Glenn who is leaving for Ontario, and the wind-up, the usual monthly meeting.

Quite a large crowd turned out to the bonfire held at the home of Mrs. W. Glenn and it being a nice evening the event was very successful. According to the large number of weiners, which quickly disappeared, the crowd came hungry. After the feast everyone gathered around the fire whilst a few of the younger folk entertained by music and song. Later a dance was held in the school house.

While around the fire members gathered together and planned a surprise for Mrs. Elizabeth Glenn, at the home of Mrs. Geneskie. Everyone present had a very enjoyable evening. A purse of money and a pretty bouquet were presented by the members and we all wish Mrs. Glenn health, wealth and happ'ness in her new home.

The L.C.C. monthly meeting was held at the home of Mrs. Joe Brown. Twelve members and one guest were present. The guest being Mrs. Carl Blake.

Our secretary, Lily Wilson being at the coast on holiday, the retired secretary, Gladys Gill took over the secretarial work for that day.

Members have arranged for a basket social and dance to be held at the school house on November 11. Ladies be sure to bring baskets.

Next meeting to be held at the home of Mrs. W. Glenn, where the first aid demonstration, which was intended to be held last March will take place. Roll call to be answered by proverbs. Members to bring guests.

Lunch was served outside where our hostess has garden seats, table and tree shade complete.

Saturday night last just as the usual Saturday night crowd of people began congregating in Tofield, a fuse blew out at one of the electric control stations, cutting off light and power. A hurry-up call was put in to Camrose and Mr. Tanner made a speedy trip up here, and made the necessary adjustment which brought on the light again. During the "eclipse" candles, coal oil lamps and anything that would make light was made use of by those business houses using electricity for light.

Mrs. Everitt Passes

We regret to have to report the death of Mrs Everitt, wife of Mr Charles A. Everitt of Tofield. Death occurred in an Edmonton hospital on Wednesday, September 1st.

The deceased lady leaves to mourn her loss, a loving husband; two sons, Bertram of Cadoman and Ross of Tofield; two daughters, Nadine of Athabasca and Blanche of Tofield; one sister Miss Nellie Hills of Laguna Beach, California; four brothers, Merrit Hills, San Bardino, Cal.; C. F. Hills, Pasedena, Cal.; Rev. James Hills, Buffalo, Min.; Dwight Hills of New York.

The funeral will be held at Tofield on Friday at 3:00 p.m.; service will be held in the United Church, interment taking place in Tofield cemetery. J. E. Stinson, funeral director.

Whatever opinions farmers held about rain in the early part of the season, their chief desire now is that it stop. Anyway for the information of those statistically minded, we can say that the total for the week ending Wednesday, September 1st, was .03 inches. This makes the total for the growing season 9.91 inches.

HOLY TRINITY TOFIELD
Holy Communion — — 11:00 a.m.
South Cooking Lake — — 3 p.m.

WORK SHIRTS— A variety of work shirts, good weight suitable for harvest wear	$1.00
SUN HELMETS— To clear	25c

E. W. ROGERS

Canada Year Book Now Available

The publication of the 1937 edition of the Canada Year Book, published by the authorization of the Hon. W. D. Euler, Minister of Trade and Commerce, is announced by the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up-to-date account of the natural resources of the Dominion and their development, the history of the country, its institutions, its demography, the different branches of production, trade, transportation, finance, education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1937 Canada Year Book extends to over 1,100 pages, dealing with all phases of the national life and more especially with those susceptible of statistical measurement. A statistical summary of the progress of Canada is included in the introductory matter. This gives a picture in figures of the remarkable progress which the country has made since the first census of the Dominion was taken in 1871, sixty-six years ago.

Attention may be called to some of the more important features of the present volume.

Chapter I, treating of the physiography of the country has been almost entirely re-written and a special section on Economic Geology, prepared by F. J. Alcock, Ph. D., Mines and Geology Branch, Department of Mines and Resources, is included. The regular section on Geology, which will be revised in the near future has been omitted this year. A special article, "Faunae of Canada," prepared for the Year Book by R. M. Anderson, Ph. D., Chief of the Division of Biology of the National Museum of Canada, appears at pages 29 to 52. The results of the Quinquennial Census of 1936 are included with the treatment of Population in Chapter V., and a special section on "Occupations of the Canadian People" rounds out the treatment of data from the 1931 Census which appeared mainly in the 1934-35 Year Book but was supplemented by later material in the 1936 Year Book. Agricultural statistics of the Quinquennial Census are given in Chapter VIII—Agriculture—which also includes a short article on "Agricultural Progress in Canada and the Dominion Experimental Farms System."

In the Public Finance Chapter, an attempt has been made on pp. 811-817 to give, in condensed tabular form, a summary of the Dominion Government Tax System as of July, 1936. The important section of Subsidies and Loans to the Provinces, has also been expanded.

The operations of the Bank of Canada are now established in the financial system of the country and it has therefore been considered advisable this year to recast Chapter XXII—Currency and Banking. Adjustments, will, no doubt be necessary from time to time, but that the main features of the new outline will serve for some time to come. A special article on "The Bank of Canada and Its Relationship to the Canadian Financial System" appears at pages 881 to 885. This should contribute to a clear understanding of the position and functions of the Bank on the part of the general public.

A list of special articles appearing in past editions from the year 1916 to 1935 will be found at page vi immediately preceding the map of Canada.

The accession of King George VI to the Throne and the Coronation of the new King on May 12 are marked by the reproduction as frontispiece of an official photograph of the ceremony in Westminster Abbey, by official portraits of King George and Queen Elizabeth, and an excerpt from His Majesty's address to his peoples, delivered after the Coronation on May 12, 1937.

Persons requiring the Year Book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of $1.50, which covers merely the cost of paper, printing and binding. By a special concession, a limited number of paper-bound copies have been set aside for ministers of religion, bona-fide students and school teachers, who may obtain copies at the nominal price of 50 cents each.

CAT CAME BACK 21-MILE JAUNT

PROVOST, Aug. 30.—A pet cat belonging to Mrs. E. Otkin of Metiskow recently worked its way back from Provost to Metiskow, a distance of 21 miles living off the country for a period of 25 days between the time it disappeared here and the time it greeted its owner by unexpectedly hopping up into her lap at home.

How long it spent on the journey is not known. Prior to leaving for Edmonton, Mrs. Otkin brought the cat here to her mother Mrs. W. Jickling for safekeeping during her month's absence. It was enclosed in a basket on the motor car journey here and therefore could not have seen the country over which it passed.

Shortly after being left here it disappeared. Twenty-five days later Mrs. Otkin, accompanied by her husband, returned home from Edmonton, reaching Metiskow shortly before midnight. Next morning her pet which she believed to be in Provost walked into the house, hopped into her lap and purred as contentedly as if it hadn't actually been earning its own living for the past month.

The question how the animal learned enough of the geography to make its own way from Provost to Metiskow remains unanswered, as is also that of how long a time it really spent on the road.

HUMANITY FATE TO BE SETTLED HERE—BYRNE

Departing Technician Says Aberhart and Cabinet Have Matters in Hand

Declaring that the "fate of humanity will be decided here during the next few weeks," and that "Premier Aberhart and the government have the situation well in hand," L. D. Byrne, Social Credit technician left Edmonton Monday night for the old country to "report personally" to Major C. H. Douglas, former chief reconstruction advisor to the provincial government.

Mr. Byrne, who arrived here early in July to join G. F. Powell in preparing to report to Major Douglas on the Alberta situation, will continue to act upon his return to the old country as a temporary commissioner to administer the Social Credit act, according to announcement Monday by G. L. MacLachlan, M.L.A., chairman of the Social Credit board. Before leaving for the east, Mr. Byrne issued the following written statement:

"I am sorry to be leaving Alberta. However, as you know, my time is up and I must go back to report personally to Major Douglas.

"I cannot leave your beautiful province, and this beautiful city, without expressing my appreciation of all the kindness and help I have received from everyone during my stay. For my part, I feel that I am leaving behind many real friends.

"The report I shall carry to Major Douglas could not be better. Premier Aberhart and the government have the situation well in hand. I am absolutely convinced that nothing will stop the premier leading THE PEOPLE of Alberta to the full enjoyment of their real wealth, if only they will remain solidly united in their support of him and the government—as they are unquestionably at the moment—and they demonstrate for all to see their determination that their will shall prevail. THE PEOPLE of Alberta will decide the issue joined against financial tyranny, and I am confident of the outcome.

"The entire world is groaning under the tyranny of finance, rightly described by your premier as "ruthless and insolent." Widespread suffering, war, revolution, and chaotic conditions are the fruits of the present system. There is no hope for civilization so long as this state of affairs continues. When Alberta emerges victorious, as it will most assuredly, it will be the end of financial tyranny and the dawn of a new civilization for the whole world and Albertans will have achieved it."

C.N.R. AUTO-RAILERS IN REGULAR SERVICE

Winnipeg, Man. Aug 23.— The first passenger auto-railer ever to be used in Western Canada has now been placed in regular service by the Canadian National Railways between Pine Falls, Man., and Winnipeg. This is a distance of 70 miles and the service will be operated daily except Sundays.

The first freight unit of the auto-railer is now in regular service in the North Battleford district of Saskatchewan.

His Preference

A wealthy Irishman was proud of the opportunity to "show off" on the occasion of a visit to London of one of his compatriots. He invited him to dine at a fashionable restaurant, and seated at the table led off with "Walter, a couple of cocktails."

His friend regarded him with astonishment, and whispered audibly: "Walter, if you don't mind I'd rather have a wing."

A "classified" advertisement is an inexpensive way of selling that article for which you have no further use.

THEY BROKE A MONOPOLY

On of the most interesting stories in the annals of Western Canada is the record of the achievement of grain producers in the overcoming of the grain marketing monopoly which existed in the pioneer years. At one time in the history of the west a farmer couldn't load a car over a platform or dispose of his grain in any way save through a line elevator, and then only on the terms dictated by the elevator company. Naturally such a monopolistic system created abuses. Grain producers successfully fought the monopoly and overcame it through the building up of co-operative institutions of their own.

It is now a far cry to the days of the early struggles of the pioneer grain farmers but the co-operative movement has gone onward. In this province it finds its highest development in Alberta Pool Elevators, an organization owned and controlled by grain producers and operated for the benefit of all.

Alberta Pool Elevators has determinedly fought for the welfare of the grain growing industry. Today it stands as a monument to the accomplishments of the pioneers in the co-operative movement. Farmers of the present age may know little of the struggles of older generations, but nevertheless they are being greatly benefited thereby.

BANK OF MONTREAL CROP REPORT

General—Harvesting operations are well under way in Manitoba, Saskatchewan and southern Alberta. In central and northern Alberta crops are ripening slowly and warm, dry weather is necessary to hasten maturity. In Quebec province, while heavy storms have done some damage prospects continue favourable for average yields of grain, and for satisfactory crops of roots, apples and small fruits. In Ontario frequent rains have damaged stooked grains but have been beneficial to roots, pastures and corn, the outlook for which, as well as for fruits of all kinds except late apples, is satisfactory. In the Maritime Provinces grain cutting has begun and the outlook remains favourable for crops in general. In British Columbia cool weather and intermittent rains have retarded late haying operations and delayed the opening of field tomatoes, but in general prospects remain good for grain, roots and fruit. Details follow:

ALBERTA—Rains have again delayed cutting of wheat, which is well under way. Except in the northwest and the south, a heavy growth of weeds is making harvesting difficult and results doubtful. There have been scattered hail storms, but the damage is not extensive. Irrigated crops are in favorable condition and the feed situation is mostly satisfactory.

SASKATCHEWAN — Cutting is nearly completed and threshing is fairly general in the limited area where crops are being harvested. Yields are uneven, ranging from poor to good.

MANITOBA—Harvesting is progressing rapidly, although operations have been retarded somewhat by unsettled weather. Except in a comparatively small area where the crops are light, wheat yields will be good and early returns indicate that the grade generally is satisfactory, Although lower than last year. Coarse grains show good yields in some districts.

THREE KILLED AT LEVEL CROSSINGS

Dreadful toll of level crossing accidents in Alberta is again causing alarm among those interested in promoting safe driving in this province.

Within two days two accidents at these crossings took the lives of three Alberta people. Since the first of the year other accidents of this kind, some fatal, have occurred.

Repeated warnings do not seem to be sufficient to reduce these accidents, causing death, serious physical injury or damage to property. Education of the public to these hazards and the need of using every possible care at railway crossings apparently is not effective.

Municipal authorities, it is suggested, might well give greater co-operation in a movement to eliminate more of these level crossings.

Federal money is available in what is known as the grade crossing fund, which is administered by the board of railway commissioners, for the elimination of crossings. Steps should be taken to see that more of that money is spent in this province.

"These accidents just recently, should stir public action," says an official of the Alberta Motor Association. "Something must be done. We must have greater safety, and that can be ensured to a greater degree by grade elimination and road diversion policies."

SOME FACTORS TO BE CONSIDERED IN BARLEY PRODUCTION

The standards established for the barley malting grades are such that considerable care must be exercised in the production and handling of a barley crop intended for malting purposes. Barley suitable for the malting trade should be bright, plump and mellow and free from other grains and foreign matter. It is now generally known that not all varieties will make up into satisfactory malts. According to the Grain Act, O.A.C. 21 and certain related varieties, Mensury, Manchurian, and Gartons are eligible for the malting grades. The two-rowed varieties are used for special malts and constitute a very small percentage of the total barley required for malting. The smooth owned varieties as a group are not allowed in the malting grades.

The use of good, pure seed is essential if the higher grades are to be realized. A mixture of varieties often results in an uneven malt. Registered seed guarantees not only varietal purity and high percentage germination but insures reasonable freedom from other kinds of grain and disease. Treating the seed with an organic mercury dust has been found to promote more vigorous germination by controlling covered smut, seed borne diseases and certain soil organisms.

Better quality barley is obtained when comparitively cool weather prevails at the time the crop is filling. With this fact in mind, the grower may provide a more favourable environment for his crop by seeding early. Late seeding—as is the practice when barley is used as a cleaning crop—often results in poor germination and prematurely ripened, thin grade sample.

Lack of proper care during the harvesting and threshing operations may exclude an otherwise good barley sample from the malting grades. The crops should not be cut until it is thoroughly mature if sacrifice of mellowness is to be averted, and threshing should be carried out with as little delay as possible to reduce to a minimum discoloration from weathering.

Much barley is damaged by close threshing. Examination of the grain should be made from time to time during threshing to ascertain the extent of damage so that any necessary adjustment of concaves or cylinder speed may be made. Properly adjusted sieves will minimize the amount of grain returned for rethreshing. Barley with a portion of the awn attached is preferred by maltsters to a sample showing excessive peeling.

A small advertisement may solve that problem for you.

THEY WENT TO BED WITH THEIR BOOTS ON

Montreal, Que., August 30.—When sleeping cars were first operated on this continent, men passengers went abed fully shod, as the story is told by George A. Kelly, vice-president of the Pullman Company, in the Canadian National Railways Magazine as a contribution to a symposium on America's first sleeping car.

Mr. Kelly relates that in 1836 the Cumberland Valley Railroad of Pensylvania operated cars fitted with bunks, and these were the first sleeping cars. But the real stage of advance was recorded on September 1, 1859, when a unit marked "Sleeping Car" was added to the night train of the Chicago and Alton at Bloomington, Illinois. This was No. 9, the original Pullman.

J. L. Barnes, conductor, afterwards said of that first journey, "There was no crowd and the car lighted by candles, moved away in solitary grandeur if such it might be called. I remember the first night I had to request the passengers to take their boots off before they got into their berths. They wanted to keep them on—seemed afraid to take them off."

The one passenger who removed his boots without compulsion was Mr. Pullman. True, there were no sheets to soil, but boots in conjunction with a curtained bed of mattress and blanket did not form a perfect blending in his ideal of a travelling substitute for home comforts.

Free Air and No Gasoline —Gee Whiz

Miami, Fla., Aug. 24.—Successful operation of a six-cylinder automobile motor whose only fuel is compressed air, points to the time when motor cars may travel for years without gasoline, oil or water, according to the inventor Obid M. Smith, of Miami, who recently has driven a car thus equipped 6000 miles through 11 states without a stop at a filling station.

In a recent exhibition of his invention, Mr. Smith, who says he literally grew up with engines, opened the throttle and eased less than five pounds of air into the new motor, which after a slight prodding of the flywheel, "caught" and moved along at an even rhythm. The exhaust could be seen emitting a light vapor.

Practically no vibration was noticeable on the engine block and it was possible to place a hand on the motor after it had been running for 15 minutes. Then it was no warmer than the sun might heat it. Its only fuel being compressed air the motor needs no wires, no gears or ignition, and no water cooling system. There is a small device for keeping the air at an even temperature, one of the secrets of the invention.

The construction is simple itself and the cost is said to be many times less than that of the cheapest motor of to-day. The motor is four inches wide and 29 inches long. The pistons have a 2½ inch diameter and 3½ inch stroke. The six cylinder engine tunes up to 5000 revolutions a minute and develops 62½ horsepower.

Mr. Smith has experimented with air pressure for 25 years. He was 15 years in perfecting the present motor. Before going to Miami he operated a garage in Chicago for several years. In 1929 he drove an automobile with a converted gasoline motor using compressed air on a 9000 mile tour of the United States and climbed Pike's Peak as easily as if it were on the level, he declared.

Mr. Smith's plan is to install a 150-pound pressure tank on the rear of the car similar to the present gasoline tank. This may be filled in the beginning at any filling station with the air used for inflating tires. The crank case is filled with oil to lubricate the moving parts, but, as there is no heat, oil never has to be changed. So stops at filling stations will be rare as the moving car will renew air in the tank by four compressors operated on the rear brakedrums. By means of a device in the motor, 85 per cent of the air used in the motor is returned to be used over again. So there is little chance of running out of air, the inventor maintains.

Mr. Smith stoutly denies that this could be called perpetual motion. The car would not be running on its engine's power all the time, any more than any automobile does, he said. Engineers estimate that 40 per cent of the time a car is moving it is running on momentum. But he admits that his motor comes about as close to perpetual motion as he ever expects to see.

Quinto of the Flaming Coat

By William MacMillan in "Forest and Outdoors."

WHOLLY IGNORANT of the fact that courage and stamina don't always come in the guise of graceful shapes and pleasing colours the little silver fox mother of Westport Hill sat back on her haunches, and staring speculatively at the red coated foxling that had mysteriously appeared in her latest litter of silvers, wondered where in the world he could have come from.

To be fair, Quinto, if we are to give him a name, had nothing whatever to do with the colour of his coat. Had he been consulted at all it is reasonable to suppose that he would have preferred the frost tipped fur of his aristocratic ancestors.

Being a perfect lady, as foxes go, the matron of the hillside den refrained at first, from openly expressing her disapproval of the newcomer. She couldn't abide the unusual for long, however. High-strung, and sensitive, given to hallucinations, fits of hysteria and sinking spells she soon began greeting his appearance with an involuntary snarl.

Notwithstanding his hateful fur the yellow foxling had a way with him, an undeniable charm. And it is just possible that if his outrageous coat hadn't brightened with the passing days she might have learned, in time, to at least tolerate his presence.

Quick to sense the disfavor in which their oddly-coloured brother stood, Quinto's brother and sister made the most of their opportunity, preempting the most comfortable positions and shouldering him to the frigid exterior of the family circle when the busy little mother gathered them into the embrace of her magnificent tail.

All these things had their compensations. And though he was something worse than an outcast, the persecutions that dogged him night and day sharpened his wits and forced him, willy nilly, into precocious development.

Worse was yet to come. So long as they remained in the immediate vicinity of the den on the hillside nothing really interfered with his rapid growth. But later when the loyal little mother felt it encumbent on her to initiate her offspring in the rudiments of the hunt, her frigid reception gave him many an anxious moment.

In view of her high-strung and nervous disposition the quality and perfection of the little matron's instructions were astonishing. Gifted, on this occasion at any rate, with a world of patience, she put her velvet-footed pupils through their paces till they were well nigh letter-perfect.

There were no frills or fancy trimmings to her instructions. And she showed them that disobedience, or even carelessness, might easily spell death in a dozen different ways.

Lesson No. one for instance, and the most important in a long list, covered the capture of mice—the most frequently repeated delicacy on their bill of fare. Carefully, patiently, she showed them how to creep up on a likely looking tussock unseen and pounce like lightning on the grass a few inches ahead of the tell tale rustlings.

Taken by and large it was an exciting time for the foxlings, and distressful, to say the least, for the mice.

With a thousand quick-witted progenitors behind them the two silverlings proved apt pupils, swiftly absorbing their teacher's technic. Quinto, however, towered head and shoulders over them. Larger and heavier, he seemed gifted with a hunting sense, a prescience far beyond his age—an afterthought of nature, perhaps, for having cursed him with such a disgusting coat.

Presently Father Fox, a long-legged hunter with an exquisite fur coat and the wisdom of the ages smouldering in his eyes, appeared on the scene.

Frightened, the two silverlings retreated precipitately to the darkest corner of the den, cowering there till forcibly ejected by the mother. Quinto's bold behaviour in contrast, seemed to appeal to the doughty old hunter. Evidently caring less for colour than courage, he made it clear that the flame-coloured intruder was a fox after his own heart.

Though the old warrior's appearance seemed accidental, it had probably been timed by watchful nature. And he immediately took over the youngster's training, steering them with consumate skill through the dangers of daylight hunting.

Needless to say, his instructions were highly technical and extended from how to track down rabbits in pairs to making oneself invisible in an open field.

These were really delightful hours for Quinto. The colour of his wretched coat forgotten, he quickly absorbed what his gifted parent had to teach and looked eagerly around for more. Nothing could either hold him back or smother the ambition that reared him head and shoulders over his brother and sister.

When the day was ended, however, and his father had melted into the underbrush on some mysterious forage of his own, the little mistress of the den made it clear that his preposterous fur still outraged her sense of the fitness of things.

Poor Quinto. Satisfied to put up with anything so long as he could remain in the den, he endured his mother's cuffings and bad temper till,

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

HEALTH

It is often difficult to give a meaning to words which we use every day. One of these words is "Health." We say that we are healthy and yet, when asked to explain what we mean we likely find it almost impossible to [illegible] our meaning into words.

In the first place, when we are healthy we are free from any [illegible] disease. That is the commonest idea of health. As long as an ind[illegible] his work and does not complain, he is thought of as healthy.

As a matter of fact, such people are not necessarily healthy in anything like the full meaning of the word. Freedom from actual disease is desirable, but health is far more than that. Health is something positive, something that brings happiness to us. The person with health faces the day's work with confidence, finds pleasure in his occupation, is able to do better work, and can fully enjoy the hours of relax[illegible].

It is surprising the number of people who spend a more or less miserable life, unable to accomplish the things of which they are capable, because they have not health. These same people are surprised when, on a medical examination they learn that there is something wrong with their bodies, something not perhaps serious enough to cause death, but sufficient to handicap them in their daily life, and perhaps, to make them grow prematurely old.

Again there are those who miss the happiness that comes with health and are yet free from any physical [illegible]ish. These are the people who are not following the simple rules of hygienic living. We cannot rob our bodies of rest, fresh air or proper food and continue to have health.

Health si a condition of physical well-being that comes to those who are free from physical defects and who follow the simple rules of hygienic living.

Questions concerning Health, addressed to the Canadian Medical Association, 184 CCollege Street, Toronto, will be answered personally by letter.

DISCOVERS MAN THOUGHT BURIED

Whitman,, Mass., Aug. 27.—Customers in a lunch room began to choke violently Thursday when William Blight, 62, put a blight on their appetites.

One of the diners ejaculated: "Holy smoke, we buried you three weeks ago."

"Guess it must have been two other fellows," Blight retorted. "Nobody buried me."

Whitman police started an investigation to determine the real identity of a man buried after Arthur Burman, a farmer, had identified a body found in the woods as his farmhand, William Blight.

WORLD OF WHEAT

"De malt barlee, she lak' de woman. To get bes' result mus' humor her.

"Besides, de feller w'at drink de beer is plaintee particulaire. So farmer d'at grow de malt barlee mus' be plaintee particulaire also."

This was the sage advice given to me by Phillippe, one of the best hired men who ever came out of Quebec. Phillippe's father was "mos' smart man for grow malt barlee."

Phillippe helped me to win many a dollar for malting premiums. Here is his advice, much in his own words:

1. "Mus' use O.A.C. vingt et un—d'at's twenty-one you know.

2. "Nevaire cut crop till she's ripe. Green kernel mak' de poor malt.

3. "To kip nice colour, fit good night cap on stook for kip away de dew and rain, d'en thresh de caps separate for feed.

4. "Mus' try kip one-eight, maybe one-quarter inch awn on barlee. Nevaire skin de kernel. To do d'is mus' run thres' machine more slow d'an for de wheat. D'en tak' out mos' all concave. Maybe if barlee too dry, use wood concave same as for thresh de pea. Separator man sell de wood concave 'bon marche.

5. "If kernel still skin, d'en feed de bundles but first into thresh' machine."

Following factors have tended to raise price:—French wheat crop indicated as only 221 million bushels—Poor harvest in Morocco—Official report Argentine wheat and flax crop reduced by drought—Indian monsoon a failure—U.S. corn crop deteriorates in southwestern section—No increase in Mediterranean raisin crop.

Following factors have tended to lower price—European consumptive demand very slow—Free offers of wheat from Russia, Danube Canada. U.S.—France and Germany doing everything to curtail imports — Fair price prospects in India—Some rains in Australia and Argentina—Liberal offers of South African corn.

AIR CHIEF MEETS TRANS-ATLANTIC PILOT

Philip G. Johnson, Vice-President in Charge of Operations Trans-Canada Air Lines, and Captain A. S. Wilcockson, pilot of the Caledonia the big Imperial Airways flying boat which made the first trans-Atlantic survey flight met recently at the Boucherville air base, Montreal, when the Caledonia was making its second visit to Canada. Former President of United Air Lines and one of the leaders in the development of aviation on the North American continent, Mr. Johnson was keenly interested in the mechanical details of the big flying boat. He went through the Caledonia under the guidance of its Captain.

AVERS ABERHART DOUGLAS APOSTLE

Ottawa, Aug 27. . Premier Aberhart is now determined to follow solely Douglas Social Credit principles, L. D. Byrne, technical adviser to the Alberta government, said in an interview here Thursday. Mr. Byrne is on his way back to England to report to Major C. H. Douglas, founder of Social Credit, on his two month's work in Alberta.

"I am profoundly hopeful, he said, "that the present tension over the Alberta issue will be short lived and that those who have caused it will recognize that nothing can stop Premier Aberhart leading the people of Alberta to the new economic order which will be born with the drastic reduction of taxation monthly dividends and a lower cost of living that the people can undoubtedly gain."

Mr. Byrne did not think there would be a fall election in Alberta. It was not needed as as more than 90 per cent of the people were solid and united behind Premier Aberhart, he said.

Textiles of skim milk are woven in Italy and Germany sponsors a paper cloth. Washington in the meantime, they say, will press its aluminum suit.—Los Angeles Times.

LISTEN IN ! !

A Sound Practice

It is a sound practice to deliver your grain regularly to your U.G.G. Elevator. Through many years' experience farmers have learned that they can count on this farmers' company for satisfactory service in handling their grain.

DELIVER YOUR GRAIN TO

UNITED GRAIN GROWERS Ltd.

Elevators at: Chipman, Demay, Kingman.

Advertisers - - -

of Fire Extinguishers

APPEA TO

FEAR!!!

but the advertisers in the Tofield Mercury appeal to YOUR COMMON SENSE.

They ask you to consider the convenience of being able to get what you want when you want it.
They remind you of the friendly, personal service they offer.

They bring to your attention the saving in time, patience and mileage effected in trading in Tofield.
They give specific instances of good values at FAIR prices.

The amount of business given local merchants and professional folk in Tofield determines the type of service rendered.

This paper commends the people in Tofield who have the trade at home habit. It shows good common sense. Thereby is a strong community spirit fostered. The pity is that all do not trade exclusively at home.

Some Tofield merchants are themselves to blame, perhaps, for a good part of the trading done by Tofield people away from home—because they do not advertise the fact that they carry as good goods at as attractive prices as their competitors in neighboring cities and towns.

Quinto of the Flaming Coat

By William MacMillan in "Forest and Outdoors."

exasperated beyond endurance, she drove him out one day with a savage display of teeth.

His world came tumbling about his ears, Quinto crept up the steep hillside, looking back over his flaming shoulder every now and then as if he half expected to see the tyrant poke her head out of the den with a forgiving screech.

continued next week

CHEESE MEALS

The following recipes are taken from the bulletin published by the Dominion Department of Agriculture, Ottawa, "Cheese for Better Meals" by Laura C. Pepper, Dairy and Cold Storage Branch. The Bulletin may be obtained on request free of charge from the Publicty and Extension Branch.

Cheese Soup

4 cups milk
2 or 3 slices onion
2 tablespoons butter
2 tablespoons flour
1 teaspoon salt
One third teaspoon pepper
Three-quarters cup grated cheese
Yolks of two eggs

Scald milk with onion. Remove onion. Melt butter in top part of double boiler. Blend in flour. Add hot milk and seasonings and stir constantly until mixture thickens. Cook five minutes. Add beaten egg yolks. Cook one minute and add grated cheese. Beat with eggbeater and serve at once. Egg yolks may be omitted but they make a richer and more desirous soup.

Cheese Pudding

4 slices of bread half inch thick
One and a half cups grated cheese
Three eggs
Quarter teaspoon mustard
Two cups of milk
Salt

Cut bread in cubes. Arrange alternate layers of bread and cheese in buttered dish. Beat eggs. Add milk and seasonings. Pour over bread and cheese. Set in pan of hot water and bake in moderate oven (350 degrees F.) until pudding is firm—about 45 minutes.

Cheese Rings With Vegetables

1 cup milk
1 cup soft bread lumps
1 egg
1½ cups cooked macaroni
1 cup cheese, diced
1 tablespoon minced parsley
1 tablespoon chopped pimento
1 teaspoon minced onion
2 tablespoons melted butter
Salt and pepper

Scald milk. Add to bread. Add well-beaten egg and other ingredients. Pour into greased ring mould and poach in a moderate oven (350) degrees F.) for about 50 minutes. Turn out on hot platter. Pour filling in centre and garnish with parsley.

Filling—1 cup medium cream sauce, 2 cups cooked vegetables, such as 1 cup cooked peas or 1 cup cooked carrots, salt and pepper.

A. J. H. McCAULEY Telephone 44 TOFIELD

The Purpose of Pool Elevators

The major function of the Alberta Wheat Pool elevators is to give support to the natural aspirations of Alberta farm people for more secure, comfortable and happier farm homes.

Every Pool elevator may be said to be a sentinel guarding the marketing interests of the grain producers in that locality. It also serves as a link connecting all parts of a great democratic movement, working on behalf of the men and women engaged in Canada's basic industry.

Every grain grower can aid himself and the entire agricultural industry by hauling his grain to a Pool elevator.

By so doing, a useful and serviceable farmer-owned organization is strengthened; the non-profit co-operaive movement is advanced; and a greater degree of unity is attained among the grain growing farmers.

STRANGE TALE OF SHOOTING PACT UNFOLDED IN DRUMHELLER COURT

Drumheller, Aug. 27. - Unfolding in police court an amazing story of how they stood on a lonely stretch of railway track near Morris at midnight and wounded each other with shots from a .32 revolver in a mutilation pact apparently planned to gain publicity, John Lane, 19, and George Knox, 22, both of Drumheller were sentenced to six months and three months respectively in Lethbridge jail here Thursday. They were charged with fabricating evidence. Lane's extra three months was given for being in illegal possession of a gun.

CHARTERED BANKS TO SPONSOR BROADCASTS

Canada's Charted Banks through their Public Relations Adviser, Vernon Knowles, are conducting a series of non-political, non-controversial radio broadcasts on the Functions and Operations of Canadian Banks it was learned from Edmonton to-day.

The first of the series was heard Tuesday night September 7. The addresses are being broadcast over an all-Alberta Network Tuesday nights from 10:15 to 10:30 and Wednesdays in the daytime from 1:15 to 1:30.

Mr. Knowles, who homesteaded in Alberta in 1900, is a former well-known newspaper man, who has worked on several western daily newspapers. He was Editor and manager of the Winnipeg Telegram and later Managing Editor of the Toronto Daily Star. In January 1937 he assumed his present position.

In commenting on the series of broadcasts Mr. Knowles laid particular stress upon the fact that they were designed to be completely non-political.

UNITED CHURCH NEWS

On Sunday evening, September 12th, the Rev. P. Anderson who is on furlough from his missionary work in China will speak in the United Church at 7:30 p m.

The Rev. M. Anderson will bring a message that will interest all who are exercised by the events taking place in that ancient land.

The speaker needs no introduction to a Tofield congregation as the name is well known and highly respected in the Tofield district

TOFIELD STUDENTS HAVE NOSE AND THROAT SPRAYED

As a preventative against infantile paralysis, the students at the Tofield schools had their throats and nostrils sprayed on Thursday.

Nurses Baptist and McCauley administered the sprays.

Mrs. A R Thompson of Leduc is visiting her daughter, Lois Thompson of town.

JOBB and Co.

LINDBROOK

The weather has been very trying of late, holding up harvesting and haying operations, but it looks as if it is at an end, we hope so anyway for a few weeks or else the government will have another problem instead of relief for the "dried out areas" it will also have to be for the "drowned out areas."

Mr and Mrs. J. Wonnacroft have moved into their new home, just off the gravelled highway west of the store

School reopened last week both at Westlake and Lindbrook Schools. Both schools retain their last year's teachers, Miss Burns at Westlake and Miss Phipps at Lindbrook.

A birthday dance was given at the home of Mr. and Mrs Tucker in honor of their eldest boy Harry's 19th birthday. A large crowd assembled and everyone had a good time

Mr and Mrs. J Whittle of Wainwright spent the week end and Labor Day with their relatives the Bracegirdle family of Lindbrook

The road running east from the station has been the scene of the operations of a tractor (caterpillar) and an outsize fresno this week. It has cut quite a lot from hills and afterwards the grader went over it so its somewhat like a road now. The steep grades have disappeared and the road is a decent width, quite an improvement.

Mr and Mrs P. Evans returned home from their trip to Athabasca and report some awful roads, we forget whether it was one mile in eight hours or eight miles in one hour, anyway it was some trip.

FAREWELL PRESENTATIONS

On Tuesday evening a gathering of the Jolly Twelve Bridge Club met at the home of Mrs. J. W Chapman for the purpose of saying farewell to Mrs. Geo. Coatts, a member of the club.

A pleasant evening was spent during which Mrs. Coatts was presented with a lovely silver rose bowl as a token of remembrance from the members of the club. The hostess served a delicious lunch and while regrets were expressed at her departure, Mrs. Coatts was overwhelmed with good wishes for future happiness in her new home.

On Wednesday evening another ladies' bridge club were entertained at the home of Mrs. J. W. Morton, Mrs. Geo. Coatts being the guest of honor.

She was presented with a lovely doily as a token of remembrance. A delightful lunch was served by the hostess and all wished Mrs. Coatts happiness in her new home.

OBITUARY

MARY W. EVERITT

Mary W. Hills was born at Springfield, Mis. March 20th, 1894 and died at Edmonton on Wednesday, September 1st, aged 43 years. She was the daughter of the late Rev. A M and Mrs. Hills. On September 25th, 1913 she was united in marriage to Chas. A Everitt at Smiley, Sask. She leaves to mourn her passing two sons, Bertram of Cadoman and Ross of Tofield; two daughters, Nadine of Athabasca and Blanche of Tofield; one sister, Miss Nellie Hills of Laguna Beach, California; four brothers, Merrit Hills, San Bardino, Cal.; Rev. James Hills, Buffalo, Min.; Dwight Hills of New York; C. F. Hills, Pasedena, Cal

Mrs. Everitt was of a home loving disposition and took great delight in her home and music. She was an accomplished pianist having attained her A T.C.M. at the age of 16. She came to Canada with her mother and brothers in 1913 the family making their home at Smiley, Sask. With the Everitt family, Mrs. Everitt has been a resident of Tofield for about a year, coming here from Round Hill.

The funeral was held on Friday, September 3rd, service being held at the United Church, Rev D K Allan officiating. The casket was banked with beautiful flowers testifying to the esteem in which the departed lady was held. The pallbearers were: Messrs. E. V. George, F Rovang, H. W Quail, V Swanson, W. Gilfillan, and G. Cookson.

Floral Tributes

Husband and family; H R Everitt and family, Smiley, Sask., Mr. and Mrs. J. U.F.W.A. Hold Meeting

The August meeting of the U F W A was held at the home of Mrs A Haukedal and was attended by a large number of members and visitors, some of the latter coming from Edmonton, Barrhead and other points

"Roll call" was answered by recipes for "Cooling Drinks for August."

The delegates to the recent conference, sang for us (with much gusto) the two original U F W A. songs, presented by them at Vegreville

An excellent book review, on the Theory and Practice of Socialism, prepared by Mrs. E. Price, was read by Mrs Bigland and the monthly bulletin on "Economics" was presented by Mrs. C. Erickson

A paper, "Bird Life in Alberta," with samples of authorative reference books, by Mrs C Baptist, was much appreciated. The September meeting will be held at the home of Mrs M McConell on the 9th inst. at 2 0 p m

On the afternoon of August 24th several carloads of U F W A members made a surprise attack on the home of one of their members Mrs E Stephens to offer good wishes to the newly weds for a long and happy married life

Presentation of a china tea set, together with a sheaf of gladioli, was made to the bride, to which both Mr and Mrs Stephens responded most suitably

Lunch was served by the invaders and topped off by a slice of wedding cake. After a jolly time over the tea cups and with renewed good wishes the party dispersed

SCHOOL FAIR SATURDAY

The Tofield District annual school fair is to be held on Saturday September 11th. The usual line of exhibits will be in evidence and the exhibition is well worth a visit

Mrs (Dr.) Bain of Washington, and child are visiting at the Secord home. Mrs. (Dr.) Bain was formerly Miss Secord.

SPECIALS FOR CASH

From Saturday, Sept. 11th to Friday, Sept. 17th

MIN-IT MARMALADE BASE—Makes four pounds, 6 oz. pkg., per pkg.	27c
OWR PUFFS—Made from Whole Grains—Celophane wrapped, per pkg.	10c

B. W. ROGERS

Quinto of the Flaming Coat

By William MacMillan in "Forest and Outdoors."

(Continued from last week)

Convinced, finally, that the decree was absolute, he found a hole in the tangled roots of a wind-toppled tree and did his best to forget his troubles in sleep.

It was night when he awoke, and a bright moon bathed the steep slopes of Westport Hill in a golden light. Unable at first to figure out exactly where he was, he sought the outdoors in a panic.

Reassured by the friendly moon, he ran along the trunk of the steeply angled tree and stared hungrily down at the pile of rocks that marked the place of his birth.

There must have been something compelling in that gaze because his mother presently popped into sight. Her snow-tipped fur glinting like silver in the moonlight, she mounted a crag commanding the slope and winnowed the air through finely attuned nostrils. Satisfied that nothing hostile lurked in the bracken she summoned her family with a low bark and started down the slope the instant they appeared.

Quinto was unsociable. Being scorned and repudiated by the parents he adored was bad enough. And banishment was even worse. But being frozen out of a hunt was adding insult to injury. Hoping against hope that his mother had forgotten his existence he slipped down the hill and fell in at the rear of the little procession.

As events shaped themselves it wasn't his mother who eventually routed him. His bushy tail in a flaming arc behind him, and ready to fly at the slightest hostile move, he was wondering if he dared close up the gap between himself and his sister's chubby flanks when a tussock of grass exploded right in his face and a frightened quail shot into the air with a whirring of wings. Terrified, he turned tail and fled up the slope.

Then, overnight almost, autumn came to the woods. The leaves turned blood red and Quinto's thick fur took on the brilliancy of a sunset. The white-oaks changed to old-gold, and there was a hint of frost in the air.

Quinto's spirits rose with the lowering temperature. And propelled by a strange restlessness he quartered both slopes of Westport Hill, keeping on the go night and day.

Meanwhile tragedy, swift and unexpected stalked through the lower end of the valley. Gunning for partridges one early morning, Pete Murphy, his eyes on a drumming bird, pressed both triggers just as Father Fox's frost-tipped shape crossed his sights.

Rolling up the narrow pass the reverberating sound roused Quinto from a sound sleep. Awake on the instant he pattered along the tree trunk till he managed to get an uninterrupted view of the brooding valley.

Further down the slope his mother, roused by the same sound, paced restlessly up and down before the den, pausing every now and then to sniff the pungent powder scented air and send a challenging scream floating out over the tree tops.

[illegible] either of them have guessed the dreadful portent of the sound they might have fled Westport Hill as from the plague.

[illegible] presently, but the matter didn't concern him particularly, Quinto crawled into the den under the roots and resumed his interrupted sleep.

As events proved that single shotgun blast spelt the end of peace and quiet on Westport Hill. Maybe it was old Father Fox' fault, for had his coat been yellow, like Quinto's for instance, his executioner might have been content to call it a day and rest on his laurels. A silver tipped fox, though, was quite another matter.

His cupidity aroused by the fabulous price brought by his victim's pelt, Pete Murphy turned loose on Westport Hill one fateful morning two gangley legged, pendulously-eared dogs.

Well hidden by the protecting roots of the wind-blown tree, Quinto was brooding over the combination of circumstances that had forced him into exile when the baying of the hounds brought him erect with a thumping heart. Aware that the others were day-hunting in the valley bottom he pricked up his ears forwards and stared questioningly down the steep hillside.

The throaty sound, musical and ominous, came drifting up the valley again, nearer this time, and from out the bracken burst his mother's bedraggled form. Her legs buckling under her from sheer weariness, and only a few short jumps ahead of the vociferous dogs, she staggered up the slope.

From his impregnable position behind the friendly roots of the big tree Quinto could see that she had come to the end of her tether.. Some perhaps, might have considered this Quinto's big moment, his hour of sweet revenge. The red fox, however, proved to be made of better stuff. Instead of exulting at his parents' predicament he became possessed with a fierce desire to help her, to thrust himself between her and the horrible beasts that his instincts told him brought danger. Then he was off the tree and down the slope like a flash, racing through the underbrush like a streak of living flame.

Right between the dogs and his mother he flew, giving the pursuing beasts just enough glimpse of him to make them forget scent and follow sight.

No dog or combination of dogs could have overtaken Quinto that day for he was doing something that sprang from the heart. In and out of the bracken he drifted, up and down the solpes he flew, doubling and twisting so he soon had the burly hounds tied in knots.

Finally, satisfied that his mother was safely ensconced in the bosom of her family, he settled down to some real running that carried the labouring hounds to the far end of the valley. Leaving them floundering hopelessly in a bog he doubled swiftly back on his tracks and raced for home.

The den in the rocks looked exactly the same as he had seen it a hundred times. And to make the picture complete, his brother and sister sprawled nearby, lost in sleep, while from her watchtower of rock the old lady herself scanned the slope with suspicious eyes.

Ready to break into a swift run forward at slightest sign of friendliness, Quinto minced slowly towards her. For a moment it did seem as if, mindful of his brave deed in the valley, she intended swallowing her aversion for his atrocious coat and returning to him the key of the front door.

Encouraged, Quinto minced forward, brushed the tip of the old lady's snout with his, and was edging eagerly for the inviting mouth of the den when she leaped between them with a smothered snarl.

His black-tipped ears flattened hard against his flaming skull. Quinto sank to his belly and made one or two abortive attempts to sidle past her. Then realizing that the den was barred to him forever, he turned, and without a single backward glance, trotted slowly up the slope.

DOMINION BUSINESS COLLEGE STUDENTS SCORE HONORS AT TORONTO

In the Coliseum at the Toronto Exhibition, before an audience of 9,000 people four students of the Dominion Business College, Winnipeg, distinguished themselves at the Annual Typing competition held there on Saturday, August 28th. Miss Gwyneth Belyea won first place and a silver cup, and Miss Dorothy Maxwell ranked fourth, in the Open School Championship Contest. Miss Belyea had a net speed of 92 words a minute, a contestant from Brockville taking second place with 81 words a minute. Mr. Gustave Stove won First Place and a silver cup for speed, with 76 words a minute, and Miss Helen Brix took second place for accuracy in the Novice division.

When announcing the winners, contest officials told the large audience assembled that the Dominion Business College of Winnipeg, had made the best showing of any commercial school in the competition. This was the more noteworthy because there were no less than 107 contestants taking part. A very creditable performance from one institution.

ALBERTA CROP REPORT NO. 3

Issued by Alberta Department of Agriculture, Sept. 3rd, 1937

Harvest is well advanced in southern and east-central districts, with wheat cutting practically completed, the bulk of coarse grains harvested, and threshing general. In west-central districts south of Edmonton, and running north-easterly to the St Paul and Lloydminster areas, most of the wheat is cut, the coarse grain harvest is underway and threshing has commenced. In the Edmonton zone north to Athabasca, ripening of the grain has been delayed awaiting maturity of crop, and practically no threshing has been done. Wet weather has also prevailed in the Peace River district, and in consequence harvest had proceeded slowly. About two-thirds of cutting is done, but practically no threshing.

Yields over the province will vary widely. In parts of the dry area in the south-east no crop has been harvested, whereas at some points farmers are getting their seed back, and in a few restricted districts wheat is yielding from two to seven bushels per acre. In the southwest wheat returns are from seven to 25 bus. Grades throughout the south are good. Not sufficient threshing has been done in central and northern districts, including the Peace River district, for authentic reports re yield and grade. Yields are likely to vary by districts from 10 to 25 bus. of wheat, oats 25 to 40 bushels, barley 20 to 40 bushels. A good deal of second growth has occurred in crops from Red Deer north to Athabasca, causing considerable variation in maturity, and grades may suffer accordingly. Heavy growth of weeds is also a problem and may interfere with proper curing in the stook. Ten days of clear dry weather would facilitate harvest in the northern half of the province, whereas continued cold and rain may mean a reduction in grades and some loss in late crops, especially in the case of course grains.

Early August frosts did slight damage to grains in the Claresholm area. More serious frost injury is reported on the low lands of the Grande Prairie district where yield and grade are appreciably affected.

CO-OPERATIVE DAIRYING BY TWO COWS AT CORONATION

Two cows were reported by the Coronation Review to be participating in a co-operative enterprise.

They had apparently grown tired of being milked by their owner and had decided to do the job themselves, each taking milk from the other in calf fashion and relishing it.

AIR LINE APPOINTMENTS ANNOUNCED BY JOHNSON

Montreal, Que., September 3.—The following appointments have been announced by Phillip G. Johnson, vice-president in charge of operations, Trans-Canada Air Lines.

D. R. MacLaren to be assistant to vice-president, with headquarters at Montreal. D. B. Colyer to be chief technical adviser with headquarters at Winnipeg.

After completing his education in Western Canada and at McGill University, Donald Roderick MacLaren joined the Canadian overseas forces in 1914, and began his association with the the Royal Flying Corps in 1917. His war record in the air was exceptionally brilliant and he was awarded the Military Cross and Bar; the Distinguished Flying Cross; Croix de Guerre with Palme; and created Chevalier of the Legion of Honor. He joined the Canadian Air Force in May, 1919, and played a prominent part in the formation of that service, retiring with the rank of Hon. Wing Commander. Retaining his interest and activity in aviation, particularly in developments on the Pacific coast, he became superintendent, Canadian Airways Limited at Vancouver, a position which he relinquished to join Trans-Canada Air Lines.

Selected as chief technical adviser to the vice-president because of his intimate knowledge of modern airline operation, Duard Brown Colyer has been associated with aviation for the past twenty years. He has occupied the positions of superintendent of flying, division superintendent of United States Air Mail Service, vice-president in charge of operations, Boeing Air Transport, Inc. and vice-president in charge of operations United Air Lines Corporation.

EASTERN CANADA FALL RAIL TRAVEL BARGAINS

Winnipeg, Man., September 5.—Early autumn bargain fares over the Canadian National Railways from western to eastern Canada, with a return limit of 45 days from date of sale, are announced by R. Creelman, passenger traffic manager, western region. These will be sold between September 18 and October 2, inclusive, and present a post-holiday opportunity for those whose summer has been filled with business rather than pleasure. Stopovers are allowed at Winnipeg and east.

Three classes of tickets will be sold namely, coach, tourist and first or standard. Coach fares are good in coaches only; tourist in tourist sleeping cars on payment of the requisite berth fare; and first are good in standard sleepers and parlor cars on payment of the rate for that accommodation.

These bargain fares will be on sale from all stations in British Columbia, Alberta, Saskatchewan, Manitoba and in Ontario west of Port Arthur and Armstrong, to points in Eastern Canada. Port Arthur, Armstrong and east.

Mr. Creelman announces similar fares from Eastern Canada to Port Arthur, Armstrong and stations west on the same conditions. These tickets will be on sale between September 18 and October 2, with a return limit of 45 days, and good for stopovers.

The "multiplication table" of the home cook is—three teaspoons make one tablespoon; 16 tablespoons make one cup; two and a-half cups make pint; five cups make one quart.

Although Moscow has 1,000 new taxicabs, lines of customers form every night at the taxi stands.

FALL RYE—THE FARMERS' FRIEND

(Experimental Farms Note)

Fall rye can be used in a number of ways as an annual and biennial pasture crop, a hay crop, a weed control crop, and as a cover or soil erosion control crop. In fact fall rye can be used in more ways than any other cereal or forage crop.

If seeded in the spring, either alone or in a mixture with another cereal such as oats, it will produce a high yield of palatable and nutritious pasture throughout the summer and late fall provided the moisture supply is adequate. If not grazed too close and too late in the fall, it will come through the winter and provide early spring pasture, or it may be left to produce either green feed or silage or allowed to ripen for grain.

Winter rye, being a hardy and vigorous growing biennial that starts growth early in the spring, constitutes one of the best smother crops available for the control of weeds. Annual weeds are all held in complete subjection, and persistent perennials such as thistles and couch grass make a relatively weak growth in competition with this crop.

Since fall rye forms a protective coating for the ground at those seasons of the year when the soil is most subject to wind erosion and drifting, it can be used to advantage in a soil drifting control program. While it has not been considered a drought resistant crop, it can be used to advantage in drought areas because it makes most of its growth early in the season and before extremely high temperatures prevail.

CHIEF SCOUT ENDS INTERNATIONAL SCOUT MEET WITH APPEAL FOR WORLD GOOD WILL

A call to scouts to "spread friendship and brotherhood throughout the world was the closing appeal of a moving address by Lord Baden-Powell, World Chief Scout, to the 28,000 boys of all nations about to separate at the close of the 5th world scout jamboree n Holland this summer.

"The time has now come for me to say good-bye," said the 80 year old father of scouting. "I want you to lead happy lives. You know that many of us will never meet again in this world. I am in my 81st year, and am nearing the end of my life. Most of you are at the beginning, and I do want your lives to be happy and successful. You can attain it by doing your best to carry out the Scout Law all your days, whatever your station and wherever you are.

"I want you to preserve this badge of the Jamboree on your uniform. I suggest that you keep it and treasure it, and try to remember what it stands for. It will be a reminder and an inspiration of the [illegible] times together in camp, and by observing the significance of the totem it will help you in your quest to help bring about God's reign of peace and goodwill.

"It will always remind you of Holland. It will help you to be equipped to carry out the Scout Law all your days and to spread even farther our Scout ideals of goodwill and of the helping hand of fellowship to all we meet. My message to you is to spread friendship and brotherhood throughout the world. Good-bye and God bless you all."

To each of the leaders of the various contingents the Chief Scout presented the Jamboree totem, a Jacob's Staff, an instrument used by early Dutch navigators, to take home "as an emblem of goodwill."

BREWED IN ALBERTA

BEER

...... the FINEST in the WEST

Of all the brands in Western Canada, none can surpass the excellence of these famous Alberta Beers. Painstaking care in brewing and the careful blending of choice barley malt, hops and yeast, serve to distinguish Alberta's five brands from all others.

By the case at Govt. Vendor Stores.
Served in bottles or on draught at all licensed hotels and clubs.

This Advertisement is Not Inserted by the Alberta Liquor Control Board or by the Government of the Province of Alberta.

PRE-COOL AND HANDLE POULTRY QUICKLY

The pre-cooling and proper handling of poultry killed on the farm or at a packing plant is particularly important because the bloom will be quickly lost if the birds are not pre-cooled without delay and also handled properly.

Poultry killed on the farm and sold dressed through local buyers or poultry pools where no pre-cooling facilities are available frequently lose their bloom, with the consequent depreciation in the sales appearance of the birds and the failure to get the best price on the market, according to the Chief Market Poultry Inspector, Dominion Department of Agriculture.

Most of the farm poultry is killed in the fall when cool temperatures prevail. If proper care is then observed in assembling and packing the birds they can be placed on the market in the best condition. Wherever poultry is handled, the temperature of the pre-cooling room should be checked frequently with a reliable thermometer. A temperature of 32 degrees Fahrenheit is the best for pre-cooling and handling dressed poultry. Fresh poultry can be handled satisfactorily in a temperature a few degrees higher than 32, if less than 32 the birds will freeze. Every effort should be made to pack the birds quickly and if intended for cold storage they should be frozen without dealy. If they are intended for immediate consumption or for sale as fresh birds, they should be held at a temperature of 32 degrees.

When pre-cooling poultry on the farm the birds should be cooled as closely as possible to a temperature of 32 degrees, whether pre-cooled outside, in the cellar, or any other part of the house. It is not safe to guess at the temperature, it should be checked by a thermometer. When transporting the dressed poultry from the farm to the assembling point, the same uniform temperature should apply. If the temperature is much lower or higher than that at which the birds were pre-cooled, most of the benefits of pre-cooling will be lost. Provision should therefore, be made if the weather is at freezing point to keep the birds from freezing, and if warm to keep them cool.

At the assembling and packing point, whether it be a sorting, packing house or pool point, the same precaution should be taken. Here again the temperature should be checked with a thermometer. Proper provision for receiving the birds should be made before the birds arrive and not after. Regardless of where the poultry is assembled, the birds should be hung up and not thrown around or put in piles, and they should be packed and shipped or put in storage as quickly as possible. Holding small lots of poultry received daily until a sufficient volume has been accumulated for packing or shipping is detrimental to the quality, particularly where no cooling facilities are available.

Poultry meat is a perishable product which will deteriorate rapidly unless properly handled. The market demand is for properly packed poultry with good bloom and bright appearance. Good bloom is first secured by proper finishing but is held after killing by proper handling and holding in correct temperature.

Some of the chief essentials in handling dressed poultry are:

1 See that all birds are bled and plucked properly and that the feet and the mouth are washed clean.

2 Birds should be hung up by both feet and allowed to pre-cool for twenty-four hours. The temperature for pre-cooling should be as close to 32 degrees as possible.

3 The temperatures should be checked frequently with a thermometer.

4. In transporting poultry to assembling or selling points it should be held at the same temperature at which it was pre-cooled.

5 Whether the assembling of poultry for packing or shipping is being done at pool landing points, packing houses or country stores, the temperature of the room should be kept at a uniformly low temperature. The birds when received should be hung up or spread out and they should never be put in piles or thrown about.

DRIVE SAFELY AROUND SCHOOLS

Reopening of schools in cities, towns and villages and elsewhere in this province again draws attention to the need of motorists using every care when approaching or driving past schools.

Thousands of children will be attending school for the first time and therefore will not fully realize the dangers to be [illegible] in traffic.

Motorists should regard it as a primary duty to exercise exceptional care when operating in the neighborhood of schools.

An appeal for safe driving, especially in the vicinity of schools, has been made by officials of the Alberta Motor Association.

Hand in hand with this appeal for safety goes the movement initiated in some centres of the province to organize school patrols. These have given satisfactory results in other provinces and states and should be encouraged in Alberta.

The Facts About Banking in Canada

Reproduced from the First Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, September 7th, from 10:15 to 10:30, and Wednesday, September 8th, in the Daytime from 1:15 to 1:30.

Opening Broadcast Describes Meaning of Credit ... Tells What a Bank Is ... Outlines Subjects of Further Talks ... Will Discuss Cries of "Monopoly" and Who Owns the Banks

Canada's Chartered Banks, through me, will tell you the facts about Canadian Banks and the banking system in a series of non-political, non-controversial broadcasts of which this is the first. There are many misconceptions and misapprehensions abroad regarding banks and banking. We believe that those who criticize the banks are thoroughly sincere and it is our hope that, as we proceed to present the true story of Canadian banking, we also shall be given credit for complete sincerity.

Certainly there is a wideawake intelligence and an inquiring spirit alive in Alberta and a genuine desire on the part of the people at large to obtain the facts. Many important questions have been raised and we intend to supply answers which are truthful and accurate. Intelligent people prefer to have *all* the facts and then to form their own judgments, so we have good reason for the belief that we shall have lots of listeners.

The explanations that we intend to give in regard to Canadian banking are offered in response to a very evident and definite public demand and I must repeat that we are not fighting, nor resisting, nor affiliating with any political party. Canada's Chartered Banks do not aim at controversy and will present their story without heat or recrimination, for any case that needs abuse of others to support it must be a weak case indeed.

One of the leading questions in regard to banking is, of course, the question of credit. Let us illustrate credit to you briefly, for it is wrongly claimed that we enjoy a monopoly of the right to extend credit. Of course, we do not. We do not have a monopoly, even of banking. Any group of responsible people, in West or East, can start a bank. We shall tell you about that in detail, in a later broadcast. Manufacturers extend credit to wholesalers. Wholesalers extend credit to retail dealers. Merchants and retailers extend credit to customers. Canada's Chartered Banks furnish short-term credit to facilitate production, to move and market that production and to transfer goods and services.

Soon the Alberta farmers will be hauling wheat to the elevators. If they had to wait until the grain reached Liverpool, and the money to come back before they got their cash, it would be a long wait — but bank credit is what enables them to get their cash at the line elevators right away. Individuals lend money to each other — the successful farmer lends money to his neighbour.

Let us take the case of two neighbouring farmers. Harry Brown, we shall say, has $500 in a Savings Account in his nearest branch of a Chartered Bank. His neighbour, William Jones, is a good farmer without ready money, who feels that if he had $250 he could buy hogs, feed them up, sell them and make a little profit; so he goes to Harry Brown and asks if his neighbour will trust him with a loan of $250.

Mr. Brown, knowing that Mr. Jones is a decent chap, and trustworthy, and that he will get his money back with a little "rent" on it, goes to the bank, draws $250 of his $500 and hands it to his neighbour. Mr. Jones buys the hogs, feeds them up, sells them, makes his profit and pays Harry Brown back his $250 with the agreed rent to boot.

If Mr. Jones had not known a neighbour both able and willing to help him, the Manager of his nearest bank would have been found, in the same circumstances, a neighbour on whom Mr. Jones could call with confidence— in other words, he could have got his loan of $250 from the Bank.

It is the deposits such as Harry Brown's $500 that furnish the major basis of Canadian bank credit. Harry Brown is only one of over three million nine hundred thousand savings bank depositors in Canada, who have on deposit in the Chartered Banks the striking total of more than One Billion Five Hundred and Seventy Millions of Dollars. The fact is that the vast sums which are employed in building up this country have their main source in the collective savings of thousands of people in all walks of life, who, through their work and thrift, have been able to build up small deposits.

The average savings deposit in the Canadian Chartered Banks is around $390. At least it was $380 on October 31st, 1936, as shown in an official return to Parliament. These returns are made periodically to the Government and to the Bank of Canada. They are sworn statements by the banker and are made public to Parliament *and in* the newspapers. If a bank Manager should make a false return, he can be sent to jail. Such penalties are provided in the Bank Act.

How did Harry Brown get the $500 which he has on deposit in the Bank? Let us say he got it by raising wheat. He probably started as a homesteader, wagering his $10 that he could make a success of it and, after three years of hard work, get his patent. This he did; and he earned his $500 by the sweat of his brow, having overcome the early hardships of homesteading.

That $500 was *one* deposit that did not come from a loan.

When I speak of the hardships of homesteading in this wonderful western land I speak with feeling, sympathy and understanding for I myself, in 1909, took up a homestead some seventy miles north from Bassano and had to make my way to that homestead, not very far from the Hand Hills District by ox team. That was before the Goose Lake Line of the Canadian Northern, now the Canadian National, was built through from Saskatoon.

I know what drought is, for that year we had no rain and no crop in a considerable area between the Bull Pound and the Berry Creeks. I used to stand on some high land on my place and watch the little rain storms travelling down the Creeks on either side of me, seven or eight miles away, without a drop falling upon the parched piece of ground that I was trying to farm. Typhoid fever, alone on the prairie, with my nearest neighbour *miles* away, made it physically impossible for me to continue homesteading.

In the West, I feel that I am talking to folks I know. From the homestead I went into western newspaper work, serving as a reporter in Prince Albert, Saskatoon, Regina and Winnipeg; and also as an Editor in Winnipeg; so you see it was on these Western Plains that my career had its beginning and so it is that I speak to you not only as a bank official tonight. I speak to you too as one who knows your hardships from the experience of a settler, one who has a real, abiding, sympathetic understanding of the people and problems of this Province.

I do not mention these things by way of boasting. It is my hope that I shall be looked upon largely as one of you. I have found that financiers do not fear the open spaces. Proper, orderly, safe banking, essential to safe-guarding the depositors' funds, is a full-time job; no Bank Manager, or bank executive, can do full justice to his work and find time to stump the country with a view to informing the public. So the presenting of our facts simply, freely, plainly and accurately has become my work. It is wrong to say that banks care nothing about the public's goodwill. It is because they *do* care that I am here — as an official representing Canada's Chartered Banks.

I have spoken to you about Harry Brown and William Jones, the two neighbouring farmers, and I have told you how credit operated between them. Let me turn to another illustration of Bank credit. I want to tell you a true story which arose in an Alberta town only a few months ago which goes to show how bank credit extended to a merchant benefits the consumer.

I was talking to the Bank Manager in whose branch this circumstance arose and he said to me: "Bank credit helps everybody in this country." Without mentioning any names he told me of a credit of $3,000 extended to a merchant the day before. The banker said to me: "This man wanted $3,000 to meet a number of bills on each of which he would be allowed, by his wholesalers, 5% discount (a saving of $150) if paid before the tenth of the month. I asked him," said the banker, "How long he wanted the money for, and the merchant said, 'Thirty days.' I asked him how he expected to be able to pay it back in the thirty days and the merchant replied, 'Because of this discount and my normal profit I can put on a sale, reduce my prices to the public, attract new customers, create goodwill, get my money out and repay the Bank.'"

Continuing, this Bank Manager asked me — "What is the matter with bank credit there? For a matter of $15.00 paid to the bank as "rent" on the money the merchant saves $150 on his bills and passes part of the saving on to the public."

I think everybody really knows at heart and will readily admit, that the man, woman or child who has a savings deposit in a bank must, at any time, be able to go to the bank in full confidence that he or she can draw out that deposit in full and with interest. No bank can say to a depositor who wants his money in a hurry: "Oh, Mr. Jones, you cannot have that money for we lent the credit based upon it to others without security and we cannot get it back." If you are a depositor you know just how you would feel in a case like that.

What is a Bank? Above all things a Bank is a place where you or your children can go and deposit your money with absolute assurance that any time you demand it you can get it back in full, intact and with interest.

I want to give you the words of the late Lord Snowden, formerly Phillip Snowden, the great Socialist Chancellor of the Exchequer in Britain's Labour Government which was headed by Ramsey McDonald. Lord Snowden, in 1935, said: "If the Banks were nationalized they would have to be managed as they are now if their solvency was to be maintained."

In later broadcasts of this series, you may hear from some Alberta Branch Bank Managers who have been your co-workers, neighbours, fellow-citizens and friends for ten, fifteen, twenty or thirty years, perhaps even longer. We shall show you how banks are formed, who owns them, what they do what they can do, as well as what they cannot do, and why. We shall explain their responsibilities. We intend to discuss their part in the community. The "thin air" or fountain pen" theory of money will be one of our subjects. We shall discuss "credit" at greater length. We will tell you about the earnings of banks. And we shall deal in greater detail with that cry of "monopoly." We shall discuss the story that we are part of "An International Ring."

No business in all Canada operates under such strict rules, such continuous governmental supervision and such close parliamentary scrutiny as do Canada's Chartered Banks. These are some of the things that we shall touch upon further as we proceed. I trust indeed that you will continue to lend us a listening ear, for Canada's Chartered Banks have confidence in the fairness of people who seek the facts and think for themselves.

You may obtain a printed copy of this broadcast at your nearest branch of any of Canada's Chartered Banks. Any member of the staff will be glad to hand you a copy personally or you may have one mailed to you by writing your nearest bank.

We shall be on the air again at 1:15 to 1:30 to-morrow afternoon over this same network and every Tuesday evening and Wednesday midday, until this series of short talks about banking is completed. You have been listening to Vernon Knowles, representing Canada's Chartered Banks.

Watch for Announcement Giving Dates and Times of Second Broadcast.
This and Future Addresses Will Be Reproduced in This Paper.

The W. A. Holy Trinity will hold a Tea, Sale of home cooking and Vegetables on Saturday, September 18, in the Institute rooms.

Advice, like snow, the softer it falls, the longer it dwells upon and the deeper it sinks into the mind.—S. T. Coleridge

Twenty Years Ago

Twenty years ago two farmers' grain companies serving Alberta Farmers were amalgamated to form United Grain Growers Limited.

The twenty years that have passed have increased the confidence of farmers in this farmer-owned institution. Satisfactory experience in the handling of their grain is the basis of that confidence.

THE WORLD OF WHEAT

* * * * * * * * *

A drastic decline has taken place in the world's demands for export wheat!

Mr. Broomhall estimates the importing countries will buy this year only 496 million bushels.

This is in striking contrast to the 818 millions which was the annual average amount purchased for five years prior to 1931, and to the [illegible] million bushels, the sales for [illegible] alone.

We are told that millions of people need more bread. Why then, is more export wheat not purchased?

It is mainly because of an extraordinary economic delusion that has recently gripped the minds of most Governments; that their people can become richer and richer by bringing in less and less of the goods and services of other countries; governments forget, apparently, that the imports from other countries constitute, in the end, the only means of payment for their own export products.

Dr. John Mackay, eminent English philosopher, in considering these curious illusions and madnesses wrote "Men think in herds, they go mad in herds, and recover their sanity slowly, and one by one."

Dr. Mackay notes, however, that economic sanity does eventually return. Let us hope for the sake of the wheat producers, and all of us, that it may be soon.

Following factors have tended to raise price: Hostilities between China and Japan increase to serious proportions; floating wheat stocks decrease; complaints from Russia of slow harvesting operations and much damage to uncut wheat; world visible stocks less than last year; Indian monsoon a failure; European fruit prospects poor.

Following factors have tended to lower price: World demand for export wheat continues small; Roumanian wheat estimate increased; substantial Turkish wheat surplus; yields increased in many parts of Europe; rains check deterioration in southern hemisphere; export considerable increase in Swiss potato crop; Sweden removes ban on export of food grains.

DIPHTHERIA Can Be PREVENTED

Diphtheria is caused by the poison or toxin produced by the diphtheria germs lodged in the human body, usually in the throat and nose.

When this toxin attacks the body, the latter seeks to protect itself, and it does so by producing diphtheria antitoxin or anti-poison, which counteracts or neutralizes the toxin. If this occurs quickly enough and a sufficient quantity is produced, the body wins and recovery results. Not only does recovery take place but something happens inside this human body which enables it, in most cases, to prevent a second attack of the disease.

Can protection similar to that conferred by an attack of the actual disease be gained without the danger of death and without fear of the suffering that comes with the disease? The answer is "yes."

Diphtheria can be prevented by the injection of diphtheria toxoid or toxin-antitoxin. This method is known as diphtheria immunization. The injections stimulate the body to produce the substances which are the fighting forces against diphtheria. These substances are not developed at once; it takes several weeks for this to occur, but after the development has taken place, the person is immunized or protected against diphtheria, just as he would have been had he had an attack of the disease.

The menace of diphtheria can be eliminated. Lives can be saved and suffering prevented. Ask your family physician to give your children this protection by immunizing them against diphtheria.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

School Fair Well Attended Exhibits Numerous and Good

The school fair held on Saturday last drew more entries and people than any previous one so far. Last year some 800 exhibits were handled; this year the number was swelled to 1400. The increase was evident in all classes, school work, arts and crafts, vegetables, grains and grasses and poultry.

It would be quite difficult, neither would it be quite fair to the exhibitors, considering they were of all ages, to comment on the individual exhibits. But one can hardly pass up the quality of the vegetables, cooking and arts and crafts. Certainly the cakes, pies, lunches, buns, etc., would have done credit to a senior fair.

All connected with it are to be congratulated upon the success of the event.

Jack Smith, who is attending university in Edmonton, spent the week end visiting friends in Tofield.

Lynn Phillips left last week for Vancouver, B.C. after spending the past week at his home here.

KETCHAMOOT

* * * * * * * * *

With ideal weather threshing is going ahead rapidly and by the end of the week most of the wheat will be threshed. The average yield per acre seems to be around 20 bushels. On one farm it seemed to run from 40 to 10 bushels to the acre, some on summer fallow and some on spring plowing.

Mr. and Mrs. Wesley Ingram came from Victoria, B.C. on Wednesday of last week and will spend a month visiting friends and relatives.

Mr. Stanley Milton of Edmonton is working for Mr. Schultz.

Mrs. Younie, Miss Maud Wildman and George and Jim Younie of Edmonton were guests of Mr. and Mrs. W. A. Mitchell over the week end.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. J. H. Ingram and Mr. and Mrs. Wesley Ingram were Sunday guests of Mr. and Mrs. Wm. Ingram and Mr. and Mrs. Les Ovelson.

Mr. Sam Nomeland has been under the doctor's care the past few days. We hope his illness will be of short duration.

The Ray boys received word on Saturday that their father, Frank Ray of Vancouver, had suffered a stroke.

Mr. and Mrs. Albert Flein of Hay Lake had dinner with Mrs. Flein's sister, Mrs. Elsie Carlisle on Sunday.

Mrs. C. A. Ingram entertained the Ladies Aid on August the 1st. A good attendance was present. A Thanksgiving tea will be held at the Appleby home some time in October. The October meeting will be held at the home of Mrs. W. A. Mitchell on October 6th.

Mr. and Mrs. W. Ingram, Mr. C. A. Ingram, Mr. and Mrs. Sears and Charlie attended the Social credit meeting in Ryley Thursday night.

Miss Mabel Lawson returned to Camrose and is teaching in the Normal practice school where she has been engaged for several years.

Mr. and Mrs. Klinewrough and family visited at the Maurice McGinitie home Sunday.

The Sears family is eating peas off the second-growth of the season. Also we presume seed potatoes just hang in clusters from the potato vines like small tomatoes.

China Large Producer of Wheat

It may be surprising to some readers of the Budget to know that China is one of the largest producers of wheat in the world. Until fairly recent years nobody had any idea of the annual growth of wheat in that country, but there was a fairly general belief that it was large. No facilities for recording information of this kind were available in China though the governments of some provinces could always certify that wheat growing was an important industry in their particular parts. Even where grown in large quantities wheat did not—nor does it now—enter into the commercial picture in more than a limited way. It is generally consumed in the locality where produced without milling or other mechanical treatment.

Quite recently the central government of China set up a research bureau whose business it is to find out about such things as the annual production of wheat. Among other facts so far established by this bureau is the interesting one that something over 50,000,000 acres of land are annually sown to wheat in the 22 provinces that constitute the China of today. This excludes Manchuria which is not at present under Chinese control but is a large producer. On this acreage the annual production ranges from 600,000,000 to 900,000,000 bushels. Including Manchuria the total would be nearly 1,000,000,000 bushels. Some who know China believe these figures understate both acreage and production.

Owing to the fact that transportation facilities over most of China are of the most elementary kind, there is no present threat that within measurable time she will become a factor in the world's wheat trade.—Northwestern Miller

GROW A MONEY-MAKING CROP

All farmers are naturally interested in increasing their incomes. Farm incomes depend upon profitable crops. Good seed is the foundation of a profitable crop.

See the nearest Searle or Home Agent about how to secure the best seed at cost price.

SEARLE GRAIN COMPANY, LIMITED

The Premier Visits Ryley Large Hall Well Packed

Ryley was the centre of interest last Thursday evening when Premier Aberhart visited that point and addressed a crowd of people that literally overflowed the hall. There was far more people than the hall could accommodate and loud speakers were installed so that those unable to get in could hear the premier's address.

In addition to the premier Hon. Mr Tanner gave an address, both speakers vigorously upholding the actions of the provincial government and condemning the action of the dominion government regarding banking legislation.

The tenor of their addresses was along lines that have already been given publicity by the press and radio stations, re-iterating social credit policies.

Quite a number from Tofield and the Tofield district attended.

FOR SALE—Ford Truck, with dual wheels. Long wheel base. Large grain tank. $[illegible]. W. C. Swift, Ford Dealer, Tofield.

KETCHAMOOT SOCIAL HOUR CLUB NOTES

The monthly meeting of the Ketchamoot Social Hour club was held at the home of Miss Ethel Coombe. Even for such a busy time there was quite a number present.

Guests were Mrs. L. Carlisle, Mrs Davidson and Miss Nellie Lindsay.

At the meeting they discussed the sale of sewing and knitting each member had done through the year. No date has yet been set for the sale but it is expected to be in the near future.

A delicious lunch was served by the hostess. The next meeting will be held at the home of Miss Edith Davidson.

NOTICE.—Patrons of the Beauty Salon may now make their appointments by telephone. Call No. 9. Permanent waving, marcelling, finger waves, etc. Esther Pyle, Tofield.

Peaches Now Plentiful And Cheap

This year Ontario and British Columbia are picking a bumper crop of peaches. The crop in Ontario is estimated at [illegible] bushels, 101,000 bushels more than in 1936. British Columbia has 125,000 bushels, an increase of [illegible] bushels over last year. The fruit will therefore, be comparatively cheap during the next [illegible] weeks. The quality of the crop is excellent.

Of all the fruits grown none is so sweetly luscious, no more healthful a food than peaches. Whether eaten just as they are picked sun ripened from the trees as fresh [illegible] fresh [illegible] canned or pickled [illegible] quality and flavour.

It is believed that the peach originated in China many generations before the beginning of the Christian era. The Chinese have always ascribed magical powers to the peach. One Chinese sage wrote: "The peach, if one is able to eat it enough times, will save the body from corruption to the end of the world." Another philosopher, [illegible] declared "Whoever eats the peach obtains immortal life."

Peaches are sold in Canada by grade, the grades in the order of quality being, Select, No. 1, No. 2, No. 3, Domestic. The grade mark is plainly indicated on the basket or other container. The following recipe may prove useful:

PEACH MARMALADE

[illegible] Peaches
2 Oranges
Sugar
Water

Peel and stone the peaches. Remove seeds from oranges and put through a food chopper. Mash all together and weigh and allow an equal amount of sugar. First cook the fruit until tender in a small amount of water, then add heated sugar and boil until thick. Pour into hot sterilized glasses, cool, seal with paraffin wax and store.

Handle Gun Carefully Is Advice to Hunters

With the approach of the hunting season in various parts of Canada, during which thousands of sportsmen will make for the woods and marshes to seek their trophies of animals and birds, a few precautions concerning the use of firearms may be mentioned in order to avoid accidents or possible fatalities which may result from the careless handling of guns, particularly in the hands of less experienced sportsmen, according to C. K. Howard, head of the Fish and Game Department, Canadian National Railways.

While the hunting season is a time of action in which a series of "don't's" would seem to defeat the enthusiasm of the sportsman, nevertheless, in view of the possible danger attendant upon the careless handling of such weapons, a little timely advice seems in order, stated Mr. Howard, to safeguard the sportsman and others from untoward injury.

Mr Howard points out that hundreds of people are killed or wounded each year, principally through their own carelessness. Many hunters kill or wound themselves or others in the excitement consequent upon the pursuit of the game.

Common among the causes of fatality and injury are: pulling guns through fences; guns knocked down by dogs; uncased loaded guns in automobiles; accidental firing of guns through bottom of boats, the hunters drowning themselves with the sinking boat; accidental stopping up of barrels with dirt; leaving obstructions in barrels, such as cleaning rags, rods and the like; carelessness in handling guns by letting them explode with barrel ends under water; shooting at a moving object without seeing the object clearly and firing at game without looking beyond it in the line of fire.

If the hunter with his gun will keep in his consciousness the fact that he has a weapon of great potential danger and will observe due precaution in handling same at all times, stated Mr. Howard, the hunting season could pass without many of the accidents usually attendant upon the hunting activities of the fall season.

Bees Nest In School Attic At Sergeant

Clive, Sept. 14 — School children at Clive have some new companions which are not at all pleasant, although they seem to have been harmless as yet. They are bees. Several thousands of them have nested in the attic of the Sergeant school house. The bees fly among the children but they seldom sting any of them, which makes the situation slightly more comfortable.

FOR SALE—Tank Pump, Tables, 4 buffet, horse hair mattress, horse bits, trunk, steel barrels half size, dishes, hand-power washing machines; .22 rifles—Apply to Stinson and McCarthy, Tofield.

The Facts About Banking in Canada

Money Not Goods, Only Means for Transferring Goods or Services ... Credit is Attribute or Possession of Individual, in Assets and Character ... Cannot Be Wiped Out by Stroke of Pen ... Next Talk to Deal With Burden of Taxation on Canada's Banks.

IN the last ten fiscal years Canada's Chartered Banks have paid out to customers in interest on their deposits over Four Hundred and Sixteen Million Dollars.

In our first broadcast we told you that prudent and orderly banking is based, above all things, upon safeguarding the depositor's funds. We now proceed to deal with the "fountain pen" theory. In my travels I have encountered two great misunderstandings:

1. That the Chartered Banks create money by a stroke of a fountain pen — that we just write figures in a book and that that is the way our deposits come into existence.
2. That we then loan these deposits ten times over, thereby making vast profits out of nothing.

Now wouldn't this be a great perpetual-motion machine if it were only true. I mentioned that in ten years we had paid out over Four Hundred and Sixteen Million Dollars in interest to attract deposits. If we could create deposits by using only a fountain pen we need not have poured out such great sums at all.

You have all heard about bank failures in various parts of the world and of the [illegible] losses suffered by depositors. If it were true that banks could create money, simply by writing figures in a book, all that would be needed to avoid any bank failure would be a fountain pen.

And if banks could make such fabulous profits on money produced by magic from an ink bottle they would be paying sky-high dividends, everybody would be selling everything they could lay hands upon to buy bank shares and there would be a land office rush at Ottawa for bank charters. We shall deal with the question of bank earnings in a later broadcast but, you will notice in the meantime, that nobody is scrambling to sell all that they own to buy bank shares and there is no Land Office rush on at Ottawa for bank charters. Not that there is any difficulty about getting a bank charter when responsible people apply for one.

Now would you not think that if the banks could perform all of the miracles that they are said to perform, some of those who criticize the banking system would secure charters and perform these miracles themselves?

Much of the misapprehension about how deposits arise is based on a fragment taken out of a statement made in 1925 by the Right Honourable Reginald McKenna, Chairman of the Midland Bank in England. That fragment is: "Every loan creates a deposit." From this statement, standing by itself, many wrong conclusions have been drawn. Mr. McKenna is now here in Canada. He was asked in Banff the other day to comment on his much quoted statement. He replied that it was true that a loan creates a deposit but that such a deposit would not be an asset on the bank's books but a liability—a debt which the bank must be prepared to meet on demand just as fast as cheques were written against it. He also pointed out that *every* deposit is a liability of the bank — money the bank owes to the depositor and must be ready to pay on the instant.

You will remember the farmer, William Jones, who figured in our first broadcast. Besides being a hard worker and an honest man, he owns his farm and the outfit to work it, and this year he has a crop. However, he is still short of ready cash. We will use him to show you just what happens in this matter of loans and deposits. The farmers in Northern Alberta this fall are having to use power units with their binders.

William Jones finds that he needs one of these units. It is going to cost him, say, $100. This time he goes to the bank and asks the manager of the bank to lend him the money. He gives the Bank Manager his note and his account is credited with $100;—here is one of those deposits that has arisen from a loan.

Now let us show what happens to that deposit. Mr. Jones obtained his loan for a purpose. He proceeds to carry out that purpose. He gives a cheque to the implement man — the implement man presents it at the bank and is paid, we will say, in bills — so the deposit which arose from the loan has completely disappeared. A Bank Manager *would indeed* have to be a magician to be able to lend *that* deposit ten times over.

Now some listening critic may say: "But suppose the implement man does *not* cash the cheque. Suppose he deposits it in his own account—in that case has not the loan created the deposit?" The answer is that insofar as *his* deposit is concerned, it came from the marketing of his goods — a deposit based on something that is produced, some tangible thing transferred to the purchaser and paid for by him.

This deposit is in the same class as that of a man who saves and deposits a part of his wages. It represents the result of the sale of goods and the wages of labour. These depositors leave their money in the bank because they are satisfied to accept the bank's promise to pay instead of demanding cash. It is the accumulation of these funds that furnishes the basis of bank credit — the basis upon which banks can make loans. But it is impossible for a bank to lend more than the total of its deposits and its paid-up capital.

In the case of William Jones' loan and deposit, by no means under the sun can it be said truthfully that the deposit came from a fountain pen. It rested, absolutely, upon William Jones' assets, the Bank Manager's knowledge of William Jones' integrity and the reasonable certainty of repayment out of the proceeds of his crop. You have all heard that a loan gives rise to a deposit but have you ever thought about what it is that gives rise to a *loan*? Realizable wealth, character, and the likelihood of repayment by the man who wanted to rent the money from the bank, to make a profit for himself.

Let me present another case where a loan does *not* result in a deposit. Let us suppose the implement dealer himself was a borrower at the bank and when William Jones gave him the $100 which he had borrowed, the dealer reduced his own indebtedness by that amount. What has happened? The total of loans at the bank has not changed — neither has the total of deposits in spite of the fact that the bank has made a new loan to William Jones. What does all of *this* illustrate? Nothing less than that the bank has fulfilled one of the prime purposes for which banks exist, namely:—It has facilitated the exchange of goods and services; it has aided in distribution and it is doing the things that keep business going.

There is one more point I should like to mention and I am sure it is one which has occurred already to many of our listeners. Let us suppose that Mr. Jones, through bad luck, was unable to repay the $100. What then? The bank which enabled him to pay his bill to the Implement Company, cannot recover the loan; in other words, it is a bad debt. Too many bad debts would jeopardize the safety of the depositors' funds. It would take the gross rent on more than sixteen loans of $100 each, at six per cent, for one year, to make up for that one loss.

Now our listening critic may say: "Oh, but in any case you have not enough cash to meet more than perhaps one-tenth of the deposits you hold — so, if everybody called for their deposits all at once, you wouldn't have money enough to pay them. How do you answer that?"

Our answer is that if you will examine the sworn returns made by the banks to the Dominion Government, you will find that in addition to the approximately ten per cent of cash *always* on hand, there are huge sums in other assets — which the bank owns — of such a nature that they can be *converted* into cash.

And we answer further, that the whole population is not going to close out its savings accounts all at once.

We answer, too, that banks, by experience, have found how much cash is likely to be called for from day to day. If you have a deposit in a bank, I'll wager that there is many a day — or even many a week — when you do not call for any part of it. You do not put money into a savings account if you have immediate need of it. You put it there because you do not want to spend it. Banks know from practice how much they need to keep in cash to meet the average daily withdrawals. The rest is set to work — some of it as we have said, immediately realizable and the rest in short-term loans or in types of investment which ensure the greatest safety for the depositors' funds.

We answer further, that money is not wealth—it is only a means whereby wealth in goods and services is transferred. Your title deed to your house is not a house; your patent to your farm is not a *farm* — nor is a dollar bill, goods — it is only a title deed to real goods.

One five-dollar bill is not extinguished the moment one man pays it to another. If Harry Brown buys a hat from Tom Jones for five dollars and Tom Jones buys coal with it from Jack Robinson and Jack Robinson pays his grocery bill with it, there is $15 of business done with one five-dollar bill — so you will see, by these plain illustrations, how people can get along and do their daily business, without having to keep on hand mountains of five-dollar bills.

On a train in Alberta recently I met a farmer who held the idea that banks create unlimited money by writing figures in a book. As I talked to him in the smoking compartment of the day coach I found out that this farmer had lost $800 in a bank failure in another country. With part of the proceeds of his crop he had bought some cattle; the balance — $800 — he had put into his bank and lost it when the bank failed. I asked him if he regarded that $800 as simply some figures that somebody had written in a book and he answered: "No, I worked for it." He willingly agreed, then, that labour and the production of new wealth had something to do with putting money in a bank.

Out of the fact that banks in practice keep about ten per cent of the deposits available in cash has been developed the amazing distortion that we lend our deposits ten times over. A bank does not, cannot, create credit nor destroy it by a stroke of the pen. Credit is the personal possession, creation or attribute of the borrower. No bank can create it for him. The borrower has it himself by accumulation of assets from his own work; by his own character, ability and willingness to repay.

I would hate to try to convince any Alberta farmer or working man, whose savings came from his own production and his own labour, that his Savings Account was created by a stroke of the fountain pen. And I'd hate to try to convince him that the bank's liability to pay it to him in money when he wants it, can be wiped out by a stroke of the fountain pen.

Canada's Chartered Banks cannot and do not perform the miracle of making something out of nothing with a stroke of the pen. There is no black magic, no mystery about the workings of Canada's Chartered Banks. They operate under specific laws, restrictions and limitations which permit them to accept and safeguard other people's money — your deposits; and to lend funds to meet the legitimate needs of communities, individuals, merchants, farmers and others.

In our next week's broadcast we expect to deal with the tremendous burden of taxation at present borne by Canada's Chartered Banks. Watch your newspapers for the announcements. You may obtain a printed copy of this broadcast by dropping into your nearest bank, or you may secure a copy by mail by writing your nearest bank, or you may read it in the advertising columns of your daily or weekly newspapers.

KEEPING THE POWDER DRY—

THE ADMONITION "Trust in God, but keep your powder dry," is good enough for most people, even if it is just a little contradictory. At least so we thought while perusing the news of provincial activities during the current week. Amid the furore of political discussion, social credit endorsement and condemnation, we ran across the printed announcement that the dominion and provincial governments together, were shortly to launch a plan of technical education specially arranged to help he youth of the province. By an estimated expenditure of $160,000, half borne by the dominion and half by the province, opportunities for technical training are to be given to many young people. This was rather pleasant reading, not only because we saw in the announcement a potential opportunity for many Alberta young folk, but because we realized more or less instinctively that while the government was searching for ways and means of getting two and two to make five, it was not neglecting the orthodox way of getting two and two to make four.

Since history was first recorded, Empires have risen, flourished and fallen. Countries have become great by the marts of trade, and, as the centuries passed, became subservient to more energetic and stronger peoples—and what is noteworthy, peoples who knew how to do something better, quicker or cheaper than they did. Without delving too far back into history we can cite the lace making and perfume blending of the French people; the heavy machinery and dye stuff of the German people; and the textile and engineering industries of the British. America has come forward with mass production in the automotive and other fields and bids fair to be as good as other nations in all fields. But while it is quite obvious that nations have risen and fallen through trade and industry or lack of it, it is, we believe, equally obvious that few, if any, nations have become great through internal strife. So when we read of advanced statements by Alberta public men, we realize that even if they are flying their kites high, they are keeping both feet on the ground. If not, they would rely on the power of their policies to bring about a degree of prosperity, rather than the more prosaic method of technical training.

Trade and commerce is merely technical training commercially used, and the better the training and more complete the knowledge, the more successful trade and commerce is likely to be. Consequently amid the hub-bub of political controversy, it is refreshing to read the premier's statement that a system of technical education is shortly to be introduced.

THE SCHOOL FAIR

Certainly the Tofield School Fair this year was held in glorious weather. Generally speaking, school fair time is synonomous with disagreeable weather, neither winter or summer. But Saturday was perfect, which, perhaps was responsible for the exceptionally fine showing of exhibits. Last year there were some eight hundred entries, this year the number was almost doubled, around fourteen hundred, which bears ample testimony to the success of the event and the painstaking labor of school fair officials and school teachers.

The array of exhibits was noteworthy in many respects. The ingenuity of the youngsters in exhibits pertaining to arts and crafts; the school work classes, and the cooking classes. But the outstanding feature was the quantity and quality of vegetables. It hardly seemed possible that a few short months ago we were all wondering if it would ever rain.

CHARTERED BANK PUBLICITY—

Having entered the spotlight of publicity with a message to the Alberta people, the chartered banks are leaving no stone unturned in an endeavor to reach everyone. Press, radio and poster media are being used and we believe it wise on the part of the general public to acquaint themselves with the message the banks have to give. For an introduction it is well to listen to the addresses, then keep a file of the printed speeches for reference. It does not matter so much whether one is against them or for them—at least one should try to understand them.

A LONG SUMMER—

Here it is September 16th and no frost. We do not remember any season that the frost stayed off so long. Growth has been peculiar this year as after a dry June and early July, rains came and brought everything on apace. Flowers particularly show the effect of the fine fall, the late flowering varieties still being in bloom. When we remember May 12th was an exceptionally fine and warm day, we realize the summer season has been an unusually long one this year.

"In Lighter Vein"

Don't be too heavyweight, nor yet
Too very high of brow—
But read some nonsense now and then,
And better do it now.

One's bundles weigh a lot some days,
And time and time again,
It's best to drop them all, and just
Proceed in Lighter Vein.

Root Rot Diseases of Oats

Like wheat and other cereals, the oat crop is subject to the attacks of various diseases. The more conspicuous maladies like rust and smut are familiar to farmers and others, but the root rots are generally not so noticeable and may be frequently confused with other troubles. Studies of these diseases have been conducted at the Dominion Laboratories of Plant Pathology located in the Provinces. Most of the forms of root rot of oats a[illegible] of the common type[illegible] result when the [illegible] the [illegible] parasitic fungi. These [illegible] may be carried on the seed, but usually they live in the soil on crop debris. From such sources the plant becomes infected. When conditions are favourable for infections, such as in periods of high soil temperature, the sprouts of the germinating seed are attacked and destroyed before they reach the surface. Such early infections, if severe greatly reduce the stand by producing irregular germination. The damage several control efforts may be at. the plant is established, will depend upon growing conditions. If conditions are favourable little injury will result but if they are not the plants may be so retarded and underdeveloped that they produce a light crop.

If root rots of oats appear year age severe control efforts may be attempted. It is likely that rotations with other cereals would give only a partial control, as many of the fungi which attack oats are also harboured by these other crops. The most promising plan in light of our present knowledge, would be to seed oats as early as possible so that the crop will develop in the cool soil temperatures of early summer. Under such conditions root rots are usually held in check. Seed treatments, especially the recently developed dusts, give every indication of reducing seed-borne infections to a minimum.

As there are different forms of root rots suspected specimens, with notes should be sent to the nearest Dominion Laboratory of Plant Pathology. These are located at Winnipeg, Saskatoon and Edmonton.

East Should Bonus West

Sir George Paish, eminent British economist, who is writing a series of articles for the Financial Post of Toronto, makes the following observations regarding Western Canada.

"Another reason for the slow development of Western Canada is the policy of high protection, which until recently, has been so strenuously pursued and demanded by the manufacturing interests of Eastern Canada. In any circumstances farming in Western Canada, with its short summers and long winters, demands that its farmers with their wives should have qualities of endurance of a high character. If anything Eastern Canada should pay a bonus to those who go to live in Western Canada in order that they might not find their task too difficult or conditions too strenuous. But for the manufacturers of Eastern Canada to make it more difficult for the farmers of Western Canada to earn a reasonable competence by making everything they buy much dearer than it should be, by heavy customs duties, is clearly both foolish and unjust, and seriously militates against the progress of the entire country.

Mrs. D. C. Scramsted and daughter Donna of Edmonton visited Mrs. O. P. Thomas Wednesday and Thursday.

Hilmar Moen, who is elevator man at Phillips, spent the week end with his parents here.

'THE TOFIELD MERCURY

Vol. XVII., No. 22 Thursday, September 23rd, 1937 $2.00 Per Year. To U.S.A. $2.50

Crop Season Nearing End

Into the last quarter of September, the crop season for 1937 is rapidly drawing to a close. In this district, generally, farmers have not done too badly, though it cannot be classed as a bumper crop or a really good year for all. It has been somewhat of a freak season. Spring opened up fairly early and considerable early planting was done. Through June and half of July there was a lack of moisture and for a week or so farmers were quite glum and talk of plowing crops under was common. Actually there was little, if any, plowing under done, as before the last vestige of hope departed, rain came and caused a transformation. In quite a number of cases, especially as regards oats, a second crop appeared, stronger and more vigorous than the first.

Splendid harvesting weather through the late August and the first half of September allowed the wheat to be cut almost without interruption and today, September 23rd, the wheat is all cut and about ninety-five per cent of it threshed. There are still some oats to cut but a large percentage—about ninety per cent is already in the stook. Only a small quantity of the oats however have been threshed, perhaps about five per cent.

The wheat yields run from poor to very good. The lowest yield, off of fall plowing is five bushels per acre, whilst the highest we have heard of is off the Lawrenceson place, a yield of 47 bushels per acre. A yield of 37 bushels off the Nickerson place is also reported. For number of acres and yield, the Hanson farm, worked by Ted Gray perhaps holds the record. From 230 acres, 7400 bushels of wheat was threshed. This is over 32 bushels per acre for 230 acres.

The district immediately west of Tofield, this year, appears to have the best crops. Quite a number of very fine yields from this district are reported. The district north of town does not appear to be so fortunate though fair crops have been harvested. South through the Bardo territory, the yields are good to fair, but some crops here were badly hailed.

The average yield of wheat per acre through all the Tofield district would be about 18 bushels per acre and the grades run mostly No. 2 and No. 3.

Mr. Frank Shupe has purchased the N.W. ¼ 26-51-20-W4M.

BARDO

A large number from here pleasantly surprised Rev. and Mrs. Bjelde at their home on Sunday. Present were: Mr. and Mrs. A. Haukedahl and family; W. Simonson and family; A. Stene and family; Mrs. L. Fuhang and family; Mr. and Mrs. H. Jenson; Mr. and Mrs. J. Ness; Mrs. Hagen and Martin; Mrs. Haugen; and Mr. and Mrs. S. Olsenberg and daughter.

Born: To Mr. and Mrs. Arnold Johnson on September 14th, a son.

Mr. and Mrs. Belmer Olsenberg have adopted a baby girl. Her name is Marlene Faye.

Mr. O. Johansen and Reuben Eide returned from the Coast last week where they have been fishing during the summer. They were fishing at Bella Cola, north of Vancouver.

Mr. A. Moen, who is now residing in New Westminster, is here for a month's visit with relatives and friends.

Mr and Mrs. Wm. Ingram of Victoria, B.C. are visiting relatives and friends here.

Little Barbara Fiseeth had the misfortune to fall off a hay-rack and fracture her arm. She is under the doctor's care.

Mrs. A. Haukedahl spent a few days in the city last week.

A large number gathered at the home of Mr. and Mrs. C. J. Rude on Sunday to celebrate their 40th wedding anniversary. All the children and grand-children were there for the occasion.

A large number from here attended the Aberhart meeting in Ryley.

Rainfall Information

After quite a lengthy period of warm dry weather, Monday of this week ushered in a change. Tuesday and Wednesday however, were real wet days, over two and a quarter inches of rain falling.

The following supplied by the Searle Grain Co., gives the different days rainfall. Monday .24; Tuesday .81; Wednesday, 1.28; a total of 2.33 inches.

The rainfall total for this season to date is 11 inches. For the 1936 season, to date the total was 9.83 inches.

Will Reduce Car Licenses October 1

First reduction of passenger car licenses under the new license year plan, which opened last April 1, will become effective on October 1, according to announcement at Edmonton by Hon. E. C. Manning, Provincial Secretary.

Those applying for car licenses on October 1 and thereafter will be given a 40 per cent reduction on the amount of the annual license. The new license taken out at this time will be good until March 31, 1938.

Owners turning in their car license plates at the end of this year (1937) will be given a 30 per cent rebate on their annual license fee. The absolute "dead-line" for turning in plates in order to obtain this rebate will be January 10, 1938. January 11 will be too late.

Those taking out licenses after January 1, possibly through having bought a new car, will be sold a license good for the three months' period ending March 31. This license may be bought at one-quarter of the annual license fee. As the license year opens on April 1, a new license would have to be secured at that time.

Another change this year has been the reduction in motor truck licenses which became effective on September 1, one month earlier than the first reduction for motor car licenses.

Officials of the Alberta Motor Association, which long advocated the change in the car license year, have expressed confidence that this change will have splendid results.

Council Meeting

A regular meeting of the town council was held in the town hall on Monday, September 20th. There were present, Mayor Swift and councillors Law, Brace, Lovell, Bellamy and Hammond. Councillor Coatts who had been granted three months leave of absence at the previous meeting, was not present. A large quantity of routine business was transacted. By-Law No. 200 was given three readings and finally passed. This By-Law prohibits children who have not attained their sixteenth birthday from being on the streets after nine o'clock in the evening, unless accompanied by their parents or guardian.

Mr. James Campbell has been sworn in as town constable and will enforce this law. He will also act as night watchman, making his headquarters in the town hall.

STRAYED—To A. C. DODD'S farm, 1 Ewe and 2 lambs, on or about September 9th. Owner may have same by proving property and paying for this ad.

Max Rogers visited with his parents over the week end.

Carload of Vegetables For Dry Area To Be Loaded October 4

A carload of vegetables for the dried out area will, under the direction of Mr J. W. Morton, be loaded at Tofield on Monday, Oct 4. Vegetables in some districts are badly needed by the people living there and those who have surplus vegetables in their gardens can do a good turn for their fellowmen by bringing in what surplus vegetables they may have.

Those contributing are requested to bring vegetables in sacks which will be emptied and returned.

Remember the date—Monday, Oct. 4th.

WEDDING

A quiet wedding took place at the home of Mr. and Mrs. E. Tiedeman on Wednesday, September 15th, at 3 p.m. when Miss Roberta Dunn was united in marriage to Mr. Benjamin Tiedeman. The Rev D. K. Allan officiated. After the ceremony which was attended by a great number of relatives, a splendid lunch was served.

The young couple will reside in the district.

Possibility of Shortage of Hogs

The federal department of agriculture is much concerned over the diminished number of hogs in Canada and states that the supply for the next f[illegible] months may be insufficient to meet the domestic and export demand. [illegible] unfinished pigs [illegible].

Canada [illegible] an important [illegible] market and [illegible] maintenance [illegible] supplying [illegible] British buyers do not like interruption [illegible] supply and prefer to deal with a area where they can be assured of a steady flow of the product. There are lots of other countries ready to take Canada's place on the British market if the dominion's export volume thereto decreases materially.

A recent bulletin from the department states: "With the total imports into the United Kingdom definitely restricted competition for her bacon [illegible] today [illegible] any other [illegible] prior to the [illegible] of import supplies. Any [illegible] from the last export volume would be extremely difficult to recover.

"A [illegible] feature of the [illegible] Canadian [illegible] feeding [illegible] on [illegible] market [illegible] weights and a better knowledge of the market situation than at any time in the history of the industry

Red Cross Appeals for Help

Calgary, Alberta.

Dear Sir:

Through the kindness and co-operation of the companies and organizations operating grain elevators in Alberta, the Alberta Division of the Canadian Red Cross Society are per[illegible] to display the attached poster in the [illegible] of this province, as the Red Cross are in urgent need of funds to carry on their work.

In the drought area last winter we assisted 5,500 families with bedding and clothing. We are faithfully carrying out our duty of caring for crippled children whose parents cannot afford hospitalization and nursing care, and since 1920 we have assisted 2,437 children in our Junior Red Cross Crippled Children's hospital.

In major disasters such as the Moose River Fund, the American Flood Fund, the Ontario Flood Fund, and the Western Drought Fund, the Red Cross services were demanded, and the people nobly responded.

[illegible] the expectant mother, the sick [illegible] and those in distress appeal to us for assistance, but now we are finding it difficult to give Red Cross [illegible].

May we hope that you will be kind [illegible] to co-operate with us by helping the farmers?

[illegible] you that we do appreciate whatever you may do for the Red Cross to help us carry on our humanitarian work,

Yours faithfully,

D. H. Tomlinson, Commissioner

Reduced Rail Fares For Thanksgiving Week-End

Winnipeg, Man. September 20 — Special low rail fares will be in effect between all stations in Canada for the Thanksgiving Day long week-end, according to an announcement by R. Creelman, passenger traffic manager Canadian National Railways. Tickets at the low fare of single fare and one-quarter for the round trip will be on sale from Friday noon, October 8, until 2 p.m. Monday, October 11. If there is no train service on Friday afternoon, tickets will be sold for the Friday morning train. All tickets will be good to return leaving destination up to midnight of Tuesday, October 12.

These low fare tickets will be honored in all classes of accommodation and as Thanksgiving week-end will be the last long week-end holiday before the Christmas vacation, the railway is looking forward to a large volume of traffic between local points.

Mr. Peter Goertze of Crowfoot, Alberta, has purchased the N.W. ¼ 2-51-20-W4M and will bring his family up next month.

Moss Used as Health Food

Winnipeg, Man., Sept. 20.—On the western seaboard of Ireland, principally in Donegal and Clare, Irish, or carrageen, moss has been gathered for centuries. It has long been known as a health food. It is also used in the paint and textile industries. Practically the entire output is exported to Great Britain and Northern Ireland, according to the Industrial Department of the Canadian National Railways, and brings approximately $120.00 to $125.00 a ton, based on quality. The industry has now been placed under state control. The moss is not subjected to any manufacturing process but is simply gathered up and left to bleach in the ozone and sunlight of the Atlantic.

Mr. C. H. Wiley has purchased the N. W. ¼ 1-51-20- W4M.

The Facts About Banking in Canada

Reproduced from the Third Broadcast in a Series by Vernon Knowles for the Chartered Banks of Canada and Delivered Over a Province-Wide Network of Alberta Stations on Tuesday Evening, September 21st, from 8:30 to 8:45, and Wednesday, September 22nd, from 12:00 noon to 12:15.

Millions Paid in Taxes to the Dominion Government... More Millions to the Provinces and to the Municipalities ... Alberta's Revenue From the Banks Boosted ... Most Branches Operate at Loss ... Banks Have Faith in Alberta.

CANADA'S Chartered Banks have paid in taxes, in Canada, during the last ten years $71,391,000

We promised last week that we would tell you about the *load* of taxation we carry. Before we get along very far to-night we shall give you a very plain, short set of figures. I would like you to get a pencil and paper to take down these figures when I reveal them to you.

We shall tell you also about our earnings, our profits and dividends. Our critics have been talking a great deal about the fabulous profits we are said to make, that criticism is unfounded. Let me repeat, as I said in our first broadcast, that we believe that many critics of the banks are sincere. We, too, are sincere.

You are often told that the banks should be taxed but *we* tell you that the banks *are* taxed, and we want to tell you some things that will interest you, about the taxes we bear.

Now are you ready with that pencil and paper? We will pause for a few seconds so that you may get ready— We [illegible] ask you to take [illegible] just a few plain figures— [illegible]

[illegible] the ten years the banks [illegible] taxes to—

The Dominion — $[illegible]

The Provinces — 13,268,[illegible]

Municipalities — 18,262,[illegible]

This makes the grand [illegible] $71,391,000 [illegible] in taxes [illegible] ten years. The banks do not complain of fair taxation, they expect to bear their proportion of the [illegible] Municipalities [illegible] taxed [illegible] telling you of the taxes [illegible].

[illegible] of Alberta alone. This year the Province imposed upon us a new and additional tax of one-tenth of one per cent of our paid-up capital. It amounts to $111,000 this year. Last year we paid to the Alberta Government total taxes of $81,150. This averaged out at $390 per branch. From paying $81,150 in 1936 our Alberta tax in 1937 has been boosted to a grand total of about $222,000 or nearly three times what it was before.

We have told you the story of Provincial taxes. Now we turn for a moment to Municipal taxes. In 1936 the total of taxes we paid to Alberta Municipalities amounted to $253,000.

Our total of Municipal taxes in Alberta average out at $1,219 per branch.

Let me repeat — the taxes paid by the banks in 1936 to the Province of Alberta alone averaged out at $390 per branch. In 1937 they had risen to an average of $1,115 per branch. And let me further repeat that the Alberta municipal taxes paid by the banks last year amounted to $1,219 per branch. At this rate we are now paying a total of $2,331 per branch in Provincial and Municipal taxes combined, quite regardless of the heavy Dominion taxes we bear. The Provincial and Municipal taxes combined which are paid by the banks in Alberta now reach the grand total of $175,000 per year.

And yet, to hear some folks speak, you'd never know that the banks are taxed at all!

Do you know that very few of the bank branches in Alberta are making *any* profit? We are now going to tell you something that has never been revealed to the public before — we are letting you in on a secret.

Now if you are ready again with your pencil and paper we will give you the actual figures for 1935, the most recent year for which complete figures are available. There were then 221 branch banks in Alberta:

Only 41 of them made any profit.

Seven of the 41 made not more than $100 in that year.

And 180 were operated at a loss.

You can figure out for yourselves what effect $111,000 in new and added taxes has had on *that* picture.

With all this newly-revealed information I have given you the picture is still incomplete, for you all know that a business such as ours cannot be carried on without some losses. Indeed the net result in Alberta for the ten years 1926 to 1935, is that after providing operating expenses and taking care of bad and doubtful debts, the banks have incurred a very substantial loss.

The money thus lost, I assure you, did not drip from the end of a fountain pen.

[illegible] — "Then why do the [illegible] to operate in Alberta?" [illegible] Canada's Chartered Banks have faith in Alberta's future and in the people of this province. We feel sure that the period of hardship and drought will [illegible]. The West has had a terrible struggle during the last seven or eight years. I remember the time, and many listeners must remember it too, when this Western country produced an export wheat crop of three to five hundred million bushels a year, when prices were high and marketing conditions were good. For years the West had, roughly speaking, from Three to Five Hundred Million Dollars in new money coming back into this country from the marketing of this newly produced wealth. Then, through fear of war and other conditions, the countries in Europe started restricting their wheat imports and growing their own. World markets collapsed. Canada's banks did not do it; fear in Europe had much to do with it. And after that came the succession of heart-breaking dry seasons that our farmers have endured. You and I know what that has meant to Alberta. It has meant that for about seven years in the Great Central Plain of this Province and for almost ten years in the South, farmers have had either no crops or poor markets, which in any case result in the same thing — little or no money.

Canada's Chartered Banks had no more to do with the collapse of the markets in Europe than they had with bringing on the drought.

The real basis of hardship in this Province, as in the other Western Provinces, is that this great annual crop of new money has not been coming in.

If Canada's banks, by any miracle of lending, could have made it come in you can be sure we would have done so; for it is by lending that we live. That is our business. The banks are a part of your community. While you suffer we cannot prosper.

I have shown you how *few* branch banks in Alberta make any profit and how many are losing and, on top of these losses, as I have shown you, we have an increased tax burden to carry.

Alberta audiences are intelligent—they are alive to questions of economics. Remember our responsibility to safeguard the funds of depositors. When we are losing money, if costs are increased by steep advance in taxes, what then? The alternative is either to pass on to our customers these added costs or steadily close out losing branches to a point where ends can be made to meet. Either way is a hardship to our customers and an inconvenience to their communities.

Now we turn to the matter of earnings. It is a popular misapprehension that because we pay one and one-half per cent on savings deposits and because, on the other hand, the highest interest rate we can charge by law is seven per cent, the difference between the one and one-half per cent and the seven per cent is all "velvet" — all profit. Let me point out to you why it is not so.

We have costs:

I am sure that all of my hearers are aware that no business can be carried on without costs. We pay wages. In the Province of Alberta alone during the past year we paid $2,015,000 in wages to employees. We pay rent on premises. We spend money for stationery, printing and postage. We buy water, fuel and light. We pay the enormous taxes that I have spoken to you about. We contribute heavily to pension funds and to group insurance for employees. Depreciation on bank buildings takes a large sum each year. We have also to set aside a substantial amount each year as a reserve for bad debts.

In addition to our costs there are distinct restrictions on bank earnings. Only a relatively small proportion of our loans earns the legal maximum of seven per cent. Let me tell you about these restricted earnings.

Banks must keep themselves in such a position that anybody going to the bank to withdraw his savings can get his money. We are required by statute to deposit with the Bank of Canada, earning nothing at all, a certain percentage of our depositors' funds. In addition it is necessary to keep in short-term investments a further amount upon which the yield is low. Why is this yield low? Because the bonds in which these funds are placed will mature at short date. Cash reserves of other companies as well as those of Chartered Banks are looking for this sort of investment—the type which can, of course, most readily be turned back into cash. The demand for this type of investment is great and the supply none too plentiful; therefore, the price is high—which is another way of saying that the earning—the yield—is low.

The costs of doing business, coupled with restrictions in earnings, eat up most of the difference between the one and one-half per cent we pay and the seven per cent which it is wrongly supposed we earn on all our loans.

Let us take a little instance of the earnings on a loan. Let us say a farmer borrows $100 in April, expecting to repay in the fall — say a six months' transaction. If the interest is seven per cent the gross amount of rent on this money paid to the bank is $3.50 — in other words the farmer has used $100 for six months at a rental of $3.50, but what does the bank receive net? Not $3.50, but a matter of cents only. We have taken a six months' transaction for illustration. The rate of profit is no greater if the loan runs longer. Why? Because the costs we mention are running on all the time, too.

Last year's net earnings of the Chartered Banks on all of their business everywhere amounted to only one-half of one per cent on total assets and in previous years approximately the same. What commercial business or enterprise gets along on so narrow a margin?

You often hear it said that we pay big dividends and our own published annual statements are often used against us as seeming proof. Do you know that for every dollar of dividends paid the banks pay ninety cents in taxes?

The fact is that while by law $100 is the par value of bank stock the average price at which the banks have sold their shares is $163, of which $100 has gone to Capital Account and $63 to Reserve. In addition, during the scores of years the Chartered Banks have been in business, earnings of $29 per share — instead of being paid out in dividends to shareholders—have been transferred to Reserve to add to the protection of bank depositors.

The total of a shareholder's investment is, therefore, on the average $192 per share. So an $8 dividend per share is a payment of only just over four per cent on the money invested.

Now we have dealt with taxes, earnings, costs and dividends. We have shown that banks operate upon a much smaller margin of profit than other lines of business.

We want to bring it home that the branch bank is a part of the community — *that* is true in the strongest sense. Besides giving a valuable service, banks maintain offices and staffs in scores of Alberta communities. They give opportunity of employment and a start in life to young people who take an active part in community affairs.

As a customer of public utilities, your local bank buys water, light, gas, power and fuel. It pays local taxes which go to the support of schools and hospitals and municipal institutions. It is on the job the year around, sharing your problems and taking its place as a good citizen.

And let me say that *apart* from their share of Dominion Government taxes — *apart* from any reserve for bad accounts, the Alberta Branches of Canada's Chartered Banks spent last year in taxes — Provincial and Municipal — in such things as wages, goods and other services, the *huge* sum of $3,000,139 to carry on business in Alberta. *That* was purchasing power for Alberta — and *that* money was not created out of nothing.

I hope I have made it clear that we have carried on these services throughout the long, lean years, at a loss so far as our operations in the Province of Alberta are concerned. Canada's Chartered Banks have faith in the future of Alberta and confidence in the fair judgment of its people when all of the facts are before them.

THE CURFEW—

A NEW innovation for Tofield was decided upon at the Council meeting held on Monday night last, namely, the ringing of a curfew bell each night. While we are not partial to unnecessary restrictive laws, especially where there is a doubt as to how well they can be enforced, we believe the action of the council was a move in the right direction. It is quite obvious that it is better for very young children to be home by nine o'clock at night, but as boys and girls grow up they feel that they have or should have more liberty in the matter of hours. We prefer to view this question from a utilarian point of view. The truth of the matter is that no youngster attending high school can afford to be out late at night. The educational system is so devised that children receive a fair education by the time they have passed all public school grades and when they enter high school they commence to receive advanced education. This education is only made possible by the expenditure of considerable money, both by educational authorities and by parents. For the average high school student, the course is not easy; it requires application both in and out of school. Therefore roaming the streets at night is a very expensive pastime and while educational authohrities and parents share in the expense, it falls heaviest on the student. The authorities and parents lose money, but the student loses or wastes opportunity. While education in itself is not an open door to success in life, it is quite true that individuals can go no farther than their education will take them. Consequently a curfew ringing at nine o'clock will have the effect of not only keeping the younger children off the street at night, but will give added impetus to necessary study on the part of the younger high school students—a very useful purpose.

The custom of ringing a bell at sunset in summer and at eight o'clock in winter to warn all householders to extinguish their lights and fires, was introduced into England from the Continent by William the Conqueror. It was not a tyrannical decree, but was a caution against leaving fires burning at a time when all houses were built of wood. The formal practice of ringing a bell at a stated hour is still continued in some districts. In Salem, Mass., U.S.A., the ringing of a curfew to keep young people off the streets at night has been in effect since Puritan days.

After many years the Town of Tofield has a combination of night watchman and town constable. Within the past year or so, intermittent engagements of night watchmen have been made, but we understand the arrangement is now of a more permanent nature. The decision is a good one, as with winter coming on, the danger of fire increases, though as far as Tofield is concerned, the 1929 and 1935 large fires occurred in the summer and autumn months. But it is significant to remember that both these fires commenced at a time when a watchman would normally be making his regular rounds, and had there been one, it is not unreasonable to suppose one or both of them would have been discovered sooner and not have been so disastrous.

Anyway that is past history, we now have a night watchman and the greater degree of security the appointment gives.

VEGETABLES FOR THE DRY AREAS—

Citizens of this district will, we believe, appreciate the opportunity of contributing vegetables to the dried out areas of the south. On Monday, October 4th, a railway car will be spotted here and will be loaded under the direction of Mr. John Morton. That these vegetables are needed, there is no question. In spite of planting and labor, large areas in southern Alberta and Saskatchewan, due to lack of rain, have been unable to raise even the most common vegetables. Here and in many other districts of the north, nature provided rain sufficient to produce wonderful crops of vegetables. The railroads and government are co-operating to move surplus vegetables from districts where there are plenty, to districts where there are none. That citizens of this district will be glad to assist their fellow countrymen in procurring a supply of vegetables for winter goes without saying. Consequently we expect Mr. Morton will be a busy man on Monday, October 4th.

AN OUNCE OF PREVENTION—

PURELY AS a matter of precaution it would be good business for mercantile establishments to see that due measures are taken against robbery. While Tofield has been reasonably free from serious burglaries it is wise to remember that at this season of the year there appear to be an annual epidemic of them. During the past week or so several towns within a 50 mile radious of Edmonton have been victimized. Of course, to the professional burglar, nothing short of a vault will stop him, but the petty thief would often be foiled were greater precaution taken. Cash especially should not be left in unguarded buildings, even if in a safe, but rather should be kept close at hand if banking hours prohibit immediate deposit. Each store, each business place have their own problem, but to all it is safe to say an ounce of prevention is worth a pound of cure.

Please Do Not Spit

We have placed the title for this article in the form of a request rather than of a command or threat. It might very well be regarded as a plea for the protection of children. It would be in the of interests of all, but it is the children who are particularly menaced by the careless, thoughtless or ignorant individuals who spit promiscuously.

The germ of disease live and multiply in the human body. A person may have such germs in his body and yet be apparently well. There are thousands of persons with tuberculosis who do not know that they have the disease and these persons are passing out myriads of germs in their sputum.

These germs leave the body in its secretions, and the most common way is in the secretions of the mouth and nose. Mouth and nose secretions should always be thought of as containing disease germs and should be avoided accordingly.

There is no reason for spitting as so many do. It is simply a bad habit which should never be started. If it is already a habit, then it should be broken without delay. It is not only disgusting to other people, but it constitutes a very real danger to them.

In the act of spitting, droplets are sprayed around, and as other individuals come in contact with these droplets they are exposed to infection by the germs of disease from which the spitter may suffer. Most of the common communicable diseases are spread chiefly by such droplet infection and the danger that results from the spraying around of sputum and saliva cannot be exaggerated because it is so very serious.

Sputum on the floor or on the ground is dangerous. Children must and will play, and while they play, they are constantly on the floor or on the sidewalk or ground. As a result, their hands are sure to become soiled. It is, of course, true that neither children nor adults should put their fingers into their mouths, but it takes time to train children not to do so.

Soiled hands are carried to the face, fingers go in the mouth, and so the sputum from the floor or ground gets into the child's body and it may carry with it the germs of disease.

Because it is a filthy, disgusting habit, because it spreads disease, because it endangers the lives of children, because there is no reason for its being done, we hope that you will treat favourably the request—

PLEASE DO NOT SPIT.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

WORLD OF WHEAT

By H. G. L. Strange

"The low wheat yields in the West of recent years have been caused almost as much by loss of fibre and depletion of soil fertility as by lack of rainfall!"

This startling statement is widely believed, I find, by people in Eastern Canada. If it is true, then the future for the West is bleak indeed.

But what do the actual records reveal?

The average longtime wheat yield per acre for the whole West is 16.4 bushels, but the four comparatively recent years, 1925 to 1928, averaged annually 20.1 bushels to the acre, a higher yield for any four years in the history of the West, excepting for one period from 1901 to 1904, when it was 21 bushels.

Fields and districts that have been cropped for 50 or 60 years—some in the drought area—are this year giving fine yields. On the other hand, in very early days, quite low yields were at times registered.

Records tell us further that, excepting in rust years, low yields always come with low rainfall, and high yields with good rainfall.

Rainfall then still governs the yield, and soil fertility is of much less importance.

Give the Prairies again good rains and the fields will again produce good crops.

Following factors have tended to raise price:—Growing fears of war in World—Rains lower quality of grain in northwest Europe— Rains threaten damage to crops in eastern Russia; harvesting progresses slowly—U.S. Department of Agriculture reduces corn, wheat, barley and flax estimates—Increase in British malting barley requirements.

Following factors have tended to lower price:— Danubian wheat quality good—Russia makes substantial wheat shipments of superior quality—Long milling, and use of substitutes in Europe curtail imports—General rains benefit Indian native food crops and help spring seeding—Manchurian soy bean crop above last year—Large Mediterranean Basin olive oil production.

Agricultural income is now at the highest point in 10 years. The farmers will soon be prosperous enough to go to Washington in person to demand farm relief.—New Yorker.

FOR SALE—Tank Pump, Tables, 4 buffet, horse hair mattress, horse bits, trunk, steel barrels half size, dishes, hand-power washing machines; .22 rifles—Apply to Stinson and McCarthy, Tofield.

Alaskan Bubble Shattered!

WASHINGTON, Sept. 10— The United States Government wants two things understood which a lot of folk has apparently misunderstood.

1—It is not looking for women to go to Alaska.

2—It has no Virgin Island houses to rent to mainlanders for $5.50 a month.

The situation—and if you'd see the letters you'd realize there is one—developed in the wake of two sprightly bulletins from the Department of the Interior.

The first announced there are two-and-a-half times as many white men as women in the nation's vast northern territory.

The second explained three low-cost housing projects had been opened on the Virgin Islands with rents ranging from $4 to $6.40 a month.

The ink had hardly dried on the items before reaction began.

"I am ready to leave for Alaska at once," wrote a New Jersey woman, "please send fare and the route."

"We are [illegible] real another letter, "how do you think a tea room would go?"

The Virgin Island bulletin stirred up such correspondence as:

"Enclosed find slip. Kindly write me about [illegible] I would like a little home. P.S. Is it $5.50 a month and how do you reach it?"

And from Brooklyn:

"I am very much interested. Can you tell me about hotel and restaurant possibilities or give me some work as I am a cook. P.S.—If there is no employment in the hotels, what kind of work is there besides?"

Facts are: There are still 2½ times as many white men as women in Alaska and, if you established residence on the islands, you can rent a house if there are any to rent.

But don't write the Government. Its office workers are tired of corresponding on the subjects

Immigration Vital Factor In Development of Canada

Vancouver, B.C. September 20 -- That Canada must have more population if it was to fulfil the destiny that Nature intended for it, was the contention before the annual convention of the Canadian Chamber of Commerce of Dr. W. J. Black, Director of Colonization and Agriculture for the Canadian National Railways.

With one-sixteenth of the cultivable land in the world and more than that fraction of the world's natural resources, Canada nevertheless had only one-half of one per cent of the population. Canada's development is and always has been tied up with immigration, he said.

To the criticism that immigration would take away the opportunities of the younger generation, Dr. Black replied no part of Canada has had less immigration the past twenty-five years than the Maritimes yet the movement during this period to the United States and elsewhere had been perhaps heavier than for any other part of the Dominion. The Maritimes had not benefitted by it and there were many today who believed an influx of farming families would have good effect.

Looking at the drought areas of the prairies, Dr Black said, the sad difficulties there still did not justify the lack of settlement in areas where families can succeed. He believed some of the perplexities of the past few years were due to rural population attracted to industry by high wages prevailing during the good years unable to find its way back to the farm without funds.

In a survey of the field for immigration the speaker found some old and favoured sources closed with the British farmer well off and contented at home and Scandinavians enjoying similar prosperity. To regain British immigration, which will probably come from younger members of families as there is very little inducement for old members to migrate, it will be necessary to organize societies or direct organizations now existent to concern themselves with encouraging the movement and with helping to supervise it when the people arrive in Canada.

"When our effort to get British has been exhausted, we should endeavour to secure the maximum of good farming families from the United States" said Dr. Black. Denmark would be a promising field in the next two or three years.

On the subject of Continental European immigration, he pointed out that British stock was amalgamated a few centuries ago of European peoples. He thought the Swiss, Czechs, Belgians, Hollanders and Ukrainians should become "as good Canadians as we ourselves ever have been."

Dr. Black suggested there should be no large scale immigration movement for the present, even if it were possible, but one that could be increased from year to year.

"In my opinion," he said, "there never has been a time in our history when this important question of immigration called so urgently for leadership of a constructive kind. There is a distinct tendency of our developing laissez-faire attitude which means we shall go back. In conclusion, he asked the Chamber to give that leadership.

Germany Building Fifty Years Ahead For Motor Traffic

No Hills, Intersections or Speed Limit on New Reichs Auto Bahnen Road—Pedestrians, Cyclists Barred

Toronto, September 17.—In Germany they are looking from ten to fifty years ahead in the construction of highways.

Old, winding traffic arteries are being supplemented by a great ribbon of concrete which is slowly but surely being unwound across the country in an almost level stretch. This ribbon is broken-up into two lanes on one side and two on the other, with a broad stretch of green sward and flower-beds between.

Known as the Reichs Auto Bahnen Road, this highway is barred to pedestrians and cyclists, while there are no intersections or patrolling police officers and the speed limit is the limit of your car.

The thrill of travelling over this new highway was experienced by M. P. Hofstetter, prominent Toronto business man, who has just returned from a two-months' tour of Europe. Mr Hofstetter, who is a native of Basel, Switzerland, outlined in an interview the remarkable transformation he had found as far as German highways were concerned.

He pointed out that a few thousand miles of this new road had been built and that it extended from the Dutch border as far as Heidelberg. "Construction work," continued Mr. Hofstetter, "is still proceeding. These highways are absolutely safe and there are very few accidents. The average speed of the German cars is 40 miles an hour because they are small cars, but you can travel as fast as you wish if you car can 'take it'. I was travelling 85 miles an hour in my Oldsmobile sedan in which I toured Europe, and believe me, it is the best way to travel in some of these countries."

With a twinkle in his eye, Mr. Hofstetter enlarged upon this point. "You see, they do not bother you so much at the border. They thing you are wealthy and of some importance when they see you in a car. And, by the way, speaking about automobile travelling, here's an interesting fact: I covered 5,500 miles in France, Switzerland, Germany, Holland and Britain and never had an accident, nor was it necessary to have any minor repairs made. I used very little water and only 2½ quarts of oil."

The Guiding Motive

The principals underlying the operations of Alberta Pool Elevators may be summed up as follows:

1. Co-operative ownership and control of facilities, designed to benefit the man who produces the grain.

2. Efficient operation of these facilities on a basis of service to every farmer who wishes to avail himself of them.

Your grain should go to

KINGMAN

Rev. Haverstein and a missionary, Mr.Anderson, hold services at the Lutheran church last Sunday afternoon.

There will be Confirmation services at the Lutheran church on Sunday, October 3rd at three o'clock, also services in the afternoon by Rev. Lundahl.

Mr. and Mrs. Wm. Wideman and three children are leaving for Sheridan, Oregon this week to visit relatives.

Mr. and Mrs. N. Wideman and son Kenneth spent last Sunday evening at the A. Soma home.

There will be a three day meeting at the Lutheran Church on October 10, 11 and 12, held by Rev. Hoverstein and several other preachers.

There will be an all day meeting at the Baptist Church on October 17, called a Thanksgiving Festival.

Mr. Roy Molvik and family are enjoying a new radio.

Little Hazel Hardin had a birthday party on Sunday afternoon. She invited all her little friends to help her celebrate her sixth birthday.

LINDBROOK

Looks like another spell of unsettled weather and lots to do yet that needs dry, but we've just got to take it as it comes, no matter what happens, it generally seems to come out alright in the end in this locality.

The sympathy of the district is extended to Mrs. A. Smith and family on the loss of her father who passed away at Seaforth, Ont. Mrs. Smith is away at Seaforth at present but will be returning home shortly.

Mrs. A. C. Trary of Quebec paid a visit to his uncle, Mr. Trary of this district.

A surprise party was sprung on Mrs. F. Kortzman last Sunday week, the occasion being her birthday. Lots of fun, good wishes and a good time for all was the programme and it was well observed.

Miss Dolly Wealake is at present at home convalescing after a rather serious illness. Miss Wealake expects to be home for at least another month.

Mr. Herbert Raynor of Leduc, but well known here, was up on a visit over the week end.

The teacher, Miss Phipps, has had quite a bit of medical business to perform lately owing to this epidemic of infantile paralysis, having sprayed upwards of 70 children of all ages 5 times. Some of the kids like it and some don't, but luckily some of them make such a joke of it that it keeps up the morale of the timid souls.

Mrs. Evans, Miss Eileen Best and Mr. Jas. Bracegirdle motored up to Athabasca last Sunday week end. Miss Best, whose home is there, stayed, she having been here on a visit.

LOCAL & PERSONAL

Miss Margaret Whyte from Edmonton spent Saturday at her home here.

* * *

Graham Allan, who has been in Jasper for the past six weeks returned home Saturday. He left for Edmonton on Sunday.

* * *

Mr. and Mrs. T. W. Taylor and Bill motored to Edmonton on Sunday, where they visited with Ella who is training in the Royal Alexandra hospital.

* * *

Miss Lois Thompson spent the week end with her parents in Leduc.

Mr. R. Whyte from Wetaskiwin spent Sunday in Tofield. Mrs. Whyte who has been visiting here returned home with him.

* * *

Mrs. Bertha Seale, Mrs. S. Yakabuski, Mrs. W. E. Seale and Miss L. Rose motored to Edmonton on Friday.

* * *

Mr. L. Simmons who has been relieving agent at the station has departed and Mr. Sinclair is back on the job.

* * *

Nurse Baptist is spending a short time in Edmonton. Miss Aronsen is relieving during her absence.

* * *

Miss Margaret McCauley left on Monday for Spirit River where she has accepted a position as nurse in the hospital there.

Junior Grain Club Seed Fairs To Be Held

The Junior Grain Club Seed Fairs will be held in Tofield on Monday, November 8 and in Ryley on Tuesday November 9th.

The public is cordially invited to attend these events, inspect the exhibits and encourage the junior farmers in their club activities.

KETCHAMOOT

The monthly meeting of the Ladies' Aid will be held next Wednesday, October 6th at the home of Mrs. W. A. Mitchell. A cordial invitation is extended to all.

Mr. Jim McDavitt of Cadomin spent the past week visiting old time friends and looking after business interests. The Kleinschroth family has his farm rented.

Mr. and Mrs. Wesley Ingram returned to their home at Victoria, B. C. Tuesday evening after a three weeks visit with friends and relatives.

Mr. D. H. Mitchell, Eddie and Lawrence Huffman of Edmonton spent Sunday at the home of Mr. Mitchell's brother, Mr. W. A. Mitchell.

Mr. and Mrs. Chester Coombes, Mrs. Campbell and mother, Mrs. Ross, were Edmonton visitors Saturday. Mrs. Ross had been the guest of her daughter for several weeks.

Miss Dorothy Ovelson is assisting Mrs. Sutton sr. with her fall housework.

Miss Elsie Kennedy, who has been residing at the coast, came last night for a visit with her friend, Mrs. A. F. Schultz. Her parents, Mr. and Mrs. Kennedy, reside near Holden.

A social credit study group meeting was called to meet at the school house Monday evening. Not being present we cannot give any details. Mr. Maurice McGinitie seems to be head of it.

Friends of the Nomelands are glad to hear that Mr. Nomeland is progressing favorably. The nurse in attendance was able to leave on Sunday.

The friends of the Ray families were sorry to hear of the death of their father, Mr. Frank Ray of Vancouver, following a stroke. Two of his sons, Roger and Franklin, went out the day of his death and will attend the funeral. Mr. Ray resided many years in Tofield and Woodlawn districts. He leaves to mourn his loss, one daughter, Mrs. Grace Mitchell, Edmonton; 3 sons Franklin of Woodlawn and Roger and Milton of Ketchamoot; 12 grandchildren and one great grandchild; also a host of friends.

Regular 'Government Letter' Will be Sent To Alberta Press

Newspapers throughout the province have received a letter from "information bureau, legislative buildings, Edmonton, stating in part: "It is felt by the writer that the local newspaper is by far the best way of disseminating the knowledge and commencing next week a regular bulletin will be issued to each weekly newspaper throughout the province.

"It is not the intention that these bulletins should contain anything of a political nature and I trust you may find them sufficiently valuable to accept them in the spirit in which they are offered.—Yours truly, Director of Public Relations."

Boy Killed As Car Driven By Sister Upsets

Wetaskiwin, Sept. 28— Robert Bailer, 8 years, was instantly killed when a car his sister Bessie Bailer was driving got out of control less than a half a mile from the Bailer home, eight miles west of Wetaskiwin, at 8 p.m. Sunday. Reggie Bailer, 12 years, is in the community hospital being treated for cuts and bruises. His condition is not serious.

Ernest Pelbeig, Art Krause, Irene Roberts, Gordon and Lillie Bailer, who were also in the car were shaken but not seriously hurt.

The car got out of the young girl's control, took the north ditch, crossed the grade and went into the opposite ditch and finally upset in the centre of the road.

Two Babies, Sister Aged 4, Burned

ANN ARBOR, Mich., Sept. 28 — Two babies and their four-year-old sister were burned to death last night when a fire destroyed a cottage at Horseshoe Lake, seven miles north of here. Sheriff's investigators said the dead were: Louise Weber, four; Judy, two, and Jackie, two months.

The Anglican W.A. will meet at the home of Mrs. McCarthy on Thursday, Oct. 7th at 2:30 p.m. At this meeting contributions will be received for the annual bazaar.

AMISK CREEK

A quilting bee was held at Mrs. A. Patterson's home, the ladies making a quilt for the Ladies' Aid, last Thursday.

Lilly Berg left to take up her studies at the University of Alberta last week.

Gordon Sand, who has made his home with his aunt and uncle, Mr. and Mrs. P. O. Flaaten, for the last two years, left for his home near Elk Point, last week.

Mr. A. Moen, who now has his home near New Westminster, B.C., was a visitor at the R. O. Berg and P. O. Flaaten homes recently.

Mr. and Mrs. J. Westby and infant son, and B. Bjorson from Bardo, were dinner guests at Mr. and Mrs. J. Nilsen's Sunday before last, and called at the P. O. Flaaten and E. A. Moen homes on their way home.

Cutting green feed has been at a stand still for some time on account of the rain and damp weather.

Ruby Berg, who has been home for a three week's vacation, left last Saturday evening for her duties in Edmonton.

The A. Hauhedahl and M. Erickson families from Bardo were visitors at the E. A. Moen home Sunday before last.

Mr. A. Erickson, Mr. and Mrs C. Erickson and infant son were guests at the Nilson home in Holden last Sunday.

Mr. and Mrs. E. A. Moen were visitors at the J. Berild and C. Johnsrud homes last Sunday.

FOR SALE—30 pigs, six weeks old, also registered Tamworth boar, 2 year-old. Apply Art Young, Tofield

Fire Prevention Week

The week commencing October 3rd, has been set aside as Fire Prevention Week. With winter fast approaching it is wise to take all precautions against fire and these can often be done better before the cold weather commences than after.

The Department of Insurance at Ottawa has published a report of the fire losses in Canada for the year 1936 giving the details of the number of fires, their causes, the amount of property losses and other interesting facts. The following table is rather hard on smokers but is compiled from authentic records.

	Percentage of Number of Fires
Careless smoking	27.6
Stoves, furnaces, boilers, pipes	11.1
Defective chimneys and flues	10.7
Electric wiring and appliances	9.1
Sparks from chimney on roof	4.9
Hot ashes and coals	3.3
Total	66.7

United Church News

Sunday, October 3rd—The Junior Choir will assist at the evening service.

Sunday, October 10th—Thanksgiving. Special music.

Sunday, October 17th —Anniversary services and annual banquet served by the Board of Stewards. Guest speaker will be announced later.

Sunday, October 31st— Communion.

The Y.P. made a fine start on Tuesday evening. There was a good attendance. The Ketchamoot young people are going to be a real asset.

There wasn't a dull moment all evening. The games— Tennis, Rings, Darts, Sticks, etc., kept the young people on the hop all the time. A splendid lunch capped the enjoyable proceedings.

E. W. ROGERS

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

Mental Hospitals

There exists a general misunderstanding regarding the activities of mental hospitals. The idea persists that such institutions are maintained to provide for the shutting-up therein of those who are suffering from mental disease. The mental hospital is thought of as a place where restraint is commonly practised and where freedom is almost unknown.

That such was the case in the past merely means that, in those days, mental diseases were not understood. They were viewed as the result of heredity, were considered as inevitable and incurable, and in addition were looked upon in the light of a disgrace as they supposedly indicated some defect, of an undesirable nature, in the family.

We know now that mental disease is chiefly the result of faulty environment. The child's surroundings, his early training, the development of his emotional life are the determining factors as to whether or not he will have mental health and avoids mental disease. Mental hygiene is now considered a part of preventive medicine and is based upon the understanding that mental health can be attained just as can physical health by proper care during the early development years.

If mental disease does develop and the patient comes under the care of a mental hospital, he receives treatment. There are curative methods for mental disease just as there are for physical. Modern medicine treats mental disease, and the mental hospital is an institution where curative methods are applied, with the result that a return to normal mental health is secured in a large number of cases.

As in other fields of medicine, it is preferable to prevent mental disease than to await its appearance and then attempt to cure it. The future of mental hygiene is full of promise and its development will go far towards making life happier. There is no reason for misconceptions concerning mental disease and the work of mental hospitals. A better public understanding will help to secure even better facilities for those suffering from mental disease.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Fall Rye. The Farmers' Friend

Fall rye can be used in a number of ways as an annual and biennial pasture crop, a hay or grain crop, a weed control crop, and as a cover or soil erosion control crop. In fact fall rye can be used in more ways than any other cereal or forage crop.

If seeded in the spring, either alone or in a mixture with another cereal such as oats, it will produce a high yield of palatable and nutritious pasture throughout the summer and late fall provided the moisture supply is adequate. If not grazed too close and too late in the fall, it will come through the winter and provide early spring pasture, or it may be left to produce either greenfeed or hay, or be allowed to ripen for grain.

Winter rye being a hardy and vigorous growing biennial that starts growth early in the spring, constitutes one of the best smother crops available for the control of weeds. Annual weeds are all held in complete subjection and persistent perennials such as thistles and couch grass make a relatively weak growth in competition with this crop.

Since fall rye forms a protective covering for the ground at those seasons of the year when the soil is most subject to wind erosion and drifting, it can be used to advantage in a soil drifting control program. While it has not been considered a drouth resistant crop, it can be used to advantage in drouth areas because it makes most of its growth early in the season and before extremely high temperatures prevail.—Alberta Wheat Pool Budget.

Predicts Defeat For Japan

Schenectady, N.Y. Sept. 25 —Returning after 20 years' service in Japan, a Presbyterian missionary Thursday said Japan "may die of economic indigestion."

Theodore H. Walser, director of the "open door" student centre in Tokio, told Union college students that Japan's military clique "has bitten off more than it can chew and as a result Japan may die of economic indigestion."

Bombs Rained on Six Cities

Shanghai, Sept.— 25Fleets of Japanese warplanes scattered new devastation and terror Saturday in the most densely populated areas of central and south China.

Shanghai, Nanking, Canton and the Wuhan cities—Hankow, Wuchang and Hanyang—the centres which Japan's air raiders have attacked most severely, all were revisited. Hundreds of non-combatant Chinese died. The bombers left widespread destruction.

Chinese officials raised Friday's estimate of non-combatant deaths between 200 and 600, to almost 1000.

Canton suffered several air raids during the night and again in daylight Saturday.

The night raid on the Wuhan cities centred mostly in Hankow. Bombs wrecked the city's power supply, compelling overworked doctors to operate in candlelight on the wounded.

Nanking, Sept. 25—Japanese aeroplanes bombed China's capital for nearly seven hours Saturday, inflicting the heaviest destruction yet wrought in the series of air raids.

Though loss of life was extensive officials estimated casualties would be less than 200. No foreigners were reported killed.

Nanking's $1,000,000 electric power plant was bombed into a shell of ruins and the city's waterworks put out of commission by Japanese projectiles. Authorities believed property damage would run into millions.

Two government hospitals flying the Red Cross flag were struck by Japanese bombs but were not damaged seriously. Three blocks of the city's best shops in the heart of Nanking were wiped out.

Chinese officials declared light water and food facilities, upon which 1,000,000 persons depended were deliberately destroyed by the raiders despite Japanese assertions their attacks were aimed only at military objectives.

Eight aeroplanes made the raid, sweeping over the terror-stricken capital in continuous waves while Chinese anti-aircraft guns rattled. Three Japanese aeroplanes were downed.

Police, soldiers and other spectators watched the aerial battle from crowded streets, cheering as the Japanese aeroplanes fell to earth.

London, Sept. 25—Movement is under way for a trade boycott of Japan. The executive committee of the League of Nations union urges the government—should the committee of 23 find Japan responsible for the present conflict in China—to declare publicly:

That they are ready in particular to join in whatever measures may seem wise and effectual in putting a stop to aggression, provided other countries are ready to do the same in sufficient numbers to make such action effectual.

The committee added that in its opinion the best method would be for all countries concerned to refuse to accept any exports from Japan.

The News-Chronicle urges its readers, without waiting for official sanctions, to refuse to buy or sell Japanese goods.

$14 per Week Minimum Pay

Providing a basic minimum wage of $14 per week instead of $15 as first proposed and making certain exemptions an order bringing schedules under the male minimum wage act into operation on Oct. 1 has been passed by the provincial board of industrial relations, it was announced Saturday.

The basic rate is 33 1-3 cents per hour with a minimum regular weekly employment of 42 hours making the basic wages $14 for workers employed by the week. Under the preliminary plan, announced some days ago, the minimum weekly employment was to be based upon 44 hours which would have made the minimum $15 per week.

The exemptions under the order cover employes in saw mills box factories, woodwork plants, including the camps in rural districts or towns where the population is less than 5000 where a special schedule of rates may be set up for the industry.

Fur Robbers Are Now Held At Lethbridge

Victoria, Sept. 27—British Columbia police headquarters here announced today Henry Courvoisier and Bert Sheffield sought for more than a month in British Columbia's northland in connection with the theft of 29 bales of raw furs at Fort Nelson, B.C. last July, were being held at Lethbridge, Alta.

Officers here said they were informed from the prairie centre the men had been arrested by United States immigration authorities at Sweetgrass, Mont., as they attempted to cross the international boundary Saturday.

An escort has been sent from Victoria to return Courvoisier and Sheffield to British Columbia for trial.

Truck Driver Is Struck By Hit-Run Auto

A new car was badly smashed when it crashed into the rear of a truck and the driver of the truck was afterwards knocked down by a hit-and-run driver in an involved traffic accident which occurred at the intersection of 126 street and 102 avenue shortly before midnight Saturday in Edmonton.

Martin Graham, 9819 110 street, told police that he was driving west on 102 avenue. At 126 street he pulled over to pass a car that was also going west when he crashed into the rear of a truck proceeding in the same direction. Graham alleged that there was no tail light on the truck, which he said, was either parked or going very slowly. The front of Graham's car was smashed in, but the truck was only slightly damaged. Three other passengers in Graham's car were uninjured; he received facial bruises.

A. Meredith 10626 142 street, driver of the truck, got out of his cab and he and Graham held a council of war on the street.

Then, after some minutes talk, Meredith turned to go back to his truck. As he did so, he was knocked to the pavement by a car which was proceeding west at high speed. The driver of the car did not stop. Meredith was taken to the Misericordia hospital by another motorist. His injuries were not serious. Police are searching for the hit and run driver.

Value of Prairie Wheat Crop

Value of the 1937 prairie wheat crop to farmers was estimated tentatively last week at $171,282,000 by the Sanford Evans statistical service.

Although the yield of 164 million bushels is the lowest since 1914, the value is the highest since 1929 with the exception of the 212 million bushel crop in 1936 when the value was estimated by the dominion bureau of statistics at $186,170,256.

The Sanford Evans service estimated the 1937 Manitoba crop at $52,139,000 compared with $34,920,000 in 1936; 1937 Saskatchewan crop at $28,030,000 compared with $102,960,000 in 1936 and the 1937 Alberta crop at $91,062,000 compared with $58,290,000 in 1936. —Alberta Wheat Pool Bulletin.

Japanese Sub Attack Kills 300 Innocents

Hong Kong, Sept. 27—Ten survivors declared today 300 men, women and children were killed when a Japanese submarine sank a fleet of Chinese fishing junks off Cheelongkan Point on the South China coast.

Some of the junks were understood to be sailing under British registry and authorities of this British naval base started an immediate investigation.

The 10 survivors, themselves all wounded were brought here aboard the German liner Scharnhorst.

They asserted the Japanese submarine rose to the surface suddenly while they were fishing off Cheelongkau, September 22. The underwater craft opened fire and sank junk after junk.

While the wounded and dying, including 100 women and children, struggled in the water, the submarine steamed away. The survivors said no effort was made to pick up any of the victims.

Only one junk out of the fleet of 12 managed to hoist its sails and escape from the submarine.

Gardeners and Ladies Are Worst Offenders

Montreal, Que. September 27—By leaving their implements on trains, a few gardeners have solved the problem of what to do with old garden tools now that summer is over—at least that is the impression given to the Lost and Found department of the Canadian National Railways in Montreal.

T. P. Mooney, who has charge of the lost articles bureau at the depot, also reports that whereas it was commonplace to receive gentlemen's hats, the men are becoming more careful of their property. Ladies' hats, however, are becoming more numerous and Mr. Rooney suggests that the fair sex would do well to bring hat pins back into style, for at one time it was a rare occurrence to have a lady's hat turned in as lost property.

Bullet Saves Guide As Grizzly Bear Attacks Him

Jasper, Sept. 25— Guide Henry Phillips was being carried Saturday over tortuous mountain trails to Jasper hospital after an escape from a wounded [redacted] grizzly bear was so narrow that the animal, shot as he clawed at him, fell across the prostrate guide as it died.

Guide Phillips was clawed about the head and legs. The hunting party which he was guiding is expected to reach Jasper on Sunday.

The party of St. Louis sportsmen was following the bear, which had been wounded, when they came suddenly upon the animal. It launched an attack and Phillips was unable to leap away in time.

As the animal lashed out with vicious claws, a member of the party shot it, and both Phillips and the bear went down in a heap, the bear on top. Guide Herb Neighbor rode ahead into Jasper to say that the party was coming in with [redacted] and said it was either A. W. Buck or Fred Robinson who shot the bear. He said the presence of mind of the sportsmen undoubtedly saved Phillip's life. He could not say how serious the injuries were.

The incident occurred just outside the boundaries of Jasper Park.

FOR SALE— Shetland [redacted], age 4 years, complete harness and cart. Price $60. Apply Mrs. Maurice McGinitie.

So Alberta Folk May Know...

ALBERTANS have heard from time to time a statement made that there appeared in the Bankers' Magazine of the United States, an article, the language of which, will be recognized by all who have heard it. The article referred to never did appear. You can read all about it in a statement issued by the Edmonton Clearing House, which appeared in the Edmonton Bulletin, the Edmonton Journal and the Calgary Albertan last March, and in the Ottawa Citizen last June. No matter whether Alberta folk hear these accusations under the guise of direct quotation from the supposed Bankers' Magazine or used as the words of any other person, they will be aware after reading the following, that the statements are false in any event.

Here is the text of the Edmonton Clearing House statement:

Banker Magazine Report Denied by Clearing House

EDMONTON FINANCE MANAGERS ISSUE STATEMENT REFUTING ALLEGED STATEMENT CREDITED TO U.S. PUBLICATION AND USED BY PUBLIC SPEAKERS.

For the purpose of keeping the record clear, and straightening out a situation which has arisen through the dissemination, apparently through misinformation, of a statement alleged to have been made in the August 25, 1920, issue of the Bankers' Magazine of the United States, officers of The Edmonton Clearing House, composed of Edmonton bank managers, have issued the following official statement:

On occasion members of the legislature and others have made use of an excerpt claimed to be copied from an issue of a Bankers' Magazine. The excerpt is as follows:

> "Capital must protect itself in every possible manner through combination and legislation. Debt must be collected, bonds and mortgages [redacted] be foreclosed as rapidly as possible. When, through a process of law, the common people have lost [redacted] they will be more tractable, and more easily governed through the influence of the strong arm of the government, applied by a central power of wealth under the control of leading financiers. A people without [redacted] will not quarrel with their leaders.
>
> "History repeats itself in regular cycles. This truth is well known among our principal men now engaged in forming an imperialism of capital to govern the world. By thus dividing the voters we can get them to expend their energies in [redacted] over questions of no importance to [redacted] teachers (I would say traitors) of the [redacted]. Thus, by discreet action we can secure for ourselves what has been generally planned and [redacted] accomplished."

This quotation was referred to by a member of the legislature on the government side as recently as last Tuesday, again creating the wrongful impression that the banks are inimical to the common interests.

NOT CONTROVERSIAL

It is not in the spirit of controversy that the Edmonton Clearing House wishes to draw the attention of the members of the legislature and the public to this unfortunate inaccuracy, but it seems only fair that the public at large should be acquainted with the facts.

The individuals using the quotation create the impression that the offensive words appeared in some banking journal, presumably in Canada. No article using the words quoted ever appeared in any Canadian banking journal. We are also in a position to say that no such words used in the sense indicated by some speakers, ever appeared in the Bankers' Magazine of the United States.

CHARGE REFUTED

Communication with the publishers of the Bankers' Magazine of the United States elicits the fact that in the August, 1920, issue of the magazine, there was an article refuting the charge that any such viewpoint had ever been expressed by any of the United States banking or financial houses. Strangely enough, the quotation so wrongfully used was supposed to have appeared in the 1892 issue of the Bankers' Magazine of the United States, and it was this accusation that the August, 1920, issue was refuting.

We now quote from the article in the Bankers' Magazine of the United States:

> "Seeking to convey the impression that the bankers of the country are in a conspiracy to oppress the 'common people,' various agencies in some of the middle western states are circulating a series of pamphlets containing what purports to be a quotation from The Bankers' Magazine. That such a statement as is quoted never appeared in the magazine or anything even remotely resembling it is of no interest to the originators of the propaganda whose sole aim seems to be to create in the public mind a false impression."

UTTERLY INCONSISTENT

There then follows, in extenso, the remarks complained of and containing the quotation which has been so wrongfully and harmfully used. The magazine then goes on to say:

> "It seems hardly necessary to state that such words never appeared in The Bankers' Magazine. They are so utterly inconsistent with the high spirit of patriotism and of public service which the bankers of the United States have always shown, that they might safely be ignored as preposterous and absurd were it not for the inflammatory effect that such garbled and false ideas might have on unthinking minds.
>
> "The reader of such literature, especially if he be of that far too numerous class that prefers to receive its thinking ready made, will be only too inclined to jump to the conclusion that there is a conspiracy of bankers seeking to destroy the happiness and prosperity of the people. In this state of mind, he falls an easy victim to any soap-box orator who holds out an equally false promise of Utopia in the overthrow of the so-called capitalistic classes.

COMBAT WITH TRUTH

> "The way to combat falsehood is with [redacted] — not with indifference, not with hysterical exclamations that only engender a blind hatred that shuts out all reason. If malicious and misleading ideas are being circulated about bankers, it is clearly the duty of bankers to be equally diligent in the dissemination of truth. The public must be taught a proper conception of what the functions of banking really are and the important part that it plays in the prosperity of the community. The shroud of mystery which has surrounded the business of banking credit must be removed. Bankers have nothing to fear from the truth.
>
> "Much can be done through advertising. Already a marked change is noticeable in the character of banking publicity. More and more bank advertisements are being humanized and are making a real attempt to explain to the public something about the various services that a bank performs. But there is still room for improvement. There is still need for human interest publicity that will appeal to the man in the street and which will successfully compete with the propaganda of the radical. Until bankers are fully awakened to the necessity for such measures, they cannot justly complain if at least a portion of the public regards them in a light that is utterly false."

HONORABLE POSITION

We have nothing to add to the remarks in this article in the Bankers' Magazine of the United States. We can only say it is the endeavour of Canadian banking institutions to maintain their honorable position, and to continue to give service to the public in the broadest sense of the word.

Our hope is that now the facts have been disclosed, responsible and honorable individuals will cease to quote that which is known to be false.

PRESS LICENSING—

ALTHOUGH MAJOR DOUGLAS cabled the Alberta government "Pass Press Act," and although we are quite certain he and his immediate associates are anxious that no well founded criticism of conditions where his theories were being tried should be allowed; yet we are of the opinion that no Alberta government could at one jump go to the lengths of press control practised in some other countries. The danger of the proposed press licensing bill lies, not so much in what the government [redacted] decided to do right now, [redacted] they might decide to do in the future. Restrictive legislation has a habit of accumulating and becoming more restrictive and while members of the government might be quite sincere when they say nothing more than perfunctory control is desired, six months or a year from now the situation might be different. As a means to serve an end we doubt whether press licensing in Alberta could prove feasible. In other countries where it is is practised the situation is different. Readers on one side of a boundary line read one language and readers on the other side read another. Here, even if criticism of Alberta political affairs were shut out of Alberta papers, there is nothing to stop newspaper plants being shipped either to British Columbia or to Saskatchewan and operating from there. The larger dailies and weeklies would, of course, be considerably embarassed, but as far as cutting off well distributed printed matter in Alberta, favorable or unfavorable to the government, it simply can't be done.

A DEADLOCK—

AT THE present moment the Alberta government challenges the right of the Dominion government to disallow provincial legislation. The Dominion government claim they have this right under the British North America Act, the provincial government say they have not. Naturally, when an important difference of opinion exists between individuals or groups of individuals, the only thing to do is to take the question before the supreme court of Canada; if the decision there is not satisfactory, then it can go before the Privy Council. This is perhaps what will be done, if the provincial body stands by its contention, even though the Alberta government has once refused to test legislation there. There are only three alternatives, capitulation on the part of the dominion government; capitulation on the part of the provincial government; or open revolt. The court way seems to be the best bet.

TOO MANY COOKS—

WHEN ONE observes the galaxy of names that are prominent in the political field of this province and which in a never ending procession pass before one on the pages of the daily press, the proverb about "too many cooks" just naturally come to mind. After all, while the geographical area of the province is large and it is important enough in an economic sense, its population is only about 750,000 and a population of this size simply does not require all the political activity displayed. We have Communist, C.C.F., Conservative, Liberal, Social Credit and U.F.A. parties, and a fusion of some of them called the People's League. This would appear to be more than enough. Among the people most prominent in these different parties, there are some of course who are imbued with a purely altruistic motive; they feel they have a mission to perform and choose the best avenue in which to perform it. But to the majority, we believe, political activity presents an opportunity for emoluments of one kind or another. Thus with the large number of embyronic political aspirants in the province today the situation has developed into something resembling a peanut scramble. We are not by any means in favor of a commission form of government as a permanent institution, but we are inclined to the belief that the time has arrived when the best interests of this province would be served by placing its affairs for five years in the hands of a limited group of individuals with proven ability in the art of statesmanship. It might not be the most pleasant experience, but we believe in the long run it would be the most profitable.

[redacted]—

ON SEVERAL occasions Mr. Herridge has delivered speeches of far reaching importance, speeches that have been reprinted in newspapers from coast to coast. Apart from the text matter of the actual speeches, an element of importance is attached to them, due to the fact that Mr. Herridge is, or was of the conservative school of thought. He is a brother-in-law of Hon. R. B. Bennett and willingly or unwillingly to some extent, bask in the spot light of that famous personage. Mr. Herridge's theme is not new but it is certainly sound. As early as the first year of the depression, the Christian Science Monitor sounded the call to capitalism to take leadership in the economic debacle that was then occurring. In a few cases it did, in most cases it sat still and demanded its pound of flesh, at the best leaving to political governments the task the depression threw upon it. Like all speakers and writers of reform relating to public affairs, Mr. Herridge was compelled to speak in general terms, but there was no mistaking his meaning. He stood for a more tolerant attitude towards labor and agriculture by capitalism. The truth is that leadership should come from the capitalistic classes. Unless they are prepared to assume the responsibility of leadership towards reform and make sacrifices incidental to such leadership, disaster lies ahead. Most men have enough common sense to know that equality of possessions is impossible, but they also have a sense of justice that tells them that a certain level of equality is preferable to peaks and valleys. When this sense of justice is outraged, the poor, being by far the most numerous, rise and engulf the well-to-do, thereby accomplishing precisely nothing. It would be much better for those in high places to come part way down, to use their talents, technique and possessions so that the common lot of all may be improved.

WORLD OF WHEAT

By R. C. L. Strange
Director "Crop Testing Plan."

"If I feed some of your Registered seed grain to my hogs, Mr. Strange, will it improve the pigs and can I get them Registered?"

A good lady, new to farming, in all good faith, recently asked this question.

"No [redacted]" I replied, "Registered seed cannot perform that miracle. It cannot improve hogs. It can, however, greatly improve your crops both in quality and in yield, and so can help you to make more money."

"But why is Registered seed any better than any other kind of seed? What does 'Registered' mean anyway?" she asked.

Many others have asked this question. Here is a short answer.

Registered seed comes from a crop that has been examined in the field by a competent cerealist, and found to be true-to-variety to a high standard of excellence, i.e. to contain not more than one off-type plant in ten thousand. The individual crop then is given a pedigree by the Canadian Seed Growers' Association.

The cleaned seed is afterwards examined in the sack by the Dominion Seed Branch. If found to be high in germination, and almost free from the seeds of other kinds of grain and of weeds, the sack is sealed and tagged, so the contents guaranteed to be Registered seed.

Following factors have tended to raise price:—Japan negotiating for Danubian wheat—Official Hungarian corn estimate reduced— Floating wheat stocks small— European hog numbers decline—Smaller hop crop expected in Europe— Export small Yugo Slavian prune crop—Lack of moisture tends to decrease U.S. winter seedings.

Following factors have tended to lower price:—Production of all major Manchurian crops above last year— Rains make Indian wheat seeding prospects satisfactory— Rains beneficial for winter sowings in Czecho Slovakia— Greece using potato flour to restrict wheat imports—Export record potato crop in Germany— Light rains improve Southern Hemisphere crops.

Successful Potato Storage

With the approach of another storage season, producers should now plan for the successful storing of the crop. Success in the storage of any plant product, more particularly the potato, is dependent upon the care exercised in growing, harvesting and storing the crop. Accordingly, it will be clear that the keeping quality of potatoes is governed to a considerable extent by pre-storage practices.

Investigations conducted by the Division of Botany have revealed that the wastage of stored potatoes can usually be traced to bad practices during digging and storing operations. Potatoes intended for storage should be dug only when they are fully mature. To reduce mechanical injuries, the digger should be run at a moderate speed, with the point deep enough so that a sufficient layer of soil moves over the elevator to act as a cushion. With certain types of diggers the shaker bars should be wrapped with pieces of rubber hose. Freshly dug tubers should be left for an hour or more on the surface of the ground to promote the drying and loosening of adhering soil. Pickers should be instructed to leave tubers showing any decay in the field and warned against pitching potatoes into baskets or emptying baskets into barrels from any considerable height. Every care should be used to avoid bruising in loading the product in the field and in unloading at the warehouse or cellar. The utmost care should be taken in the storage building to avoid rough handling of crates, barrels or bags and under no conditions should walking on piled tubers be allowed. If time allows and if the machinery is available, it is a good practice to run the potatoes over the grader and to remove any blemished tubers prior to filling the bins.

Before use the warehouse or storage cellar should be thoroughly cleaned and sprayed with a solution of 4 pounds of copper sulphate in 40 gallons of water. During the first few weeks of storage the storage-house should be well ventilated in order to carry off the moisture from the sweating tubers. A temperature between 36 and 40 degrees Fahrenheit should be maintained during the storage season.

The application of the principles contained in this article will do much to reduce storage losses and ensure a good product.

For further information write to your nearest Plant Pathological Laboratory.

Four New Bills Get First Reading

Four bills were introduced in the legislature Friday and given first readings as the house cleared the decks for the legislative program. In addition, notice was given of two other bills expected to be brought in early in the week. One of these is a bill to provide for increased taxation of banks, while the other is to re-enact or implement the three banking and court bills recently disallowed by the dominion government.

Sponsored by Hon. E. C. Manning, minister of trade and industry, one of the bills given first reading is designed to broaden the Male Minimum Wage act, in order to have it confirm with schedules announced recently.

Under the schedules, there is a basic minimum rate of 33 1-3 cents per hour with a minimum weekly rate of $15.

The bills introduced in the house and given first reading were: An act to amend the Debt Adjustment act; an act to amend the Coal Mines Regulation act; an act to amend the Male Minimum Wage act; an act to consolidate the Licensing of Trades and Businesses act.

The bill to amend the Debt Adjustment act, introduced by Hon. Lucien Maynard, minister of municipal affairs, is designed to cover a point raised by the moratorium on private debts, which was brought into effect August 24.

The point involves crop shares. Through the amending bill the debt adjustment board may order a debtor to retain for his own use as much share of the crop as the board considers sufficient to provide the debtor with the necessities of life, feed and seed grain.

Under the bill to amend the Coal Mines Regulation act, sponsored by Hon. N. E. Tanner, minister of lands and mines, "any person employed in or about a mine may by order in writing signed by him, request the owner, agent or manager of the mine to apply the whole or any part of any money due the person so employed, to the payment of any amount payable by him, to any other person for hospital dues, sick and accident fund dues or union dues.

A Sound Practice

It is a sound practice to deliver your grain regularly to your U.G.G. Elevator. Through many years' experience farmers have learned that they can count on this farmers' company for satisfactory service in handling their grain.

Plane Passenger Spots Nudist On H.B. Reserve

It's getting so you can't take a chance on anything any more. Witness the red face of an Edmonton citizen on Sunday.

The gentleman in question, whose name is withheld by the police because he is a "decent citizen" is suffering from ill-health and has been advised by his doctor to take sunbaths.

Sunday afternoon, in order to follow out his doctor's orders, he hied him away into the bush on the Hudson's Bay reserve near Portage avenue, found a secluded spot surrounded by bushes where the sun shone brightly. Taking off his clothes he stretched out on the grass and luxuriated in the warming rays of the autumn sun. Lazily and wholly unconscious of impending disaster he watched airplanes from the local airport soaring through the sky above.

But one of the airplane passengers looking earthward, was amazed to see the nudist sun bather, and as soon as the plane landed the passenger dashed for a telephone and informed the city police that there was "a naked man in the bush near the airport."

Constable J. B. Arial and Charlie Bumstead responded. By this time the citizen had had enough sun, had dressed and was about to depart. He explained everything to the satisfaction of the police officers, who explained to the passenger, who said he was [redacted]

Now all are laughing about it.

Wants Produce Stamped

A government system of distinctly marking all Canadian agricultural product for export as "produced" or "made in Canada" will be proposed in a report by A. M. Shaw, chief of the dominion marketing service, which is expected to be released in a short time.

British consumers frequently have no knowledge that they are buying Canadian goods. Bacons and hams are a special instance. The markings at present are such that Canadian bacon and ham can be sold as pretty nearly coming from anywhere. The same applies to numerous other Canadian products. Marking all such products with a distinct Canadian government stamp, as graded and inspected, will be recommended.

The marketing committee found that with proper grading, inspection and marketing, the sale of Canadian food products in the British Isles can be greatly enlarged.

Grand Prairie Man Victimized by Slick "Pals"

If George Salmark, late of Grande Prairie, hadn't confided his personal affairs to two slick strangers who "palled" up with him just before he left Grande Prairie for Edmonton, he'd have $30 more than he has and city detectives wouldn't be looking for the two men who had "flim flam[redacted]" him.

Salmark, leaving Grande Prairie on September 24, put $30 in an envelope, which he addressed to himself at General Delivery, Edmonton and registered it. Later meeting his two new pals he told them about it. They left on the next passenger train. Salmark came along two days later by freight.

Arriving in the city he went to the post office to get his letter, only to learn that it had been called for two days previously and signed for by a man who said he was George Salmark. Salmark told police and they are looking for the two men.

Grain Company Agent Charged With Forgery

Charged with forging and uttering nine grain cheques of a total value of $140, William R. Kerr, Dodds, agent for the Northern Grain Co., went on trial Tuesday morning before Mr. Justice Tweedie and a jury in supreme court.

It is alleged by the Crown that Kerr forged and uttered nine grain cheques in the name of J. Ross, a farmer in the district, but produced evidence to show that Mr. Ross never saw or cashed the grain cheques. R. Cogswell, K.C., is acting for the Crown with L. Stuart Fraser for the accused.

Bishop Avers Canada West Be No Desert

Windsor, Ont. Sept. 26 —The immediate outlook in some sections of the Canadian west is depressing, but the prairies are not becoming a desert, Rt. Rev. W. T. Hallam, Bishop of Saskatoon said in Edmonton.

There is evidence the Saskatchewan prairies have been subjected to cycles of drought from the earliest times, always followed by periods of prosperity, he said.

Bishop Hallam appealed to Windsor churches to render all possible aid to the drought stricken regions.

World's Biggest Shipbuilding Centre Is Clyde, In Scotland

Among the world's shipbuilding rivers, the Clyde in Scotland, is still by far the greatest. Its yards at the present time are constructing about one-sixth of the world's new ships. During the past six months the Clyde has turned out 47 ships of [illegible] tons, the highest half-yearly output since 1930, according to the Industrial Department of the Canadian National Railways. Lack of adequate supplies of steel and other materials is hampering the industry at the present time. In Great Britain the extraordinary demand for steel products continues undiminished in spite of the fact that production is maintained at the rate of over 1,000,000 tons of steel ingots a month.

Europe Watching As Dictators Meet

M[illegible], Germany, Sept. 25—Dictators of [illegible] Germany and Italy [illegible] on a reviewing stand Saturday afternoon to watch [illegible] of Germany's new army [illegible]. [illegible] Hitler's [illegible] display [illegible] the result of [illegible] Mussolini's 10000 [illegible] goose-stepping by in full field equipment.

Hitler watched the demonstration with a smile on his face talking at the same time with the stern-faced Hitler. They seemed to be discussing the various units participating in the review.

Mussolini and Hitler met Saturday for the second time in their spectacular careers and Europe tensely [illegible] the result of their rendez-

Women Excel In Bank Memory

Buffalo, N.Y. Sept. 30—Take the word of Howard E. Avery for it, women are long-memoried about their bank accounts. Mr. Avery speaks with the weight of 14 years experience in the unclaimed deposits department of a bank behind his statement.

"I don't know whether it's because they generally handle less money then men," he said, "or whether they have better memories. But women depositors seldom forget their deposits."

If women don't however, men do; and they dislike to be reminded of the fact, even if the money is tantamount to a gift.

"The average man is so cocksure he knows all his resources," Mr. Avery said, "that he's inclined to resent being told he has unsuspected funds. I usually have to argue.

He argued once with a memory school about a deposit that had languished several years in the bank, he said, and won the argument. Absent-minded relatives and godparents frequently oblige Mr. Avery to convince people to take money utterly unknown to them. They open accounts to put baby through college, he said, and pass on without ever telling the baby's parents about their philanthropy.

Enraged creditors supply another source of work to the unclaimed deposits detectives. When they hear that a debtor firm has failed, a good many times the creditors fling that company's checks into the wastebasket. As often as not, there's money to back up the draughts Mr. Avery has found.

His chief trouble comes from depositors who make out checks, deduct from their balances and never find out whether or not the check is cashed. If it isn't, the chances are excellent that the amount will become an unclaimed account, he said.
